PREFACE TO THE SECOND EDITION

In the past thirty-five years the *Encyclopaedia Judaica* has come to occupy a rarefied space in the world of Jewish learning. Authoritative, comprehensive, serious yet accessible, it graced the library shelves of scholars and rabbis, of the learned and the studious, and even of the would-be studious, consulted by the curious and the inquisitive, an important starting point for a journey of learning.

It also was that rare work in Jewish life and learning that covered controversy and yet was not controversial. It could not be identified with one school of thought, with one religious, political, or social perspective. Written by Zionists who believed ardently in Jewish peoplehood and the centrality of the land of Israel and the nascent State of Israel for the Jewish future, it also respected the many forms that Jewish life had taken. It performed its task admirably, sharing with the reader what was known and knowable in 1972, the year when it was first published. For a time through Year Books and Decennial volumes, it sought to update its readers on more recent learning, trends, and issues, and for the first time in 1997 it migrated to an electronic version with a wonderful search engine that freed the reader from taking volumes off the shelf and moving from the index to yet another volume.

So we understood as we embarked upon the task of updating the masterful work that much could be lost. We were also confident of what could be gained.

Why a new edition?

The answer is quite simple. Knowledge is dynamic, not static. Much has changed in the last thirty-five years.

Israel of 2006 is quite different from Israel of 1972, when Golda Meir was prime minister. Israel has faced two wars – the war of 1973 (Yom Kippur War) and the war in Lebanon – two Intifadas, the Camp David Accords, the withdrawal from Sinai, the Oslo Accords, the Disengagement, the rise of militant radical Islam, and so much more. Israel has become the home of almost half the world's Jewish population, absorbing Jews from the former Soviet Union, from Ethiopia, Argentina, France, and elsewhere. Soon a majority of the world's Jews will live in Israel, which has become a regional military superpower and a developed country in an increasingly globalized world. Israeli culture has been transformed and its insti-

tutions have evolved. Quite simply, the Israel described in 1972 is unrecognizable today.

The Soviet Union is no longer. Lithuania, Latvia, and Estonia have become independent countries; so too have the Ukraine and many of the former Soviet Republics. Jewish life has been transformed by these changes. The Iron Curtain has fallen and thus the Jews of Poland and Hungary, of the Czech Republic and Slovakia live under different conditions; and their world – the possibilities of their world – has changed. East and West Germany have been reunited and the German Jewish community – which once lived with a fascinating past that had been eclipsed by its catastrophic recent history but had no discernible future – is now growing rapidly as it has become home to many Jewish immigrants from the former Soviet Union.

In the United States, Las Vegas and Phoenix are growing most rapidly as Jewish communities as tens of thousands of Jews have moved to these Sun Belt cities and built not only new homes but also new institutions and new environments. Southern Florida has become the third most populated area of Jewish settlement. In the rural South, where Jews had lived for a century or more, synagogues have become museums, thus marking the end of many small communities, while the Jewish population of Atlanta and Jewish life in Atlanta, Dallas, and Houston have expanded dramatically. Once Jewish Day Schools were the province of Orthodox Jews living in major cities. They can now be found wherever there is a significant Jewish population and they serve the entire spectrum of those interested in Jewish learning. In light of such developments, each entry on the fifty states had to be updated; so too the entries on each of the cities in which almost all of American Jews reside.

Religiously, American Jewry has evolved dramatically. Orthodoxy is no longer in danger of extinction but confident and self-sustaining. It is no longer characterized by loss but by gains, and modern Orthodoxy, which once appeared dominant, has been sliding to the right. Chabad has developed as a global presence to be encountered wherever Jews live, wherever Jews travel. It has endured the passing of the Rebbe, centralized charismatic leadership has been replaced by management and by the charisma and dedication of many individual leaders. It has endured a messianic crisis. Liberal forms of Judaism have become more diverse, more creative and more diffuse. New institutions for the training of rabbis have evolved and the neat tripartite division of Jews – Orthodox, Conservative and Reform – has become far more fascinating as multiple forms of Jewish identity and Jewish engagement have become available. Reconstructionist Judaism has created its own institutions; even the anti-institutional world of Renewal Judaism is creating institutions of its own with its own journals, its own publishing house and its own rabbinical and cantorial schools. Non-denominational rabbinical seminaries are flourishing. Rural Jews gather for conferences; Jewish life is alive and flourishing in cyberspace as well as real space, even as a more individualized and less institutionalized Jewish identity takes root.

American Jews live in a world with few barriers, with no glass ceilings. Their Jewishness is not regarded as a handicap but a privilege; highly individualized for many,

celebrated or even ignored, it takes a variety of forms and expresses itself in many creative endeavors. The editors of this new edition of the *Encyclopaedia Judaica* are acutely conscious of these changes, both in the choice of individual entries and in the description of various Jewish communities. But along with this extraordinarily positive picture, American Jewry is in the decline numerically; simply put, American Jews are not reproducing, and the rate of intermarriage exceeds even the most alarming predictions of a generation ago. Survivalists are deeply concerned about survival, about the viability of the American Jewish community, in part because of the freedom it enjoys. And with freedom comes the easy freedom not to identify as a Jew, for one is not forced to identify as a Jew. One can embrace any number of other identities, professional and personal, without betrayal.

Yet there is a cross fertilization between Israel and the United States. American Jewish scholars spend sabbatical years in Israel, many have studied in Israel as part of their undergraduate and graduate training, and Israeli scholars spend significant time in the Diaspora. They read each other's work; they publish in each other's journals. Scholarly works initiated in Israel are published in English and American scholarship is read in Israel and often translated into Hebrew.

Thirty-five years ago the women's movement was just beginning and all rabbis were men. Feminist Studies as a discipline was but in its infancy and women were not considered by many an integral part of the Jewish community or the Jewish experience. Much has changed, and this new edition represents a deliberate attempt to include women and the experience of women within its pages; the inclusion was not for inclusion's sake but because we cannot understand Jews or the Jewish experience without understanding the role of Jewish women. Permit a simple example. An earlier entry on "Mikveh" considered Jewish religious teaching on the mikveh and its halakhic requirements. A woman's perspective was not included, which we now understand was a serious omission, one not repeated in this volume.

A new generation has arisen and, with each new generation, new scholarly questions are asked, new methodologies are employed. Thus, even though the giants of the last generation played an important role in editing the *Encyclopaedia Judaica*, extraordinary scholars such as Professors Gershom Scholem, Salo Baron, Menachem Stern, H.L. Ginzburg, and Cecil Roth among others, the fields they developed and in some cases pioneered have moved beyond them; their findings have been built upon, their methodologies refined, enhanced, expanded, and disputed, and the result transforms our understanding even of the fields they illuminated so masterfully a generation ago. We have endeavored to preserve much of their original writing, to add what must be added, to refine where refinement was in order and to change what must be changed with the passage of time. Thus, even while the masterful work of Gershom Scholem has been preserved in its entirety, the intellectual discussion he initiated has gone well beyond his work and his students and their students have begun to ask different questions and reach different conclusions, as is reflected in the second edition addendum to his classic Kabbalah entry. The presentation of the historicity of the Talmud (see below) takes cognizance of the important work of

Jacob Neusner and David Weiss Halivni and others as well as Saul Lieberman and Efraim Urbach.

The generation that created the first edition of the *Encyclopaedia Judaica* was primarily trained in Germany in the great institutions and the extraordinary culture of the Weimar Republic or at the Hebrew University of Jerusalem, perhaps the greatest German university outside of Germany. Alas, that generation has passed. Many of the scholars who wrote for this edition were trained in the United States and, even if trained in Israel, were influenced by the dominance of American culture and American scholarship. Native-born Israel-trained scholars have written with brilliant competence. Historians dominated the first edition; in this new work, the approach of scholars even in the field of Judaic Studies is far more multi-disciplinary.

Entries written for the first edition had to be written differently for the second edition for their fields had evolved in the ensuing decades. Special treatment is accorded to the subject of Jewish Law (*Mishpat Ivri*) under the direction of Justice Menachem Elon, where it is now possible to examine the principles of Jewish religious law (*halahkah*) as they are reflected in the courts of a sovereign Jewish state. Elon, who had pioneered this field, has expanded his treatment of Jewish law as it has grown in the recent past, confronted new questions and grappled with issues unknown thirty-five years ago.

Certain dramatic changes have occurred within the most classical of fields of studies. As our Bible editor notes:

“Modern critical Bible study as it arose in the 19th century was often couched in terminology affirming that the Old Testament was inferior to the New Testament and that Judaism had been superseded by Christianity. Some notable Christian biblicists were also antisemites. As a result *Wissenschaft des Judentums*, ‘the scientific study of Judaism,’ neglected the critical study of the Bible. At Reform Judaism’s Hebrew Union College and Conservative Judaism’s Jewish Theological Seminary it took years before critical study of the Bible was fully embraced. Similarly, the Hebrew University of Jerusalem opened with a chair in biblical exegesis rather than Bible proper. To some extent the first edition of the *Encyclopaedia Judaica* retained this gingerly approach to Bible so that in contrast to most subject areas, apologetic writing was not always discouraged. By the 1990s the American and Israeli Jewish communities had reached a level of self-confidence and maturity that permitted even Orthodox scholars to participate fully in the critical study of the Hebrew Bible. In addition, the 20th century witnessed renewed interest in the great Bible commentators of medieval times. Largely neglected in early modern critical Bible scholarship, these commentaries, which anticipated modern ‘discoveries’ are regularly studied by contemporary Biblicists, Jewish and Christian.” Critical literary studies of the Bible not only dissect the Bible by pointing to the sources of its composition, but consider it as an integrated whole which must be read as one work.

The editors of our Talmud division note that the past thirty years have seen a number of developments in talmudic studies, which required the significant revision of many of the first edition entries dealing with talmudic and midrashic litera-

ture. First of all, since the 1970s, we have been witness to a dramatic increase in the study of talmudic literature, not just within the rapidly expanding world of academic Judaic studies, but even more so among the public at large. Many new editions and translations in nearly all branches of talmudic and midrashic literature have been published, often accompanied by reliable and user-friendly commentaries. These in turn have opened up the study of the Mishnah, the Talmud, and other related texts to a wide audience of interested non-professional students. Many of the core entries in the previous edition of the *Encyclopaedia* were written with a pronounced bias toward the agenda of professional scholarship, and it has been one of our concerns both to widen this agenda and to provide the necessary foundation in order to make entries accessible to the public at large (see, for example, Mishnah and Talmud, Babylonian). At the same time two developments in academic scholarship have also had an impact on editorial policy. First of all, the application of modern critical historical methodology to the field of Aggadah and rabbinic biography has brought about no less than a revolution in the attitude toward talmudic and midrashic traditions concerning the lives and deeds of the rabbis (see Aggadah). This profound development has led to the revision of well over a hundred entries describing the lives of greater and lesser rabbinic figures (e.g. Eliezer ben Hyrcanus, Beruryah, Imma Shalom, Johanan ben Zakkai, Meir, Elisha ben Avuyah, Johanan ben Nappaḥa, etc.), while numerous traditional biographies of lesser rabbinic figures who have yet to be critically reexamined have been reproduced intact. Secondly, the increasing sophistication of critical and historical tools for the analysis of talmudic literature as a whole has brought about an equally profound revolution in our understanding of the internal historical development of this literature, and specifically of the relationships between parallel traditions found in the different finished talmudic works (see, for example, Tosefta; Talmud, Babylonian – The Bavli and the Extant Tannaitic Works, The Bavli and the Yerushalmi). The description and dating of the various talmudic compositions – Mishnah, Tosefta, the halakhic and aggadic Midrashim, the Babylonian and Jerusalem Talmudim – included in the earlier edition of the *Encyclopaedia* could not, of course, have taken these new developments into account. As a result, all of the entries dealing with this literature were reviewed, and in many cases (e.g. the Midrashei Halakhah) thoroughly revised.

Judaic Studies in the United States was limited thirty-five years ago. The Association of Jewish Studies had just been founded; its members knew each other. Positions were few. Membership has since then increased a hundredfold, and interest in Jewish Studies is wide throughout the Diaspora, as it has come to be seen as an essential component of Western civilization, though not just of Western civilization. American-trained Judaic Studies academics are on the faculty of every Israeli university, often holding distinguished chairs, so the cross fertilization of Israeli and American scholarship is a daily fact of life in both countries.

My own field of Holocaust Studies was but in its infancy thirty-five years ago. The scholars were mostly survivors or refugees writing of their experience. Many archives were closed, records were unavailable, many survivor memoirs had not yet

been written and one could convene a meeting of the significant figures in the field in a conference room large enough for a dozen people. Holocaust Studies as a field could be confined to several paragraphs, a few major works, and an occasional conference. There was no major museum and no Holocaust educational resource centers, no sense of a “Holocaust industry.” With the passage of time came the insights of time. There was a more personal intensity to the scholarly battles of the first generation, as many had lived through the events. The works of Bruno Bettelheim, who wrote of the infantilization of the victim; of Hannah Arendt, who condemned Jewish leadership in the Holocaust; and of Raul Hilberg, whose magisterial work minimized the role of Jewish resistance, severely stung. In response, other Jewish scholars fought back angrily, defensively, as if the pride of the living seemingly could be enhanced by a positive depiction of the conduct of the dead. In the past thirty-five years, records were declassified, documents from the former Soviet Union and elsewhere became available as so many archives were opened. Documents and copies of originals could be read in Washington, New York, and Jerusalem and not just Warsaw, Budapest, or Berlin. We have broadened our perspective and sought to come to terms with the dynamics of a growing field of study. And the contributions to this new edition reflect how much more is now known about an event that was in the immediate past thirty-five years ago.

From time to time, as we worked with the vastness of this material, colleagues and friends – especially our children – would ask what place an encyclopedia holds in the world of the web, where access to information is instantaneous and the web so vast. We have endeavored to preserve the sense of authority of the original edition – its reliability. We were mindful of the fact that this work would be consulted for years and years; thus, it is intended to be more than a snapshot of what is known at this time; its insights are meant to withstand the passage of time. Still, in a generation or two, when scholars and students want to know what was known in the first decade of the 21st century, who were the Jews, what they thought, how they lived, they will be able do no better than to consult this work and to understand its ramifications.

The *Encyclopaedia Judaica* grapples with Jews and Judaism, how Jews live, how they perceive themselves, how they encounter the world and shape the world they encounter. From medicine to mysticism, from resurgent Ḥasidism to renewal Judaism, from economics to science, from politics to art, music, theater, and cinema, even cartoons and comedy, sports and entertainment, we have endeavored to be comprehensive and creative.

Keter Publishing House and Macmillan Library Reference (an imprint of Thomson Gale), the publisher and distributor, respectively, of the first edition of the *Encyclopaedia Judaica*, initiated this project. Under the watchful eye of Peter Tomkins, Keter turned to the Jerusalem Publishing House, which has long been known for initiating encyclopedias in many languages all over the world, to organize the project. Frank Menchaca initiated this project for Macmillan, Hélène Potter was assigned to bring it to life. When Menchaca went on to even higher levels of management,

Hélène Potter capably filled the vacuum. Jay Flynn has been entrusted with the all important task of bringing this work to completion.

The scope of a second edition of the *Encyclopaedia* was far too large to be covered by minor revisions and cosmetic updates – too much had changed, too much more had become known. In sum, as the project evolved, half of the original entries had to be changed; more than 2,650 were added.

Over time, it also became clear that an American editor would have to be added to the core staff, to work with Jerusalem-based editor-in-chief Fred Skolnik. Shlomo (Yosh) Gafni, president of the Jerusalem Publishing House (JPH), and his managing editor Rachel Gilon, were a source of guidance and wisdom, with the assistance of Leonardo Szichman, who executed the huge data control. JPH undertook the difficult task of coordinating this project with enormous energy, skill, and dedication. Fred Skolnik was indefatigable and so wonderfully skilled. Associated with the *Judaica* for 35 years, he was both its champion and the driving force in its enlargement and transformation.

The writers of the *Encyclopaedia* are many. They write with passion and confidence of the fields they know, of the persons, the ideas and the issues they describe. Many could write – and have written – volumes on their subjects. Here they were asked to be concise and precise, to write in a manner that reflected what is known, to avoid polemics, to be scrupulously fair. We have endeavored not only to furnish important details but also to present them in an interesting manner, knowing that, unlike the stuff of journalism, which will not be read tomorrow, this work will be read by many on many tomorrows. It has to endure the test of time.

This edition is a unique partnership. Initiated by Israelis, it brought together Israelis and Americans and scholars from many different countries and many spheres of learning. It took cognizance of the centrality of Israel in the contemporary Jewish world but also of the enduring life, creative vitality, and intensity of the Jewish experience in the Diaspora. It was mindful of the many forms that Jewish life has taken and the diverse ways in which Jews have contributed to their people and the world.

It has been built on a strong foundation; time and again the editors have come to appreciate how comprehensive and authoritative was the work of their predecessors. We have endeavored to take the work of our predecessors forward in the ongoing quest for knowledge and understanding of the Jewish experience.

GENERAL INTRODUCTION

The *Encyclopaedia Judaica*, first published in 1972, has a long history, antedated by a number of predecessors. The English-language *Jewish Encyclopedia*, the first complete work of this nature, appeared in New York at the beginning of the 20th century (its twelfth and final volume was published in 1906). This pioneering work summed up the state of Jewish scholarship and the condition of the Jewish world at the time. It was an extraordinary achievement – especially if one considers the relatively small numbers of the English-speaking and English-reading Jewish population at the time. It was able, however, to call upon the collaboration of Jewish scholars in many countries – in particular the representatives of the *Wissenschaft des Judentums*, the School of Scientific Jewish Scholarship, then at its height. There were aspects that it tended to overlook or underplay, such as the world of East European Jewry, Kabbalah and Ḥasidism, Yiddish language and literature, and the life and culture of the Jews in Muslim lands, but seen as a whole, it was a monumental work incorporating many entries which became classic statements on their subject. The 16-volume Russian Jewish encyclopedia *Yevreyskaya Entsiklopediya*, which also appeared before World War I, was well conceived and in some respects brilliantly edited. Particularly outstanding was its expertise on East European Jewish subjects. The 10-volume Hebrew *Oẓar Yisrael* (1924), an almost single-handed achievement by J.D. Eisenstein, was on a far smaller scale and had less rigorous standards, although in certain areas its articles presented useful material.

At the time of the revival of Jewish interest and learning in Germany after World War I, Jacob Klatzkin, Ismar Elbogen, and Nahum Goldmann planned a new encyclopedia in the German language. This was intended to incorporate the results of the intervening years of intensive scholarship and research, to reflect the intellectual attitudes which had become established during this period, and to correct certain imbalances found within the *Jewish Encyclopedia*. Klatzkin and Goldmann gathered a galaxy of scholars to produce a new work. This work – called *Encyclopaedia Judaica* – progressed notwithstanding the obstacles and difficulties of those troubled times, until the Nazis rose to power in Germany. Publication had to be suspended after Volume 10 (completing the letter L), leaving incomplete this last monument of the

intellectual greatness of German Jewry. Under the same auspices, a Hebrew version – the *Eschkol* encyclopedia – appeared, but only two volumes were issued. Mention should also be made of the five-volume *Juedisches Lexikon*, edited by Georg Herlitz and Bruno Kirschner, published by the Juedischer Verlag in 1927–30. Although more modest in scope than the other works mentioned, it made a useful contribution to Jewish studies and also paid more attention than its predecessors to illustrative material.

In the five first years of World War II the *Universal Jewish Encyclopedia*, edited by Isaac Landman, was issued in the United States in 10 volumes. It was able to reflect the growing importance of U.S. Jewry and to take into account late developments, especially in American Jewish history and biography. It had considerable merits, but was not an ambitious work. Moreover the fact that it was published in a period of major transition in itself set a limit to its utility. It was, however, the *Universal Jewish Encyclopedia* which constituted the basis of the 10-volume Spanish-language *Enciclopedia Judaica Castellana* produced in Mexico between 1948 and 1951. The major contribution of this latter work lay in its original entries dealing with the development of Jewish life in Latin America.

After the establishment of the State of Israel, the Hebrew language *Encyclopaedia Hebraica* began to be published in Jerusalem by the Massada Publishing Company, directed by the Peli family. This was the first large-scale general encyclopedia in the Hebrew language – and naturally it emphasized the Jewish aspects of various subjects, some of them of high scholarly importance and in certain cases even pioneering studies in their field. But though it contains the elements of a Jewish encyclopedia, it was not – nor was it intended to be – a Jewish encyclopedia as such.

The Development of the Encyclopaedia Judaica

For many years, and especially since the cataclysmic events in Jewish history of the 1940s, the need had been felt for an entirely new Jewish encyclopedia, especially in the English language for English-speaking Jewry, who now accounted for about half of the Jews of the world. Furthermore the survivors of the editorial board of the German *Encyclopaedia Judaica* had always been determined that the Nazi attack on their work could not be accepted as a final defeat and that the unfinished publication must be completed. However, they too recognized that now only a relatively small proportion of the Jewish people had access to a work in German and that any new endeavor in this field must be, first and foremost, in English. Dr. Nahum Goldmann, the last active survivor of the original board of editors, had long had this objective.

Initial funding of the project was made possible through an allocation obtained by Dr. Goldmann from the German reparations fund earmarked for cultural purposes. The Rassco Company in Israel also became interested and provided some of the funds during the early stages. In the U.S., the *Encyclopaedia Judaica* Research Foundation was established to raise further support for the project.

During this early period, when the preliminary work was centered in the U.S.,

Prof. Benzion Netanyahu (father of Israeli Prime Minister Binyamin Netanyahu), then editor of the *Encyclopaedia Hebraica*, served as editor in chief. The main editorial offices were established in Philadelphia in 1963.

In 1965 Prof. Netanyahu was compelled through pressure of work to retire from his post, and the editorial center was transferred to Jerusalem. This move was regarded as advisable because Jerusalem had become the unquestioned pivot of Jewish studies in the world, with the greatest concentration of scholars in the subject as well as possessing unrivaled research facilities. Moreover it was now the home of Prof. Cecil Roth, who had been appointed to succeed Prof. Netanyahu as editor in chief.

The publishing responsibility was assumed by the Israel Program for Scientific Translations (at that time an Israel government corporation, later owned by CLAL Israel Investment Company Ltd.). The Israel Program for Scientific Translations had already begun diversifying its publishing program and subsequently set up the Keter Publishing House Ltd. under whose imprint the *Encyclopaedia* appeared. In the U.S. the *Encyclopaedia Judaica* also appeared for a limited time with the imprint of Macmillan under an agreement by which the Macmillan Company would distribute the *Encyclopaedia* in the Western Hemisphere. The financing of the *Encyclopaedia* during the five years of actual work in which it was produced in Israel was made possible initially by a generous loan from the United States government out of counterpart funds available in Israel at a nominal interest. This was supplemented by a considerable investment made by the publisher to bring the project to a successful conclusion.

Work started in earnest in 1967 and a period of five years was allocated for the completion of the entire *Encyclopaedia*. It was decided early on that with well-planned organization and by proper exploitation of technological advances it would be possible to achieve the highly desirable goal of publishing the entire *Encyclopaedia* at one time. This would obviate the time gap inevitable in works that appear gradually, avoid the frustration of having the first volumes of a series but not the continuation to which references are made, and make possible the simultaneous publication of an index volume which the editors saw as basic and indispensable to the whole work.

To complete the *Encyclopaedia* within the given time, it was decided to adopt the principle of maximum subdivision so as to involve the greatest number of editors and contributors. The subject matter was broken down into some 20 divisions and these were again subdivided into departments. Some divisions had only two or three departments, but others included many more – 35 in the history division and more than 70 in the division dealing with the participation of Jews in world culture.

The general flow of an entry was from the contributor to the departmental and divisional editors, then to the central office for translation (where necessary), checking, styling, transliterating and bibliographical verification, approval by the relevant associate editor and by the editors in chief, and then back to the contributor for his approval of the final version (in cases where substantial editorial changes had been inserted). Finally the entry was sent to the index department and then to press.

A number of outstanding scholars served as consulting editors. They advised the *Encyclopaedia* staff in their fields of specialization when requested, but did not bear any editorial responsibility. Nor did any departmental, divisional, or associate editor or deputy editor in chief have any editorial responsibility for the contents of the *Encyclopaedia* apart from those which were his own direct responsibility. The final responsibility for all entries rested with the editors in chief.

Dr. Geoffrey Wigoder was appointed deputy editor in chief and the various divisions were grouped into sections each headed by an associate editor. The associate editors – Prof. Louis Rabinowitz, Prof. Raphael Posner, Dr. Binyamin Eliav, and Mr. Simḥa Katz – together with the editor in chief and his deputy constituted the editorial board. After the death of Prof. Roth in 1970, Dr. Wigoder was appointed editor in chief. The New York office was headed by Dr. Frederick Lachman, who coordinated the departments and divisions whose editors were in North America. Working parallel with those preparing the text was the illustrations and graphics department headed by Mr. Moshe Shalvi. This complex administration was directed by Mrs. Rachel Sabbath. The immensity of the operation can best be illustrated by the fact that apart from the 300 editors and 1,800 contributors with whom contact was maintained, the *Encyclopaedia* employed an internal staff of 150 – not including those who worked on the printing and binding stages. The entire publishing operation was directed by Mr. Yitzhak Rischin, managing director of the Keter Publishing House Ltd.

The Year Books and Decennial Books

It was obvious on the publication of the *Encyclopaedia Judaica* that to maintain its usefulness a mechanism would have to be found to ensure that it remained up to date. The method chosen was the periodic publication of Year Books. These incorporated feature articles on subjects of current interest in the Jewish world as well as extensive photo spreads on relevant topics. Many entries were updated, notably the major countries of Jewish settlement which received special consideration in each volume. Moreover new entries were devoted to personalities, organizations, Jewish studies, and other items that had come into the news or to public attention since the publication of the *Encyclopaedia*.

The Yearbooks continued to be published by Keter Publishing Company and the editors included Rabbi Louis I. Rabinowitz, Professor Pinchas Peli, Dr. Geoffrey Wigoder, and Ms. Fern Seckbach.

In addition, two special Decennial books covering the decades preceding 1982 and 1992 were published, incorporating and supplementing Year Book material.

The CD-ROM Edition

The CD-ROM edition, appearing in 1997, included the complete text of the original 16-volume edition of the *Encyclopaedia Judaica*, as well as the subsequent Year Books and the Decennials published in 1982 and 1992. In the limited time allotted for the *Encyclopaedia Judaica* CD-ROM project, there was no possibility for updat-

ing the entire work. Rather, the entire content of the *Encyclopaedia Judaica* was reviewed editorially and items selected for update or expanded coverage, under the supervision of Dr. Geoffrey Wigoder, as editor in chief, together with Fern Seckbach, as deputy editor in chief.

The Second Edition

With the need acutely felt to bring the *Encyclopaedia* into the 21st century, it was now determined to produce a thoroughly revised and updated new edition of the *Encyclopaedia* with the accumulated material in the CD-ROM as its starting point. Accordingly, Thomson Gale signed a licensing agreement with the Keter Publishing House and work on the second edition commenced in August 2003. The project was concluded editorially in the first months of 2006, though last-minute emendations continued to be made until the *Encyclopaedia* went to press in the autumn of 2006. It employed over 50 divisional editors and around 1,200 contributors from all around the world.

To prepare the second edition all entries were systematically reviewed by the divisional editors to select those requiring updating, revision, or rewriting and to propose new entries. Those selected were assigned to the appropriate scholars and writers and the process culminated in the review and editing of all entries received from the contributors. At the end of the process, about half of the original entries had been revised and about 2,650 new entries were produced. In addition, around 30,000 new bibliographical items were added. In all, 4.7 million new words were written for the second edition.

Principles of Selection

An obvious problem in the compilation of any encyclopedia is the decision as to which entries are to be included and which excluded. For the first edition, guidelines were drawn up as a result of which certain subjects were earmarked for definite inclusion while others clearly fell short. But there is always a body of “borderline” entries which potentially could fall in either category. This problem becomes particularly sensitive when dealing with biographies of contemporaries. Which scholars receive entries and which do not? Where is the line to be drawn for rabbis or businessmen or lawyers or scientists?

The Editorial Board laid down general principles, but was fully aware of the potential risk of inconsistency. The Editorial Board considered the entire entry list and paid special attention to the “borderline” entries according to the principles of selection it determined.

Various methods and criteria were established. For example, editors were circumscribed by the word allocation. For example, the editors of the section on Jews in medicine listed many hundreds of Jews who had distinguished themselves in the field. They were asked to subdivide the list into those of major importance of whose inclusion there was no doubt; those who should appear if possible; and those who should at least be mentioned and characterized in the main entry. In this way, the

maximum of names appear in the *Encyclopaedia*. But at the same time, it was obvious that along the borderline, different selections would be made by different experts. In certain categories, it is impracticable to talk about objective standards and an element of subjectivity must enter the final selection. This inevitably provides a happy hunting ground for discussion and criticism. However, it must be noted that the editors of this and any such work have no alternative in such instances but to rely on their judgment, formed after consultation with the expert editors and advisers in each field. With contemporary scholars, the tendency was to be more generous with the older generation, whose major work had been completed, and to be more selective with younger scholars who are in the process of producing their major works and where it is therefore more difficult to reach an assessment.

In some subjects, it was possible to fix objective criteria. For example when it came to U.S. Jewish communities, it was decided to include only those numbering more than 4,500 (although here too exceptions had to be made where the community has historical or other social importance). For places in Israel, it was decided that all municipalities would have their own entry as well as kibbutzim and moshavim which were in existence at the time of the establishment of the State in 1948. For those settlements founded subsequently, only those of special interest have their own entry. With regard to the kibbutzim, the process of “privatization” which most have undergone or are undergoing is not noted in each of the many kibbutz entries but rather discussed in general terms in the Kibbutz Movement entry.

In certain biographical entries a problem was to determine who was a Jew. The first principle adopted was that anyone born a Jew qualified for inclusion, even if he or she had subsequently converted or otherwise dissociated himself from Jewish life (where these facts are known, they are stated). The second principle was that a person with one Jewish parent would qualify for inclusion (with the relevant information stated) if he or she were sufficiently distinguished. A person whose Jewish origins were more remote would only be the subject of an entry in very unusual cases. However, a more generous attitude was taken in the case of Marranos, in view of the special circumstances surrounding their history.

A number of non-Jews are also the subject of entries in the *Encyclopaedia*. They have been included because of their relationship to Jewish life or culture (to avoid misunderstanding, the sign ° has been placed before their name at the head of the entry). These have been selected to ensure the completeness of the *Encyclopaedia*, for example in matters of history (e.g., Alexander the Great, Napoleon, Balfour, Stalin), philosophy and thought (e.g., Aristotle, Avicenna, Kant), or literature (e.g., Dante, Shakespeare, Goethe). In these cases, the entry concentrates only on those elements of the subject’s life and thought which are of Jewish interest, and for a biography and assessment, the interested reader should refer to a general encyclopedia.

By and large the editors of the second edition have followed the above principles in selecting new subjects for inclusion in the *Encyclopaedia*. At the same time, given the widespread availability of perpetual Jewish calendars on the Internet, it was decided to omit this feature from the new edition. It was thought more beneficial to

devote the space to additional text and such new features as the Thematic Outline (see below). On the whole, it has been the explicit aim of the editors to offer entries that the general as well as the specialized reader will expect to find in an encyclopedia of this nature.

Consistency

Notwithstanding all efforts, it has been impossible to maintain perfect consistency in the *Encyclopaedia Judaica*. For one thing, scholars who have written the entries have been allowed a certain latitude in incorporating their own conclusions and this leads occasionally to internal contradictions. For example there are differing views about biblical chronology. It is possible that a scholar writing on a king of ancient Israel may maintain a certain year to have been that of his death; another scholar writing about his successor may be of the view that he began to reign a few years earlier or later; while the author of the general survey of the period may give still different dates. Since the entire subject is a matter of conjecture and all scholars regard their own chronology as well founded, it is impossible to compel them to use dates with which they disagree. Wherever possible, such dates have been coordinated, but the editors are aware of such discrepancies, which must be seen against the differences of opinion among the scholars.

Similarly there can be inconsistencies regarding the transliteration of places and names. The name Leib represents the accepted English version of a Yiddish name; but many with that name who lived in German-speaking countries themselves wrote it Loeb, so that both forms are to be found in the *Encyclopaedia*. Accepted usage is followed in most cases, but there are many problems. In some instances, it is customary in English to anglicize names, such as those of foreign rulers: Empress Catherine – and not Yekaterina or Caterina; Frederick the Great – and not Friedrich; Victor Emmanuel – and not Vittorio Emanuele. But usage differs in other instances: Christopher (not Cristóbal or Cristoforo) Columbus, but Johann (not John) Sebastian Bach, Leo (not Lev) Tolstoy, but Albrecht (not Albert) Durer. Just as inconsistency occurs in general usage, so it occurs in specific Jewish contexts. It is common to adapt the better-known names into English and to write Salomon as Solomon or Josef as Joseph, but what about Salomone and Giuseppe? Biblical names have a familiar English form that has been accepted, but it would hardly be appropriate to anglicize Hebrew names in modern Israel and to refer to Moses Dayan.

Whether Slavic names should end with the form -ich, -icz, -itz, or -itch must depend on usage and not logic; and usage is sometimes confusing as, for example, when persons could have spelled their name according to German or Czech usage.

For a number of reasons (in part because of the ambiguity and interchangeability of the forms Aben and Ibn, but mainly because of the sheer weight of numbers) the *Encyclopaedia* has generally entered persons with quasi-surnames beginning with Ibn under the second name – but not in the case of accepted usage such as that of Abraham ibn Ezra who is always referred to as Ibn Ezra. Here too inconsistencies occur.

Problems have also arisen concerning the consistency of place names: the modern Slovakian town of Bratislava, for example, was famous in Jewish life as a center of scholarship as Pressburg, and is frequently referred to as such within a historical context. Both forms will therefore be found in the *Encyclopaedia*. In such instances the Index will prove an invaluable guide in coordinating the various references.

Certain concessions have led to inconsistencies with regard to Hebrew transliteration. Apart from the different systems that have been employed, common English usage has been taken into consideration in some cases. According to *Encyclopaedia* rules, the word for commandment should be transliterated *mizvah* – but the spelling “bar mitzvah” has in fact passed into the English language as has “kibbutz” (not *kibbuz*) and matzah (or matzoh) and it is the accepted usage that has been adopted. Current Anglo-American usage refers, even in legislation, to ritually prepared food as “kosher” but in other contexts the term is transliterated according to Hebrew usage as *kasher*.

There are similar problems regarding the transliteration of terms in modern Hebrew which embody the “mobile *sheva*,” which is normally not pronounced in the middle of a word in modern Hebrew. Thus the organization *הסתדרות* should be transliterated in accordance with the rules as *Histadderut*, but it is universally known as Histadrut. And then there are transliterations officially adopted by various bodies – the name of the Religious Zionist movement is Mizrahi by which it appears throughout the world, and so it appears in the *Encyclopaedia* even though according to the rules it should appear as *Mizrahi*.

Inconsistencies also occur with regard to italicization. Foreign words are generally italicized – but not where they have become part of the English language, or are in German, French, Spanish, or Italian languages. But this too leads to anomalies. Yeshivah is now an English word and is not italicized; but the principal of a yeshivah is a *rosh yeshivah*, which is italicized. *Ḥasidim* have joyfully entered the English language, but their opponents, the *Mitnaggedim*, remain italicized outsiders.

Cross References and Glossary

The *Encyclopaedia* has been planned as a unit. To avoid unnecessary duplication, cross-references are made to complementary entries and the fullest treatment of any subject will be obtained by consulting both the cross-references given in any entry together with any other references listed under the subject in the Index. However, the *Encyclopaedia* has avoided a plethora of text cross-references which send the reader from volume to volume (such as Ribash see Midrash, Genesis Rabbah, Exodus Rabbah, etc.). Such information will be found by turning to the Index volume which gives all relevant references.

In the text, cross-references are indicated in two ways. The first is by the direct statement “See ...” referring to entries that have directly relevant additional information. The second is by the use of an asterisk (*). The asterisk is placed before the word under which the entry appears. Thus “Abraham *ibn Ezra” indicates that further information related to that entry is to be looked for in the article on Ibn Ezra.

In occasional instances the asterisk has been used to refer the reader to an entry in the Index rather than an article in the text.

Generally speaking, asterisks indicate those further entries which, it is felt, throw additional light on the subject under discussion. For example, in the statement "Benjamin Cardozo was born in New York," there is no cross-reference to New York, both because it is unnecessary and because the entry on New York contains no supplementary information on Cardozo. But the first reference to New York in the entry on "United States" will have a cross-reference because the New York entry in many ways supplements the "United States" entry. Occasional exceptions have been made where some more obscure name or phrase is mentioned, the explanation of which would unduly complicate the text. In most cases, only the first reference to a subject receives a cross-reference, but on occasions it is repeated for special reasons.

It is inevitable in a work of this nature to use a considerable number of Hebrew and technical terms which may not be familiar to the general reader. To explain these on every occasion would make the work far too cumbersome. Therefore, where necessary the cross-reference is given. However, for the convenience of the reader a glossary has been prepared of the most frequently recurring Hebrew terms and specialized names. This glossary is printed at the front of Volume 1, before the start of the entries and at the end of the text in volumes 2 through 21.

Transliteration

For its basic transliteration from the Hebrew, the *Encyclopaedia* has adopted a simplified system. It has been devised with particular regard to the usages of the English-speaking reader. However, certain exceptions have been necessary:

a) The editors of the section dealing with Hebrew and Semitic languages felt that the *Encyclopaedia's* simplified system could not convey all the nuances required in technical linguistic entries. All entries in this section use the transliteration adopted by the Academy of the Hebrew Language. However, to avoid inconsistencies in proper names, the basic system used in the rest of the *Encyclopaedia* has also been retained for names in these entries.

b) The editors of the Bible section felt the need for a few modifications in the *Encyclopaedia's* system in order to convey certain nuances. To preserve the maximum unity, these have generally been added in parentheses after the usual transliteration, although in certain cases where it makes no difference to the ordinary reader (use of *ṭ* in place of *t*), only one form has been given.

c) Other forms of transliteration will be found in some of the musical notations. This is in accordance with the system that has been developed so as best to print Hebrew transliteration together with music.

d) As already mentioned, in a few instances, Hebrew words have become part of the English language and their spelling standardized. In such cases, the term must be regarded by now as an English word, and the spelling in Webster's New International Dictionary (Third Edition) has been followed.

See accompanying tables regarding transliteration for Hebrew, Arabic, Yiddish, Greek, and Russian.

Furthermore, certain English usages have been taken into account inasmuch as certain words and names have received accepted English forms—for example Koran (rather than Qur'an), Saladin (rather than Salah al-Din). Often, in place of the umlaut in German names an “e” has been added after the accented vowel – thus Koenigsberg, not Königsberg.

Bibliographies

The bibliography available for an entry is integral to the treatment of the subject as a whole. On the basis of these references, the reader who wishes to pursue the subject in greater depth can turn to these basic books and articles.

For the first edition a principle of selectivity had to be adopted in view of the vast amount of material that had accumulated. It had to be recognized that the German language, in which so much of Jewish research was written, had become inaccessible to most Jewish students. On the other hand, a considerable body of scientific publication on Jewish subjects had now become available in English while the corresponding literature in Hebrew had assumed vast proportions.

Preference was thus given to works in the English language provided they were of an adequate scientific standard. Moreover, where translations were available in English they were listed in some cases in preference to a (generally German) original. However, exceptions were made in some cases where the English translation did not represent the entire original (e.g., in some sections of Graetz's *History of the Jews*). Generally, only the most important and significant works are listed. Full bibliographies can usually be found in the works referred to and where there is a full bibliography on the subject in a work cited, this fact is mentioned.

Many problems were encountered in the course of compiling the bibliography of the first edition, not all of which found an ideal solution. For example, there is the problem of which edition to cite – the first or latest? A book can have its first edition in England in a different form than its first U.S. edition – and even have a different name for each; an article can appear in a periodical and be reprinted as part of a book; many volumes are now being reprinted photographically and are designated as “second editions” although – where no extra material is added – this is inaccurate.

The organization of the bibliographies (basically supplied by the authors) is also not consistent. An attempt was made to give precedence to the major works on the subject and to works in English, while generally speaking, books precede articles. However, in certain cases other arrangements (e.g., chronological) were followed. In the first edition, names of articles in periodicals were usually not listed for reasons of space, but the author and full details of the periodical served to direct the reader to the major studies in such publications. For the bibliographical updates in the second edition of the *Encyclopaedia*, the editors have endeavored to supply full article titles. Bibliographical items added to updated or revised first edition entries are preceded by the heading “Add. Bibliography” in bold face and appear immediately after the

old bibliography where one exists, unless the latter is arranged by subtopic. Bibliographies of entries new to the second edition are simply headed “Bibliography.”

The standard histories – Graetz, Dubnow, Baron – have not been cited for every article, but only in those cases where they provide material of special significance for the subject in hand. Similarly, regarding individual countries, the standard regional histories have been mentioned only when specially called for and the reader should remember that they must be consulted.

Most of the bibliographical checking for the first edition was done at the Jewish National and University Library, Jerusalem. The unrivaled richness of its collection made possible a thorough investigation of most subjects dealt with and most works cited, but there were cases when certain works or editions were not available and the facts given by the contributor could not be verified.

To make the bibliographies less unwieldy a large number of standard works are quoted by abbreviation. A full list of these abbreviations will be found at the front of Volume 1 of the *Encyclopaedia* and the back of volumes 2 through 21. Such works can be distinguished in the bibliographies by the fact that their titles are not italicized.

Biographical Entries

The title entry for an individual is given according to the name by which he or she was most commonly known. Other names by which a person was known or versions of the name are also in the Index, allowing direct access to the entry, where the alternative names appear in parentheses following the entry title.

Wherever possible, biographical entries are given under the surname if the person had one. Where a combined rendering has become accepted in Europe (e.g., Abenatar) this is followed in the *Encyclopaedia*. In the case of Spanish and Portuguese names (e.g., Texeira de Mattos, Mendes da Costa), accepted usage is followed even though the first component of these names is the basic part.

The place of birth and death are not always given. The reason is that the information given customarily is in many cases conjectural, in others irrelevant. Places of birth are usually mentioned in the text when these have been found to be verifiable. Place of death is not mentioned unless there is a specific reason for giving it. Generally, it can be assumed that a subject died in the place where the person is last mentioned as having resided. To keep the entries within allotted proportions, places of education have generally been omitted as have details concerning awards such as honorary degrees, visiting professorships, prizes (except for major ones such as the Nobel Prize and the Israel Prize), promotion details (e.g., for military figures only the last rank attained is usually given), etc. Though the second edition has been more liberal in this respect, the above principles have generally been followed.

Family Entries

A single entry often covers various members of the same family. This has been especially the case when there are a number of members of the family who are of sufficient interest to warrant a description but where space would not allow individual

entries. In such cases the various members are generally treated in chronological order within the entry. It often occurs that in such families there are several members mentioned in the body of the entry but one or two members are of exceptional importance, warranting a separate entry. In this case they are listed with few details in their appropriate chronological context within the family entry, together with an asterisk indicating that they are the subject of separate entries.

In certain instances, two or more members of the same family have been combined into a single entry. There are also examples of composite entries of several people with the same name as in the case, for example, of biblical persons and places where a single entry covers more than one person or place of the same name. In all such cases, each individual subject can be traced through the Index, where an individual listing will be found. If the family name is not repeated in the article following a personal name, it is understood that the name is identical with that of the title entry.

Special Terminology

In a few instances, the *Encyclopaedia* staff had to make decisions regarding the adoption of basic terminology. One such term is “Holocaust” referring to the fate of the Jews resulting from Nazi policies, from 1933 to 1945. Another is “Mishpat Ivri,” familiarly called “Jewish Law.”

Another is the use of the term Erez Israel. The name Palestine was specifically created by the Romans in order to invalidate the association of the Jewish people with the country they had formerly called Judea. The name Palestine was virtually unknown even when the country was under Muslim (as well as Crusader) rule. The *Encyclopaedia* therefore terms the country by its proper name Erez Israel (literally, the Land of Israel) using the term “Palestine” only in certain contexts (especially with regard to the later Roman period and to the period of the British Mandate when it was the official name of the country). This applies as well to such historical West Bank cities as Hebron, Jericho, and Nablus (Shechem), which are accordingly defined as cities in Erez Israel.

Israel, on the other hand, generally implies in these pages the modern State of Israel. Since the origins of a great part of Israeli institutions and life go back to the 1880s, for certain purposes the term Israel is used retrospectively to this seminal period. For example, the section of the comprehensive entry Israel (by far the largest in the *Encyclopaedia*) headed “State of Israel” covers not only the period from 1948 but also the pre-State period. Though according to official government usage, Israel (and not Israeli) is the adjective relating to Israel and Israeli is a citizen (or permanent resident) of the State of Israel, in most cases “Israeli” has been also used as an adjective in compliance with common usage.

Israel’s wars, discussed in the context of Israel’s history, are given their Israeli nomenclatures. Thus, for example, Six-Day War for the war of 1967 and Yom Kippur War for the war of 1973.

The *Encyclopaedia* uses the term Jerusalem Talmud rather than Palestinian Talmud because although the latter is more accurate (the work was not written or

compiled in Jerusalem) the former conveys the traditional Jewish title *Talmud Yerushalmi*.

Place Names

The basic guide for the form of place names in the first edition was the *Columbia Lippincott Gazetteer of the World* (Columbia University Press, 1966) and where various alternatives are cited there, the preferred form has been adopted. For the sake of consistency the same guidelines have been used for the second edition. Place names occurring in the Bible are given according to *The Holy Scriptures* (according to the Masoretic text; The Jewish Publication Society of America, 1955). Other places in Israel are cited according to the *Encyclopaedia's* rules of transliteration. This has led to some inconsistencies in cases where ancient and modern places (not always on the same site) have identical names. Thus readers will find that some towns mentioned in the Bible will begin with Beth (e.g., Beth Shean) but others not mentioned there will begin with Bet (Bet She'arim). There will be a similar problem with "En" and "Ein."

Another problem with place names is that in many instances, places had different names at different periods. The usage of the *Encyclopaedia* is that where a place is still in existence, the entry appears under its current name (in a very few cases, an exception has been made where the alternative name is so strong in Jewish tradition that any variant would look bizarre). Variants are given at the beginning of the entry on the place and all these variants are cited in their appropriate places in the Index. When place names occur in the body of entries, it has often been necessary to change the usage according to the period. For example it would be absurd to talk of a person in "Wroclaw" in the first half of the 20th century – he was in Breslau; a book in the 18th century was published in Constantinople, not Istanbul.

A special problem was posed by East European names not to be found in the gazetteer. Many Jews were born or lived in small places which had a reputation in the Jewish world but are not large enough to figure in Western works of reference. Such places were identified in standard atlases and where necessary the *Encyclopaedia's* regular rules of transliteration for the appropriate language were followed.

A number of major geographical changes have occurred since the original edition of the *Encyclopaedia Judaica* appeared, notably the break-up of the Soviet Union, Yugoslavia, and Czechoslovakia and the reunification of Germany. The reader is advised to look under both the original and former names of these countries. Thus, the major history of many members of the Commonwealth of Independent States (formerly the U.S.S.R.) will be found under Russia and only developments since their independence are under their particular name. Appropriate cross-references will be found in the text.

Proper Names

Some of the problems relating to consistency in the use of proper names have already been mentioned. As noted, the tendency has been to anglicize first names where ap-

propriate. This has been done even though in certain instances the person himself did not use the form. Thus a German Jew would have signed himself (probably in Hebrew letters) as Schlomo or Salomon but – as is customary in standard works of reference in English – these all appear as Solomon.

Every effort has been made to give the spelling of the surname as the person himself spelled it – even if this means that the more usual Berdichevski appears as Berdyzewski and Moshe Glikson appears as Gluecksohn, these being the forms they themselves used. However, problems remain. What about a person who never signed his name, as far as is known, in Latin characters? For example, if such a person's name was רבינוביץ, is it to be transliterated Rabinowitz, Rabbinowitz, Rabbinowicz, Rabinovich, Rabinovitch, or by any other of the known transliterations, all of which are legitimate? There is no ready-made answer. In some instances, there are precedents to follow; in others, the precedent has to be invented. We are aware that consistency has not always proved possible. Sometimes an apparent inconsistency is deliberate. A man living in a German-speaking country would have written his name Hirsch. But for a man with this name in Eastern Europe there is no reason to use a German form of transliteration; in such instances the rules of Yiddish (or familiar English) transliteration have been followed and the name appears as Hirsh.

Dates

The Hebrew year begins in the fall, three months approximately (in recent centuries) before the Gregorian year. Where the Hebrew year is known (but not the exact date) the probability is that the Gregorian date corresponds to the last nine months rather than the first three months of the Hebrew year. So the *Encyclopaedia* has normally used, e.g., 1298 and not 1297/98 to correspond to the Hebrew year 5058, etc. Where, however, the exact Hebrew date is known, it is possible to be more precise. Where precision is significant the form 1527/28 is used; this implies that the event took place in the Hebrew year 5388 but the period of the year cannot be determined. Before the Gregorian reform of the calendar in 1587 the secular-Christian New Year was considered in most places to have been in March; the Gregorian reform established January 1st but this was adopted only gradually in Europe. The *Encyclopaedia Judaica* assumes, however, in most cases (in accordance with modern historical practice) the beginning of the new year in January, even before the Gregorian reform. To avoid unnecessary complications, account has not been taken of the ten- (to 12- or 13-) day discrepancy between the Gregorian and Julian calendars, which has continued in some areas until our own day. (The 1917 revolutions in Russia are mostly called the February and October Revolutions, although by Western calendars they occurred in March and November.)

Statistics

The whole area of Jewish demography is highly problematical and in many cases precise numbers cannot be determined. Only in recent decades have systematic attempts been made to determine Jewish statistics. Moreover, different criteria have

been adopted in different places, and results will vary with such factors as whether any sort of Jewish definition appears in an official census, whether the particular community has been subject to a scientific analysis – and how one defines a Jew! Occasional discrepancies are inevitable. Moreover, in the case of France and the former Soviet Union the problem has proven to be particularly acute. In the former case this derives from the reluctance of community leaders to publicize Jewish population figures. In the latter case, figures vary widely depending on the body producing them and the criteria used. In both cases, other than for the largest communities where current information is available, older figures are often used rather than arbitrary or unsubstantiated later figures. For U.S. communities, the 2001 figures appearing in the *American Jewish Year Book* have been used in the *Encyclopaedia's* standardized state maps, together with the 2000 U.S. Census figures for the general population, with later figures given in the text where available.

Alphabetization

Entries have been arranged (both in the body of the *Encyclopaedia* and in the Index) in strict alphabetical order – disregarding spaces and hyphens. The criterion is the order of the letters up to the first punctuation sign (comma, period, etc.). This makes for easy reference as well as facilitating the work of the computer.

For example, Ben-Gurion should be sought somewhere after Benghazi and before Benjamin; El Paso will be after Elephantine but before Elul.

The following elements are not considered in alphabetization: definite and indefinite articles; personal titles (e.g., Sir or Baron), with the exception of “Saint”; material that appears in parentheses; the ordinal number of a monarch or pope. In the event of absolutely identical title entries, the following order of precedence prevails: places, people, things. Where persons have identical names, the one who lived earlier comes first. Where the same name is used as a first and family name, entries of the first name precede those of the family name.

For example in looking for an ABRAHAM one would find the order:

ABRAHAM (the patriarch)

ABRAHAM (family name)

ABRAHAM, APOCALYPSE OF (the comma after Abraham acting as a caesura)

ABRAHAM, MAX

ABRAHAM ABELE BEN ABRAHAM SOLOMON (considered as a unit in the absence of a comma)

ABRAHAM A SANCTA CLARA

ABRAHAM BAR HIYYA

ABRAHAM BEN ALEXANDER (note that “bar” and “ben” are considered as spelt in full)

ABRAHAM HAYYIM BEN GEDALIA

ABRAHAMITES

ABRAHAM JOSHUA HESCHEL OF APTA

ABRAHAM (ben Aaron) OF BAGHDAD (note that variants in parentheses are ignored for alphabetization purposes)
 ABRAHAM OF SARAGOSSA
 ABRAHAMS
 ABRAHAMS, ISRAEL
 ABRAHAMS, SIR LIONEL (note that titles such as Sir and Lord are ignored for alphabetization purposes)
 ABRAHAMS, MOSES
 ABRAHAM'S BOSOM
 ABRAHAMSEN, DAVID
 ABRAHAM ZEVI BEN ELEAZER

Style

Although basing itself on standard rule of style, the *Encyclopaedia* has in many cases had to establish its own rules to meet its own particular requirements. Spelling was based on Webster's Third International Dictionary, except for a number of specific Jewish and Hebrew words. Italicization is used in the text for non-English words and phrases. (See also section on Consistency.)

Familiar abbreviations of rabbinical authorities (e.g., Rif for Isaac Alfasi or Rashba for Solomon ben Adret) are generally not employed in the text but are used in bibliographical references in articles on rabbinical literature and Jewish law (see section on Abbreviations). The exception here is Rashi (Rabbi Solomon Yizḥaki) who is so universally known by his acronym that it would be unnecessarily pedantic to insist on his full name in usual references to him. In other cases, a decision had to be made with regard to the form regularly used; thus the *Encyclopaedia* uses Maimonides rather than Moses ben Maimon or Maimuni and Naḥmanides rather than Moses ben Naḥman. Here again the reader should consult the aliases appearing in the alphabetized Index.

Illustrations

Supplementing the text are over 600 tables, maps, charts, and archaeological plans including a full list of Jewish settlements in Israel and detailed chronologies of Jewish history and of the Holocaust period, as well as an eight-page full-color insert in each volume illustrating all facets of Jewish life in hundreds of photographs. A special section of Holocaust photographs follows the main Holocaust entry.

Signatures and Contributors

Authors' names generally appear at the end of each entry. Where different contributors have written sections of an entry, their names are found at the end of the section they have written. When two (or more) contributions have been merged into a single article a joint signature appears at the end of the entry. Contributions to the second edition are indicated by the words (2nd ed.) after the contributor's name. However, in cases where updates or revisions to a first edition entry are minor, or only new bibli-

ography has been added (see Bibliographies above), the second edition contributor has generally not been cited, lest the mistaken impression be created that the entry was a joint effort. Furthermore, with the removal of the ubiquitous “ED.” (for “Editor”) signature from first edition entries produced by the EJ editorial staff, such entries are now unsigned, unless the second edition update or revision was significant enough to warrant its attribution to the second edition contributor alone.

Information on the authors (as of the date of writing the entry) can be found in the List of Contributors along with a list of all entries partially or entirely written by each author.

For the first edition the *Encyclopaedia Judaica* received permission to utilize entries appearing in two other encyclopedias in other languages – the German *Encyclopaedia Judaica* and the Hebrew *Encyclopaedia Hebraica*. Where contributors of such entries were living, the English version was sent to them for their approval and where received, the author’s initial is given. In a few cases, for one reason or another, the author was not available or not prepared to check the English version; in such cases the entries are merely signed [*Encyclopedia Judaica* (Germany)] or [*Encyclopaedia Hebraica*] to indicate that the source is to be found in these works. For the second edition, permission was received to use material from two other sources: Yad Vashem’s *Pinkasei Kehillot* and its English abridgment (*Encyclopedia of Jewish Communities Before and During the Holocaust*) and *The Shorter Jewish Encyclopedia in Russian* (*Kratkoy Evreyskoy Entsiklopedii*). Material from these sources was incorporated into entries written and generally signed by second edition contributors.

Index

One of the highlights of the *Encyclopaedia* is its comprehensive index, originally edited by Prof. Raphael Posner for the first edition. This provides the key which unlocks the *Encyclopaedia* so that each detail becomes readily available for consultation. Ordinarily, an encyclopedia can be consulted only through the alphabetical list of entries. In the case of the *Encyclopaedia Judaica* this would give the reader some 22,000 subjects. With the aid of the Index the option is expanded more than eightfold, and the reader can at once see where information on topics that have not received independent entries but have been treated under other headings can be found. In addition a subject can be followed through all aspects of its treatment in the *Encyclopaedia*. For example, if the reader is interested in Maimonides, he or she will discover not only that there is a major entry on Maimonides but that there are further extensive treatments of Maimonides’ thought and work in dozens of other entries – such as the entry *Mishpat Ivri* (Jewish Law), Philosophy, Medicine, Aristotle, Attributes, etc.

The Index is an indispensable tool for the use of the *Encyclopaedia* and the editors recommend that the reader always start by turning to it. Only by consulting the Index will he or she grasp the full treatment of any subject. (Where a person can be referred to under various names or pseudonyms, the Index will guide the reader to the relevant entry.) In planning the *Encyclopaedia*, the editors endeavored to main-

tain an overview of the complete work and to avoid overlapping, as far as possible. Without the Index, the reader would not be aware of the carefully planned structure of each subject and might conclude that certain important facets had been omitted or overlooked or that in certain cases treatment was inadequate. But by referring to the Index the user will immediately find out under what heading each subject is treated and where the supplementary aspects are dealt with.

It should be noted that the captions to the illustrations have also been indexed. Thus, under Israel, the reader will find page references to all maps and tables in the entry. In this way, the reader has easy access to all the visual material in the *Encyclopaedia*.

For full details on the Index and its use, the reader is referred to the Introduction to the Index in the Index volume.

Thematic Outline

The Thematic Outline, at the front of the Index volume, is an entirely new feature listing all entries in the *Encyclopaedia* under their appropriate subject headings, more or less corresponding to the *Encyclopaedia*'s editorial divisions. Thus, for example, a typical heading of this kind would be "Canada," broken down into Main Entries, General Entries, Community Entries, and Biographical Entries. For the larger divisions (U.S., Israel, Germany, etc.) biographical entries are further subdivided into Public and Economic Life, Academic Life, Popular Culture, Art, Science, etc. Many entries will appear under more than one heading. Scientists, for example, will appear under both the country they are identified with (or more than one country in certain cases) and the Science heading. As definitions are sometimes not clearcut, the existence of an entry can always be checked against the Index.

The aim of the Thematic Outline is to provide at a glance a picture of what is contained in the *Encyclopaedia* as well as to serve as a teaching and research tool showing all the entries available on a given subject.

Conclusion

The preparation of the second edition of the *Encyclopaedia Judaica* was a labor of devotion and dedication on the part of those responsible. It is the product of the diligent work of many hundreds of participants making very special efforts to ensure its successful conclusion. In this, they have been motivated by an awareness of the historic and cultural value of this work and the significant role it can play in Jewish education and culture, in the spread of Jewish knowledge – which is such an urgent priority in the Jewish and non-Jewish world today – and in the closer linking of Israel with Jews as well as non-Jews the world over. The editors are aware that for objective reasons, they have not always attained the desired perfection and that, as is inevitable in any work of comparable size and scope, errors have crept in. But they feel that the final product, seen in its entirety, is indeed a historical contribution to Jewish culture with which they feel privileged to have been associated.

Semak, Usual abbreviation of *Sefer Mitzvot Katan*, elucidation of precepts by *Isaac b. Joseph of Corbeil.

- Sh. Ar. = *Shulḥan Arukh*, code by Joseph b. Ephraim *Caro.
Sha'ar Mishpat, Comm. to Sh. Ar., ḤM. By Israel Isser b. Ze'ev Wolf.
Sha'arei Shevu'ot, Treatise on the law of oaths by *David b. Saadia; usually printed together with Rif, *Halakhot*; also called: *She'arim of R. Alfasi*.
Sha'arei Teshuvah, Collection of resp. from Geonic period, by different authors.
Sha'arei Uzzi'el, Rabbinical treatise by Ben-Zion Meir Ha *Ouziel.
Sha'arei Zedek, Collection of resp. from Geonic period, by different authors.
Shadal [or Shedal] = Samuel David *Luzzatto.
Shai la-Moreh, Resp. by Shabbetai Jonah.
Shakh, Usual abbreviation of *Siftei Kohen*, a comm. to Sh. Ar., YD and ḤM by *Shabbetai b. Meir ha-Kohen; printed in most editions of Sh. Ar.
Sha'ot-de-Rabbanan, Resp. by *Solomon b. Judah ha-Kohen.
She'arim of R. Alfasi see *Sha'arei Shevu'ot*.
Shedal, see Shadal.
She'elot u-Teshuvot ha-Ge'onim, Collection of resp. by different authors.
She'erit Yisrael, Resp. by Israel Ze'ev Mintzberg.
She'erit Yosef, Resp. by *Joseph b. Mordecai Gershon ha-Kohen.
She'ilat Yavez, Resp. by Jacob *Emden (Yavez).
She'iltot, Compilation arranged acc. to the Torah by *Aḥa (Aḥai) of Shabḥa.
Shem Aryeh, Resp. by Aryeh Leib *Lipschutz.
Shemesh Zedakah, Resp. by Samson *Morpurgo.
Shenei ha-Me'erot ha-Gedolim, Resp. by Elijah *Covo.
Shetarot, Sefer ha-, Collection of legal forms by *Judah b. Barzilai al-Bargeloni.
Shevut Ya'akov, Resp. by Jacob b. Joseph Reicher.
Shibbolei ha-Leket Compilation on ritual by Zedekiah b. Avraham *Anav.
Shiltei Gibborim, Comm. to Rif, *Halakhot*, by *Joshua Boaz b. Simeon; printed in major editions of the Talmud.
Shittah Mekubbezet, Compilation of talmudical commentaries by Bezalel *Ashkenazi.
Shivat Ziyyon, Resp. by Samuel b. Ezekiel *Landau.
Shiyyurei Korban, by David *Fraenkel; additions to his comm. to Jer. Talmud *Korban Edah*; both printed in most editions of Jer. Talmud.
Sho'el u-Meshiv, Resp. by Joseph Saul ha-Levi *Nathanson.
Sh[ulḥan] Ar[ukh] [of Ba'al ha-Tanyal], Code by *Shneur Zalman of Lyady; not identical with the code by Joseph Caro.
Siftei Kohen, Comm. to Sh. Ar., YD and ḤM by *Shabbetai b. Meir ha-Kohen; printed in most editions of Sh. Ar.; usual abbreviation: *Shakh*.
Simḥat Yom Tov, Resp. by Tom Tov b. Jacob *Algazi.
Simlah Ḥadashah, Treatise on *Sheḥitah* by Alexander Sender b. Ephraim Zalman *Schor; see also *Tevu'ot Shor*.
Simeon b. Zemah = Simeon b. Zemah *Duran.
Sma, Comm. to Sh. Ar. by Joshua b. Alexander ha-Kohen *Falk; the full title is: *Sefer Me'irat Einayim*; printed in most editions of Sh. Ar.
Solomon b. Isaac ha-Levi = Solomon b. Isaac *Levy.
Solomon b. Isaac of Troyes = *Rashi.
Tal Orot, Rabbinical work with various contents, by Joseph ibn Gioia.
Tam, Rabbenu = *Tam Jacob b. Meir.
Tashbaz = Samson b. Zadok.
Tashbez = Simeon b. Zemah *Duran, sometimes also abbreviation for Samson b. Zadok, usually known as Tashbaz.
Tashbez [Sefer ha-], Resp. by Simeon b. Zemah *Duran; the fourth part of this work is called: *Ḥut ha-Meshullash*.
Taz, Usual abbreviation of *Turei Zahav*, comm., to Sh. Ar. by *David b. Samuel ha-Levi; printed in most editions of Sh. Ar.
(Ha)-Tekhelet, subdivision of the *Levush* (a codification by Mordecai b. Abraham (Levush) *Jaffe); *Ha-Tekhelet* parallels Tur, OH 1-241.
Terumat ha-Deshen, by Israel b. Pethahiah *Isserlein; subdivided into a part containing responsa, and a second part called *Pesakim u-Khetavim* or *Piskei Maharai*.
Terumot, Sefer ha-, Compilation of *halakhot* by Samuel b. Isaac *Sardi.
Teshuvot Ba'alei ha-Tosafot, Collection of responsa by the Tosafists.
Teshivot Ge'onei Mizraḥ u-Ma'a'av, Collection of responsa.
Teshuvot ha-Geonim, Collection of responsa from Geonic period.
Teshuvot Ḥakhmei Provinzyah, Collection of responsa by different Provençal authors.
Teshuvot Hakhmei Zarefat ve-Loter, Collection of responsa by different French authors.
Teshuvot Maimuniyyot, Resp. pertaining to Maimonides' *Yad Ḥazakah*; printed in major editions of this work after the text; authorship uncertain.
Tevu'ot Shor, by Alexander Sender b. Ephraim Zalman *Schor, a comm. to his *Simlah Ḥadashah*, a work on *Sheḥitah*.
Tiferet Zevi, Resp. by Zevi Hirsch of the "AHW" Communities (Altona, Hamburg, Wandsbeck).
Tiktin, Judah b. Simeon = Judah b. Simeon *Ashkenazi.
Toledot Adam ve-Ḥavvah, Codification by *Jeroham b. Meshullam.
Torat Emet, Resp. by Aaron b. Joseph *Sasson.
Torat Hayyim, Resp. by Hayyim (ben) Shabbetai.
Torat ha-Minhagot, subdivision of the *Massa Ḥayyim* (a work on tax law) by Hayyim *Palaggi, containing an exposition of customary law.
Tosafot Rid, Explanations to the Talmud and decisions by *Isaiah b. Mali di Trani the Elder.
Tosefot Yom Tov, comm. to Mishnah by Yom Tov Lipmann b. Nathan ha-Levi *Heller; printed in most editions of the Mishnah.

Tur, usual abbreviation for the *Arba'ah Turim* of *Jacob b. Asher.
Turei Zahav, Comm. to Sh. Ar. by *David b. Samuel ha-Levi; printed in most editions of Sh. Ar.; usual abbreviation: *Taz*.
Urim, subdivision of the following.
Urim ve-Tummim, Comm. to Sh. Ar., ḤM, by Jonathan *Eybeschuetz; printed in the major editions of Sh. Ar.; subdivided in places into *Urim* and *Tummim*.
Vikku'ah Mayim Ḥayyim, Polemics against Isserles and Caro by Hayyim b. Bezalel.
Yad Malakhi, Methodological treatise by *Malachi b. Jacob ha-Kohen.

ABBREVIATIONS

Yad Ramah, Nov. by Meir b. Todros [ha-Levi] *Abulafia.
Yakhin u-Vo'az, Resp. by Zemaḥ b. Solomon *Duran.
Yam ha-Gadol, Resp. by Jacob Moses *Toledano.
Yam shel Shelomo, Compilation arranged acc. to Talmud by Solomon b. Jehiel (Maharshal) *Luria.
Yashar, Sefer ha-, by *Tam, Jacob b. Meir (Rabbenu Tam); 1st pt.: Resp.; 2nd pt.: Nov.
Yaskil Avdi, Resp. by Obadiah Hadaya (printed together with his Resp. *De'ah ve-Haskel*).
 Yaveẓ = Jacob *Emden.
Yehudah Ya'aleh, Resp. by Judah b. Israel *Aszod.
Yekar Tiferet, Comm. to Maimonides' *Yad Ḥazakah*, by David b. Solomon ibn Zimra, printed in most editions of *Yad Ḥazakah*.
Yere'im [ha-Shalem], [*Sefer*], Treatise on precepts by *Eliezer b. Samuel of Metz.
Yeshu'ot Ya'akov, Resp. by Jacob Meshullam b. Mordecai Ze'ev *Ornstein.
Yizhak Rei'ah, Resp. by Isaac b. Samuel Abendanan (see article *Abendanam Family).

Zafanat Pa'ne'ah (1), also called *Raban* or *Even ha-Ezer*, see under the last name.
Zafanat Pa'ne'ah (2), Resp. by Joseph *Rozin.
Zayit Ra'anani, Resp. by Moses Judah Leib b. Benjamin Auerbach.
Zeidah la-Derekh, Codification by *Menahem b. Aaron ibn Zerah.
Zedakah u-Mishpat, Resp. by Zedakah b. Saadiah Huẓin.
Zekan Aharon, Resp. by Elijah b. Benjamin ha-Levi.
Zekher Zaddik, Sermons by Eliezer *Katzenellenbogen.
Zemaḥ Zedek (1) Resp. by Menaham Mendel Shneersohn (see under *Shneersohn Family).
Zera Avraham, Resp. by Abraham b. David *Yizḥaki.
Zera Emet Resp. by *Ishmael b. Abaham Isaac ha-Kohen.
Zevi la-Zaddik, Resp. by Zevi Elimelech b. David Shapira.
Zikhron Yehudah, Resp. by *Judah b. Asher
Zikhron Yosef, Resp. by Joseph b. Menahem *Steinhardt.
Zikhronot, *Sefer ha-*, Sermons on several precepts by Samuel *Aboab.
Zikkaron la-Rishonim . . ., by Albert (Abraham Elijah) *Harkavy; contains in vol. 1 pt. 4 (1887) a collection of Geonic responsa.
Ziz Eliezer, Resp. by Eliezer Judah b. Jacob Gedaliah Waldenberg.

BIBLIOGRAPHICAL ABBREVIATIONS

Bibliographies in English and other languages have been extensively updated, with English translations cited where available. In order to help the reader, the language of books or articles is given where not obvious from titles of books or names of periodicals. Titles of books and periodicals in languages with alphabets other than Latin, are given in transliteration, even where there is a title page in English. Titles of articles in periodicals are not given. Names of Hebrew and Yiddish periodicals well known in English-speaking countries or in Israel under their masthead in Latin characters are given in this form, even when contrary to transliteration rules. Names of authors writing in languages with non-Latin alphabets are given in their Latin alphabet form wherever known; otherwise the names are transliterated. Initials are generally not given for authors of articles in periodicals, except to avoid confusion. Non-abbreviated book titles and names of periodicals are printed in *italics*. Abbreviations are given in the list below.

AASOR	<i>Annual of the American School of Oriental Research</i> (1919ff.).	Adler, Prat Mus	1. Adler, <i>La pratique musicale savante dans quelques communautés juives en Europe au XVIIe et XVIIIe siècles</i> , 2 vols. (1966).

TRANSLITERATION RULES

1. The letters **א** and **י** are not transliterated.
An apostrophe (') between vowels indicates that they do not form a diphthong and are to be pronounced separately.
2. *Dagesh hazak* (forte) is indicated by doubling of the letter, except for the letter **ש**.
3. Names. Biblical names and biblical place names are rendered according to the Bible translation of the Jewish Publication Society of America. Post-biblical Hebrew names are transliterated; contemporary names are transliterated or rendered as used by the person. Place names are transliterated or rendered by the accepted spelling. Names and some words with an accepted English form are usually not transliterated.

1. Yiddish transliteration rendered according to U. Weinreich's *Modern English-Yiddish Yiddish-English Dictionary*.
2. Hebrew words in Yiddish are usually transliterated according to standard Yiddish pronunciation, e.g., חזנות = *khazones*.

LADINO

Ladino and Judeo-Spanish words written in Hebrew characters are transliterated phonetically, following the General Rules of Hebrew transliteration (see above) whenever the accepted spelling in Latin characters could not be ascertained.

1. not indicated when initial
2. see note (f)

- a) The EJ follows the *Columbia Lippincott Gazetteer* and the *Times Atlas* in transliteration of Arabic place names. Sites that appear in neither are transliterated according to the table above, and subject to the following notes.
- b) The EJ follows the *Columbia Encyclopedia* in transliteration of Arabic names. Personal names that do not therein appear are transliterated according to the table above and subject to the following notes (e.g., Ali rather than ‘Ali, Suleiman rather than Sulayman).
- c) The EJ follows the *Webster’s Third International Dictionary, Unabridged* in transliteration of Arabic terms that have been integrated into the English language.
- d) The term “Abu” will thus appear, usually in disregard of inflection.
- e) Nunnation (end vowels, *tanwīn*) are dropped in transliteration.
- f) Gemination (*tashdīd*) is indicated by the doubling of the geminated letter, unless an end letter, in which case the gemination is dropped.
- g) The definitive article *al-* will always be thus transliterated, unless subject to one of the modifying notes (e.g., El-Arish rather than al-‘Arish; modification according to note (a)).
- h) The Arabic transliteration disregards the Sun Letters (the antero-palatals (*al-Ḥurūf al-Shamsiyya*)).
- i) The *tā-marbūṭa* (o) is omitted in transliteration, unless in construct-stage (e.g., *Khirba* but *Khirbat Mishmish*).

These modifying notes may lead to various inconsistencies in the Arabic transliteration, but this policy has deliberately been adopted to gain smoother reading of Arabic terms and names.

1. Ye at the beginning of a word; after all vowels except Ы; and after Ъ and Ь.
 2. O after Ч, Ш and Щ.
 3. Omitted after Ы, and in names of people after И.
- A. Many first names have an accepted English or quasi-English form which has been preferred to transliteration.
 B. Place names have been given according to the *Columbia Lippincott Gazetteer*.
 C. Pre-revolutionary spelling has been ignored.
 D. Other languages using the Cyrillic alphabet (e.g., Bulgarian, Ukrainian), inasmuch as they appear, have been phonetically transliterated in conformity with the principles of this table.

GLOSSARY

Asterisked terms have separate entries in the Encyclopaedia.

Actions Committee, early name of the Zionist General Council, the supreme institution of the World Zionist Organization in the interim between Congresses. The Zionist Executive's name was then the "Small Actions Committee."

***Adar**, twelfth month of the Jewish religious year, sixth of the civil, approximating to February–March.

***Aggadah**, name given to those sections of Talmud and Midrash containing homiletic expositions of the Bible, stories, legends, folklore, anecdotes, or maxims. In contradistinction to **halakhah*.

***Agunah**, woman unable to remarry according to Jewish law, because of desertion by her husband or inability to accept presumption of death.

***Aharonim**, later rabbinic authorities. In contradistinction to **ris-honim* ("early ones").

Ahavah, liturgical poem inserted in the second benediction of the morning prayer (**Ahavah Rabbah*) of the festivals and/or special Sabbaths.

Aktion (Ger.), operation involving the mass assembly, deportation, and murder of Jews by the Nazis during the *Holocaust.

***Aliyah**, (1) being called to Reading of the Law in synagogue; (2) immigration to Erez Israel; (3) one of the waves of immigration to Erez Israel from the early 1880s.

***Amidah**, main prayer recited at all services; also known as *She-moneh Esreh* and *Tefillah*.

***Amora** (pl. **amoraim**), title given to the Jewish scholars in Erez Israel and Babylonia in the third to sixth centuries who were responsible for the **Gemara*.

Aravah, the *willow; one of the *Four Species used on *Sukkot ("festival of Tabernacles") together with the **etrog*, *hadas*, and **lulav*.

***Arvit**, evening prayer.

Asarah be-Tevet, fast on the 10th of Tevet commemorating the commencement of the siege of Jerusalem by Nebuchadnezzar.

Asefat ha-Nivḥarim, representative assembly elected by Jews in Palestine during the period of the British Mandate (1920–48).

***Ashkenaz**, name applied generally in medieval rabbinical literature to Germany.

***Ashkenazi** (pl. **Ashkenazim**), German or West-, Central-, or East-European Jew(s), as contrasted with *Sephardi(m).

***Av**, fifth month of the Jewish religious year, eleventh of the civil, approximating to July–August.

***Av bet din**, vice president of the supreme court (*bet din ha-gadol*) in Jerusalem during the Second Temple period; later, title given to communal rabbis as heads of the religious courts (see **bet din*).

***Badḥan**, jester, particularly at traditional Jewish weddings in Eastern Europe.

***Bakkashah** (Heb. "supplication"), type of petitionary prayer, mainly recited in the Sephardi rite on Rosh Ha-Shanah and the Day of Atonement.

Bar, "son of . . ."; frequently appearing in personal names.

***Baraita** (pl. **beraitot**), statement of **tanna* not found in *Mishnah.

***Bar mitzvah**, ceremony marking the initiation of a boy at the age of 13 into the Jewish religious community.

Ben, "son of . . ."; frequently appearing in personal names.

Berakhah (pl. **berakhot**), *benediction, blessing; formula of praise and thanksgiving.

***Bet din** (pl. **battei din**), rabbinic court of law.

***Bet ha-midrash**, school for higher rabbinic learning; often attached to or serving as a synagogue.

***Bilu**, first modern movement for pioneering and agricultural settlement in Erez Israel, founded in 1882 at Kharkov, Russia.

***Bund**, Jewish socialist party founded in Vilna in 1897, supporting Jewish national rights; Yiddishist, and anti-Zionist.

Cohen (pl. **Cohanim**), see Kohen.

***Conservative Judaism**, trend in Judaism developed in the United States in the 20th century which, while opposing extreme changes in traditional observances, permits certain modifications of *halakhah* in response to the changing needs of the Jewish people.

***Consistory** (Fr. *consistoire*), governing body of a Jewish communal district in France and certain other countries.

***Converso(s)**, term applied in Spain and Portugal to converted Jew(s), and sometimes more loosely to their descendants.

***Crypto-Jew**, term applied to a person who although observing outwardly Christianity (or some other religion) was at heart a Jew and maintained Jewish observances as far as possible (see *Converso*; *Marrano*; *Neofiti*; *New Christian*; *Jadid al-Islam*).

***Dayyan**, member of rabbinic court.

Decisor, equivalent to the Hebrew *posek* (pl. **posekim*), the rabbi who gives the decision (*halakhah*) in Jewish law or practice.

***Devekut**, "devotion"; attachment or adhesion to God; communion with God.

***Diaspora**, Jews living in the "dispersion" outside Erez Israel; area of Jewish settlement outside Erez Israel.

Din, a law (both secular and religious), legal decision, or lawsuit.

Divan, **diwan**, collection of poems, especially in Hebrew, Arabic, or Persian.

Dunam, unit of land area (1,000 sq. m., c. ¼ acre), used in Israel.

Einsatzgruppen, mobile units of Nazi S.S. and S.D.; in U.S.S.R. and Serbia, mobile killing units.

***Ein-Sof**, "without end"; "the infinite"; hidden, impersonal aspect of God; also used as a Divine Name.

***Elul**, sixth month of the Jewish religious calendar, 12th of the civil, precedes the High Holiday season in the fall.

Endloesung, see *Final Solution.

***Erez Israel**, Land of Israel; Palestine.

***Eruv**, technical term for rabbinical provision permitting the alleviation of certain restrictions.

***Etrog**, citron; one of the *Four Species used on *Sukkot together with the **lulav*, *hadas*, and *aravah*.

Even ha-Ezer, see Shulḥan Arukh.

***Exilarch**, lay head of Jewish community in Babylonia (see also *resh galuta*), and elsewhere.

***Final Solution** (Ger. *Endloesung*), in Nazi terminology, the Nazi-planned mass murder and total annihilation of the Jews.

***Gabbai**, official of a Jewish congregation; originally a charity collector.

***Galut**, "exile"; the condition of the Jewish people in dispersion.

- ***Gaon** (pl. **geonim**), head of academy in post-talmudic period, especially in Babylonia.
- Gaonate**, office of *gaon.
- ***Gemara**, traditions, discussions, and rulings of the **amoraim*, commenting on and supplementing the *Mishnah, and forming part of the Babylonian and Palestinian Talmuds (see Talmud).
- ***Gematria**, interpretation of Hebrew word according to the numerical value of its letters.
- General Government**, territory in Poland administered by a German civilian governor-general with headquarters in Cracow after the German occupation in World War II.
- ***Genizah**, depository for sacred books. The best known was discovered in the synagogue of Fostat (old Cairo).
- Get**, bill of *divorce.
- ***Ge'ullah**, hymn inserted after the **Shema* into the benediction of the morning prayer of the festivals and special Sabbaths.
- ***Gilgul**, metempsychosis; transmigration of souls.
- ***Golem**, automaton, especially in human form, created by magical means and endowed with life.
- ***Habad**, initials of *ḥokhmah, binah, da'at*: “wisdom, understanding, knowledge”; ḥasidic movement founded in Belorussia by *Shneur Zalman of Lyady.
- Hadas**, *myrtle; one of the *Four Species used on Sukkot together with the **etrog*, **lulav*, and *aravah*.
- ***Haftarah** (pl. **haftarot**), designation of the portion from the prophetic books of the Bible recited after the synagogue reading from the Pentateuch on Sabbaths and holidays.
- ***Haganah**, clandestine Jewish organization for armed self-defense in Erez Israel under the British Mandate, which eventually evolved into a people's militia and became the basis for the Israel army.
- ***Haggadah**, ritual recited in the home on *Passover eve at seder table.
- Haham**, title of chief rabbi of the Spanish and Portuguese congregations in London, England.
- ***Hakham**, title of rabbi of *Sephardi congregation.
- ***Hakham bashi**, title in the 15th century and modern times of the chief rabbi in the Ottoman Empire, residing in Constantinople (Istanbul), also applied to principal rabbis in provincial towns.
- Hakhsharah** (“preparation”), organized training in the Diaspora of pioneers for agricultural settlement in Erez Israel.
- ***Halakhah** (pl. **halakhot**), an accepted decision in rabbinic law. Also refers to those parts of the *Talmud concerned with legal matters. In contradistinction to **aggadah*.
- Halizah**, biblically prescribed ceremony (Deut. 25:9–10) performed when a man refuses to marry his brother's childless widow, enabling her to remarry.
- ***Hallel**, term referring to Psalms 113–18 in liturgical use.
- ***Halukkah**, system of financing the maintenance of Jewish communities in the holy cities of Erez Israel by collections made abroad, mainly in the pre-Zionist era (see *kolel*).
- Halutz** (pl. **halutzim**), pioneer, especially in agriculture, in Erez Israel.
- Halutziiyyut**, pioneering.
- ***Hanukkah**, eight-day celebration commemorating the victory of *Judah Maccabee over the Syrian king *Antiochus Epiphanes and the subsequent rededication of the Temple.
- Hasid**, adherent of *Ḥasidism.
- ***Hasidei Ashkenaz**, medieval pietist movement among the Jews of Germany.
- ***Ḥasidism**, (1) religious revivalist movement of popular mysticism among Jews of Germany in the Middle Ages; (2) religious movement founded by *Israel ben Eliezer Ba'al Shem Tov in the first half of the 18th century.
- ***Haskalah**, “enlightenment”; movement for spreading modern European culture among Jews c. 1750–1880. See *maskil*.
- ***Havdalah**, ceremony marking the end of Sabbath or festival.
- ***Hazzan**, precentor who intones the liturgy and leads the prayers in synagogue; in earlier times a synagogue official.
- ***Heder** (lit. “room”), school for teaching children Jewish religious observance.
- Heikhalot**, “palaces”; tradition in Jewish mysticism centering on mystical journeys through the heavenly spheres and palaces to the Divine Chariot (see *Merkabah*).
- ***Herem**, excommunication, imposed by rabbinical authorities for purposes of religious and/or communal discipline; originally, in biblical times, that which is separated from common use either because it was an abomination or because it was consecrated to God.
- Ḥeshvan**, see *Marḥeshvan*.
- ***Ḥevra kaddisha**, title applied to charitable confraternity (**ḥevrah*), now generally limited to associations for burial of the dead.
- ***Ḥibbat Zion**, see *Ḥovevei Zion*.
- ***Histadrut** (abbr. For Heb. **Ha-Histadrut ha-Kelalit shel ha-Ovedim ha-Ivriyyim be-Erez Israel**). Erez Israel Jewish Labor Federation, founded in 1920; subsequently renamed Histadrut ha-Ovedim be-Erez Israel.
- ***Holocaust**, the organized mass persecution and annihilation of European Jewry by the Nazis (1933–1945).
- ***Hoshana Rabba**, the seventh day of *Sukkot on which special observances are held.
- Ḥoshen Mishpat**, see *Shulḥan Arukh*.
- Ḥovevei Zion**, federation of *Ḥibbat Zion, early (pre-*Herzl) Zionist movement in Russia.
- Illui**, outstanding scholar or genius, especially a young prodigy in talmudic learning.
- ***Iyyar**, second month of the Jewish religious year, eighth of the civil, approximating to April-May.
- I.Z.L.** (initials of Heb. ***Irgun Zeva'i Le'ummi**; “National Military Organization”), underground Jewish organization in Erez Israel founded in 1931, which engaged from 1937 in retaliatory acts against Arab attacks and later against the British mandatory authorities.
- ***Ja'did al-Islām** (Ar.), a person practicing the Jewish religion in secret although outwardly observing Islām.
- ***Jewish Legion**, Jewish units in British army during World War I.
- ***Jihād** (Ar.), in Muslim religious law, holy war waged against infidels.
- ***Judenrat** (Ger. “Jewish council”), council set up in Jewish communities and ghettos under the Nazis to execute their instructions.
- ***Judenrein** (Ger. “clean of Jews”), in Nazi terminology the condition of a locality from which all Jews had been eliminated.
- ***Kabbalah**, the Jewish mystical tradition:
Kabbala iyyunit, speculative Kabbalah;
Kabbala ma'asit, practical Kabbalah;
Kabbala nevu'it, prophetic Kabbalah.
- Kabbalist**, student of Kabbalah.
- ***Kaddish**, liturgical doxology.
- Kahal**, Jewish congregation; among Ashkenazim, *kehillah*.

- ***Kalām** (Ar.), science of Muslim theology; adherents of the Kalām are called *mutakallimūn*.
- ***Karaite**, member of a Jewish sect originating in the eighth century which rejected rabbinic (*Rabbanite) Judaism and claimed to accept only Scripture as authoritative.
- ***Kasher**, ritually permissible food.
- Kashrut**, Jewish *dietary laws.
- ***Kavvanah**, “intention”; term denoting the spiritual concentration accompanying prayer and the performance of ritual or of a commandment.
- ***Kedushah**, main addition to the third blessing in the reader’s repetition of the *Amidah* in which the public responds to the precentor’s introduction.
- Kefar**, village; first part of name of many settlements in Israel.
- Kehillah**, congregation; see *kahal*.
- Kelippah** (pl. **kelippot**), “husk(s)”; mystical term denoting force(s) of evil.
- ***Keneset Yisrael**, comprehensive communal organization of the Jews in Palestine during the British Mandate.
- Keri**, variants in the masoretic (*masorah) text of the Bible between the spelling (*ketiv*) and its pronunciation (*keri*).
- ***Kerovah** (collective plural (corrupted) from **kerovez**), poem(s) incorporated into the **Amidah*.
- Ketiv**, see *keri*.
- ***Ketubbah**, marriage contract, stipulating husband’s obligations to wife.
- Kevuzah**, small commune of pioneers constituting an agricultural settlement in Erez Israel (evolved later into *kibbutz).
- ***Kibbutz** (pl. **kibbutzim**), larger-size commune constituting a settlement in Erez Israel based mainly on agriculture but engaging also in industry.
- ***Kiddush**, prayer of sanctification, recited over wine or bread on eve of Sabbaths and festivals.
- ***Kiddush ha-Shem**, term connoting martyrdom or act of strict integrity in support of Judaic principles.
- ***Kinah** (pl. **kinot**), lamentation dirge(s) for the Ninth of Av and other fast days.
- ***Kislev**, ninth month of the Jewish religious year, third of the civil, approximating to November–December.
- Klaus**, name given in Central and Eastern Europe to an institution, usually with synagogue attached, where *Talmud was studied perpetually by adults; applied by Ḥasidim to their synagogue (“*kloyz*”).
- ***Knesset**, parliament of the State of Israel.
- K(c)ohen** (pl. **K(c)ohanim**), Jew(s) of priestly (Aaronide) descent.
- ***Kolel**, (1) community in Erez Israel of persons from a particular country or locality, often supported by their fellow countrymen in the Diaspora; (2) institution for higher Torah study.
- Kosher**, see *kasher*.
- ***Kristallnacht** (Ger. “crystal night,” meaning “night of broken glass”), organized destruction of synagogues, Jewish houses, and shops, accompanied by mass arrests of Jews, which took place in Germany and Austria under the Nazis on the night of Nov. 9–10, 1938.
- ***Lag ba-Omer**, 33rd (Heb. **lag**) day of the **Omer* period falling on the 18th of *Iyyar; a semi-holiday.
- Lehi** (abbr. For Heb. ***Lohamei Herut Israel**, “Fighters for the Freedom of Israel”), radically anti-British armed underground organization in Palestine, founded in 1940 by dissidents from *I.Z.L.
- Levir**, husband’s brother.
- ***Levirate marriage** (Heb. *yibbum*), marriage of childless widow (*yevamah*) by brother (*yavam*) of the deceased husband (in accordance with Deut. 25:5); release from such an obligation is effected through *ḥalīzah*.
- LHY**, see *Lehi*.
- ***Lulav**, palm branch; one of the *Four Species used on *Sukkot together with the **etrog*, *hadass*, and *aravah*.
- ***Ma’aravot**, hymns inserted into the evening prayer of the three festivals, Passover, Shavuot, and Sukkot.
- Ma’ariv**, evening prayer; also called **arvit*.
- ***Ma’barah**, transition camp; temporary settlement for newcomers in Israel during the period of mass immigration following 1948.
- ***Maftir**, reader of the concluding portion of the Pentateuchal section on Sabbaths and holidays in synagogue; reader of the portion of the prophetic books of the Bible (**haftarah*).
- ***Maggid**, popular preacher.
- ***Maḥzor** (pl. **maḥzorim**), festival prayer book.
- ***Mamzer**, bastard; according to Jewish law, the offspring of an incestuous relationship.
- ***Mandate, Palestine**, responsibility for the administration of Palestine conferred on Britain by the League of Nations in 1922; mandatory government: the British administration of Palestine.
- ***Maqāma** (Ar. pl. **maqamāt**), poetic form (rhymed prose) which, in its classical arrangement, has rigid rules of form and content.
- ***Marḥeshvan**, popularly called Ḥeshvan; eighth month of the Jewish religious year, second of the civil, approximating to October–November.
- ***Marrano(s)**, descendant(s) of Jew(s) in Spain and Portugal whose ancestors had been converted to Christianity under pressure but who secretly observed Jewish rituals.
- Maskil** (pl. **maskilim**), adherent of *Haskalah (“Enlightenment”) movement.
- ***Masorah**, body of traditions regarding the correct spelling, writing, and reading of the Hebrew Bible.
- Masorete**, scholar of the masoretic tradition.
- Masoretic**, in accordance with the masorah.
- Melīzah**, in Middle Ages, elegant style; modern usage, florid style using biblical or talmudic phraseology.
- Mellah**, *Jewish quarter in North African towns.
- ***Menorah**, candelabrum; seven-branched oil lamp used in the Tabernacle and Temple; also eight-branched candelabrum used on *Ḥanukkah.
- Me’orah**, hymn inserted into the first benediction of the morning prayer (*Yozer ha-Me’orot*).
- ***Merkabah**, *merkavah*, “chariot”; mystical discipline associated with Ezekiel’s vision of the Divine Throne-Chariot (Ezek. 1).
- Meshullah**, emissary sent to conduct propaganda or raise funds for rabbinical academies or charitable institutions.
- ***Mezuzah** (pl. **mezuzot**), parchment scroll with selected Torah verses placed in container and affixed to gates and doorposts of houses occupied by Jews.
- ***Midrash**, method of interpreting Scripture to elucidate legal points (*Midrash Halakhah*) or to bring out lessons by stories or homiletics (*Midrash Aggadah*). Also the name for a collection of such rabbinic interpretations.
- ***Mikveh**, ritual bath.
- ***Minhag** (pl. **minhagim**), ritual custom(s); synagogal rite(s); especially of a specific sector of Jewry.
- ***Minḥah**, afternoon prayer; originally meal offering in Temple.

- ***Minyan**, group of ten male adult Jews, the minimum required for communal prayer.
- ***Mishnah**, earliest codification of Jewish Oral Law.
- Mishnah** (pl. **mishnayot**), subdivision of tractates of the Mishnah.
- Mitnagged** (pl. ***Mitnaggedim**), originally, opponents of *Ḥasidism in Eastern Europe.
- ***Mitzvah**, biblical or rabbinic injunction; applied also to good or charitable deeds.
- Mohel**, official performing circumcisions.
- ***Moshav**, smallholders' cooperative agricultural settlement in Israel, see *moshav ovedim*.
- Moshavah**, earliest type of Jewish village in modern Erez Israel in which farming is conducted on individual farms mostly on privately owned land.
- Moshav ovedim** ("workers' moshav"), agricultural village in Israel whose inhabitants possess individual homes and holdings but cooperate in the purchase of equipment, sale of produce, mutual aid, etc.
- ***Moshav shittufi** ("collective moshav"), agricultural village in Israel whose members possess individual homesteads but where the agriculture and economy are conducted as a collective unit.
- Mostegab** (Ar.), poem with biblical verse at beginning of each stanza.
- ***Muqaddam** (Ar., pl. **muqaddamūn**), "leader," "head of the community."
- ***Musaf**, additional service on Sabbath and festivals; originally the additional sacrifice offered in the Temple.
- Musar**, traditional ethical literature.
- ***Musar movement**, ethical movement developing in the latter part of the 19th century among Orthodox Jewish groups in Lithuania; founded by R. Israel *Lipkin (Salanter).
- ***Nagid** (pl. **negidim**), title applied in Muslim (and some Christian) countries in the Middle Ages to a leader recognized by the state as head of the Jewish community.
- Nakdan** (pl. **nakdanim**), "punctuator"; scholar of the 9th to 14th centuries who provided biblical manuscripts with masoretic apparatus, vowels, and accents.
- ***Nasi** (pl. **nesi'im**), talmudic term for president of the Sanhedrin, who was also the spiritual head and later, political representative of the Jewish people; from second century a descendant of Hillel recognized by the Roman authorities as patriarch of the Jews. Now applied to the president of the State of Israel.
- ***Negev**, the southern, mostly arid, area of Israel.
- ***Ne'ilah**, concluding service on the *Day of Atonement.
- Neofiti**, term applied in southern Italy to converts to Christianity from Judaism and their descendants who were suspected of maintaining secret allegiance to Judaism.
- ***Neology**; **Neolog**; **Neologism**, trend of *Reform Judaism in Hungary forming separate congregations after 1868.
- ***Nevelah** (lit. "carcass"), meat forbidden by the *dietary laws on account of the absence of, or defect in, the act of **sheḥitah* (ritual slaughter).
- ***New Christians**, term applied especially in Spain and Portugal to converts from Judaism (and from Islam) and their descendants; "Half New Christian" designated a person one of whose parents was of full Jewish blood.
- ***Niddah** ("menstruous woman"), woman during the period of menstruation.
- ***Nisan**, first month of the Jewish religious year, seventh of the civil, approximating to March-April.
- Nizozot**, "sparks"; mystical term for sparks of the holy light imprisoned in all matter.
- Nosaḥ (nusah)** "version"; (1) textual variant; (2) term applied to distinguish the various prayer rites, e.g., *nosaḥ Ashkenaz*; (3) the accepted tradition of synagogue melody.
- ***Notarikon**, method of abbreviating Hebrew works or phrases by acronym.
- Novella(e)** (Heb. **hiddush (im)*), commentary on talmudic and later rabbinic subjects that derives new facts or principles from the implications of the text.
- ***Nuremberg Laws**, Nazi laws excluding Jews from German citizenship, and imposing other restrictions.
- Ofan**, hymns inserted into a passage of the morning prayer.
- ***Omer**, first sheaf cut during the barley harvest, offered in the Temple on the second day of Passover.
- Omer, Counting of** (Heb. *Sefirat ha-Omer*), 49 days counted from the day on which the *omer* was first offered in the Temple (according to the rabbis the 16th of Nisan, i.e., the second day of Passover) until the festival of Shavuot; now a period of semi-mourning.
- Orah Ḥayyim**, see *Shulḥan Arukh*.
- ***Orthodoxy** (Orthodox Judaism), modern term for the strictly traditional sector of Jewry.
- ***Pale of Settlement**, 25 provinces of czarist Russia where Jews were permitted permanent residence.
- ***Palmah** (abbr. for Heb. *peluggot mahaz*; "shock companies"), striking arm of the *Haganah.
- ***Pardes**, medieval biblical exegesis giving the literal, allegorical, homiletical, and esoteric interpretations.
- ***Parnas**, chief synagogue functionary, originally vested with both religious and administrative functions; subsequently an elected lay leader.
- Partition plan(s)**, proposals for dividing Erez Israel into autonomous areas.
- Paytan**, composer of **piyyut* (liturgical poetry).
- ***Peel Commission**, British Royal Commission appointed by the British government in 1936 to inquire into the Palestine problem and make recommendations for its solution.
- Pesah**, *Passover.
- ***Pilpul**, in talmudic and rabbinic literature, a sharp dialectic used particularly by talmudists in Poland from the 16th century.
- ***Pinkas**, community register or minute-book.
- ***Piyyut**, (pl. **piyyutim**), Hebrew liturgical poetry.
- ***Pizmon**, poem with refrain.
- Posek** (pl. ***posekim**), decisor; codifier or rabbinic scholar who pronounces decisions in disputes and on questions of Jewish law.
- ***Prosbul**, legal method of overcoming the cancelation of debts with the advent of the *sabbatical year.
- ***Purim**, festival held on Adar 14 or 15 in commemoration of the delivery of the Jews of Persia in the time of *Esther.
- Rabban**, honorific title higher than that of rabbi, applied to heads of the *Sanhedrin in mishnaic times.
- ***Rabbanite**, adherent of rabbinic Judaism. In contradistinction to *Karaite.
- Reb, rebbe**, Yiddish form for rabbi, applied generally to a teacher or ḥasidic rabbi.
- ***Reconstructionism**, trend in Jewish thought originating in the United States.
- ***Reform Judaism**, trend in Judaism advocating modification of *Orthodoxy in conformity with the exigencies of contemporary life and thought.

- Resh galuta**, lay head of Babylonian Jewry (see exilarch).
- Responsum** (pl. ***responsa**), written opinion (*teshuvah*) given to question (*she'elah*) on aspects of Jewish law by qualified authorities; pl. collection of such queries and opinions in book form (*she'elot u-teshuvot*).
- *Rishonim**, older rabbinical authorities. Distinguished from later authorities (**aharonim*).
- *Rishon le-Zion**, title given to Sephardi chief rabbi of Erez Israel.
- *Rosh Ha-Shanah**, two-day holiday (one day in biblical and early mishnaic times) at the beginning of the month of ***Tishri** (September–October), traditionally the New Year.
- Rosh Hodesh**, ***New Moon**, marking the beginning of the Hebrew month.
- Rosh Yeshivah**, see ***Yeshivah**.
- *R.S.H.A.** (initials of Ger. *Reichssicherheitshauptamt*: “Reich Security Main Office”), the central security department of the German Reich, formed in 1939, and combining the security police (Gestapo and Kripo) and the S.D.
- *Sanhedrin**, the assembly of ordained scholars which functioned both as a supreme court and as a legislature before 70 C.E. In modern times the name was given to the body of representative Jews convoked by Napoleon in 1807.
- *Savora** (pl. **savoraim**), name given to the Babylonian scholars of the period between the **amoraim* and the **geonim*, approximately 500–700 C.E.
- S.D.** (initials of Ger. *Sicherheitsdienst*: “security service”), security service of the ***S.S.** formed in 1932 as the sole intelligence organization of the Nazi party.
- Seder**, ceremony observed in the Jewish home on the first night of Passover (outside Erez Israel first two nights), when the ***Haggadah** is recited.
- *Sefer Torah**, manuscript scroll of the Pentateuch for public reading in synagogue.
- *Sefirot, the ten**, the ten “Numbers”; mystical term denoting the ten spheres or emanations through which the Divine manifests itself; elements of the world; dimensions, primordial numbers.
- Selektion** (Ger.), (1) in ghettos and other Jewish settlements, the drawing up by Nazis of lists of deportees; (2) separation of incoming victims to concentration camps into two categories – those destined for immediate killing and those to be sent for forced labor.
- Seliḥah** (pl. ***seliḥot**), penitential prayer.
- *Semikhah**, ordination conferring the title “rabbi” and permission to give decisions in matters of ritual and law.
- Sephardi** (pl. ***Sephardim**), Jew(s) of Spain and Portugal and their descendants, wherever resident, as contrasted with ***Ashkenazi(m)**.
- Shabbatean**, adherent of the pseudo-messiah ***Shabbetai Zevi** (17th century).
- Shaddai**, name of God found frequently in the Bible and commonly translated “Almighty.”
- *Shaharit**, morning service.
- Shali'ah** (pl. **sheliḥim**), in Jewish law, messenger, agent; in modern times, an emissary from Erez Israel to Jewish communities or organizations abroad for the purpose of fund-raising, organizing pioneer immigrants, education, etc.
- Shalmonit**, poetic meter introduced by the liturgical poet ***Solomon ha-Bavli**.
- *Shammash**, synagogue beadle.
- *Shavuot**, Pentecost; Festival of Weeks; second of the three annual pilgrim festivals, commemorating the receiving of the Torah at Mt. Sinai.
- *Sheḥitah**, ritual slaughtering of animals.
- *Shekhinah**, Divine Presence.
- Shelishit**, poem with three-line stanzas.
- *Sheluheḥi Erez Israel** (or **shadarim**), emissaries from Erez Israel.
- *Shema** ([Yisrael]; “hear... [O Israel];” Deut. 6:4), Judaism’s confession of faith, proclaiming the absolute unity of God.
- Shemini Azeret**, final festal day (in the Diaspora, final two days) at the conclusion of ***Sukkot**.
- Shemittah**, ***Sabbatical year**.
- Sheniyyah**, poem with two-line stanzas.
- *Shephelah**, southern part of the coastal plain of Erez Israel.
- *Shevat**, eleventh month of the Jewish religious year, fifth of the civil, approximating to January–February.
- *Shi'ur Komah**, Hebrew mystical work (c. eighth century) containing a physical description of God’s dimensions; term denoting enormous spacial measurement used in speculations concerning the body of the ***Shekhinah**.
- Shivah**, the “seven days” of ***mourning** following burial of a relative.
- *Shofar**, horn of the ram (or any other ritually clean animal excepting the cow) sounded for the memorial blowing on ***Rosh Ha-Shanah**, and other occasions.
- Shoḥet**, person qualified to perform ***sheḥitah**.
- Shomer, *Ha-Shomer**, organization of Jewish workers in Erez Israel founded in 1909 to defend Jewish settlements.
- *Shtadlan**, Jewish representative or negotiator with access to dignitaries of state, active at royal courts, etc.
- *Shtetl**, Jewish small-town community in Eastern Europe.
- *Shulḥan Arukh**, Joseph ***Caro**’s code of Jewish law in four parts: *Orah Hayyim*, laws relating to prayers, Sabbath, festivals, and fasts; *Yoreh De'ah*, dietary laws, etc; *Even ha-Ezer*, laws dealing with women, marriage, etc; *Hoshen Mishpat*, civil, criminal law, court procedure, etc.
- Siddur**, among Ashkenazim, the volume containing the daily prayers (in distinction to the ***mahzor** containing those for the festivals).
- *Simhat Torah**, holiday marking the completion in the synagogue of the annual cycle of reading the Pentateuch; in Erez Israel observed on Shemini Azeret (outside Erez Israel on the following day).
- *Sinai Campaign**, brief campaign in October–November 1956 when Israel army reacted to Egyptian terrorist attacks and blockade by occupying the Sinai peninsula.
- Sitra ahra**, “the other side” (of God); left side; the demoniac and satanic powers.
- *Sivan**, third month of the Jewish religious year, ninth of the civil, approximating to May–June.
- *Six-Day War**, rapid war in June 1967 when Israel reacted to Arab threats and blockade by defeating the Egyptian, Jordanian, and Syrian armies.
- *S.S.** (initials of Ger. *Schutzstaffel*: “protection detachment”), Nazi formation established in 1925 which later became the “elite” organization of the Nazi Party and carried out central tasks in the “Final Solution.”
- *Status quo ante** community, community in Hungary retaining the status it had held before the convention of the General Jew-

- ish Congress there in 1868 and the resultant split in Hungarian Jewry.
- ***Sukkah**, booth or tabernacle erected for *Sukkot when, for seven days, religious Jews “dwell” or at least eat in the *sukkah* (Lev. 23:42).
- ***Sukkot**, festival of Tabernacles; last of the three pilgrim festivals, beginning on the 15th of Tishri.
- Sūra** (Ar.), chapter of the Koran.
- Ta’anit Esther** (Fast of *Esther), fast on the 13th of Adar, the day preceding Purim.
- Takkanah** (pl. ***takkanot**), regulation supplementing the law of the Torah; regulations governing the internal life of communities and congregations.
- ***Tallit (gadol)**, four-cornered prayer shawl with fringes (*zizit*) at each corner.
- ***Tallit katan**, garment with fringes (*zizit*) appended, worn by observant male Jews under their outer garments.
- ***Talmud**, “teaching”; compendium of discussion on the Mishnah by generations of scholars and jurists in many academies over a period of several centuries. The Jerusalem (or Palestinian) Talmud mainly contains the discussions of the Palestinian sages. The Babylonian Talmud incorporates the parallel discussion in the Babylonian academies.
- Talmud torah**, term generally applied to Jewish religious (and ultimately to talmudic) study; also to traditional Jewish religious public schools.
- ***Tammuz**, fourth month of the Jewish religious year, tenth of the civil, approximating to June–July.
- Tanna** (pl. ***tannaim**), rabbinic teacher of mishnaic period.
- ***Targum**, Aramaic translation of the Bible.
- ***Tefillin**, phylacteries, small leather cases containing passages from Scripture and affixed on the forehead and arm by male Jews during the recital of morning prayers.
- Tell** (Ar. “mound,” “hillock”), ancient mound in the Middle East composed of remains of successive settlements.
- ***Terefah**, food that is not **kasher*, owing to a defect on the animal.
- ***Territorialism**, 20th century movement supporting the creation of an autonomous territory for Jewish mass-settlement outside Erez Israel.
- ***Tevet**, tenth month of the Jewish religious year, fourth of the civil, approximating to December–January.
- Tikkun** (“restitution,” “reintegration”), (1) order of service for certain occasions, mostly recited at night; (2) mystical term denoting restoration of the right order and true unity after the spiritual “catastrophe” which occurred in the cosmos.
- Tishah be-Av**, Ninth of *Av, fast day commemorating the destruction of the First and Second Temples.
- ***Tishri**, seventh month of the Jewish religious year, first of the civil, approximating to September–October.
- Tokheḥah**, reproof sections of the Pentateuch (Lev. 26 and Deut. 28); poem of reproof.
- ***Torah**, Pentateuch or the Pentateuchal scroll for reading in synagogue; entire body of traditional Jewish teaching and literature.
- Tosafist**, talmudic glossator, mainly French (12–14th centuries), bringing additions to the commentary by *Rashi.
- ***Tosafot**, glosses supplied by tosafist.
- ***Tosefta**, a collection of teachings and traditions of the *tannaim*, closely related to the Mishnah.
- Tradent**, person who hands down a talmudic statement on the name of his teacher or other earlier authority.
- ***Tu bi-Shevat**, the 15th day of Shevat, the New Year for Trees; date marking a dividing line for fruit tithing; in modern Israel celebrated as arbor day.
- ***Uganda Scheme**, plan suggested by the British government in 1903 to establish an autonomous Jewish settlement area in East Africa.
- ***Va’ad Le’ummi**, national council of the Jewish community in Erez Israel during the period of the British *Mandate.
- ***Wannsee Conference**, Nazi conference held on Jan. 20, 1942, at which the planned annihilation of European Jewry was endorsed.
- Waqf** (Ar.), (1) a Muslim charitable pious foundation; (2) state lands and other property passed to the Muslim community for public welfare.
- ***War of Independence**, war of 1947–49 when the Jews of Israel fought off Arab invading armies and ensured the establishment of the new State.
- ***White Paper(s)**, report(s) issued by British government, frequently statements of policy, as issued in connection with Palestine during the *Mandate period.
- ***Wissenschaft des Judentums** (Ger. “Science of Judaism”), movement in Europe beginning in the 19th century for scientific study of Jewish history, religion, and literature.
- ***Yad Vashem**, Israel official authority for commemorating the *Holocaust in the Nazi era and Jewish resistance and heroism at that time.
- Yeshivah** (pl. ***yeshivot**), Jewish traditional academy devoted primarily to study of rabbinic literature; *rosh yeshivah*, head of the yeshivah.
- YHWH**, the letters of the holy name of God, the Tetragrammaton.
- Yibbum**, see levirate marriage.
- Yihud**, “union”; mystical term for intention which causes the union of God with the **Shekhinah*.
- Yishuv**, settlement; more specifically, the Jewish community of Erez Israel in the pre-State period. The pre-Zionist community is generally designated the “old yishuv” and the community evolving from 1880, the “new yishuv.”
- Yom Kippur, Yom ha-Kippurim**, *Day of Atonement, solemn fast day observed on the 10th of Tishri.
- Yoreh De’ah**, see Shulḥan Arukh.
- Yozer**, hymns inserted in the first benediction (*Yozer Or*) of the morning **Shema*.
- ***Zaddik**, person outstanding for his faith and piety; especially a ḥasidic rabbi or leader.
- Zimzum**, “contraction”; mystical term denoting the process whereby God withdraws or contracts within Himself so leaving a primordial vacuum in which creation can take place; primordial exile or self-limitation of God.
- ***Zionist Commission (1918)**, commission appointed in 1918 by the British government to advise the British military authorities in Palestine on the implementation of the *Balfour Declaration.
- Zyyonei Zion**, the organized opposition to Herzl in connection with the *Uganda Scheme.
- ***Zizit**, fringes attached to the **tallit* and **tallit katan*.
- ***Zohar**, mystical commentary on the Pentateuch; main textbook of *Kabbalah.
- Zulat**, hymn inserted after the **Shema* in the morning service.

Initial "A" at the opening of the Book of Judith in a bible from Citeau, Eastern France, 1109, showing Judith decapitating Holofernes. Dijon, Bibliothèque Municipale, Ms. 14, fol. 158.

AA-ALP

AACHEN (Aix-la-Chapelle; in Jewish sources: שׂוֹן אַאָא, שׂא), city on the German-Belgian border; former capital of the Carolingian Empire. The delegation sent by *Charlemagne to the caliph Harun al-Rashid in 797 included a Jew, Isaac, who probably acted as interpreter or guide, and subsequently reported back to Aachen. Jewish merchants were active in Aachen by about 820. A "Jews' street" is known to have existed from the 11th century. The Aachen community, which paid only 15 marks in tax to the emperor in 1241, cannot have been large. In 1349 the Jews were "given" to the count of Juelich, who received their taxes and authorized Jewish residence in Aachen. The Jews were expelled from Aachen in 1629, most settling in neighboring Burtscheid. However, Jewish moneylenders were again active in Aachen about ten years later. They were included in the municipal jurisdiction in 1777. Prior to the inauguration of a Jewish cemetery in 1823, the Jews of Aachen buried their dead in Vaals across the border in the Netherlands. In 1847 the community was organized under the Prussian Jewish Community Statute. A Jewish elementary school was founded in 1845. The synagogue, built in 1862, was destroyed in the 1938 *Kristallnacht.

The Jewish population had increased from 114 in 1816 to 1,345 by 1933. In 1939, after emigration and arrests, there were 782 Jews living in the city. Others subsequently managed to

flee and the rest were deported between March 1942 and September 1944. After the war, there were 62 Jews in Aachen. A new synagogue and communal center were built at the expense of the German government in 1957. In 1966 the Jewish community of Aachen and environs numbered 163. As a result of the immigration of Jews from the former Soviet Union, the number of community members increased from 326 in 1989 to 1,434 in 2003. Another new synagogue and community center were inaugurated in 1995.

AARGAU, canton of northern Switzerland. A few Jewish families are known to have lived there during the Middle Ages. From the 17th to the mid-19th centuries Aargau remained the sole area of permanent Jewish settlement in Switzerland; Jews lived in the two communities of *Endingen and Lengnau, and it was they who waged the struggle for Jewish *emancipation in Switzerland. In the 18th century Aargau Jews obtained rights of residence and movement; these were conferred by special safe conducts and letters of protection against the payment

of high imposts, usually granted for a 16-year period. Jewish occupations were restricted to participation in the markets, the cattle and horse trade, peddling, and estate brokerage. Both communities possessed their own synagogues, sharing a cemetery and rabbi. The Jews in Aargau continued to pay the special taxes until their abolition by the Helvetic Republic in 1798. Rights of residence, trade, and ownership of real estate were granted to the Jews by the Helvetic government but were later revoked by the *Judengesetz* (Jews' Law) in 1809. The independent canton of Aargau was founded in 1798/1803. A law regularizing the status of the Jewish communities was passed in 1824 and, in conjunction with the General Education Act of 1835, regulated Jewish life and communal organization on the same principles as those governing similar non-Jewish institutions in the canton. In the 1850s two new synagogues were built, one in Endingen and one in Lengnau, and were later declared cantonal monuments. However, since the Jewish communities were not recognized as communities of local citizens, their members were debarred from canton citizenship. The Great Council of Canton Aargau authorized Jewish emancipation in 1862, but was bitterly opposed by the popular anti-Jewish movement and was subsequently repealed. The Jews of Aargau only obtained full rights of citizenship in 1878 after the Swiss federal parliament had intervened in their favor. Jews began to leave the region for other parts of Switzerland in the middle of the 19th century, their numbers dwindling from 1,562 in 1850 to 990 in 1900 and to 496 in 1950. In 1859 in the town of Baden a Jewish community was founded which built its synagogue in 1913 and erected a cemetery (1879). Between 1900 and the 1940s a small yeshivah was active under Rabbi Akiba Krausz. A Jewish Swiss Home for the Aged was established in Lengnau in 1903. At the turn of the 20th century services were sometimes held in the synagogues on Rosh Ḥodesh and for marriages. Aargau Jewish history came to public attention with the appointment of the first Jewish member of the Swiss government, Ruth *Dreifuss. In 2000, 342 Jews lived in Aargau.

[Florence Guggenheim-Gruenberg / Uri Kaufmann (2nd ed.)]

AARON (Heb. אַהֲרֹן), brother of *Moses and *Miriam; founder of the priesthood in Israel.

Biblical Information

Aaron belonged to the tribe of *Levi (Ex. 4:14) and was the elder son of *Amram and *Jochebed (*ibid.* 6:20; Num. 26:59; 1 Chron. 5:29; 23:13). He was senior to Moses by three years

(Ex. 7:7), but younger than his sister (as may be inferred from Ex. 2:4). There is no narrative recounting Aaron's birth and nothing is known of his early life and upbringing. He apparently stayed in Egypt all the time Moses was in Midian and became known as an eloquent speaker (4:14). Aaron's marriage to Elisheba, daughter of Amminadab (6:23), allied him with one of the most distinguished families of the important tribe of Judah. His brother-in-law, Nahshon, was a chieftain of that tribe (Num. 1:7; 2:3; 7:12,17; 10:14) and a lineal ancestor of David (Ruth 4:19; 1 Chron. 2:10). The marital union thus symbolized the religio-political union of the two main hereditary institutions of ancient Israel, the house of David and the house of Aaron. Four sons were born of the marriage, Nadab, Abihu, Eleazar, and Ithamar (Ex. 6:23; 28:1; Num. 3:2; 26:60; 1 Chron. 5:29; 24:1).

The biblical narrative assigns Aaron a role subordinate to that of Moses. No mention is made of him in the initial theophany (Ex. 3:18; 4:12), and he is introduced into the events of the Exodus only because Moses resists the divine commission (4:14–16). He is to be Moses' spokesman ("prophet") to Israel (4:15–16) and to Pharaoh (7:1–2). He receives a revelation from God to go to meet Moses returning from Midian (4:27), and together the two brothers appear before the people, with Aaron performing his signs in their presence (4:28–30). Later, he performs wonders before Pharaoh. His rod turns into a serpent that swallows the serpent rods of the Egyptian magicians (7:9–12). In the ten plagues that befall the Egyptians, Aaron acts jointly with Moses in the first plague (7:19 ff.), operates alone only in the next two (8:1 ff., 12 ff.), is involved with Moses in the sixth and eighth (9:8 ff.; 10:3 ff.), and does not appear at all in the fifth and ninth (9:1–7; 10:21 ff.). For the rest, he is merely a passive associate of his brother. Although Aaron functions whenever the Egyptian magicians are present, it is significant that even where he plays an active role in performing the marvels, it is not by virtue of any innate ability or individual initiative, but solely by divine command mediated through Moses. Aaron's sons do not inherit either his wondrous powers or his potent rod. The secondary nature of Aaron's activities in the cycle of plagues is further demonstrated by the circumstance that he never speaks to Pharaoh alone and that only Moses actually entreats God to remove the plagues, although Pharaoh frequently addresses his request to both brothers (8:4, 8, 21, 25–26; 9:27 ff., 33; 10:16 ff.).

Strangely, Aaron plays no part at all in the events immediately attending the escape from Egypt, the crossing of the Red Sea, the victory hymns, and the water crisis at Marah (13:17; 16:1). He reappears again in connection with the incident of the manna (16:2–36), and at the battle with the Amalekites when, jointly with Hur, he supports Moses' hands stretched heavenward to ensure victory (17:10–13). Together with the elders of Israel, he participates in Jethro's sacrificial meal (18:12), but plays no role in the subsequent organization of the judicial administration. He does, however, again jointly with Hur, deputize for Moses in his judicial capacity while the latter goes up to the Mount of God to receive the Tablets (24:14). At the

revelation at Sinai, Aaron again is a minor participant. He is distinguished from the “priests” and the people in being allowed to ascend the mount (19:24), but has the same status as his two sons, Nadab and Abihu, and the seventy elders of Israel in having to maintain a distance from Moses, although they all “see the God of Israel” and survive (24:1, 9 ff.).

It was during his brother’s prolonged absence on the mount that, yielding to popular insistence, he fashioned a golden calf that became a cause of apostasy (ch. 32). On the one hand, the text stresses the grave responsibility of Aaron in this incident. He makes no attempt to dissuade the would-be idolaters, but himself issues instructions, produces the molten image, builds an altar, and proclaims a religious festival (32:2–5). His culpability is thrice emphasized (32:2, 25, 35), and the contrast between his actions and the zealous fidelity of the tribe of Levi is apparent (32:26–29). On the one hand, God wanted to destroy Aaron, but he was saved by virtue of Moses’ intercession on his behalf (Deut. 9:20). On the other hand, there is a perceptible tendency to de-emphasize Aaron’s share in the episode. The initiative for the idol comes from the people who approach Aaron menacingly (Ex. 32:1). They, not he, identify the calf with a divinity (32:4). He does not participate in the worship and is not mentioned in God’s indictment of the people (32:7 ff.); nor is his name mentioned in Moses’ intercession (32:11–14, 31–32). The making of the calf is attributed to the people (32:20; cf. Deut. 9:21) and is also described as though the particular bovine form emerged almost accidentally (Ex. 32:24). Despite Aaron’s involvement, he was neither punished nor disqualified from the priesthood. The same inclination to play down Aaron’s participation in the calf cult is present in the poetic version of the story (Ps. 106:19–22; cf. 106:16; Neh. 9:18).

When it comes to constructing the portable sanctuary, Aaron is conspicuously absent, but he and his sons are appointed priests and are consecrated into that office by Moses (Ex. 28–29; Lev. 8–9). During the ceremonies marking the investiture, his two sons, Nadab and Abihu, died mysteriously, a calamity that he bore in silent resignation (Lev. 10:1–3; Num. 3:4; 26:61; cf. 1 Chron. 24:2). Aaron’s other two sons continued to serve in the priestly office (Num. 3:4; 1 Chron. 24:2) and Eleazar succeeded his father as high priest (Num. 20:25–28; Deut. 10:6; cf. Josh. 24:33). No reason is given for the selection of Aaron as the archetypal high priest and founder of a hereditary priesthood to the extent that “the house of Aaron” became synonymous with the only legitimate priestly line (see *Aaronides). After his induction as high priest, Aaron is no longer the attendant of Moses, nor does he occupy a position of secular authority, his activities being restricted to the area of the cult. Yet even here, it is Moses, not Aaron, who is the real founder of the cult and who generally receives the divine instructions relative to the priestly duties (cf. Lev. 6:1, 12, 17; et al.). It is to him, too, that the priests are answerable (cf. Lev. 10:16–20). But on one occasion Aaron corrected Moses’ understanding of a sacrificial law (*ibid.*).

Nevertheless, Aaron undoubtedly held an outstanding

position of leadership, as may be determined by the fact that God often addresses Moses and Aaron jointly (Ex. 9:8–10; 12:1, 43; Lev. 11:1; 13:1; 14:33; 15:1; et al.) and, sometimes, even Aaron alone (Lev. 10:8; Num. 18:1, 8). With Moses, Aaron shares the popular hostility to authority (Ex. 16:2–36; Num. 14:1–45; 16:3; 20:1–13). In the extra-pentateuchal literature his name is coupled with that of his brother as bearers of the divine mission (Josh. 24:5; 1 Sam. 12:6, 8; Micah 6:4; Ps. 77:21; 105:26; 106:16; cf. 99:6). Significantly, the period of national mourning at his death is the same as that for Moses (Num. 20:29; cf. Deut. 34:8) and throughout biblical literature the name Aaron remains unique to this one personality. A hint of friction between Moses and his brother is apparent from one narrative in which Aaron and his sister were involved in some act of opposition to Moses’ prophetic preeminence. Probably because of priestly immunity he escaped divine punishment, but Miriam was stricken. At Aaron’s behest, Moses successfully interceded with God on her behalf (Num. 12).

On another occasion, Aaron, together with Moses, was the target of a widespread insurrection against the monopoly of leadership. The exclusive priestly privileges of Aaron and his family against the challenge of Korah and his associates were upheld in a trial by ordeal, which led to the destruction of the rebels (Num. 16). This aroused the indignation of the people which, in turn, brought down upon them divine anger in the form of a plague. Through an incense offering, brought at Moses’ directive, Aaron was able to make expiation for the people and to check the outbreak (Num. 17:1–15). This event necessitated a further vindication of Aaron’s priestly preeminence. Twelve staffs, one from each tribe and each inscribed with the name of the tribal chieftain, were deposited in the Tent of Meeting. The following day, that of Levi, on which Aaron’s name was written, sprouted blossoms and almonds. Henceforth, Aaron’s staff lay in the Tent of Meeting as a witness to his unchallengeable priestly supremacy (17:16–26; cf. 20:8 ff.). Further, the subordination of the Levites to Aaron and his sons and their respective duties and privileges in the service of the sanctuary were unequivocally defined (17:18).

Aaron died on the first day of the fifth month at the age of 123 years (33:38–39). The account of his passing is unusually detailed, doubtlessly due to the fact that it involved the all-important matter of priestly succession. The Israelites arrived at Mount Hor from Kadesh and, by divine decree, Aaron ascended the mount accompanied by Moses and Eleazar. The high priest was stripped of the garments of his office and his son was invested in his stead. Aaron then died on the summit of the mount and a 30-day mourning period was held by the entire community (20:22–29; cf. 33:37–38; Deut. 32:50). It should be noted that another tradition has the place of Aaron’s death as Moserah (Deut. 10:6), which was seven stages behind Mount Hor in the wilderness wanderings (Num. 33:31–37). Like Moses, Aaron was not permitted to enter the promised land in punishment for disobeying the divine command in connection with the waters of Meribah (20:12, 24; 27:13–14; cf. Deut. 32:50–51), although no clear account of Aaron’s role

in that incident has been preserved (Num. 20:10). A poetic digest of the narrative mentions only Moses as suffering the consequences of the people's provocation (Ps. 106:32). No explanation for Aaron's death in the wilderness is given in either Numbers 33:37–38 or Deuteronomy 10:6, except that the latter passage follows the story of the golden calf and the sequence may possibly imply a connection between the two events.

Critical View

The difficulty of reconstructing a comprehensive biography and evaluation of Aaron is due to the meager and fragmentary nature of the data available. It is aggravated by the fact that the details are scattered over several originally independent sources which, in the form they have come down to us, represent an interweaving of various traditions. This explains the differences in approach, emphasis, and detail, outlined above. Moreover, consideration has to be given to the possibility that the picture of Aaron, the archetypal high priest, may well be the idealized retrojection of a later period, and that subsequent developments have influenced the narratives in the Pentateuch. While there is no unanimity among scholars of the source critical school as to the proper distribution of many passages among the different pentateuchal sources, especially in regard to J and E, there is a wide measure of agreement that in the original J and E documents Aaron was neither a priest nor a levite, and that he had no part in the narrative of the ten plagues. In fact, it is regarded as likely that J did not originally mention Aaron. To E is attributed the picture of Aaron as Miriam's brother, as Moses' attendant, as participating in the war with Amalek, Jethro's sacrifice, and the golden calf, as well as acting together with Miriam in opposition to Moses. The redactor who combined JE introduced the story of Aaron as a levite and as Moses' brother and spokesman and, possibly, portrayed him as assisting in the plagues. There is no agreement as to whether D originally mentioned Aaron, or as to the source of the few references to him in that document. To the P source is assigned the exalted image of Aaron as the archetypal and only legitimate levitical high priest, and a leader of the people. Here, too, is the source of the Aaronite genealogies and the notices of his age and his death.

[Nahum M. Sarna]

In the Aggadah

The many praises heaped on Aaron in the *aggadah* are due to the desire to minimize his guilt with regard to the sin of the golden calf and to explain why, despite it, he was worthy to be appointed high priest (see: Sif. Deut. 307).

Aaron had great love for Moses. He was completely free of envy and rejoiced in his success. Moses was reluctant to assume his call (Ex. 4:14), because Aaron had for long been the prophet and spokesman of the Jews in Egypt, and Moses was unwilling to supplant him, until God told him to assume the leadership. Far from resenting it, Aaron was glad. For this he was given the reward of wearing the holy breastplate (*Urim* and *Thummim*) upon his heart (Tanh. Ex. 27). Aaron is espe-

cially praised for his love of peace. Unlike Moses, whose attitude was "let the law bend the mountain" (i.e., the law must be applied), Aaron loved peace and pursued peace.

Aaron never reproached a person by telling him that he had sinned, but employed every stratagem in order to reconcile disputes (ARN² 48) especially between man and wife (*ibid.*, emended text p. 50). According to one account this love for peace determined Aaron's attitude toward the golden calf. He could have put to death all those who worshiped it, as Moses did, but his love and compassion for the people prevented him. He regarded peaceful persuasion as the best way of inculcating love of the Torah, and thus Hillel declared: "Be of the disciples of Aaron, loving peace and pursuing peace, loving one's fellow men and bringing them nigh to the Torah" (Avot 1:12). For this behavior Aaron was chosen to be the high priest; God knew that his intentions were honorable (Ex. R. 37:2). According to other accounts Aaron agreed to make the golden calf after procrastinating as much as possible, because his life was threatened, and he feared the same fate as overtook Hur, who according to the Midrash, was assassinated by the people when he opposed them (Ex. R. 41:9; Sanh. 7a). Aaron's rod possessed the same miraculous powers as the staff of Moses and some aggadic sayings make them identical (Yal. Ps. 869). With it, Aaron brought about the first three of the Ten Plagues because the water of the Nile, that shielded Moses as an infant, should not suffer through Moses, by being turned into blood or bringing forth frogs, and the earth that afforded Moses protection when it concealed the slain Egyptian overseer (Ex. 2:12) should not bring forth lice by his action. Both the *aggadah* and Josephus emphasize the great spiritual strength of Aaron at the death of his two sons Nadab and Abihu; he saw his two "chickens" bathed in blood and kept silent (Lev. R. 20:4). "He withstood his ordeal with great courage because his soul was inured to every calamity" (Jos., Ant., 3:208). He did not question God's dealing with him, as Abraham did not when ordered to sacrifice his only son Isaac (Sifra 46a).

Aaron was one of those who died not on account of sin "but through the machinations of the serpent" (Sif. Deut. 338–9). When Aaron died "all the house of Israel" wept for him (Num. 20:29), while after the death of Moses, the stern leader who reprimanded them by harsh words, only part of the people, "the men," bewailed him (Sifra 45d).

[Elimelech Epstein Halevy]

In Christian Tradition

As the ancestor and founder of the one priesthood entitled to offer acceptable sacrifice to God, Aaron was taken as the type of Christ in the New Testament and later Christian tradition: he offers sacrifice, mediates between the people and God, and ministers in the Holy of Holies. The typology is developed especially in the *Epistle to the Hebrews* which stresses the superiority of Jesus' perfect sacrifice to the animal sacrifices of the Aaronic priesthood. Jesus, the high priest of the New Covenant, is foreshadowed by Aaron, the high priest of the Old Covenant, but Christ's priesthood, which is "after the order of

Melchizedek," supersedes and replaces the inferior priesthood of Aaron (see Heb. 5:2–5; 7:11–12; 8:23–27). Influenced by this distinction, the Mormons distinguished in their hierarchy between a lesser, Aaronic priesthood, and the office of high priest which is according to the order of Melchizedek.

[R.J. Zwi Werblowsky]

In the Koran and in Islamic Literature

Like some other biblical figures, Aaron (Arabic: Hārūn) only became known to Muhammad gradually. In the Koran (37:114–20), Moses and Aaron appear together as those who were redeemed (from Egyptian slavery) at the head of their people and to whom the Book was given. In 20:29–30, Moses requests, in a general way, that his brother Aaron be his helper (*wazīr*; cf. also 25:37; see below). In 26:12, he voices his fear that he might be inhibited and unable to speak. Finally, in 28:35 Moses prays to God: "Aaron is more eloquent than I am; send him to strengthen me." Just as the Midrash tries in various ways to exonerate Aaron from all blame in the incident of the golden calf, so the Koran account of that incident assigns him the role of an onlooker and administrator rather than that of chief participant, and attributes the actual making of the golden calf to one Samiri (20:96–7; perhaps meaning "a Samaritan"; see the detailed discussion by H. Speyer, pp. 329–32). The post-koranic Islamic legend describes, in a number of fanciful variations, how Moses demonstrated to the children of Israel that he had not killed his brother, as they suspected, but that he had died a natural death. The relationship of these legends to similar stories in the late Midrash still needs elucidation. An attempt to explain why Mary, the mother of Jesus, is addressed during her pregnancy as "sister of Aaron" (Koran 19:27–29, cf. Ex. 15:20) is made by H. Speyer (p. 243, where further literature is available). The Koran never mentions the fact that Aaron was the father of the priestly tribe of the Kohanim; the ancient biographer of Muhammad, however, was aware of this fact. The two main Jewish tribes in Medina, the Quraiza and *Naḏīr, were called *al-Kāhīnān*, "the two priestly tribes." When Muhammad's Jewish spouse, Šafīyya, was insulted by one of the Prophet's other wives, he allegedly advised her to retort: "My father was Aaron and my uncle Moses." The word *wazīr*, by which Aaron's subordination to Moses is designated in the Koran, became the title "vizier," a kind of prime minister with wide or full powers in Islamic states.

AARON, ISRAEL (1859–1912), U.S. rabbi. Aaron was born in Lancaster, Pennsylvania, but at the age of 16 moved to Cincinnati to join the first class of students entering the Hebrew Union College. There was little in his background to suggest a rabbinical career. He attended public schools and his parents were immigrants from Hesse-Darmstadt, where his father had served as a junior officer in the military. In 1883, Aaron, together with Henry *Berkowitz, Joseph *Krauskopf, and David *Philipson, formed the first cohort of students to graduate from the new seminary. He later received a doctorate in divinity from the same institution. After graduating, Aaron served the synagogue in Fort Wayne, Indiana, for four years before assuming the pulpit of Temple Beth Zion in Buffalo, New York. Aaron thrived in this latter setting. He was a keen advocate of the reintroduction of congregational singing, seeking to extend the success of his own endeavors in Buffalo to the wider Reform movement. Aaron was also a scholar of medieval Jewry, writing about Muslim-Jewish relations during the Renaissance, and the Iberian Jewish community. As with many of his contemporaries in the Reform rabbinate, he was also active in the civic and cultural life of his city. Aaron was an immensely successful pulpit rabbi, overseeing both the building of a new temple and the enlargement of its membership. This new temple, designed by Edward Kent, an architect who later perished in the *Titanic* disaster, was also ill-omened for Aaron. Barely four days after a celebration organized by his congregation to honor his 25th year of service to Temple Beth Zion, Aaron died at age 52 of an ear infection. David Philipson, a lifelong friend, officiated at both services.

[Adam Mendelsohn (2nd ed.)]

AARON BEN AMRAM (ninth–tenth centuries), court banker in Baghdad. Having built up a position of wealth and influence as private bankers, Aaron and his partner Joseph b. Phinehas were eventually accorded the official position of *jahbadh*, whose functions involved the collecting of state revenues, the issue of bills of exchange on behalf of the government, and long-term loans to the caliph's administration. At the same time, Aaron and his firm acted as private bankers for the vizier and other high officials, who transacted through them their sometimes shady business. The firm attracted the patronage of Jewish merchants, both in Baghdad, where there was a special banking quarter, and from the provinces of the Islamic empire, and beyond. Their banking transactions involved them deeply in international trade. The contributions of Diaspora communities to the upkeep of the talmudical academies in Babylonia were conveyed by letters of credit

drawn on such banking houses as that of Aaron b. Amram and his partner. The influence which Aaron and his friends commanded in the Jewish community was commensurate with his position at court and in the economic life of the caliphate. Aaron sided with *Aaron b. Meir, the *gaon* in Erez Israel, in his controversy with *Saadia b. Joseph, over the supremacy of the Palestinian authorities in proclaiming the religious feasts. His sons and heirs, who inherited his official position and influence, enjoyed the confidence of Saadia, who made use of their services in dealing with the government.

[Walter Joseph Fischel]

AARON BEN BATASH (Ben Senton-Ben Shem Tov; Hārūn al-Yahūdī; d. 1465), vizier in Morocco. Aaron was a member of a family of Spanish origin who settled in *Fez. He served as banker and adviser to 'Abd al-Ḥaqq, sultan of Morocco, later becoming his vizier. He appointed a relative, Saul b. Batash, intendant of the palace and chief of police. Aaron is mentioned as a scholar and writer. He imposed heavy taxes and was accused of distributing the revenue among his impoverished coreligionists. Anti-Jewish agitation by Muslim divines induced a mob attack on the Jewish quarter in Fez. The sultan and his vizier were assassinated in May 1465. (See *Morocco.)

[David Corcos]

AARON BEN DAVID COHEN OF RAGUSA (d. 1656), rabbi and merchant in Ragusa (Dubrovnik). After studying in Venice, Aaron returned to his native city. There he engaged in commerce, his import and export business becoming the most important Jewish commercial house in the city. At the time of the blood accusation against Isaac Jesurun in 1622, Aaron and his father were arrested. In his will, Aaron gave his children guidance for moral behavior and regular study. He also provided for the publication of the *Zekan Aharon* (Venice, 1657), which included his own discourses on the Bible and those of his grandfather (and predecessor in the Ragusa rabbinate), Solomon Ohev (Oef), which were entitled *Shemen ha-Tov*. He appended an account of the blood accusation and a poem of thanksgiving for recital on the annual commemoration of the occurrence. This appendix was reprinted separately under the title *Ma'aseh Nissim* (Venice, 1798). The will, of unique interest for the history of Hebrew publishing, provided for the printing of 800 copies of the work of which 600 were to be exported.

BIBLIOGRAPHY: J. Tadić, *Jevreji u Dubrovniku* (1937), 329–45; 453–4 (French abstract); 431–4 (text of will).

AARON BEN ELIJAH (1328?–1369), Karaite scholar, philosopher, and jurist. Aaron, who lived in Nicomedia (near present-day Izmir, in Turkish Asia Minor), was called Aaron the

Younger to distinguish him from Aaron ben Joseph, or Aaron the Elder, who lived a century earlier. Aaron died in an epidemic, apparently in Constantinople.

Aaron's greatest work is a massive Hebrew trilogy of Karaite learning. The trilogy consists of *Ez Ḥayyim* ("Tree of Life"), dealing with philosophy of religion, composed in 1346; *Gan Eden* ("Garden of Eden"), dealing with Karaite law, composed in 1354; and *Keter Torah* ("Crown of the Law"), a commentary on the Pentateuch, written in 1362. According to Karaite tradition, Aaron wrote *Ez Ḥayyim* when he was 18 years old. This would place his birth in 1328, but it was probably earlier. The trilogy displays fully his great learning in both Karaite and Rabbanite literature. Aaron quotes of course the Karaite authorities, notably the 10th and 11th centuries Jerusalem scholars (his access to their Arabic writings was probably through Hebrew translations and abridgements). But he frequently quotes also the Talmud, Saadia, Rashi, Abraham Ibn Ezra, David Kimḥi, Maimonides, Naḥmanides, the earlier grammarians Judah ibn *Quraysh, Judah Ḥayyuj, Jonah ibn Janaḥ, and others. His Hebrew style, though tinted with arabisms, is clear and fluent.

Legal Teachings

As a jurist, Aaron followed mainly in the footsteps of his Karaite predecessors. He generally opposed any relaxation of the letter of scriptural law, even when it involved great exertion and hardship, except in cases of clear and evident danger to life. Yet on the other hand he accepted Jeshuah ben *Judah's reform of the Karaite law of incest, and rejected the excessive restrictions advocated by Karaite ascetics, such as the prohibition of eating meat in the Diaspora.

Biblical Exegesis

As a biblical commentator, Aaron followed the general Karaite policy of preferring the literal meaning of the biblical text, except where this meaning seemed to lead to conclusions that were blasphemous or illogical. However, this did not prevent him from indulging his philosophical bent by introducing allegorical and metaphorical interpretations where they seemed to him to be more suitable or advisable. His commentary on the Pentateuch has become the standard reference in all Karaite communities.

Philosophy

Aaron's *Ez Ḥayyim* was undoubtedly undertaken by him with the aim of creating a Karaite counterpart to *Maimonides' *Guide of the Perplexed*. Unlike Maimonides, Aaron did not venture to cut a new Aristotelian path for Karaite theological-philosophical thought. Instead, he remained attached to the *Mu'tazilite* philosophy (see *Kalam) which dominated his Karaite predecessors, as well as a number of pre-Maimonidean Rabbanite philosophers. Aaron is more orderly, clear, and logical than his Karaite forerunners, but he to a large extent rephrases what the latter had already said. Occasionally he avoids taking a definite stand on some points, and does not refrain from adopting some Aristotelian terminology and ar-

gumentation. Accordingly, and under the influence of Aaron b. Joseph, he attempted to forge some sort of reconciliation between traditional Karaite Kalamitic positions, regarding it as his duty to stand by the tradition of his predecessors, and more Modern positions.

Although Aaron had to deal with religion in a rational fashion, he begins his philosophical work with a wholesale condemnation of the Greek philosophers and of their brain-child, philosophy, in general. The teachings of the *Mu'tazilite* "investigators" (the term "philosopher" is objectionable to Aaron), on the other hand, are in accord with Scripture (as interpreted by the Karaites), while most Rabbanite thinkers, particularly Maimonides, follow the philosophers and thus often run counter to the true principles of the Torah. Reason is the chief instrument of true knowledge, hence God exists, for His existence was deduced rationally already by the patriarch Abraham. God is one, and is neither corporeal nor characterized by any corporeal qualities. His attributes are both negative and positive – indeed every negation implies a positive assertion – and not exclusively negative, as asserted by Maimonides. His providence and justice extend to all creatures, both human and subhuman. His revelations were given to His prophets for transmission to mankind as a guide to righteous life. The world (i.e., matter) is not eternal (as the Aristotelians taught) but created – this is the chief proof of God's existence – and consequently natural law is not immutable. The universe is made up of indivisible atoms having no magnitude and not eternal, and creation signifies combination of atoms, while dissolution signifies their separation. The atomic theory of matter, rejected by the Aristotelians, is thus reasserted by Aaron. Anthropomorphic descriptions of God in the Bible must be interpreted allegorically. God is all-knowing, but man's will is free, hence no evil can be charged to God; though God foreknows that the wicked will choose evil, the blame is theirs, not God's. Free will necessarily involves retribution according to each man's deserts. Scriptural ordinances are divided into revelational, whose necessity is so sublime that it is beyond rational explanation; and rational, whose necessity is deducible by reason. Good and evil are inherently so, and are not so merely because God approves of the former and condemns the latter. His approval or condemnation simply assists man in recognizing what is good and what is evil. Divine chastisement is not always punishment for antecedent sin: in the case of a righteous person like Job it is a Divine favor intended to increase the sufferer's reward in the world to come. This explains the prosperity of the wicked and the misery of the righteous on earth. Besides, physical bliss is, at best, a base and fleeting enjoyment, hence a more sublime spiritual reward must be postulated in the hereafter. This serves as one of the evidences of the immortality of the soul and the resurrection of the dead. All these philosophical problems are treated with constant reference to, and mostly refutation of, the teachings of the Aristotelians, as set forth by Maimonides.

Aaron also composed a number of poems and hymns, some of which were included in the official Karaite liturgy.

Gan Eden was published in Eupatoria, 1864 and 1866; Ramle 1972. *Ez Hayyim* was edited by Franz Delitzsch (Leipzig, 1841), and was re-edited, with an extensive commentary, by the Karaite scholar Simḥah Isaac Lutzky (Eupatoria, 1847). Extracts from these two works, in English translation, are found in L. Nemoy (ed.), *Karaite Anthology* (New Haven, 1952), 172–95, and most chapters of the latter in two Ph.D. dissertations mentioned below; *Keter Torah* was published in 1867 in Eupatoria; Ramle 1972.

[Leon Nemoy]

AARON (Arnd) BEN ISAAC BENJAMIN WOLF (c. 1670–1721), rabbi in Germany; nephew and son-in-law of the court Jew Jost *Liebmann, who appointed him head of the yeshivah he founded in Berlin. In 1697 Aaron became deputy rabbi and in 1709 rabbi of Berlin. Berlin Jewry was then rent by internal strife in which Aaron supported Liebman's widow in her struggle for leadership of the community against the court Jew Markus Magnus. When in 1713 the Magnus faction prevailed, Aaron left Berlin to become rabbi of Frankfurt on the Oder, which had been detached from the Berlin rabbinate to enable him to officiate there. Aaron was suspected of Sabbatean sympathies. In 1713 he approbated two works by Nehemiah *Hayon.

AARON BEN JACOB HA-KOHEN OF LUNEL (end of 13th and first half of 14th century), Provençal scholar. Despite his name, he was probably not from Lunel but from Narbonne, where his forefathers lived. In his well-known work *Orḥot Hayyim* he makes frequent mention of the customs of Narbonne and often cites the opinions of its scholars. Aaron's grandfather, David, wrote a work on the laws of *terefot* (*Orḥot Hayyim*, 2:420), and his great-grandfather, Isaac, was a pupil of *Abraham b. David of Posquières and wrote a commentary on the Jerusalem Talmud (Meiri, *Beit ha-Behirah* on *Avot*, ed. by B.Z. Prag (1964), 56). Aaron was among those exiled from France by Philip IV in 1306 and apparently reached Spain, subsequently proceeding to Majorca. *Orḥot Hayyim* is for the most part a compilation of *halakhot* taken verbatim from earlier halakhic works sometimes without indicating the source (e.g., extracts from Nathan b. Judah's *Ha-Maḥkim* and David

b. Levi's *Mikhtam*). It is a work of great importance and cites *halakhot* not found in any other source. Halakhic authorities esteemed it greatly, and it was cited by Jeroham b. Meshullam, Isaac b. Sheshet, Simeon Duran, Levi ibn Ḥabib, Joseph Caro, and others. Its sources are extremely varied. Though based on Maimonides, it contains statements of German, French, Provençal, and Spanish scholars. Some (Joseph Caro, Azulai, and others) consider the anonymous work *Kol Bo* (1490) to be an abbreviated version of *Orḥot Ḥayyim*. This view, however, is controverted by a comparison of the two works. Benjacob and S.D. Luzzatto are more correct in maintaining that *Kol Bo* is the *editio princeps* of *Orḥot Ḥayyim*, probably representing an early stage of that book, and antedating the three manuscripts mentioned below.

Part I of *Orḥot Ḥayyim* was first published in Spain before 1492, but no complete copy of it is extant (for part of the missing introduction see A. Freimann, *Thesaurus Typographiae Hebraicae* (1931) B37, 1–2). The existing edition first appeared in Florence in 1750, although the manuscript had already been sent for publication by Elijah Capsali of Candia to Meir of Padua in Venice in the middle of the 16th century (*Responsa Maharam Padua*, no. 77). The order of the *halakhot* is very similar to that of the *Tur*, *Orah Ḥayyim* of *Jacob b. Asher, Aaron's younger contemporary. The *Tur* quickly gained wide acceptance at the expense of *Orḥot Ḥayyim*. Its second part, dealing with laws of marriage, damages, things ritually prescribed or permitted, and the like was published by M. Schlesinger in Berlin in 1902 from the Warsaw Communal Library Ms. (a copy of the Jerusalem Ms. of 1455) after a rather inadequate comparison with another earlier manuscript, now in the Montefiore Library, London. There are significant differences between these two manuscripts, and between a third (in the Guenzburg Collection, Moscow, copied in 1329) which was not used by Schlesinger and which represents the earliest version of the work, having been written apparently before Aaron went to Majorca, since it omits all the passages (at least 15) referring to that island and to Shem Tov Falkon, the local rabbi. It contains however 12 more chapters than the 73 in the printed version. These deal with faith, philosophy, messianic legends, paradise, hell, the natural sciences, the formulae for documents, and (in a lengthy chapter) the principle of intercalation. The date 1313, given in this chapter, shows that the manuscript was not composed before this date.

[Shlomoh Zalman Havlin]

AARON BEN JOSEPH HA-KOHEN SARGADO (also known as Ḥalaf ibn Sargado), *gaon* and head of the academy at Pumbedita, 942–60. His antagonist *Saadia Gaon slanderously altered his Arabic first name, Ḥalaf, to read *Kelev* (“dog”)

and it appears in this erroneous form in the Hebrew translation of Nathan ha-Bavli's chronicle. No satisfactory explanation has yet been found for the surname Sargado.

The *gaon* Mevasser (916/7–925/6) appointed Aaron *resh kallah* (“head of the *kallah*”) although he did not come from a family of scholars. He was the son-in-law of Bishr b. Aaron, one of Baghdad's wealthiest and most respected citizens. According to the tenth-century chronicler Nathan ha-Bavli, who does not seem to have admired Aaron, Aaron was very eloquent and erudite, but Saadia was a much greater scholar and Aaron envied him for his superior learning. In the campaign against Saadia, led by the exilarch David b. Zakkai, Aaron took the exilarch's side and attacked Saadia in a malicious epistle. Upon the death of Gaon Ḥananiah (Ḥanina), the father of *Sherira Gaon, Aaron assumed the direction of the academy, although Amram b. Meswi, Sherira's uncle, who was the *av bet din*, was more deserving of the *gaonate*. Aaron was a self-righteous and willful person, and his term of office was marked by endless quarrels. Many years later a rival *gaon*, Nehemiah b. Kohen Zedek, was nominated, but he was unable to assert himself against Aaron who, according to Sherira, excelled him in scholarship. Sherira's son Hai, who later became *gaon*, was Aaron's pupil in his youth.

Only fragments of Aaron's literary work have been preserved; the *Teshuvot ha-Ge'onim* contain four responsa ascribed to him (*Hemdah Genuzah* (1863), no. 37–40, and *Rashi Pardes*, ed. by H.Y. Ehrenreich (1924), 118–22), but only one of these is definitely by Aaron. Another responsum by Aaron was published in *Jeschurun*, 12 (1925), 50–51. Sherira and Hai Gaon mention Aaron's interpretation of a passage in the tractate *Yevamot* in one of their legal opinions (L. Ginzberg, *Geonica*, 2 (1909), 67). Aaron also wrote an Arabic commentary on the Pentateuch, in the same style as that of his rival Saadia. The few existing fragments are inadequate to judge the character of this work, or its relationship to Saadia's exegesis. Aaron's commentary on Deuteronomy (beginning with the weekly portion *Shofetim*) is also mentioned. Fragments of his commentary on other parts of the Pentateuch are cited in Abraham Ibn Ezra's commentary on the Pentateuch. Maimonides mentions Aaron among the older Jewish scholars who opposed the view of the Greek philosophers that the universe is eternal.

[Jacob Mann]

AARON BEN JOSEPH HA-LEVI (HARAH, initials of his name Ha-Rav Aharon ha-Levi; c. 1235–1300), Spanish rabbi and halakhist. Aaron was a descendant of *Zerahiah b. Isaac ha-Levi. His principal teachers were his brother Phinehas

and Moses b. Naḥman (*Naḥmanides). He had many disciples in his native Barcelona; the most famous was Yom Tov b. Abraham of Seville. In 1278 Aaron and Solomon b. Abraham *Adret were designated by Pedro III to settle a dispute in the community of Saragossa. In 1284, on the instructions of the king, he was appointed rabbi of that town for the purpose of ending the continuous dissensions in Saragossa. On Aaron's advice, the community enacted several important ordinances; some were vigorously contested both during his lifetime and in subsequent generations (Isaac b. Sheshet, Responsa, 388). After some time he returned to Barcelona where he apparently engaged in business. In 1286 he went to Toledo and remained there briefly. He returned to Barcelona.

Noted for his originality, Aaron would defer neither to the majority nor to the traditional authorities. At times, both he and Solomon b. Abraham Adret, who had many mutual disciples, were consulted on the same legal question, and answered jointly. Their personalities clashed and they often disagreed. On one occasion they requested French scholars to pronounce a final decision (Yom Tov b. Abraham of Seville, responsa, ed. by Y. Kafah (1959), 79). When Adret published his *Torat ha-Bayit* ("Law of the House") Aaron wrote critical comments called *Bedek ha-Bayit* ("Repair of the House") which were printed together with the former work (Venice, 1608 and in all subsequent editions). His introduction and notes were written in an inoffensive and respectful tone. Adret hastily wrote a sharp rejoinder called *Mishmeret ha-Bayit* ("Guard of the House"), which was issued anonymously. However, Adret admits his authorship in one of his responsa. Most of his attacks were based on statements of the early legal authorities whom Aaron had ignored.

Aaron wrote several independent books. Of his novellae to the Talmud, only those to three tractates have survived – *Ketubbot* (Prague, 1734), *Bezah* (published in the *Mareh ha-Ofannim* of Jacob Faitusi, Leghorn, 1810), and *Sukkah* (1962); the novellae on *Kiddushin* (1904) are erroneously ascribed to him. A large part of his novellae to *Shabbat* is preserved in the pseudo-R. Nissim commentary to this tractate. Of his commentaries on the *halakhot* of Alfasi, only those on tractates *Berakhot* and *Taanit* have survived (*Pekuddat ha-Leviyyim*, 1874; new edition M. Blau, 1957). In his preface Aaron mentioned that he wrote a short commentary on the Talmud called *Nezer ha-Kodesh* in which he gives the *halakhah* without the accompanying discussion. The work is no longer extant. Of his legal decisions, only his *Kelalei Yein Nesekh* on the prohibition of wine prepared by Gentiles (published as an appendix to Adret's *Avodat ha-Kodesh*, (Venice, 1602)), and *Hilkhot Niddah* (1967), have survived. The *Sefer ha-Hinnukh* of Aaron ha-Levi of Barcelona has been wrongly ascribed to him.

[Simha Assaf]

AARON BEN JOSEPH HA-ROFE ("the physician") "the Elder" (c. 1250–1320), *Karaitic scholar and writer. Born apparently in Solkhat, Crimea. In 1279 he disputed there with the Rabbanites concerning the method of determining the New Moon of Tishri (see *Calendar). Apparently he also lived in Constantinople. The influence of the Talmud and Rabbanite scholars and philosophers is seen in his writings. His views were based on the Muslim *Kalām philosophical system, but he inclined toward Aristotelianism. In 1293 he completed his commentary on the Pentateuch, *Sefer ha-Mivḥar* (1835), widely used by the Karaites in the 14th and 15th centuries; several supercommentaries were written on it, the last, *Tirat Kesef*, by Joseph Solomon *Luzki. Usually preferring the plain meaning of the Bible, Aaron occasionally also uses aggadic interpretations, taken as a rule from *Rashi. He frequently quotes his Karaite and Rabbanite predecessors, notably *Abraham ibn Ezra. Aaron sometimes interpreted the *halakhah* of his sect leniently, for instance permitting Karaite residents of Jerusalem to eat meat; however this ruling was not accepted. He also disagreed with the "catenary" theory of forbidden marriage (*rikkuv*) which extended the laws against incest to extremely remote relationships, on the ground that it ran counter to the Karaite principle that no addition should be made to biblical injunctions. In these laws, he differed from the Rabbanites only in upholding the Karaite interdict of marrying one's niece. He may have preferred a permanent system of calendation instead the one based on lunar observation. Aaron also wrote commentaries on the Former Prophets and Isaiah 1–59 (*Mivḥar Yesharim*, 1836), and on Psalms 1–71 (several Mss. In Leyden and JTS, New York). He refers to an apparently lost commentary he wrote on Job. An unfinished Hebrew grammar (*Kelil Yofi*, printed Gozlow 1847), recognizably influenced by Jonah ibn *Janaḥ, was completed by Isaac b. Judah Tishbi. His polemics against Rabbanite practices and the *Kabbalah (entitled *Moreh Aharon* and *Sefer Mitzvot*) have not been preserved. Aaron's redaction of the Karaite liturgy remains the official order of Karaite service. He introduced into it *piyyutim* by Solomon ibn *Gabirol, Judah *Halevi, and *Abraham and Moses ibn *Ezra. Aaron himself wrote liturgical poems for Sabbaths and holy days, many of which have been included in the Karaite prayer book, notably those written according to the weekly reading of the Torah. A late commentary on these poems entitled *Tuv Ta'am*, has appeared in a non-critical edition (Ramle 2000). He had a marked influence upon later Karaite writers.

[Zvi Avneri]

AARON BEN JUDAH KUSDINI (or **Kosdani**, i.e., “of Constantinople”; end of 12th century), Karaite scholar. Of his works only a responsum addressed to Solomon b. David, the Karaite *nasi* in Cairo, concerning the law of incest is known. In it Aaron reveals himself a zealous partisan of the highly restrictive catenary (*rikkuv*) theory of forbidden marriages favored by the early Karaite authorities. Solomon rejected his views. The responsum is quoted by Karaite writers, who call Aaron *baʿal ha-derashot* (“the author of homilies”) but no homilies from his pen have as yet been found.

[Leon Nemoy]

AARON BEN MEIR BRISKER (d. 1807), Polish rabbinical scholar and author. Aaron’s father was one of the leaders (*allufim*) of the Brest-Litovsk (Brisk) community and one of the signatories to a letter sent in 1752 to Jonathan Eybeschuetz, whom he supported in the dispute with Jacob *Emden. Aaron studied under Eleazar b. Eleazar Kallir, author of *Or Hadaash*. He refused to accept a rabbinical position and devoted himself exclusively to his studies. Aaron was delegate to the conference of Jewish notables of Poland which assembled in Warsaw in 1791 to deliberate on the problems of Polish Jewry. He wrote *Minḥat Aharon*, novellae on tractate *Sanhedrin* (Novydvor, 1792) with an appendix entitled *Minḥah Belulah* containing responsa and talmudical treatises. Other responsa (*Anaf Ez Avot*) were included in *Mekor Mayim Ḥayyim* (1839) by his grandson Jacob Meir, whose father Ḥayyim had adopted the surname Padua. In his work Aaron shows himself a master of the casuistic method of Talmud study known as *pilpul*.

AARON BEN MESHULLAM OF LUNEL (d. c. 1210), one of the leading scholars of Lunel. He was the son of *Meshullam b. Jacob of Lunel. Aaron studied under *Abraham b. David of Posquières, with whom he subsequently corresponded. A book on the laws of *terefot* is attributed to him, but it is likely that this treatise is an extract from his work on the Talmud or on the *halakhot* of Alfasi on tractate *Hullin*. *Meshullam b. Moses, son of Aaron’s sister, mentions these novellae of his uncle in his *Sefer ha-Hashlamah*. Aaron was expert in astronomy and the computation of the calendar and wrote a booklet comparing the Hebrew and Christian calendars. Judah b. Saul ibn *Tibbon, in his will, urges his son Samuel to study this subject with Aaron and to rely upon him and upon his brother Asher. Aaron was an admirer of Maimonides. In the controversy which arose following the criticism by Meir ha-

Levi *Abulafia of Maimonides’ views on resurrection, Aaron vigorously defended Maimonides in the name of the “sages of Lunel,” lauding him as “Prince (*nasi*) and rabbi, unequaled in East or in West.”

[Yehoshua Horowitz]

AARON BEN MOSES HA-LEVI (Horwitz) OF STAROSIELCE (1766–1828), leader of a dissenting group in the *Chabad branch of Lithuanian Ḥasidism. Born in Orshva Aaron was a descendant of the family of Isaiah Leib *Horwitz (Shelah; 1555–1630) and was considered both a brilliant interpreter of ḥasidic teachings and a prominent mystical innovator. He was the most prominent disciple of *Shneur Zalman of Lyady, founder of Chabad Ḥasidism (1745–1813), with whom he remained close friends for 30 years between 1783 and 1813. Personal and subsequently ideological disputes estranged him from Shneur Zalman’s elder son and successor Dov Ber (see *Schneersohn, 1773–1827), who assumed Chabad leadership in a period of ensuing conflict. After Shneur Zalman’s death in 1813, Aaron headed a major trend of Chabad which was marked and differentiated from the mainstream movement in questions concerning spiritual authority and ecstatic religious expression in prayer. While the importance of the intellectual approach to religious worship (*hitbonenut* in Chabad vocabulary) was accepted by all the followers of Shneur Zalman, the role of mystical rapture and the ecstatic-emotional approach, referring to communion with God known and as *devekut* or *hitpaʿalut*, was intensely disputed. Dov Ber maintained a distinction between proper and improper states of ecstasy and stages of mystical rapture, claiming that his perception expressed his father’s position. R. Aaron maintained, on the contrary, that he was the true follower of R. Shneur Zalman, who favored unrestricted exaltation in meditation and emotional prayer, which he considered conducive to love and reverence of God, a position which Dov Ber refused to accept. The debate is argued forcefully in the books of R. Aaron detailed below and the two tracts by R. Dov Ber – *Kuntres ha-Hitpaʿalut* (“Tract on Ecstasy”) and *Kuntres ha-Hitbonenut* (“Tract on Contemplation”). Aaron’s most important works are (1) *Shaʾarei ha-Yiḥud ve-ha-Emunah* (Shklov, 1820), a commentary completing the second (unfinished) part of the *Tanya*, the main work of Shneur Zalman; (2) *Shaʾarei ha-Avodah* (Shklov, 1821) with a forward known as *petah hateshuvah*, explaining and defending his approach, considered the true path set by Shneur Zalman; (3) *Avodat ha-Levi*, a compendium of sermons, letters, and miscellaneous works, published posthumously in 1842 in three volumes (Lemberg ed. and in 1866, Warsaw ed.). The composition of some of the most beautiful Ḥabad melodies is attributed to him. Although one of Aaron’s sons attempted to continue his spiritual leadership in his court after his father death, most of his disciples left him to

join the main Chabad movement led by Menahem Mendel of Lubavitch or other ḥasidic groups.

[Adin Steinsaltz / Rachel Elijor (2nd ed.)]

AARON BEN SAMUEL (c. 1620–1701), German rabbinical author. He is best known for his concordance *Beit Aharon* (Frankfurt on the Oder, 1690–91) in which he assembled all biblical passages cited or explained in the Talmud, the midrashim, and the many religious-philosophical, homiletic, and kabbalistic writings, with exact references for each quotation. The *Beit Aharon* is based on such works as *Aaron of Pesaro’s *Toledot Aharon* (1581), Simeon b. Isaac ha-Levi’s *Masoret ha-Mikra* (1572), and Jacob *Sasportas’ *Toledot Ya’akov* (1652). It was published in the Vilna and Grodno edition of the Prophets and Hagiographa in 1780. An enlarged edition by Abraham David Lavat appeared under the title *Beit Aharon ve-Hosafot* (1880). Aaron’s other works include *Sisra Torah* (a pun on the Ashkenazi pronunciation of “*Sitrei Torah*”), a homiletic commentary on Judges 4 and 5 (on Sisera and Jael); *Shaloh Manot*, a short commentary on the Babylonian Talmud; *Megillah* (both lost); and *Hibbur Masorah*, a midrashic commentary on the *masorah*. Some excerpts of the latter appeared as an appendix to the *Beit Aharon*. At the request of his wife Aaron translated into Yiddish the *Midrash Petirat Moshe* (Frankfurt on the Oder, 1693), which was popular among women in Poland and Russia. Aaron also wrote a commentary on **Perek Shirah* which appeared as an appendix to the Berlin prayer book (1701).

BIBLIOGRAPHY: Michael, Or, no. 320.

[Jehuda Feliks]

AARON BEN SAMUEL (of Hergerhausen; 1665–c. 1732), author of *Liebliche Tefillah*, a volume of prayers and supplications in Yiddish. Aaron was an orphan supported by charity. Later he was a distiller of brandy for sale in his tavern. He had little schooling, but in 1709 he came to the conclusion that prayers should be recited in the current Jewish vernacular (Yiddish-Taitch) since the public was ignorant of Hebrew, and in pursuit of this aim published (Frankfurt a-M., 1709) his *Liebliche Tefillah* in that language and in his introduction urges that children be taught to pray in that language. It consists of selections from the Prayer Book, Psalms, and a number of personal supplications which include “a beautiful prayer for a servant or maid” and one “...for husband and wife that they live in harmony.”

The book was completely forgotten but in 1846 Leopold Stein published an article in which he stated that some 20 years previously thousands of copies had been found in the attics

of synagogues and buried. This gave rise to the statement that the book was placed under a ban of the rabbis because it advocated Reform, but despite intensive research no evidence of any such ban has been found and it is probable that the book simply did not take on.

[Manfred Klarberg]

AARON BERECHIAH BEN MOSES OF MODENA (d. 1639), Italian kabbalistic writer and compiler. Aaron was a cousin on his mother’s side of Leone *Modena. For the benefit of the pious members of his native Modena, Aaron compiled his *Ma’avar Yabbok* (“The Crossing of the Jabbok” (cf. Gen. 32:22), Venice, 1626, and often reprinted) comprising the readings, laws, and customs relating to the sick, death-bed, burial, and mourning rites. David Savivi of Siena published an abridged version under the title *Magen David* (Venice, 1676), and Samuel David b. Jehiel *Ottolengo, another entitled *Kerī’ah Ne’emanah* (*ibid.*, 1715). Aaron also compiled *Ashmoret ha-Boker* (“The Morning Watch,” Mantua, 1624; Venice, 1720), containing prayers and supplications for the use of the pious confraternity *Me’irei Shaḥar* in Modena, as well as *Me’il Zedakah* and *Bigdei Kodesh* (both Pisa, 1785), containing prayers and passages for study.

[Shmuel Ashkenazi]

AARON HAKIMAN (14th century), poet; lived in Baghdad. His prolific works include the incomplete *divan* presently in the Firkovich collection (*Catalog der hebraeischen und samaritanischen Handschriften*, 2 (1875), no. 72) in St. Petersburg; this contains a *kinah* on the persecution of the Jews of Baghdad in 1344 which describes the destruction of the city’s synagogues and the desecration of Torah scrolls. Outstanding among the poems of the *divan* are those in honor of *resh galuta* Sar Shalom (b. Phinehas); also included are several brief *maqamas*. His poems demonstrate the author’s expert knowledge of classical Spanish poetry and the Bible, but they lack originality.

[Abraham Meir Habermann]

AARONIDES, members of the *priesthood in Israel. The traditional view is that throughout its history the legitimate priesthood comprised only those members of the tribe of *Levi descended directly from *Aaron, the first *high priest. The notion is anticipated in the Pentateuch by the use of such phrases as “for all time” and “throughout the ages” in connection with legislation of concern to “Aaron and his sons” (Ex. 27:21; 28:43; 30:8, 10, 19–21; Lev. 6:11, 15; 7:34ff.; 10:15 et al.). It

Genealogies of the Aaronides.

is made explicit in the sharp distinction between the Aaronides and the other Levites who are made subordinate to them (Num. 3:10; 17:5; 18:1–7), and it is implicit in the designation of the priesthood in general by such terms as “the son(s) of Aaron” (Josh. 21:4, 10, 13, 19; Neh. 10:39; 12:47; I Chron. 6:39, 42; 12:27; 15:4; 23:28, 32; 24:1; cf. I Chron. 13:9; 26:28; 29:21; 31:19; 35:14), “the House of Aaron” (Ps. 115:10, 12; 118:3; 135:19), and, occasionally, simply “Aaron” (I Chron. 12:27; 27:17; cf. Ps. 133:2). This same situation is assumed by the chronicler in the classification of the priestly clans according to the lines of Eleazar and Ithamar, sons of Aaron (I Chron. 24:1–4). It is also reflected in the various genealogical lists of the high priests (Ezra 7:1–5; I Chron. 5:28–41; 6:35–38).

The Critical View

This picture of the history of the priesthood is regarded as an oversimplification of a very complex situation that can no longer be reconstructed with any degree of confidence. It is possible, however, to isolate the complexities. In the first place, the

construction “sons of Aaron,” in itself, like the terms “sons of Korah” and “sons of Asaph,” may just as well refer to a professional class or guild as to blood kinship. That there were non-Aaronide priests, who were most likely incorporated into the Aaronide guild, may be inferred from the mention of priests prior to the Sinaitic revelation (Ex. 19:22, 24). Further, in the lifetime of Eleazar, son of Aaron, Joshua is said to have allotted 13 Canaanite cities with their pasture lands to the “sons of Aaron, the priests” (Josh. 21:19; cf. 21:4, 10, 13), an impossible situation unless the description “sons of Aaron” is not to be understood literally. Secondly, the exclusive priestly legitimacy of the Aaronides is characteristic of the P document, and is found elsewhere only in the book of Joshua and in the post-Exilic Nehemiah and Chronicles. It is not to be found in D, which seems to confer priestly status and privileges upon the entire tribe of Levi (Deut. 10:8–9, 18:6–7) and to postdate the selection of that tribe to the death of Aaron. Nor are the “sons of Aaron” mentioned in Judges, Samuel, Kings, or the prophets. Ezekiel never refers to them, only to the “levitical priests, the sons of Zadok” (Ezek. 40:46; 43:19; 44:15; cf. 48:11), without ever mentioning their Aaronic ancestry.

As to the clear differentiation between Aaronides and Levites, this may well argue against the historicity of the claim to an original levitical ancestry. One of the strands in the narrative of the revolt of Korah seems to reflect an Aaronide-Levite struggle for priestly prerogatives and to derive from a period before the levitical or Aaronic genealogizing of priests was effected (Num. 16; esp. 1 and 7–10). The same tension between the tribe of Levi and the Aaronides is apparent in the golden calf episode (Ex. 32:26–29). In this connection, it is regarded as significant that Aaron’s son Eleazar was buried at Gibeah, a town in the hill country of Ephraim belonging to his son, the high priest Phinehas (Josh. 24:33). It was precisely the bull-cult, with which the name of Aaron was associated, that was a characteristic of the religion of northern Israel (I Kings 12:28–29). This suggests to some the possibility that the Aaronides were close to the Ephraimites and accounted for at least some of the priests of Beth-El (cf. *ibid.* 31; Judg. 20:26 ff.). In this case, the description of Moses’ brother as “Aaron the Levite” (Ex. 4:14) would be a later insertion into the text, it being in fact superfluous in its present context.

The post-Exilic genealogical lists of the Aaronide high priesthood present numerous problems. Missing entirely are the high priests Amariah (I Chron. 19:11), Jehoiada (II Kings 11:4; 12:10; II Chron. 23:1; 24:20), and Urijah (II Kings 16:10–11, 15). The registers of I Chronicles (5:29–41 and 6:35–38) both list Ahimaaz, but not Azariah, while that of Ezra (7:1–6) records the latter, but omits the former. All three lists, however, have 12 generations between Aaron and the building of Solomon’s temple, which suggests schematization to accommodate the 480 years (or 12 40-year generations) supposed to have elapsed between the Exodus and the construction of the sanctuary (I Kings 6:1). Further, I Chronicles (5:36–41) presupposes exactly another 12 generations between Solomon and the first high priest after the Restoration, but the repetition

of Amariah, Ahitub, and Zadok (*ibid.* 33–34, 37–38) is suspicious. The genealogy of Ezra from Aaron lists only four high priests between Zadok of Solomon's time and Ezra (Ezra 7:2). The fragmentary lists of 1 Chronicles (9:10–11) and Nehemiah (11:11) differ slightly from each other, and both vary from the other lists. Completely ignored in these genealogical tables is the line of Ithamar to which the Eli priesthood belonged. It is quite possible that the lists are interested only in the Zadokite high priests. At any rate, they cannot be used uncritically as source material for the history of the Aaronides.

Some scholars believe that the Aaronides constituted a priestly clan that had its origins in Egypt in pre-Mosaic times and very early embraced the new faith of Moses, anticipating in this respect the tribe of Levi. It used its prestige and influence among the people to gain support for Moses. This is regarded as being the real situation behind Exodus 4:14 ff., 27–31. Further corroboration of this theory is seen in the fact that in contrast to the justification for the selection of the clan of Phinehas (Num. 25:10–13) and the tribe of Levi (Ex. 32:26–29; Num. 3:12–13, 41, 45; 8:13–17), no reason is given for the choice of Aaron. The priesthood seems to come naturally to him. Another link in the chain of evidence is found in 1 Sam. 2:27–28, which tells of the selection of the house of Eli, undoubtedly considered Aaronide (1 Sam. 22:20; 1 Chron. 24:3), already in Egypt where it was the recipient of a divine revelation. No mention is made of any wilderness events or of the Levites. It is noted further that Egyptian names figure prominently in the Aaronide priesthood, viz., Hophni (1 Sam. 1:3), Phinehas (Ex. 6:25; 1 Sam. 1:3), Putiel (Ex. 6:25), Pashhur (Jer. 20:1; 21:1; Ezra 2:38), and Hanamel (Jer. 32:7). At some period, and in circumstances that can no longer be determined, the Aaronide priesthood amalgamated with the Levites and became the dominant priestly family. Its great antiquity and prestige ultimately generated the pattern of Aaronic genealogizing.

AARON OF BAGHDAD (c. mid-ninth century), Babylonian scholar, described as the son of a certain R. Samuel, who lived in Jewish communities in southern Italy. In the sources he is referred to either as Aaron, or Abu Aaron, or Master Aaron (which might be a corrupted version of Abu Aaron). He met with several scholars in Oria, Lucca, and other communities, and many stories were told about his wisdom as well as his magical powers. His appearance is described in *Megillat *Ahima'az*, which is a literary chronicle of the *Kalonymus family in Italy, and in a document, written by Eliezer ben Judah of Worms in the second or third decade of the 13th century, tracing the history of the tradition of exegesis of prayers used by Eleazar and his teacher, *Judah b. Samuel he-Hasid. These two sources agree in attributing to Aaron, who is described by R. Eleazar as *av kol ha-sodot* ("father of all the secrets"), the transmission of certain doctrines and methods from the East to the West, to the Kalonymus family in Italy and Germany. As

to the nature of these secrets, it is clear from *Megillat Ahima'az* that before the arrival of Aaron, Jewish scholars in Italy were studying early mystical, eastern works, especially the mysticism of the *Heikhalot* and *Merkabah*. Eleazar's words seem to prove that Aaron contributed to the Ashkenazi ḥasidic tradition of prayer exegesis. The stories in *Megillat Ahima'az* suggest that he may have transmitted some magical formulae, as magic was one of the fields of study (usually secret) of both the Italian and the Ashkenazi scholars. There is no evidence that Aaron contributed anything to the development of theological doctrines or mystical speculations in these areas. Nor is there proof that any known book was written by Aaron or contained a contribution by him. However, in the traditions of the Kalonymus family, Aaron serves as the link connecting its own western culture with the revered centers of learning in Babylonia of the geonic period.

AARON OF LINCOLN (c. 1123–1186), English financier. Aaron probably went to England from France as an adult. His recorded transactions extended over a great part of England and his clients included bishops, earls, barons, and the king of Scotland. Aaron advanced money to the crown on the security of future county revenues ("ferm of the shires"), as well as to various ecclesiastical foundations, such as the Monastery of St. Alban's, for their ambitious building programs. Nine Cistercian abbeys owed him 6,400 marks for their acquisition of properties upon which he held mortgages. At one time Aaron worked in partnership with a rival Jewish financier, Le Brun of London. After Aaron's death, his vast estate, which might have totaled as much as £100,000, was seized by the king. A special branch of the exchequer, the *Scaccarium Aaronis*, was established and administered the estate until 1191. Some of his debts were later resold to his son Elias. Aaron had no connection with the ancient house in Lincoln which now bears his name.

[Cecil Roth]

AARON OF NEUSTADT (**Blumlein**; d. 1421), rabbinical scholar of Krems (Lower Austria). Aaron was a brother-in-law of Abraham *Klausner. He was a student, and then a colleague of Sar Shalom of Vienna (Wiener-Neustadt), and also of Jacob (Jekel) of Eger, rabbi in Vienna. Aaron was rabbi in Wiener-Neustadt and then in Vienna. A halakhic controversy arose between Aaron and Jacob on the question of non-Jews supplying Jewish prisoners with food on the Sabbath, a practice permitted by Aaron (*Leket Yosher*, ed. by J. Freimann, 1 (1903),

64). Aaron's nephew and outstanding pupil was Israel b. Pethahiah *Isserlein, who often quotes his master's biblical and talmudic teachings, in his *Pesakim u-Khetavim* (1519) and in his *Be'urim* (1519). He refers, in particular, to *Hilkhot Niddah*, a halakhic compendium by Aaron. Among Aaron's famous followers were Jacob b. Moses *Moellin (Maharil) and Isaac Tyrnau, author of *Minhagim* (1566), all of whom quote him. During the Vienna persecutions of 1420 Aaron was imprisoned and suffered severe tortures, from which he died.

AARON OF PESARO (d. 1563), Italian lay scholar and bibliophile. A wealthy businessman of Novellara in northern Italy (not Nicolara, as in some works of reference), he later extended his interests to Gonzaga in the duchy of Mantua, where he was authorized to open a loan-bank in 1557. From a manuscript in his rich library the *Mirkevet ha-Mishneh* of Isaac Abrabanel was published in Sabionetta in 1551, the first Hebrew book printed there. His only known work is *Toledot Aharon*, a concordance of biblical passages cited in the Babylonian Talmud, arranged in the order of the Bible. After his death, his three sons, who succeeded him in his business, sent the manuscript of the work to the wandering Hebrew printer, Israel Zifroni, who published it at Freiburg in 1583–84, and Venice in 1591–92. Jacob *Sasportas appended to the work references from the Jerusalem Talmud (*Toledot Ya'akov*, Amsterdam, 1652) while Aaron b. Samuel added references from other rabbinic and kabbalistic works (*Beit Aharon*, Frankfurt on the Oder, 1690–91). *Toledot Aharon* is printed in abbreviated form in most editions of the rabbinic Bible.

[Alexander Carlebach]

AARON OF YORK (1190–1268), English financier, son of *Josce of York. Aaron was one of the wealthiest and most active English Jews living during the reign of Henry III. In 1241 his estate was valued for taxation at £40,000, an incredible sum. He was *Presbyter Judaeorum of English Jewry in 1236–43. During these years, as he complained to the chronicler Matthew Paris, he was compelled to pay the king over 30,000 marks; he relinquished the office and died impoverished. He was styled *nadiv* ("benefactor") in Hebrew, an indication that he was probably a patron of scholarship.

[Cecil Roth]

AARON OF ZHITOMIR (d. 1817), ḥasidic preacher in Zhitomir and other communities in Russia. His homilies on the weekly portions (*parashiyyot*) were recorded by his pupil Levi of Zhitomir and published in *Toledot Aharon* (Berdichev, 1817). In these, Aaron refrains from learned commentary and teaches "morality and pursuit of the service of God." Particular emphasis is given to *deveikut* or adhesion to God.

AARON SAMUEL BEN MOSES SHALOM OF KREMENETS (d. c. 1620), rabbi and author. A pupil of *Ephraim Solomon b. Aaron Luntschits when the latter was rabbi at Lemberg, Aaron Samuel was forced to immigrate to Germany as a youth. Toward the end of 1606 he was preaching in Fuerth. In 1611 he was in Eibelstadt (not, as often stated, Eisenstadt), Lower Franconia, where he wrote an ethical treatise entitled *Nishmat Adam*, on the origin and essence of the soul, the purpose of human life, and divine retribution (Hanau, 1611; Wilmersdorf, 1732). In 1615 he became rabbi in Fulda, where he wrote an introduction and notes to a homily on the Decalogue by Baruch Axelrod (Hanau, 1616). In his *Nishmat Adam* he mentions three unpublished works on ethical and religio-philosophical problems (*Be'er Sheva*, *Or Torah*, and *Ein Mishpat*), as well as novellae to the Talmud, entitled *Kitvei Kodesh*.

BIBLIOGRAPHY: L. Loewenstein, in: *JJLG*, 6 (1908), 154, n. 1; J.J. Gruenwald, *Ha-Yehudim be-Ungarya* (1912), 18–19 (and A. Freimann's note, p. 14).

[Jakob Naphtali Hertz Simchoni]

AARON SAMUEL BEN NAPHTALI HERZ HA-KOHN (1740–1814), Polish rabbi. He served as rabbi to the communities of Stefan, Ostrog, Yampol, and Belaya Tserkov. He was an ardent follower of *Dov Baer of Mezhirech and Phinehas Shapira of Korets and was influenced by them in his views on Ḥasidism. He collected extracts from their statements in his books, *Kodesh Hillulim* (Lemberg, 1864). His talmudic novellae and his responsa were destroyed by fire. Only *Kore me-Rosh*, a commentary on the *Midrash Rabbah*, of which a portion only (part of Genesis) has been published (Berdichev, 1811), and *Ve-Zivvah ha-Kohen*, an ethical will to his children preceded by an anthology of homiletical and esoteric thoughts (Belaya Tserkov, 1823; Jerusalem, 1953), have survived.

[Yehoshua Horowitz]

AARON SELIG BEN MOSES OF ZOLKIEW (d. 1643), kabbalist. His father, Moses Hillel, was president of the Jewish community in Brest-Litovsk; his brother Samuel was a *parnas* ("delegate") in the Council of the Four Lands. Aaron wrote a

compendium of the Zohar entitled *Ammudei Sheva* ("Seven-fold Pillars," Cracow, 1635), in five volumes, with an introduction. The work comprises (1) a commentary, glosses, and explanations of difficult words in the Zohar, based on the works of Meir ibn *Gabbai, Moses *Cordovero, Judah *Hayyat, Menahem *Recanati, Elijah de *Vidas, Shabbetai Sheftel *Horowitz, and on the notes to the Zohar by Menahem Tiktin in the margin of his copy; (2) sections from the Mantua edition of the Zohar of 1558–60 which are missing in the Cremona edition of 1558; (3) an index indicating where the various chapters of the Zohar are commented upon by the six authors mentioned above; (4) a similar index for the *Tikkunei Zohar*; (5) a list of 39 parallel passages in the Zohar with their variant readings. The last volume is extremely rare.

[Isaak Dov Ber Markon]

AARON SIMEON BEN JACOB ABRAHAM OF COPENHAGEN (late 18th century), secretary of the Jewish community of Cologne. Aaron is known for his participation in the important controversy known as the *Cleves *gef*. Having personal knowledge of the entire case from its inception, Aaron sought to reverse the decision of Tevele Hess of Mannheim and of the Frankfurt rabbinate who had declared the divorce invalid. In conjunction with Israel b. Eliezer Lipschuetz, he appealed to all rabbis of authority in Germany, Holland, and Poland to permit the divorced woman, Leah Gunzhausen, to remarry. The majority expressed agreement with his point of view. He collected expert opinions and published them under the title *Or ha-Yashar* (Amsterdam, 1769; reprinted Lemberg, 1902, with notes by Jekuthiel Zalman Schor entitled *Nizozei Or*). Aaron also wrote *Bekhi Neharot*, a description of the flood at Bonn in 1784 (Amsterdam, 1784).

[Heinrich Haim Brody]

AARONSOHN, family of pioneers in Erez Israel. EFRAYIM FISHEL (1849–1939), one of the founders of Zikhron Ya'akov, was the father of the leaders of *Nili, AARON, ALEXANDER, and SARAH. Born in Falticeni, Romania, he went to Erez Israel with his wife Malkah in 1882. He was a gifted farmer, which was an occupation he continued until the end of his long life.

AARON (1876–1919), agronomist, researcher, and founder of the Nili intelligence organization. Born in Romania, he was brought to Erez Israel by his parents at the age of six and grew up in Zikhron Ya'akov. He was an unusual personality whose achievements and service to his people have not been fully appreciated.

His outstanding talents became evident from early childhood, and Baron Edmund de *Rothschild, the colony's patron, generously sponsored his academic education at universities in France, Germany, and the United States.

The experimental station in *Athlit, near Haifa, which Aaronsohn founded on his return to Palestine, was a pioneering venture. It was there that his discovery of the ancestry of the wheat grain established his international reputation as an agricultural scientist.

Aaronsohn's range of interests, however, far transcended his daily research. The social and political problems of his people always competed for his attention, but his greatest passion was for Palestine. His knowledge of the country and those adjacent to it, and of the habits of life of Jew and Arab, was unparalleled.

During World War I and afterwards, when he threw himself into the mainstream of Zionist political activity, this knowledge stood him in good stead, broadening his *Weltanschauung*. But Aaronsohn was not a popular leader. Though endowed with remarkable qualities, which put him head and shoulders above his contemporaries, his individualism operated against him. Temperamental and militant by nature, he was not an easy person to work with.

Aaronsohn's conviction that the Zionist enterprise could flourish best under British protection had matured as early as 1912–13, when he was in New York. He refrained from publishing his views lest they embarrass the Berlin-based Zionist leadership. However, the brutal expulsion of Russian Jews from Jaffa in December 1914 finally shattered his hope that a *modus vivendi* with the Turk was possible.

During 1915–16 Palestine and its adjacent countries were infested with locusts. Djemal Pasha, the commander of the Ottoman Fourth Army, found that the only specialist competent to organize chemical warfare against the plague was Aaronsohn. The latter's forthright manner and skill won the Pasha's confidence but the closer their relationship became, the more concerned Aaronsohn grew about the future of his people.

With the tragedy that had befallen the Armenians at the back of his mind, he feared that at the slightest provocation Djemal would not hesitate to put an end to Zionist colonization. He therefore reached the radical conclusion that unless Palestine was speedily conquered by the British, the prospect for the survival of the *Yishuv* was slender.

It was for this reason that he made his way, by devious means, to England, leaving behind him a well-organized network of espionage. His second objective was to elicit some assurances of British sympathy for Zionist aspirations. On neither count was he successful at this stage, but unwittingly he converted his interlocutors at Military Intelligence to his cause.

Among those who fell under Aaronsohn's spell should be mentioned: Major Walter Gribbon, the officer in charge of Turkish affairs at GHQ; his close assistant, Captain Charles Webster; and Sir Mark Sykes.

Forty years later Sir Charles Webster testified how much his sympathy for the Jewish national ideal had deepened as a result of his admiration for Aaronsohn and his career:

It was he who gave me my first real contact with one of the Yishuv and I cannot forbear to mention how deep that impression was. It was made not only by the story of his great adventure during the war, but his unexampled knowledge of Palestine and his complete faith that this land could be made to blossom like the rose by Jewish skill and industry.

Such assurances were all the more important at that time because one of the arguments most frequently used was that it was quite impossible for Palestine to accommodate more than a fraction of the numbers which the Zionists claimed could be settled there.

Aaronsohn was equally successful in making converts among British officers both in political and military intelligence in Cairo, which he joined late in 1916. William Ormsby-Gore, Wyndham Deedes, and Richard Meinerzhagen in particular, proved a source of strength to the Zionists.

Uppermost in Aaronsohn's mind was a swift invasion of Palestine, to crush the Turk and deliver the Yishuv from disaster. It was he who alerted world public opinion to the evacuation of the Jewish population of Jaffa/Tel Aviv in April 1917; a policy which if followed to its conclusion could have resulted in a catastrophe. Exasperated by the sluggish British military advance, Aaronsohn was convinced that if properly handled, a blitz on the Palestinian front was possible.

British Intelligence was faulty and, in spite of all efforts, very little news could be elicited about enemy movements. Even when some information did filter through, it was too stale to be of any use. By contrast, not only did Aaronsohn gather a great deal of information, but by re-establishing contact with his group in Zikhron Ya'akov, he was able to furnish first-hand reports on Turkish troop movements, morale, and conditions behind enemy lines. Moreover, with his well-trained mind, he was able to give useful advice to the British on other matters, including military questions, so much so that it was humorously commented among the General Staff that "Aaronsohn is running the GHQ." A co-author of the *Palestine Handbook*, an indispensable military guide, he was also invited to write for the prestigious *Arab Bulletin*.

It was not before the arrival of General *Allenby that full use was made of Aaronsohn's suggestions. Allenby based his Beersheba operation on exhaustive intelligence data provided by the Aaronsohn group from behind the Turkish lines, which pointed to that sector as the weakest link in the enemy's defenses and one where a British onslaught was least expected. Perhaps the most crucial information was that the wells in the region had been left untouched.

The British won a resounding victory but the Aaronsohn group was less fortunate. Their ring was uncovered by the Turkish authorities at the end of September. Eighteen months later Ormsby-Gore, paying tribute to the Aaronsohn family, wrote:

They were ... the most valuable nucleus of our intelligence service in Palestine during the war. Aaronsohn's sister was caught by the Turks and tortured to death, and the British Government owes a very deep debt of gratitude to the Aaronsohn family for all they did for us in the war ... Nothing we can do for them ... will repay the work they have done and what they have suffered for us.

General Macdonogh, the director of Military Intelligence, confirmed that Allenby's victory would not have been possible without the information supplied by the Aaronsohn group.

In Brigadier Gribbon's opinion it saved 30,000 British lives in the Palestine campaign. General Clayton considered the group's service "invaluable," while Allenby singled out Aaronsohn as the staff officer chiefly responsible for the formation of Field Intelligence behind the Turkish lines. Sir Mark Sykes acknowledged that it was Aaronsohn's idea of outflanking Gaza and capturing Beersheba by surprise that was the key to Allenby's success.

The Foreign Office, too, had formed a high opinion of him, and his presence in London in autumn 1917, when the Balfour Declaration was still in the balance, assisted in creating a favorable climate of opinion for the Zionist cause.

Aaronsohn made a valuable contribution to the work of the Zionist Commission in Palestine in 1918, and his expertise was eagerly sought by the British and Zionist delegations to the Paris Peace Conference.

On May 15, 1919, Aaronsohn died tragically when a military aircraft taking him from London to Paris crashed in the Channel.

[Isaiah Friedman (2nd ed.)]

ALEXANDER (1888–1948), one of the founders of Nili. In 1913 he founded a short-lived semi-clandestine group for sons of farmers, called Gidonim, in his birthplace Zikhron Ya'akov. A precursor of Nili, the group had as one of its purposes the defense of the settlement. In 1915 he went to Egypt as an emissary of Nili to establish contact with the British Command. From there he went to the U.S., where he was active as an anti-Turkish and pro-Ally propagandist, and wrote *With the Turks in Palestine* (1917), a book on his personal experiences, exposing the evils of Turkish rule. After World War I he founded and for a time headed *Benei Binyamin, an organization of second-generation farmers in Palestine. He contributed to the Jerusalem newspaper *Do'ar ha-Yom* and published his memoirs, as well as booklets on Nili and its members. During World War II he served with the British Intelligence Service in its operations against Germany.

SARAH (1890–1917), martyr heroine of Nili. Born and educated in Zikhron Ya'akov, she married Hayyim Abraham, a Bulgarian Jew, in 1914, and moved to Constantinople. Her married life was unhappy and, in 1915, during World War I, she returned to her family's home. En route, she passed through Anatolia and Syria, and was an eyewitness to the savage per-

secution of the Armenians by the Turkish authorities. On her return to Zikhron Ya'akov, her brother Aaron enlisted her into Nili's intelligence activities against Turkey. When he left the country, she supervised the agents' operations and relayed information to the British in Egypt. Later, she was responsible for receipt of the gold sent through the Nili organization for help to the *yishuv*. In April 1917 she secretly visited Egypt to consult with her brother Aaron and the British Command. Warning her of the danger that threatened her in Erez Israel, they begged her to remain in Egypt, but she refused, and returned in June. In September, on learning that the espionage network had been uncovered by the Turkish authorities, she ordered its members to disperse, while she remained at home in Zikhron Ya'akov to avoid incriminating rumors, thus facilitating the escape of her fellow members. Arrested in her home on Oct. 1, 1917, she was subjected to brutal torture for four days, but disclosed nothing, and finally put an end to her suffering by shooting herself. In reverence to her memory, pilgrimages are made to her grave in Zikhron Ya'akov on the anniversary of her death.

AARONSOHN, MICHAEL (1896–1976), U.S. rabbi. Born in Baltimore, Aaronsohn attended the University of Cincinnati (B.A., 1923) and was ordained the same year at Hebrew Union College. When the U.S. entered World War I in April 1917, Aaronsohn, who was entitled to a clerical exemption from military service, enlisted the following month. When his parent expressed anxiety over his decision he wrote them that “as good Jews, you should [trust] in God implicitly ... without a word of doubt or discouragement.” Antisemitism in the U.S. was on the rise during the war and one of the most common accusations was that Jews shirked military service. Aaronsohn, who rose to the rank of battalion sergeant-major (he served with the 147th Infantry Regiment, 39th Division of the AEF), expressed disgust at Jewish draftees who claimed that they were ineligible for overseas duty because they were foreign born, telling his parents that “while I am a Jew and love everything that Judaism stands for, nevertheless I cannot stand for a hypocrite or a low down coward.”

While attempting to pull a wounded comrade to safety during the Meuse-Argonne offensive (September 29, 1918), Aaronsohn was blinded by an artillery shell. After eight

months at the Red Cross school for the blind he returned to Hebrew Union College and was able to complete his studies when the college hired his sister Dora to be his note taker. During his rabbinic career Aaronsohn promoted a number of causes associated with the mental and physically disabled, for example serving a term as president of the Hamilton County (Ohio) Council for Retarded Children. He was instrumental in founding the Jewish Braille Institute in 1931, which made Jewish texts such as the Bible and Talmud more widely accessible through a free monthly magazine called the *Jewish Braille Review*.

Aaronsohn also served as a chaplain to several organizations, such as the Disabled American Veterans and the Veterans of Foreign Wars. An active member of the Republican Party, he gave the invocation at the Republican National Convention in 1940 and unsuccessfully ran for Cincinnati City Council in 1949, where he campaigned for “a scientific system of taxation.” Aaronsohn was the author of numerous articles and three books, including *Broken Lights* (1946), an autobiographical novel.

[Frederic Krome (2nd ed.)]

AARONSOHN, MOSES (1805–1875), preacher, rabbi, and scholar. Born in Salant, Lithuania, Aaronsohn was a preacher (*maggid*) in Eastern Europe (Vishtinetz, Brotski, and Mir) and was recognized for his scholarship by 1836, when he published *Pardes ha-Hokhmah*, a book of sermons. He later published *Pardes ha-Binah*, a book of sermons with responsa. Aaronsohn arrived in the United States c. 1860, living on the Lower East Side of Manhattan, where he held services in his home and was known as “The East Broadway Maggid.” For four years, he served as a preacher in a number of established synagogues, including Chevrat Vizhaner and the Allen Street Beth Hamedrash, which had split from the Beis Medrash Hagadol. In 1864, he became the rabbi at Congregation Adath Yeshurun in New York City. He continued to write responsa and also included the opinions of those rabbis in Eastern Europe with whom he corresponded regarding contemporary halakhic issues.

Aaronsohn was a strong personality with definite opinions, which eventually erupted into major controversies. He attacked the scholarship and practices of two New York rabbis who were eminent talmudic scholars, Rabbi Abraham Joseph *Ash and Rabbi Judah Mittleman, calling into question divorces written by Rabbi Ash and the *kashrut* of the animals slaughtered under the supervision of Rabbi Mittleman – whom he accused of allowing improper bloodletting before *shehitah*. By 1873, when he criticized the *kashrut* of certain California wines, the hostility he created in the clergy caused him to be excommunicated by Ash and Mittleman, and he was forced to leave New York. For a time, he served as an itinerant preacher and finally settled in Chicago, where he died. His book on American responsa, *Matta'ei Mosheh*, was published posthumously in 1878 in Jerusalem.

[Jeanette Friedman (2nd ed.)]

AARONSON, LAZARUS LEONARD (1894–1966), English poet. A lecturer in economics at London University, Aaronson published several verse collections, including *Poems* (1933) and *The Homeward Journey* (1946). Aaronson dealt at length with his conversion in *Christ in the Synagogue* (1930) but remained preoccupied with his spiritual duality as a Jew and an Englishman in a late poem, “The Jew” (1956).

ABADAN, island and seaport located in the province of Khuzistan at the southwest corner of Iran on the left bank of Shatt al-Arab and about 60 km from the Persian Gulf. It grew into a big city because of its oil refinery. During World War II there were about 25,000 refinery employees out of a total population of 100,000. This was a period in which Abadan attracted a relatively large number of Jews from several cities in Iran, mainly from *Isfahan, *Bushire, *Shiraz, and *Kermanshah. According to one source (*Alam-e Yahud*), at this time there were 200 Jewish families (about 800 people) living in Abadan, some of whom were Iraqi Jews. In addition, it has been reported that 300 out of 1,700 foreign professional refinery employees were Palestinian Jews belonging to *Solel Boneh. For this reason, one may say that the post-Reza Shah (1925–41) *He-Ḥalutz movement and Zionist activities in Iran had, to some degree, their roots in the Jewish community of Abadan. Abadan played an important role in rescue missions of the Iraqi Jews during and after the independence of Israel. After the 1979 Islamic revolution, Jews began to leave the city. At the beginning of the 21st century there were few Jewish families living in Abadan, numbering fewer than 20 people.

[Amnon Netzer (2nd ed.)]

ABADDON (Heb. אַבְדּוֹן; “place of destruction”). It is mentioned in the Wisdom literature of the Bible (Job 26:6; 28:22; 31:12; Prov. 15:11; Ps. 88:12); and it occurs also in the New Testament (Rev. 11:1) where, however, it is personified as the angel of the bottomless pit, whose name in Greek is “Apollyon” (Ἀπολλύων, “destroyer”). In the Talmud (Er. 19a) it is given as the second of the seven names of Gehenna (*Gehinnom), the proof verse being Psalms 88:12, while *Midrash Konen* makes it the actual second department of Gehenna.

ABARBANELL, LINA (1879–1963), star of European light opera and Broadway doyenne. Born in Berlin to a prominent Sephardi family active in the professional theater, Abarbanell debuted as Adele in the Berlin Court Opera's production of *Die Fledermaus* in 1904, at the age of 15. As a young woman, she toured European concert halls and theaters, establishing a career as a vocalist and actress. She won especial renown in the world of Viennese operetta, where luminaries of the scene, such as Franz Lehar and Oscar Straus, composed works for her. She spent a season in New York with the Metropolitan Grand Opera in 1905, appearing as Hänsel in the American premiere of Humperdinck's *Hänsel und Gretel*. Abarbanell and her husband, Edward Goldbeck, an editorialist and cultural commentator, and their young daughter settled in Chicago soon after, returning to New York after World War I.

In America, Abarbanell introduced the Viennese light musical repertoire to popular audiences and won fame and critical plaudits with starring roles in Lehar's *The Merry Widow*, among other works. A fashionable, graceful, and vivacious personality, she helped popularize songs and dances of the musicals and light operas in which she appeared. With her husband, she hosted a weekly salon in her Chicago home for European and American artists and writers. Abarbanell essentially supported the family through her theater career, seeing them through bankruptcy in 1921. After the death of her husband in 1934, she transformed herself from performer to producer and director. Her daughter Eva Goldbeck, a fiction writer and reviewer who published in periodicals such as the *New Republic*, died in 1935 at the age of 34. Abarbanell maintained a close relationship with her son-in-law, the composer Marc Blitzstein (*The Cradle Will Rock*), for the rest of her life. She established a successful second career as casting director for Blitzstein and others, in theater (*Porgy and Bess*) and in film (*Carmen Jones*), and remained actively involved in the theater world until her death from heart failure shortly after her 84th birthday.

[Emily Alice Katz (2nd ed.)]

ABBA (Heb. אָבָא), Aramaic equivalent of the Hebrew (אב, אָב; “father”). The term was in common use from the first century onward (cf. Mark 14:36). In the early centuries of the Christian era it was used in both Jewish and Christian sources in addressing God, and in talmudic times as a prefix to Hebrew names, probably to designate an esteemed scholar (cf. Abba Hilkiah, Abba Saul). K. *Kohler, however, was of the opinion that the title referred specifically to Essenes. Because of its honorable association, it was forbidden to call slaves by this name (Ber. 16b). It often occurs independently, sometimes perhaps as an abbreviation of Abraham. Its fusion with the prefix “rav” (for “rabbi”) gave rise in Babylonia to the names “Rabbah,” “Rava,” and to their abbreviated forms, “Ba” and

“Va” in Palestine. It is a common name among Ashkenazi Jews in Eastern Europe and Israel, often used as an agnomen of Abraham. The word survives in European languages as an ecclesiastical designation (Abbas, Abt, Abbot), while in modern Hebrew it has largely displaced the Hebrew *av* as the popular term for “father.”

[Cecil Roth]

ABBA (Ba), two *amora'im* are known by this name.

(1) **ABBA** (late third and early fourth centuries), in his youth probably knew Rav and Samuel, the founders of rabbinic learning in Babylonia. He was, however, primarily a disciple of R. Huna and R. Judah, and frequently is mentioned together with their other disciples. Like R. Zeira, Abba ignored R. Judah's prohibition to leave Babylonia and emigrated to Erez Israel (Ber. 24b). In Erez Israel Abba was a close friend of R. Zeira and other Palestinian scholars. In Tiberias he studied with R. Johanan's chief disciples, R. Eleazar and Resh Lakish. After the death of Eleazar, leadership passed to R. Ammi and R. Assi, but Abba was considered equally great and was referred to in the Babylonian academies as “our teacher in the land of Israel” (Sanh. 17b). Abba dealt in silk (BK 117b) and became very wealthy. This enabled him to honor the Sabbath by buying 13 choice cuts from 13 butchers (Shab. 119a). A very charitable man, he never embarrassed the poor and would put money in his scarf which he would hang behind his back, so that the poor might take the money without him seeing their faces (Ket. 67b). He frequently revisited Babylonia, but always returned to Erez Israel for the festivals. Thus he transmitted Babylonian teaching and traditions to Erez Israel and vice versa (TJ, Shev. 10:2,39c; Ned. 8:1,40d; BM 107a). When the body of his teacher Huna was brought from Babylonia for burial, Abba eulogized him, saying “Our teacher deserved to have the *Shekhinah* rest upon him, were it not that he lived in Babylonia” (MK 25a). Influential in both *halakhah* and *aggadah*, Abba's teachings are found in the Babylonian and Palestinian Talmuds, as well as in the Midrash. (For a critical analysis of the traditions relating to the death and burial of Rav Huna, see S. Friedman, *Historical Aggadah*, pp. 146 ff.)

(2) **ABBA** (THE LATER; fourth–fifth centuries), Palestinian *amora*. Abba went to Babylonia, probably during the anti-Jewish reaction following the death of *Julian the Apostate in 363 C.E. Abba is mentioned together with R. Ashi, to whom he transmitted the Palestinian tradition (BK 27b). He is also quoted as saying to R. Ashi: “You have derived teaching from this source, we derive it from a different one, as it is written: ‘A land whose stones are iron’ [Deut. 8:9], Do not read ‘whose stones’ [בְּנֵי אֲבָנֵי, *avaneha*] but rather ‘whose builders’ [בְּנֵי אֲבָנֵי, *boneha*, i.e., sages]”, meaning that a scholar who is not as hard as iron is no scholar (Ta'an. 4a; cf. Bek. 55a). He is not mentioned in the Palestinian Talmud.

[Yitzhak Dov Gilat]

ABBA (Rava, Rabbah; eighth century), rabbinical scholar; disciple of *Yehudai Gaon and possibly also of *Aḥa of Shabḥa, the author of *She'iltot*. Abba is the author of *Halakhot Pesukot*, a juridical tract in the vein of *She'iltot* from which it apparently quotes. It was published in segments twice – first by S. Schechter and then by J.N. Epstein. A small monograph on the laws of phylacteries (probably part of a larger work), which has been attributed to Abba, was appended by *Asher b. Jehiel – who calls it the work of a *gaon* – to his own laws on the subject, under the title *Shimmusha Rabbah* (“Rabbah's Legal Practice”); it was printed in the Vilna edition of the Talmud in Asher's *Halakhot Ketannot* at the end of tractate *Menahot*. *Judah b. Barzillai pointed out that many of its utterances run counter to talmudic regulations, a phenomenon which he attributed to errors by pupils and copyists. Among Abba's best-known pupils was *Pirkoi b. Baboi.

BIBLIOGRAPHY: S. Schechter, in: *Festschrift ... David Hoffmann* (1914), 261–6 (Heb. sect.); Baron, *Social²*, 6 (1958), 339–40, n. 43, 356, n. 72; J.N. Epstein, in: *Madda'ei ha-Yahadut*, 2 (1927), 147–63.

[Meir Havazelet]

ABBA BAR AḤA (third century), *amora*. He was born in Erez Israel and emigrated to Babylonia (TJ, Ber. 1:9,3d). Several *halakhot* are quoted by him in the Jerusalem Talmud in the name of “Rabbi” (Judah ha-Nasi) and in the Babylonian in that of “Rabbenu”; therefore he may have been a pupil of Judah ha-Nasi. In the Jerusalem Talmud (*loc. cit.*) Abba b. Aḥa is quoted as saying in the name of Rabbi (according to Ber. 49a, cf. Dik. Sof. 258, in the name of Rabbenu): “If one fails to mention ‘covenant’ [i.e., the phrase ‘for Thy covenant which Thou has sealed in our flesh’] in the Blessing for the Land or ‘the kingdom of the House of David’ in the blessing ‘who rebuildest Jerusalem’ [both in the Grace after Meals], it must be repeated correctly.” R. Ilai reports decisions in his name (Ber. 49a, et al.). He is the author of the statement, “The nature of this people [Israel] is incomprehensible. Approached on behalf of the golden calf, they contribute; approached on behalf of the tabernacle, they contribute toward it too” (TJ, Shek. 1.145d).

BIBLIOGRAPHY: Hyman, *Toledot*, 15; Abraham Zacut, *Sefer Yuhasin ha-Shalem* (1924²), 99–100.

[Zvi Kaplan]

ABBA BAR AVINA (third century), Palestinian *amora*. He was also called Abba b. Binah, Abba b. Minah, or simply Buna. He was of Babylonian origin and studied there at the academy of *Rav (cf. TJ, Sanh. 3:3,2la) but later immigrated to Erez Israel. Among his pupils were R. *Abba b. Zavda and R. Berechiah. Most of his sayings are quoted in the Jerusalem Talmud and in the Midrash (e.g., Lev. R. 20:12); he is mentioned only once in the Babylonian Talmud (Shab. 60b). Abba

b. Avina was consulted in legal questions (TJ, *ibid.*) and seems to have officiated as a judge (TJ, BM, 5:2,10a). He interpreted 1 Chronicles 22:14: "Behold in my straits I have prepared for the house of the Lord ... etc." to teach that wealth does not matter before the Creator of the universe. A moving confession, composed by him, is quoted at the end of Jerusalem Talmud (Yoma 8:10,45c): "My God, I have sinned and done wicked things. I have persisted in my bad disposition and followed its direction. What I have done I will do no more. May it be Thy will, O Everlasting God, that Thou mayest blot out my iniquities, forgive all my transgressions, and pardon all my sins." The Palestinian *amora*, R. Higrāh, was his brother (TJ, Meg. 1:11,71c).

BIBLIOGRAPHY: Bacher, Pal Amor; Hyman, Toledot, 14.

ABBA BAR KAHANA (late third century), Palestinian *amora*. It is possible that he was the son of Kahana the Babylonian, the pupil of Rav who immigrated to Erez Israel. Abba quotes *halakhot* in the name of Ḥanina b. Ḥama and Ḥiyya b. Ashi (Shab. 121b; TJ, Ber. 6:6, 10d), but his talents lay largely in the realm of *aggadah* and, with his contemporary R. Levi, he was regarded as one of its greatest exponents (TJ, Ma'as. 3:10,5 la). Early aggadic traditions of leading *tannaim* such as *Eliezer b. Hyrcanus, *Simeon b. Yoḥai, *Judah b. Ilai, and *Phinehas b. Jair were known to Abba. Among his statements are "Such is the way of the righteous: they say little and do much" (Deut. R. 1:11) and "No serpent ever bites below unless it is incited from above ... nor does a government persecute a man unless it is incited from above" (Eccles. R. 10:11). This statement probably reflects the persecutions of the Jews of his time, to which there may also be a reference in the observation "The removal of the ring by Ahasuerus [Esth. 3:10] was more effective than the 48 prophets and seven prophetesses who prophesied to Israel but were unable to lead Israel back to better ways" (Meg. 14a). His homiletical interpretations deal with biblical exegesis; he identifies anonymous biblical personalities (e.g., Dinah was the wife of Job: Gen. R. 19:12, etc.) as well as geographical sites whose location was not clear (Kid. 72a). He embellishes the biblical narrative with tales and *aggadot* (Gen. R. 78:16; Eccles. R. 2:5, etc.). His statements reflect the contemporary hardships and persecutions suffered by the Jews (Lev. R. 15:9). Abba expresses his expectation of redemption in the remark that "if you see the student benches in Erez Israel filled with sectarians [Babylonians], look forward to the approaching steps of the Messiah" (Lam. R. 1:41); *ibid.*, ed. Buber, 39a, however reads "every day" (Heb. בכל יום) instead of "Babylonians" (Heb. בבבליים).

BIBLIOGRAPHY: Hyman, Toledot, 48–50; Bacher, Pal Amor; A. Marmorstein, in: *Jeschurun*, 13 (1926), 369 ff.

[Yitzhak Dov Gilat]

ABBA BAR MARTA (third and first half fourth centuries), Babylonian *amora*. Some suggest that he was named after his mother because she cured him as a child after he'd been bitten

by a mad dog (Yoma 84a). He owed a debt to the exilarch and was seized by his men on a Sabbath. However, the exilarch set him free because he was a scholar (Shab. 121b). In another incident Abba b. Marta managed to outwit the exilarch's men who sought to hold him prisoner because of his debt (Yev. 120a). In another instance Abba b. Marta owed money to Rabbah, the head of the Pumbedita academy. He went to Rabbah with the intention of repaying his debt during the sabbatical year. Rabbah answered in accordance with the *halakhah*. "I cancel it." Abba b. Marta took the money back, instead of saying, as the procedure demanded, "Nevertheless, I insist..." Only after the intervention of Abbaye did he realize that he had not acted properly and repaid the debt (Git. 37b). Another contemporary scholar, Abba b. Menyamin (Menyomi, Benjamin) b. Ḥiyya, who expounded Mishnayot and asked a halakhic question of Huna b. Ḥiyya (Sot. 38b, Ḥul. 80a), is sometimes identified with Abba b. Marta.

BIBLIOGRAPHY: Hyman, Toledot, 53; Bacher, Trad, 243.

[Moshe Beer]

ABBA BAR MEMEL (third and the beginning of the fourth centuries), Palestinian *amora*. Some scholars consider that Memel refers to his place of residence, Mamla or Malaḥ in Lower Galilee. He posed questions to R. Oshaya in Caesarea who may have been his teacher (TJ, BK 2:1, 2d). Eleazar b. Pedat, one of his eminent contemporaries, refers to Abba Memel as his master (Ket. 111a). He discussed halakhic problems with R. Ammi, R. Assi, R. Zeira, and others, and *halakhot* are quoted in his name by many Palestinian sages. He is the author of several principles concerning the interpretation of the biblical text. A *gezerah shavah* ("inference from a similarity of phrases in texts") may be established to confirm but not to invalidate a teaching. One may deduce a *kal va-ḥomer* (inference from minor to major) of one's accord, but not a *gezerah shavah*. An argument may be refuted on the basis of a *kal va-ḥomer*, but not on the basis of a *gezerah shavah* (TJ, Pes. 6:1, 33a). He also stated, "If I had someone who would agree with my view, I would permit ... work to be done on the intermediate days of the festival. The reason why work is then prohibited is to enable people to eat and drink and study the Torah; but instead they eat and drink and engage in frivolity ..." (TJ, MK 2:3, 81b).

BIBLIOGRAPHY: Frankel, Mevo, 67a-b; Hyman, Toledot, 50–52; Bacher, Pal Amor.

[Yitzhak Dov Gilat]

ABBA BAR ZAVDA (third century), Palestinian *amora*. Abba studied in Babylonia, first under Rav and later under R. Huna. He returned to Erez Israel, where he became one of the leading scholars at the yeshivah of Tiberias. He quotes *halakhot* in the name of the last of the *tannaim*: R. Simeon b. Ḥalafta, R. Judah ha-Nasi, and R. Ḥiyya as well as R. Ḥanina, R. Johanan, and Resh Lakish. After the deaths of R. Johanan and R. Eleazar b. Pedat, Abba b. Zavda became one of the most

prominent sages in Erez Israel. At the yeshivah of Tiberias he was given the honor of opening the lecture which Ammi and Assi closed (TJ, Sanh. 1:4, 18c). His humility is stressed by the sages (*ibid.*, 3:5, 21a). His saying, “A Jew, even though he sins, remains a Jew” (Sanh. 44a) is well known. In a sermon delivered on a public fast day, Abba b. Zavda called on those who wished to repent first to mend their evil ways, for “if a man holds an unclean reptile in his hand, he can never become clean, even though he bathes in the waters of Shiloah or in the waters of creation” (TJ, Ta’an. 2:1; in TB, Ta’an. 16a, the statement with slight variations is ascribed to Abba b. Ahavah).

BIBLIOGRAPHY: Hyman, Toledot, 43–44; Frankel, Mevo, 66b.

[Yitzhak Dov Gilat]

ABBA BAR ZEMINA (also **Zimna**, **Zimona**, **Zevina**; fourth century), Palestinian *amora*. His father was probably the Zemina who acted as “elder” of the Jews of Tyre (TJ, Bik. 3:3, 65d). Abba’s principal teacher was Zeira. While working as a tailor in Rome, his employer offered him meat which had not been ritually slaughtered and threatened to kill him if he refused to eat it. When Abba chose death, his employer informed him that had he eaten, he would have killed him, saying, “if you are a Jew, be a Jew, if a Roman be a Roman” (TJ, Shev. 4:2, 35a-b). The statement, “if our predecessors were as angels, we are as men; if they were men, we are as donkeys,” is quoted by Abba b. Zemina in the name of Zeira (TJ, Dem. 1:3, 21d; in Shabbat 112a, by Zeira in the name of Rabbah b. Zemina).

BIBLIOGRAPHY: Frankel, Mevo, 56b-57; Bacher, Pal Amor; Hyman, Toledot, 44–45.

[Abraham Goldberg]

ABBA BEN ABBA HA-KOHEN (early third century), Babylonian scholar during the transition from the tannaitic to the amoraic period. Abba is overshadowed by his famous son Samuel, and therefore is always referred to in the Babylonian Talmud as “the father of Samuel” (cf. Bezaḥ 16b). He was a native of Nehardea and decided issues of Jewish law there (Ket. 23a). He subsequently emigrated to Palestine and continued his studies in the academy of R. Judah ha-Nasi (TJ, RH 3:6, 59a; TJ, BM 4:1, 9c). Even after his return to Babylon, he addressed halakhic inquiries to him and maintained contact with his grandson R. Judah Nesia. He was a colleague of R. Levi b. Sisi and their opinions are often cited together (Shab. 108b; MK 26b). Mention is made of a divine revelation granted to the two when they were studying Torah together in the ancient synagogue Shaf ve-Yativ in Nehardea (Meg. 29a). The Jerusalem Talmud (Ber. 2:8, 5c) quotes the funeral oration Abba delivered over his friend. When Rav returned to Babylon, he deferred to Abba by refusing to head the community during the latter’s lifetime. Rav engaged in halakhic discussions with Abba, whom he highly respected (Ket. 51b). Abba derived his livelihood from trading in silk and also owned property. Highly charitable, he supported orphans and redeemed cap-

tives, and in all his actions attempted to go beyond the mere letter of the law.

[Zvi Kaplan]

ABBA BENJAMIN, *tanna* of unknown date. Four aggadic statements are quoted in his name (Ber. 5b–6a). They include: “A person’s prayer is heard [by God] only in the synagogue.” “If two enter [a synagogue] to pray, and one of them finishes his prayers first, and leaves without waiting for the other, his prayers are torn up before his face.” “If the eye had the power to see the demons, no creature would be able to endure them.” He has been identified with Benjamin the Righteous who was in charge of a charity fund. Once, when the fund was depleted during a famine, he supported a woman and her seven sons from his own pocket. Later he became gravely ill and was about to die, whereupon the ministering angels addressed the Almighty: “Sovereign of the universe, Thou hast said that he who saves one soul is regarded as having saved the whole world. Shall Benjamin the Righteous who saved a woman and her seven sons die so young?” Immediately the decree against him was annulled and a further twenty-two years were added to his life (BB 11a).

ABBA GULISH. Legendary figure mentioned in midrashic literature (Mid. Hag. to Ex. 2:16). Abba Gulish was a priest at a heathen temple in Damascus. However, on one occasion, when in great distress, he supplicated his idol without success. Disappointed with idol worship, he went to Tiberias where he converted to Judaism, zealously observing the precepts. He was there appointed overseer for the poor, but he embezzled the money entrusted to him and was punished by blindness, first of one eye and later of both. An object of contempt, he returned to Damascus where his former friends, regarding his blindness as a punishment for his apostasy, reproached him for his unfaithfulness. He thereupon assembled the people in the shrine for the ostensible purpose of apologizing to the idol, but instead he told them that an idol which is unable to see could not have punished him with blindness; it was the work of the omniscient God. As he descended from the dais, his sight was restored, as a result of which thousands of heathens became proselytes. It is not possible to determine whether there is any historical basis for this legend.

ABBA GURYON OF SIDON (second century), talmudic sage. Only two of his statements, both quoted in the name of other sages, have been preserved. One (Kid. 4:14) is “a man should not teach his son the occupation of an ass driver, camel driver, barber, sailor, shepherd, or tavern keeper, these being the trades of robbers.” The second is contained in the introduc-

tion (ix) to a late Midrash on Esther known as *Midrash Abba Guryon* (ed. by S. Buber, 1886), taken apparently from *Esther Rabbah*. “With the increase of false judges, false witnesses increased; of informers, the wealth of violent men increased; of impudence, respect for human beings ceased; when the beloved children provoked their heavenly Father to anger, He set an arbitrary king over them.” The “arbitrary king” is probably Domitian (89–96 C.E.) and the reference to “informers” may be reflected in the coin struck by his successor Nerva to commemorate the abolition of the calumny connected with the Jewish tax.

[Bialik Myron Lerner]

ABBA HILKIAH, according to the *aggadah* (Ta’an. 23a–b) a saint who lived in the first century C.E. Like many narratives concerning saints in the ancient world, Abba Hilkiyah was famous for his miraculous ability to bring rain in times of drought (Kalmin, 212). The Talmud describes him not as a learned sage, but rather as a common worker to whom the sages turned in time of need. Once when a pair of scholars came to ask him to pray for rain, he was not at home, and they finally found him hoeing in a field. They greeted him, but he did not return their greeting. Toward evening he gathered wood for his fire, put the wood and his hoe on one shoulder and his cloak on the other. All the way home he wore shoes, but when he passed through water he removed them. When he approached thorns and thistles he raised up his garment. And so the story goes on describing his apparently eccentric behavior, which puzzled the two sages, who nevertheless followed him into his home. Without speaking to the sages he and his wife went up to roof and prayed, and his wife’s prayer was answered first. Despite the disclaimers of the humble and saintly man, the sages thanked him for bringing the much needed rain. Before they left, they asked him about his puzzling behavior, and he explained how every element reflected some aspect of practical wisdom or ethical concern. For example his refusal to return their greeting was explained by the fact as a day laborer, he feared to take time off during his work hours lest by so doing he would be defrauding his employer. Similarly, he put the wood and his hoe on one shoulder and the cloak on the other because the cloak was borrowed, and the owner of the cloak had not given him permission to rest wood or a hoe on his cloak, and so on.

The story belongs to a genre of tales of the saints, common in the pagan and Christian world in antiquity. It is somewhat remarkable in the talmudic context because its hero, though not himself a sage, turns out to exemplify many of the most noble values which the sages admired, and was even capable of instructing the sages through his behavior regarding these values (Kalmin, 225–232).

In line with its principle of “creative historiography,” the Talmud informs us that this saintly figure, Abba Hilkiyah, was

in fact the grandson (son of the son) of *Ḥoni ha-Me’aggel, the famous “rainmaker” mentioned in Mishnah Ta’an. 3:8. Similarly, the Talmud tells us that Ḥanan ha-Naḥbah, another saintly rainmaker who is the protagonist of the following story in Ta’an. 23b, was also the grandson (son of the daughter!) of Ḥoni.

[Stephen G. Wald (2nd ed.)]

ABBAHU or **Avahu** (c. 300), usually counted a second generation Palestinian *amora*. He is often presented as the disciple of R. Johanan who purportedly called him “Abbaḥu my son.” He also is said to have studied with Resh Lakish (See *Simeon b. Lakish) and *Eleazar b. Pedat. Abbahu most likely lived in Caesarea, then the center of Roman rule and of Palestinian Christianity. He seems to have been an important halakhic figure and his aggadic sayings are significant in the fields of religion, ethics, and philosophy. Abbahu is presented in rabbinic literature as learned in mathematics, rhetoric, and Greek, which, we are informed, he taught his daughters. Tradition also endows him with good looks and physical strength and great wealth. It is reported that the Romans “showed favor to his generation for his sake,” perhaps a token of the great esteem in which they may have held him. His access to government circles may have given him a special position among his colleagues.

The Babylonian Talmud (Sot. 40a) tells us that Abbahu declined academic leadership in favor of *Abba of Acre because the latter was poor and debt ridden. This legend goes on to show Abbahu concealing his true reasons. Various passages also depict him in the following ways: He was a peacemaker even when others gave offense. He judged all men favorably and appreciated even a single merit of a sinner. He had special esteem for the scholars and taught that a scholar who had committed an offense deserving *niddui* (“the minor ban”), should be treated with consideration (TJ, MK 3:4, 81d). He enjoyed a position of honor in the community. He was an ordained judge, entitled to sit in judgment alone, but earned his livelihood in trade. He was apparently head of a group of scholars known as “the rabbis of Caesarea” and trained many outstanding disciples, among them the *amoraim* R. Jeremiah, R. *Jonah, and R. *Yose. He enacted ordinances, issued proclamations, and introduced usages such as the now accepted order of blowing the *shofar* on *Rosh Ha-Shanah* (RH 34a). Because of his position within the Jewish community and his connections with the authorities he made many official trips, both in Erez Israel and abroad. On such occasions he always deferred respect to the customs of the local community.

His aphorisms include: “Where the penitent stand, the wholly righteous cannot reach” (Ber. 34b); “A man should never tyrannize his household” (Git. 7a); “Be among the persecuted rather than persecutors” (BK 93a); “The world endures only on account of the man who utterly abases himself” (Ḥul.

89a). A prayer ascribed to him reflects the times in which he lived: "May it be Thy will ... to save us from the arrogance and harshness of the evil times which threaten to overtake the world" (TJ, Ber. 5:1, 8d).

With regard to Christianity he said, "If a man tells you 'I am God,' he is lying; 'I am the son of man,' he will eventually regret it; 'I shall go up to heaven,' he promises but will not fulfill" (TJ, Ta'an. 2:1,65b). Similarly he explained the verse (Isa. 44:6) "I am the first" means "I have no father"; "I am the last" means "I have no son"; "and beside me there is no God" means "I have no brother" (Ex. R. 29:5). It is stated in his name: "it was ordained [some say, in Usha] that 'Blessed be the name of His glorious kingdom for ever and ever' be recited in a loud voice-to offset any false charges by sectarians" (Pes. 56a; Rashi explains "lest they say that we add something improper in a low voice"). Abbahu isolated the Samaritan priests in his town from the Jewish community and decreed that they should be regarded as Gentiles in all ritual matters. When the Samaritans asked him "Your fathers found our food and wine acceptable, why not you?" he answered, "Your fathers did not corrupt their ways, but you have yours" (TJ, Av. Zar. 5:4, 44d).

ABBA KOHEN BARDELA (second century), *tanna*. He is not mentioned in the Mishnah but is quoted by Abba Yose b. Hanin in the *Sifrei* (Deut. 2). Resh Lakish cites his views on several principles of the laws of acquisition; one is that within a public domain a person may acquire ownership of chattels in a radius of four cubits around him (BM 10a). One of his many aggadic statements is, "Woe to us for the day of judgment. Woe to us for the day of rebuke. Balaam was a wise man of the Gentiles, but could not withstand the rebuke of his ass [cf. Num. 22:30]. Joseph was the youngest of the tribes, but his brothers were unable to bear his rebuke [cf. Gen. 45:3]. When God will rebuke each one of us for what he is, how much less will we be able to bear it" (Gen. R. 93. 10).

[Abraham Goldberg]

ABBA KOLON, legendary person mentioned in midrashic literature as the founder of a city, called "Rome-Babylon." It is related of him (Song R. 1:64): "On the day that Jeroboam, son of Nebat, installed the two golden calves, two huts were built in Rome, yet each time they were erected they collapsed. A wise man, Abba Kolon by name, was present. He told them that unless water from the Euphrates was mixed with the mortar, the buildings would not stand. He volunteered to fetch some

and, disguised as a cooper, journeyed afar until he reached his destination. There he drew water from the Euphrates, brought it back and mixed it with the mortar. The huts now remained standing. Henceforth people would say: 'A city without Abba Kolon is unworthy of the name.'" They called this city Rome-Babylon. The moral of this *aggadah* is that Rome was founded as a result of the iniquities of the kings of Israel. According to one opinion the name, Abba Kolon, is derived from Deucalion in Greco-Roman mythology. According to another, he is identified with Ablaccon, a magician in the time of Emperor Tiberius, who is said to have saved the city of Antioch from inundation. It has also been suggested that there is a double allusion in this name: father of "a colony" and "of *kalon*" ("shame").

ABBA MARI BEN ELIGDOR (**Sen Astruc de Noves** or **de Sen Negre**; 14th century), French philosopher, astronomer, physicist, talmudist, and exegete. Born in Noves near Avignon, about 1320 he resided in Salon where Samuel b. Judah of Marseilles studied astronomy under him. In 1335 the latter mentions his teacher as still alive and very old. According to the conjecture of Perles and Gross, he is to be identified with Abba Mari of Salon, whom *Kalonymus b. Kalonymus mentions as his teacher and whose refutation of the philosophic views contained in Joseph *Kaspi's *Sefer ha-Sod* is quoted by Kalonymus (Responsa 5, 11, 13). Isaac b. Jacob de Lattes states in his *Sha'arei Ziyon* that Abba Mari wrote commentaries on various tractates of the Talmud "combining interpretation of the text with halakhic decisions," as well as a commentary on the Pentateuch, an exhaustive interpretation of the *Pirkei de-R. Eliezer*, and various treatises on logic, metaphysics, and science. Abba Mari's commentary on Job (and on the story of the Creation), which follows the spirit of the religious-philosophical speculations of Maimonides, is extant (Mss. in Parma, De' Rossi, no. 1372, and Rome, Vatican, no. 244). A philosophical commentary on the Song of Songs (Neubauer, Cat, 1 (1886), 794, no. 2282 and Ms. Cambridge, Schiller-Szinessy, 215) may also be ascribed to Abba Mari. He may also be the author of a commentary to the "Introduction" of Euclid's *Elements* which is to be found at the beginning of the Ms. Munich, no. 91. Graetz's assertion that Abba Mari was arrested in Beaucaire together with Samuel b. Judah of Marseilles is based on a misunderstanding.

[Jakob Naphtali Hertz Simchoni]

ABBA MARI BEN ISAAC OF ST. GILLES (near Lunel, southern France; c. 1165), bailiff or agent of Count Raymond VI of Toulouse (*pakid ha-shilton Ramon*). He is mentioned by the 12th-century traveler *Benjamin of Tudela, who met him in St. Gilles. Possibly Abba Mari was the father of *Isaac b. Abba Mari, author of the legal codex *Ittur*.

BIBLIOGRAPHY: M.N. Adler (ed.), *Itinerary of Benjamin of Tudela* (1907), 4; Graetz, *Hist*, 3 (1949), 399; Gross, *Gal Jud*, 372, 651; Renan, *Ecrivains*, 520; S. Grayzel, *Church and the Jews* (1933), index.

ABBA MARI BEN MOSES BEN JOSEPH ASTRUC OF LUNEL (c. 1300), writer who opposed extreme rationalism. He especially attacked the spread of philosophical allegorization of Scripture in popular sermons and the use of astral magic for healing. Abba Mari lived in Montpellier where the dispute over Maimonides' *Guide of the Perplexed* had broken out as early as 1232–33 and where the controversy between the philosophical and the traditionalist schools of thought persisted up to the beginning of the 14th century. In order to counteract the rationalistic method of biblical exegesis, which in his view undermined belief, Abba Mari laid down three basic principles of Judaism: the existence, unity, and incorporeality of God; the creation of the world by God; and God's special providence. In his polemical work *Sefer ha-Yare'ah* (*yerah* = "moon"; an allusion to his native city Lunel), Abba Mari interprets biblical sayings and stories from the point of view of these three principles. As the leader of the traditionalists in the struggle against their opponents, Abba Mari conducted a vehement propaganda campaign and attempted to induce Solomon b. Abraham *Adret of Barcelona and Kalonymos b. Todros to combine in taking steps against the "corrupters of the holy tradition" (see *Maimonidean controversy). Abba Mari did not succeed, however, in inducing Solomon b. Abraham Adret to oppose publicly the use of astral magic and was barely able to persuade him to join the opposition to allegoristic sermons. Ultimately Adret did join the struggle against rationalism.

After negotiations lasting three years, a 50-year ban was pronounced in the synagogue of Barcelona on the Sabbath before the Ninth of Av, July 1305, against all those who before their 25th birthday engaged in the study of science and of metaphysics. In a special letter to the Provençal communities, this anathema was extended to include those who indulged in rationalistic exegesis and the philosophic interpretation of the *aggadah*. Abba Mari's opponents, led by Jacob b. Machir ibn Tibbon of Montpellier, realizing that this movement was directed against the extreme rationalists, issued a counter-ban. Menahem *Meiri of Perpignan sent Abba Mari a sharp rejoinder, and *Jedaiah ha-Penini Bedersi addressed himself in a like manner to Adret. Abba Mari obtained rabbinic opinions concerning the ban and counter-ban and received many favorable comments on his position, among others from the rabbis of Toledo, headed by *Asher b. Jehiel. This controversy, however, came to an abrupt end when the Jews were

expelled from France by Phillip the Fair in 1306. Abba Mari then moved to Arles and after that to Perpignan. His enemies sought to prevent his settling in that city. The leaders of the Jewish community, Samuel b. Asher and his son Moses, however, espoused his cause and befriended him. The letters and pamphlets of this controversy were collected by Abba Mari in his work *Minhat Kena'ot* (Pressburg, 1838). The halakhic correspondence between Abba Mari and Adret is contained in the responsa of the latter – *She'elot u-Teshuvot ha-Rashba*, 1 (1480; no. 167, 825, in conjunction with no. 413, 424–28; for the correspondence with Asher b. Jehiel, see the latter's *Responsa* no. 24). Abba Mari wrote a *kinah* for the Ninth of Av as well as a commentary on a Purim song in Aramaic, composed by Isaac ibn Ghayyat (Venice, 1632). Presumably, the *piyyut*, published by S.D. Luzzatto in *Kerem Hemed* 4 (1839), 30, is also by Abba Mari (cf. Zunz, against this view, *Lit Poesie*, 537), and similarly the one written entirely in Aramaic, mentioned in *Nahalat Shadal* 2 (1879), 4, but omitted in Davidson's *Ozar*. J. *Jabez, at the end of his book *Or ha-Hayyim* (1554) includes excerpts from *Sefer ha-Yare'ah* without mentioning Abba Mari, but occasionally referring to the author as "one of the disciples of Ben Adret" (*Kerem Hemed*, 9 (1856), 47).

A critical edition of *Minhat Kena'ot* and other pertinent responsa was published by Hayyim Zalman Dimitrowsky, in *Teshuvot ha-Rashba* (1990), vol. 2.

[Jacob Freimann / Dov Schwartz (2nd ed.)]

ABBA OF AKKO (Acre; third–fourth centuries), Palestinian *amora*. Abba apparently served as a rabbi in Acre. None of his halakhic statements has been preserved. The Midrash (Gen. R. 15:7) quotes a solitary comment to the fact that "the tree of the knowledge of good and evil" (Gen. 2:9) was an *etrog* ("citron"). He was so humble that even when the *amora* (the official interpreter of the lecture) introduced into it his own explanation which differed from his, Abba did not protest (Sot. 40a). Since he was poor, his intimate friend R. Abbahu declined to be nominated as head of the yeshiva and instead proposed Abba for the position in order to provide him with a source of livelihood (*ibid.*, loc. cit.; see Rashi ad loc.).

[Moshe Beer]

ABBA OSHAYA (Hoshaya) OF TIRIAH (a village in Galilee, near Nazareth), probably lived in Palestine during the fourth

century C.E. (Gen. R. 58:2). None of his *halakhot* or *aggadot* has been preserved; but he was remembered for his piety. Abba Oshaya was a launderer who was meticulous in his work. According to the law the launderer could keep the few threads which detached themselves during the wash. Abba Oshaya however refrained from this practice (TJ, BK 10:11, 7c). Another incident tells of a queen who was bathing where Abba Oshaya worked. She lost her jewelry and relinquished all claim to it. Abba Oshaya, however, found it and insisted on returning it to her (TJ, BM 2:5, 8c). Because of his piety he was regarded as being especially beloved of God. The Midrash (Lev. R. 30:1) relates that "When Abba Oshaya died, his bed was seen floating in the air, and the people applied to him the verse 'If a man would give all the substance of his house for love' – the reference being to the love which God bestowed on Abba Oshaya of Tiriah – he would utterly be desposed" (Song 8:7). Abba Oshaya is an example of the influence which some scholars had, not as a result of their teaching, but on account of their exemplary lives. S. Liebermann, however, is of the opinion that Abba Oshaya the launderer is to be identified with the *tanna* "Isaiah of Tarichae" mentioned in *Tosafot* (BK 11:14) as a man of exceptional piety and not with the later *amora* (The Talmud of Caesarea, *Musaf le-Tarbiz*, 2 no. 4, p. 85 note 12).

[Moshe Beer]

°**ABBAS I** (reigned 1588–1629), regarded as the mightiest king of the Safavid period (1501–1736). In 1598 he transferred his capital from Kazvin to *Isfahan, which he transformed into one of the most magnificent cities in the world by constructing monumental mosques and beautiful avenues and squares. He is mentioned as a great builder of roads and carvanserais, a renowned conqueror, an able organizer of the army, and an austere punisher of his opponents. He was famed for his cruel punishment of disloyal officers and, as a fanatical Muslim, was responsible for the assassination of several Jewish rabbis and for the forced conversion of many Jews in Isfahan and in other cities of Iran. His persecutions of the Jews of Iran are recorded in the Chronicle of Babai ben Lutf of Kashan, according to which there were three waves of forced conversion to Islam between 1613 and 1629, but many of the Jews returned to Judaism afterwards.

[Amnon Netzer (2nd ed.)]

°**ABBAS II** (reigned 1642–1666), son of Shah Šāfi; regarded, like his great-grandfather *Abbas I, as an able administrator and builder. Abbas II treated any kind of malfeasance with severe punishment. Iranian sources picture him as generally tolerant in religious matters, possibly because he allowed mem-

bers of the Catholic orders in his empire freedom of action. This tolerance may have to do with his policy of establishing friendly relations with European states in order to win allies against Iran's most formidable enemy, the Ottoman Empire. He died at the age of 36 from alcoholism and syphilis. His cruel treatment of the Jews and forced conversions in many cities of Iran are narrated by *Babai ben Lutf of Kashan, who probably witnessed them. He reported a wave of forced conversions to Islam between 1656 and 1662, after which, however, many Jews returned to Judaism.

[Amnon Netzer (2nd ed.)]

ABBAS, JUDAH BEN SAMUEL IBN, moderate rationalist author active sometime between the 13th and 15th centuries. Ibn Abbas' most important contribution was the rationalist-ethical and educational work *Ya'ir Nativ* ("He Will Light the Way"). Ibn Abbas also wrote a short book on ethics, *Mekor Ḥayyim* ("Fountain of Life"), and two other books which have not survived, *Me'ir Einayim* ("Light of the Eyes"), on the reasons for the commandments, and a commentary on Aristotle's *Organon*.

In *Ya'ir Nativ*, Ibn Abbas criticized the extremists on both sides of the controversy over philosophy. On the one hand, he criticized the extreme rationalists for their philosophical *antinomianism and for their laxity in, or even mocking, observance of the commandments. On the other hand, he was critical of the "talmudist" rabbis who studied only Talmud and not philosophy. He was thus a model of the moderate rationalism of the period. Ibn Abbas became famous for the curriculum of studies presented in *Ya'ir Nativ*. The curriculum was printed several times.

[Dov Schwartz (2nd ed.)]

ABBAS (Abenabez, Abenavez), MOSES BEN SAMUEL (c. 1350–c. 1420), talmudist, poet, and communal leader in Saragossa, Spain. Moses was born in Tudela and studied under *Solomon b. Ḥasdai, settling in Saragossa after 1370. He was a close friend of the poet Solomon b. Meshullam *da Piera, with whom he corresponded in Hebrew and Spanish, and some of his poems have been included in collections of the latter's works. Moses was repeatedly elected to the office of *muqaddam*, or administrative officer, of the Saragossa community between 1380 and 1420, representing it at court for the first time in 1389. After the massacres of 1391 Moses did much to relieve the survivors. He represented Saragossa at the disputation of *Tortosa (1413–14).

ABBAS, MOSES JUDAH BEN MEIR (c. 1601–1671), talmudist, halakhist, and poet. Abbas came from a Spanish family which, after settling in Salonika, spread throughout Turkey. He himself was born in Salonika. From his youth onward Abbas endured poverty and illness. His rabbis were Mordecai Kalsy, Jonah Adelle, and Solomon (III) b. Isaac (Bet ha-Levi) *Levi. Appointed rabbi in Egypt, he founded a yeshivah and *talmud torah* from which he earned his living. To enlist the necessary financial support he traveled extensively, and wrote appeals to those towns he was unable to visit. In the last years of his life he was a rabbi of Rosetta, where, in about 1669, his house was plundered and he lost all his possessions. Abbas wrote many responsa, most of them in Rosetta, and some during his travels. Two volumes are still extant in manuscript. He wrote *Kisse Kavod* (now at Jews' College, London), a commentary on the minor tractates *Kallah*, *Soferim*, and *Semaḥot*. While still a youth, Abbas corresponded and exchanged poems with Jewish notables in Turkey. As a poet, he was superior to his contemporaries, but did not reach the heights of the Spanish school. He encouraged young poets, correcting their efforts and couching his replies in verse form. His poems, which employ the meter and language of the Spanish poets, express his sufferings and hopes. According to Conforte, Abbas compiled two volumes of poetry. Some of his secular poems were published by Wallenstein (see bibliography), but hundreds of his scattered poems are still in manuscript. In some of his poems, the name MaShYA (an abbreviation for MoShe Yehudah Abbas) appears as an acrostic.

ABBA SAUL, mid-second century *tanna*. Quoted frequently in the Mishnah and Tosefta, he was probably a disciple of R. Akiva (in view of the fact that he quotes several *halakhot* in his name; Tosef., Sanh. 12:10). Abba Saul was the colleague of R. Judah b. Ilai and R. Meir (Men. 11:5). He is not usually mentioned with other *tannaim*, nor are *halakhot* transmitted in his name by later *tannaim* (see *Abba Gurion). His terminology often differed from that normally used, not only in relation to burial tools (TJ, Shek. 8:2, 51a) but in other areas as well, so that, for example, one who was commonly called a *shetuki* (“one whose father is not known”), he calls *beduki* (“one requiring examination,” Kid. 4:2). He often declared: “The rule is just the opposite” (Git. 5:4) indicating that his version of a tradition differed from that of other *tannaim*. Generally his opinion is quoted as an adjunct to a Mishnah (Sanh. 10:1; et

al.). On the basis of these differences, it has been suggested that there was a different “Mishnah of Abba Saul,” which Judah ha-Nasi had used. He transmitted traditions with regard to the pathology and growth of the human embryo (TJ, Nid. 3:3, 50d), and especially with regard to the structure and utensils of the Temple (Mid. 2:5; 5:4; Shek. 4:2; et al.). One of his few aggadic statements is his comment on “This is my God, and I will glorify Him” (Ex. 15:2), which he interpreted as meaning that man should strive to imitate God, endeavoring – like Him – to be gracious and merciful (Shab. 133b; Mekh., Shirah, 3). Later traditions suggest that his father’s name may have been Nannos (ARN¹ 29, 87; cf. Nid. 24b, 25b), and his mother’s Imma Miriam (Ket. 87a). The Talmud describes him as “the baker for the family of Rabbi [Judah ha-Nasi]” (Pes. 34a), but in another place his occupation was given as a gravedigger (Nid. 24b) and he described prevailing burial customs, reporting how a grave was located in the rock at Beth-Horon (Nid. 61a).

[Bialik Myron Lerner]

ABBA SAUL BEN BATNIT (first century C.E.), mentioned a number of times in tannaitic sources. According to Bezaḥ 3:8, Abba Saul was a shopkeeper in Jerusalem who had the custom of filling his measuring vessels with oil and wine before a festival for the convenience of his customers. Praised for his honesty, the Tosefta (*ibid.*, 3:8) reports that he once brought as a gift to the Temple three hundred jars of oil which had accumulated from the drops left in the measuring vessels, to which he had no right. When he was ill and the sages came to visit him, he showed them his right hand, and exclaimed: “See this right hand which always gave honest measure” (TJ, Bezaḥ 3:9, 62b). His name is associated with a halakhic precedent at the end of Mishnah *Shabbat* (24:5), and Tosefta *Menahot* (13:21, Pes. 57a) mentions him in connection with a series of criticisms of the conduct of the high priestly class in the last decades of the Second Temple.

[Abraham Goldberg]

ABBASI (incorrectly *Akasi* and *Aksai*), **JACOB BEN MOSES IBN** (second half of 13th century), Hebrew translator. Abbasi was born probably in Béziers in southern France, but he lived in *Huesca, Spain. There in 1297–98 he translated Maimonides’ commentary on the third order of the Mishnah (*Nashim*) from the original Arabic into Hebrew. As he relates in his introduction, the Jews of Rome had sent an emissary, R. Simḥah, to Spain to obtain a translation of the Mishnah commentary; the emissary was directed to Huesca with recommendations from Solomon b. Abraham *Adret of Barcelona and other Spanish rabbinical authorities. The Huesca

community agreed to provide translations of the first three orders of Maimonides' commentary, and commissioned the third to Abbasi with the assistance of Ḥayyim b. Solomon b. Baka, the physician.

In his introduction Abbasi set down his views on the relation of Judaism to philosophy. Citing Ecclesiastes 7:23, "... I said: 'I will get wisdom'; but it was far from me," he declared that the powers of man's mind are limited; neither philosophy nor natural science can reveal the essence of things. The Greek philosophers, whom Abbasi quotes, admitted this. Perfection can be achieved only by the study of the Torah and the observance of its commandments. There are secrets in prophecy that man cannot always penetrate, but the merit of divinely commanded action is evident and leads to deeper knowledge. Abbasi considered men in relation to the Torah in three categories: those who study and observe it, those who study but do not observe it, and those who observe but do not study it. He classified the commandments of the Torah in three categories as well; commandments involving the mind and the soul, commandments pertaining to the body, and commandments dealing with one's possessions. Abbasi continued his discussion describing the importance of the Oral Law as the indispensable and authoritative interpretation of Scripture; he explained the nature of Mishnah, *Gemara*, and certain works codifying the law, and stressed the importance of Maimonides' commentary for the understanding of the Mishnah and establishing *halakhah*. Thus, he praised the Jewish community of Rome for their initiative in commissioning the translation, which he considered of great importance for the future as well.

Abbasi wrote a short preface in which he explained the principles followed in his work, which for the most part are the same as those followed by other contemporary translators. He states that the translation is strictly literal; only rarely did he expand the text for clarity. He corrected obvious mistakes of transcription in the Arabic manuscript according to talmudic sources and Maimonides' other writings, but did not attempt to harmonize this commentary with Maimonides' *Mishneh Torah*. He also wrote a letter to Solomon b. Abraham Adret submitting his translation for approval. Abbasi's translation was included in the first edition of the complete Mishnah commentary (Naples, 1492), and after that often appeared in editions of the Mishnah and Talmud.

ABBASIDS, second dynasty in Islam, ruling from 750 to 1258, mostly from their capital of Baghdad. At its height (eighth-ninth centuries) the Abbasid realm extended from Central Asia in the east through North Africa in the west. It thus encompassed virtually all the Jewish communities then known, save those in Europe.

The new dynasts came to power after some 50 years of

clandestine revolutionary activity resulted in an open revolt (747–50). The ensuing conflict toppled the Umayyads (661–750), usurpers of the Prophet Muhammad's authority. The change of dynasty has long been regarded as a major watershed in the history of the Islamic state, albeit for different reasons.

Previous generations of Orientalists saw the rise of the Abbasids in the light of 19th century notions of nationalism and race and society. The emergence of the Abbasids was thus depicted as the culmination of a long struggle between the Syria-based "Arab" kingdom of the Umayyads and the conquered people of an Iranian empire that was shattered with the rise of Islam. The conflict was thus seen as being between a ruling institution predicated on the special privilege of a relatively small Arab/Muslim aristocracy and a more broadly defined coalition of forces whose ethnic origins were said to have been in the former Iranian provinces to the east, most especially the great land of *Khurasan. With that, there developed the seductive notion that Islamic government became increasingly Iranized under the Abbasids. In sum, it was believed that the Abbasid triumph heralded the creation of a new political and social order in which a narrowly defined ruling Arab society was replaced by a polity of more universal outlook and composition.

The traditional view has given way to a new consensus. Historians now stress the central role played by Arabs from the eastern provinces, particularly in leading the revolt. It is now believed that the struggle between the rebels and the Umayyads was not to restore an Iranian empire and civilization in Islamized garb, but to restore the pristine Islam of the Prophet's time under caliphs chosen from the House of the Prophet (Hashimites).

In any case, the Abbasid revolution was not a palace coup in which one family displaced another for reasons of personal aggrandizement only to see business continue as usual. A new age had dawned, or so the advocates of the regime claimed in hyperbolic language spiced with apocalyptic symbols. The Abbasid rulers adopted regnal titles suggesting that the messianic age was at hand and they were the chosen instruments of this manifest destiny. The messiah did not arrive but the new rulers altered the political and social landscape dramatically. With unexpected swiftness, the Abbasids redefined an Islamic state that had been founded on Arab privilege and beset by tribal xenophobia. They replaced it with a broadly based polity aspiring to universal outlook and recognition. Viewed as a whole, the deliberate restructuring of Abbasid society seems radical and far reaching. Whether one speaks of new networks of social relationships, a complete overhaul of the military from tribal to regionally based professional units, innovations in provincial administration that allowed for greater representation of non-family affiliates among the governors and sub-governors, or the creation of a highly centralized and massive bureaucracy that employed many non-Arabs, the changes instituted by the new regime represented

an ambitious departure in the style and substance of rule hitherto known amongst the Muslims.

To legitimize these dramatic changes, the new ruling order built a magnificent capital at Baghdad in central Iraq. Never before had so grand a city been built. Completed in 766 as a glorified administrative complex, the city eventually grew to an urban area of some 7,000 hectares that was by all accounts densely populated throughout the eighth–tenth centuries. Population estimates vary, but a settlement of well over half a million is certainly possible. With the building of a second imperial center, Samarra, some 55 years later, the Abbasids completely altered the demographic landscape of Iraq, particularly the central region. The vast majority of the inhabitants now lived in major cities and towns, signifying a dramatic shift from agricultural hinterland to urban environment.

Although we lack firm evidence, we can surmise that the increasing urbanization saw a shift in the pattern of Jewish settlement in the region. Babylonian Jews, previously engaged in agriculture and small crafts, must have been attracted, like their Muslim and Christian neighbors, from the declining villages and small towns to the cities where the Abbasid rulers encouraged urban development and expanded commerce and trade. Jews thus became part of the changing economic environment, and eventually played a central role in long-distance trade throughout the Islamic world and beyond. In the ninth century, a group of Jewish merchants called Radhanites after a district in the vicinity of Baghdad traded from China to the Iberian Peninsula. Although business of this sort was not the archetypal Jewish profession, it was a *métier* to which they readily adapted and with communities of co-religionists dispersed throughout the Islamic world and in Europe, they were able to create an effective business network that included commerce, trade, and also banking.

In the tenth century, a number of Christian and Jewish bankers were employed by various Abbasid functionaries, including the caliphs in Baghdad. Their task was to manage the fortunes of state officials and of the caliph himself. One might ask to what extent the activities of the Jewish bankers in Baghdad had similar parallels elsewhere in the Islamic world. The contemporary Muslim geographer al-Muqaddasi reports that most of the bankers and moneychangers in Egypt were Jews. However, the broad picture of Jewish involvement in the financial transactions of the times has yet to be fully researched.

The Abbasid state could not sustain the political stability of its early decades. Civil war broke out towards the end of the eighth century and military revolts were common in the ninth. By the latter part of the tenth century, the Abbasid empire witnessed the loss of North Africa and Egypt to the *Fatimids, a Shi'ite dynasty that originated in North Africa. To the east, various petty dynasts recognized the suzerainty of the Abbasid caliphs but withheld the tax revenues for themselves. As a result, economic conditions declined throughout the truncated realm. Already in the ninth century, the state, strapped for revenues, confiscated vast wealth from rich Christians (and presumably Jews) and during the reign of the caliph al-Muta-

wakkil (847–61) went so far as to invoke the discriminatory legislation against the Christians and Jews that had long been Islamic law but was seldom put into effect.

With conditions deteriorating in the Abbasid heartland, many Jews migrated westward to Egypt, North Africa, and more distant lands. Their path was made easier by the relative tolerance they experienced in Egypt and North Africa. Slowly, the center of Jewish commercial activity as well as scholarly enterprise shifted westward. Abbasid Iraq, which had been the home of the *exilarchs and of the *geonim* (see *Gaon), the leading political and scholarly figures of world Jewry, as well as the seat of the great academies of Sura and Pumbedita, was forced to share its preeminence as a Jewish center with rapidly developing communities elsewhere.

Over the centuries the power of the caliphs declined although the empire itself, however truncated, was more or less kept intact. When Baghdad was conquered by the *Mongols in 1258, to all intents and purposes, the Abbasid caliphate came to an end. The Mongol conquest would seem to have created expectations of more relaxed times among Christians and Jews. But the conversion of the Mongols to Islam ended any hopes of dramatic change in the relations among the monotheists.

[Jacob Lassner (2nd ed.)]

ABBA SIKRA (or **Sakkara**), talmudic name of one of the leaders in the defense of Jerusalem against the Romans in 66–70 C.E. “Abba Sikra” is regarded by some scholars as an epithet meaning “chief of the *Sicarii.” Jastrow, however, believes the word *sikra* means “red paint” or the act of “leaping”; Sikr is also recorded as a name for Arabs. In the two parallel accounts of his activities, the Talmud (Git. 56a) calls him Abba Sikra whereas the Midrash (Lam. R. 1:5 no. 31), refers to him as Ben Batiah, but there is no doubt that both refer to the same person. The Talmud calls him “chief of the *biryonim* in Jerusalem,” seemingly in a deprecatory sense, since this term is frequently used in connection with robbers and brigands (Sanh. 37a; Ber. 10a). He is linked with two episodes; the burning of the storehouses in Jerusalem, and the smuggling of his uncle, Johanan b. Zakkai, out of the city during the siege. The burning is recorded in connection with a dispute between the sages and the *Zealots. The sages wished to sue for peace, while the latter wished to do battle with the Romans. No conclusion was reached; but Ben Batiah, who was in charge of the storehouses in Jerusalem, burnt them all, to R. Johanan’s distress. The resultant famine led R. Johanan to seek the assistance of Abba Sikra in his plan to leave the beleaguered city. Abba Sikra proposed that R. Johanan feign illness and then death. He accompanied the coffin, borne by Eliezer and Joshua, the disciples of R. Johanan, and prevented the guards at the gate from stabbing the body.

ABBA UMANA (Heb. אָבָא אֱמָנָה; fourth century C.E.), Babylonian bloodletter (hence his cognomen). Abba Umana was distinguished for his exceptional piety and, according to legend, daily received a greeting from the Heavenly Academy, a distinction accorded to Abbaye only once a week, and to Rava only once a year. Abbaye, grieved at not being considered as worthy as Abba Umana, was told: “You cannot do what Abba Umana does.” In treating women, he conducted himself with the utmost modesty. In order not to put poor patients to shame, he arranged for his fee to be deposited in a place hidden from public view. He never accepted any remuneration from a scholar but instead would give him money to enable him to recuperate. Once Abbaye sent two sages to test him. Abba Umana gave them food and drink, and in the evening prepared mattresses for them. The following morning they took them to the market to sell. On meeting Abba Umana they asked him of what he suspected them. Abba Umana replied that when he missed the mattresses he assumed that they needed money for the redemption of captives. He refused to take the mattresses back, saying that he already devoted them to charity (Ta’an. 21b–22a).

BIBLIOGRAPHY: Hyman, *Toledot*, 10.

ABBAYE (278–338 C.E.), Babylonian *amora* of the fourth generation; chief of scholars of *Pumbedita. Abbaye was of priestly descent and was reputed to be a descendant of *Eli, the high priest. His father, whose name apparently was Keilil (Zev. 118b), died before, and his mother, at his birth (Kid. 31b). He was raised by his uncle, *Rabbah b. Nahmani, and by a foster mother whom he frequently quoted, calling her “mother.” His true name is not known. According to R. Sherira Gaon, he was called “Nahmani” after his paternal grandfather, and Abbaye, then, was a nickname. While he was still a child, his uncle recognized Abbaye’s intellectual capacity, and endeavored to educate him appropriately (Ber. 33b). He continued his studies under R. Joseph who apparently succeeded Rabbah as the head of Pumbedita’s circle of scholars. There is a legend that Abbaye later helped R. Joseph recall what he had forgotten as the result of illness. Abbaye debated legal points with the leading talmudic scholars of the day, such as Judah and *HISDA (Ta’an. 11b–12a). In his youth he was poor and watered his fields at night to enable him to study by day (Git. 60b), but later he employed tenant farmers (Ket. 60b) and traded in wine (Ber. 56a). Upon Joseph’s death (333 C.E.), Abbaye succeeded him as head in Pumbedita and held this position for the rest of his life. Until relatively recently, most modern scholars presumed that his most prominent colleague was *Rava, and that their agreements (“Both Abbaye and Rava

say ...”) and disagreements constituted a major element of the Talmud. Today the predominant view is that direct dialogues between Abbaye and Rava are extremely rare. Nearly all of their presumed dialogues, previously thought to form the backbone of the Babylonian Talmud, are, in fact, discussions between Abbaye and his teacher, Rabbah. This misapprehension resulted from the widespread confusion between the names Rava and Rabbah in the manuscripts and printed editions of the Talmud. Indeed, face-to-face contact between fourth generation Babylonian masters has now been shown to be generally infrequent, leading to the conclusion that they may have studied in disciple circles rather than academies. It seems that the editors of the Talmud in a later period gathered issues of law on which Abbaye and Rava’s independently adduced positions contradicted. These contradictions were then hashed out by the anonymous editorial voice of the Talmud. However, actual historically authentic dispute dialogue between Abbaye and Rava is almost nonexistent. In the Talmud’s discussions of their contradictory opinions, generally Rava’s view was accepted as law; only in six instances did Abbaye’s view prevail (BM 22b; etc.). The Talmudic term, “Discussions of Abbaye and Rava” became a general term appellation for the entire system of talmudic dialectics. Abbaye’s method of halakhic study combined erudition with keen, logical analysis. Yet, in contrast to his colleague – Rava – he was said to have preferred to rely on transmitted knowledge rather than on independent reasoning (Er. 3a). Discovering similar principles underlying the opinions of various sages, Abbaye would formulate terse general rules and find support for his opinion and that of others in *baraitot*. He also classified difficult passages in earlier sources and included in his studies laws no longer in force (Zev. 44b). He had a large stock of popular sayings, which he prepared with “People say ...” Some of his own remarks became popular maxims; among them, “Go outside and see what the people say ...,” i.e., follow popular tradition. Through his foster-mother he became familiar with remedies and justified their use by the rule that whatever is done for healing is not considered “ways of the Amorites” (i.e., pagan superstition; Shab. 67a). In the field of *aggadah*, Joseph’s influence on Abbaye can be seen, but the former sometimes deferred to his pupil’s exposition of a different verse. Abbaye was also responsible for reversing Joseph’s negative attitude to the book of Ben Sira (Sanh. 100b). He took over *aggadot* and interpretations brought by Dimi from Erez Israel to Babylon (Sanh. 44b). He was the first to discriminate explicitly between the plain contextual meaning of Scripture and its interpretation use for Midrash (Hul. 133a). Especially noteworthy is his quotation (from a *baraita*) of an exposition of the verse (Deut. 6:5): “And thou shalt love the Lord, thy God,” meaning that “the Name of Heaven should be loved on account of you.” One should study Scripture, learn halakhot, be apprenticed to a sage, and deal honorably with one’s fellowmen. Then people will say “How pleasant are the ways of this person who has studied Torah, how proper his conduct” (Yoma 86a). In the discussion between the *tannaim* as to whether man should

devote his time to the study of Torah to the exclusion of everything else (according to the view of Simeon b. Yoḥai) or whether one should study as well as live a productive life (the opinion of Ishmael), Abbaye concurred with the latter (Ber. 35b). Whenever one of his disciples had completed a tractate he would arrange a feast for scholars, thus showing his appreciation and concern for his students (Shab. 188b–119a). He often stressed the importance of “A soft answer turning away wrath,” and of promoting goodwill among men “so that one may be beloved above and well-liked below . . .” (Ber. 17a). His second wife, Ḥoma, who was the great-granddaughter of R. Judah, was famous for her beauty (Ket. 65a).

[Ephraim Elimelech Urbach]

ABBAYE KASHISHA (“Abbaye the Elder”; c. 300), Babylonian *amora*. He is called “the elder” in order to differentiate him from the better known *Abbaye of a later generation. He taught and interpreted halakhic *beraitot* (Yev. 24a; Ket. 94a, 96b), but also dealt with aggadic topics (Shab. 56a). He compared dissension and controversy to “the planks of a bridge which at first are loose but ultimately become fixed in place through constant treading” (Sanh. 7a). The later Abbaye quotes a *baraita* transmitted by his namesake (Ket. 94a).

BIBLIOGRAPHY: Hyman, *Toledot*, s.v.

ABBA YOSE BEN DOSTAI (Dosai; second century C.E.), Palestinian *tanna*. He is not mentioned in the Mishnah, but he transmitted halakhic statements in the names of R. *Eliezer and R. *Yose ha-Gelili (Tosef., Pe’ah 4:2; Ta’an. 2:6; cf. *Tosefta ki-Feshutah*. 1 (1955), 180, 5 (1962), 1080). He was a contemporary of *Yose b. Meshullam, and halakhic remarks are quoted jointly in their names (Tosef., Kelim, BK 6:18; Makhsh. 2:10). *Aggadot* dealing with the reconciliation of contradictory biblical passages are cited in his name by Judah ha-Nasi (Sif. Num. 42).

BIBLIOGRAPHY: Bacher, *Tann*, 2 (1890), 388–9, 489; Hyman, *Toledot*, 720–1 Z.K.

ABBA YOSE (Isi) BEN HANIN (Hanan, Johanan; second half of first century C.E.), *tanna* who transmitted details of the number and location of the Temple court gates (Mid. 2:6) and the order of the Temple service (Tosef., Suk. 4:15). Several of his statements on *halakhah* have been preserved (Tosef., Er., end; Sif. Num. 8; Sot. 20b). He denounced the priestly families and their corrupt behavior: “Woe is me because of the house of Boethus, woe is me because of their staves! Woe is me because of the house of Kathros, woe is me because of their pens! Woe is me because of the house of Elhanan, woe

is me because of their whisperings! Woe is me because of the house of Elisha, woe is me because of their fists! Woe is me because of the house of Ishmael b. Phabi, for they are high priests, and their sons are Temple treasurers, and their sons-in-law trustees, and their servants come and beat us with staves!” (Tosef., Men. 13:21; Pes. 57a). According to some later traditions (DEZ 9, end; cf. Sperber, DEZ, 152), Abba Yose transmitted an *aggadah* conveying the significance of the Temple, in the name of *Samuel ha-Katan: “This world is like the human eyeball. Its white typifies the ocean, which surrounds the world. Its black typifies the world. The pupil of the eye symbolizes Jerusalem. The image in the pupil of the eye symbolizes the Temple, may it speedily be rebuilt.”

ABELL, MAXWELL (1902–1957), U.S. communal worker, lawyer, businessman, and philanthropist. Abbell, who was born in Slonim, Poland, was taken to the U.S. at the age of three by his parents, who settled in Chelsea, Mass. Moving to Chicago, Abbell worked first for the Jewish Social Service Bureau, then as assistant executive director of the Jewish Charities of Chicago (1925–37). In 1937 he established his own accounting firm, and in 1944 he became senior partner of the law firm of Abbell and Schanfeld. He entered the real estate business as well, eventually establishing Abbell Hotels, a large nationwide chain, which he continued to manage until his death. Highly active in local and national Jewish life, Abbell was chairman of the Chicago College of Jewish Studies (1950–54), president of the United Synagogue of America (1950–53), and a founder of the World Council of Synagogues in 1957. His philanthropical activities were devoted mainly to the State of Israel and the Jewish Theological Seminary of America. In 1955 President Eisenhower appointed him chairman of the President’s Committee on Government Employment Policy.

[Bernard Segal]

ABBOTT, BUD (William Abbott; 1895–1974), U.S. actor. Famous for playing the straight man in the legendary comedy duo “Abbott and Costello” with longtime partner Lou Costello, Abbott was born to Ringling Brothers’ Circus performers in Asbury Park, New Jersey. After dropping out of school in 1909, he began working in carnivals and theaters around the U.S. Eventually he became the manager of the National Theater in Detroit, where he honed his skills playing the straight man alongside vaudeville performers Harry Steepe and Harry Evanson. In 1931, Abbott was working as a cashier at the Brooklyn Theater when he substituted for Lou Costello’s usual straight man, who was ill, and what would become one of comedy’s most celebrated teams was formed. The duo’s first national exposure came in 1938, with an appearance on *The Kate Smith Hour* radio show that led to a contract with Uni-

versal the following year. In 1940, Abbott and Costello secured their place in comedic history with their unforgettable supporting role in Universal's *One Night in the Tropics*, in which they performed their signature "Who's on First?" routine. Abbott and Costello's first starring role with Universal came in the comedy *Buck Privates* (1941). The unexpected success of *Buck Privates* led to a string of starring roles in slapstick comedies such as *In the Navy* (1941), *Hold That Ghost* (1941), *Keep 'Em Flying* (1941), *Ride 'Em Cowboy* (1942), *Who Done It?* (1942), *Hit the Ice* (1943), and *In Society* (1944). The duo continued to rely upon their trademark fast-paced, cross-talking formula in more than a dozen other films throughout the latter half of the 1940s and into the early 1950s, when they also began to appear on the television shows *The Colgate Comedy Hour* (1951–54) and *The Abbott and Costello Show* (1952–54). In 1956, Abbott and Costello finally parted ways following an IRS investigation that left both men in dire financial straits. Abbott attempted to revive his career with a new partner, Candy Candido, during the 1960s but found little success. In his final performance, Abbott provided his own voice for the 1966 animated television series, *Abbott and Costello*.

[Walter Driver (2nd ed.)]

ABBREVIATIONS. The abbreviation of words originated in antiquity, probably soon after the alphabet developed from ideographic pictures. While originally rare, their use increased with the general growth in the transmission of ideas by writing. They relieved the shortage of space and precious writing materials, served the convenience of the scribe, and preserved a certain degree of secrecy. An abbreviation also obviated the constant repetition of the full Divine Name. Various methods of abbreviating evolved in the course of time and, when extensively used, they economized in space and materials, although occasionally causing confusion and misunderstandings.

Terminology

The expression *notarikon* (derived from the Greek term for stenography) occurs in the Mishnah (Shab. 12:5) and refers to the use of initial letters, dots, and dashes to indicate abbreviation. It is used in the Talmud to indicate memory devices and is one of the 32 *hermeneutics rules of the *aggadah* (H.G. Enelow (ed.), *Mishnat R. Eliezer* (1933), 39) and one of the most popular and frequently used. By the third century the terms *siman* (Heb. סימן; Gr. *sēmeion*) and *alef bet* (אֵלֶף בֵּית) were current and applied to mnemonics, as in "Torah can only be acquired with [the aid of] mnemonic signs" (Er. 54b), while the Talmud also refers to *serugin* (סְרוּגִין; Yoma 38a, etc.), a system of abbreviation called trellis-writing, whereby only the initial word or letter is used when quoting a biblical verse. This system has been found in Bible fragments recovered from the Cairo *Genizah. The term *rashei otiiyyot* is found only in *Tanḥuma* (B., Ex. 54); *rashei teivot* first in *Tanḥuma Ha'azinu* 5; while the expression *sofei teivot* occurs in the post-talmudic masorah. The grammarian Elijah Levita (1468–1549)

speaks of "... abbreviated, broken words, expressions written in *notarikon* and initials...."

History

As the Hebrews wrote at an early stage of their history, the early invention of abbreviations could be assumed. They appear on sixth-century Semitic inscriptions, fifth-century Aramaic documents, and on Samaritan jar handles. To mark ownership, for Temple and other sacred purposes, such abbreviations were used well into talmudic times. Although not usually found in official manuscripts of the Bible, abbreviations appear in masoretic writings, Midrash, Mishnah, and Talmud, and they abound in post-tannaitic literature. It has been suggested that the translators of the Septuagint used a Hebrew text with abbreviations. It became one of the main concerns of the masoretic scholars to eliminate ambiguities caused by abbreviations, so that in printed Bibles there are generally no abbreviations; modern Bible commentators, however, while seeking to explain obscure passages, offer emendations suggesting that certain words are actually abbreviations (e.g., J.H. Greenstone in his commentary on Num. 23:3).

Abbreviations appear on Jewish *coins of the Jewish War (66–70) and the Bar Kokhba War (132–135; e.g., שְׁנֵה ב' – שְׁב', לְחָרוֹת – לְחָרוֹת); on documents recovered from the Dead Sea Caves and Masada; and on ossuaries of the talmudic period (e.g., יְהוֹזְקִיָּה – יְהוֹזְקִיָּה). The Mishnah regularly uses them (e.g., רַבִּי – רַבִּי), as does the Talmud (see Pes. 102b–103a) in a discussion on the order of the blessings known as *yaknehaz* (יְקַנְהֵז). Rashi, commenting on Numbers 5:11 ff. in *Gittin* 60a and *Yoma* 37b–38a, discusses various forms of abbreviations mentioned in the Talmuds. The mnemonic *simanim* were used to group together different *halakhot* with a common denominator such as authorship (e.g., *halakhot*, all by Abbaye, known as יַעֲלֵ קַג"ם; BK 73a). Abbreviations were used extensively as formulas of the calendar system (e.g., לֹא אֵד"וּ רֵאשׁ, "Rosh Ha-Shanah cannot fall on Sundays, Wednesdays, or Fridays"). In the Middle Ages, the names of frequently quoted scholars and/or their works were abbreviated and made pronounceable, e.g., Rashi (R. Shelomo Yizḥaki), Rambam (R. Moses b. Maimon), Rosh (Rabbenu Asher). It was also the practice in the medieval and post-medieval periods to append eulogistic terms in abbreviated forms (e.g., גּוֹחַז עֵדֶן – גּוֹחַז עֵדֶן, "he rests in paradise") or for martyrs (ה' יְקוּם דָּמוֹ – ה' יְקוּם דָּמוֹ, "may God avenge his blood"); among Sephardim ס"ט was used meaning סוֹפּוֹ טוֹב ("may his end be good") and is applied to the living as well, standing for סְפָרְדִי טָהוֹר, "of pure Sephardi descent." Current also were abbreviated eulogistic phrases in Spanish and Portuguese on tombstones, supplementing or replacing the traditional Hebrew. Abbreviations were also known in the communities of the Marrano Diaspora, e.g., Amsterdam, where there were transliterations into the Latin alphabet of accepted Hebrew abbreviations (e.g., ק.ק.ת.ת. – תּוֹרַה – קֹדֶשׁ תְּלִמּוֹד תּוֹרַה, "Holy Congregation Talmud Torah–" as an abbreviation for the Amsterdam Sephardi congregation). The use of abbreviations has continued to grow, particularly in all fields of Jewish scholar-

ship. It has been estimated, for example, that in the *siddur* of Jacob *Emden there are approximately 1,700 abbreviations. Famous personalities continued to be called by an abbreviation such as the Ba'al Shem Tov (Besht, בְּעֶשְׂט) and Elijah of Vilna (הַגָּאון ר' אֵלִיָּהוּ – הַגָּר"א).

Since the 19th century some authors' initials have almost superseded their actual names (e.g., the poet Judah Leib *Gordon is commonly known as יל"ג). The initials with which the historian and journalist Shneur Zalman Rubashov (later president of the State of Israel) signed his articles eventually became his Hebrew name (שז"ר, *Shazar).

Many 19th- and 20th-century Jewish organizations and institutions have become known by their abbreviated titles, e.g., *Alliance Israélite Universelle (כ"ח – כ"ח); or the *Bilu pioneers (ב"ל for בְּיָלִי). The Hasidic movement emanating from Lubavitch is known by the initials of their motto Habad (חב"ד – חב"ד), "wisdom, understanding, knowledge". Jewish organizations have also taken names from non-Hebrew initials, such as HIAS and *WIZO. The habit of calling international bodies by their initials (e.g., UN, UNESCO, UNSCOP) has found an echo in the Hebrew א"מ for אֲמוֹת מְאַחְדוֹת (United Nations). In Israel constant use is made of abbreviations (e.g., *Mapai, מ"פא"י – מ"פא"י; "the Israel Labor Party"; Zahal, צ"ה"ל – צ"ה"ל, "Israel Defense Forces"). These groups have adopted abbreviations which have virtually become independent words. Military ranks, units, and equipment are expressed almost exclusively by abbreviations, and so are most public enterprises (e.g., *Tahal, ת"ה"ל – ת"ה"ל, "Water Planning for Israel"). A member of the Israeli parliament is abbreviated ח"כ; a publisher ח"פ; Land of Israel, מו"צ; the rest of the world חו"ל; Cities with a compound name are often abbreviated (e.g., ת"א – ת"א, Tel Aviv). Various methods have been used to indicate abbreviations and several types are distinguishable. By the Middle Ages various systems of dots and strokes were known. The modern method uses a single stroke if one word is abbreviated (e.g., מ"ס – מ"ס) and double strokes before the final letter of the abbreviation if there are more (e.g., הקדוש – הקב"ה).

Types of Abbreviations

Two types of abbreviations are distinguishable. The first type is when one word is abbreviated: (1) *tevot mogzarot*: the end of the word is dropped (e.g., שני – שני); (2) *tevot nishbarot*: the middle of the word is dropped (e.g., אלא – אלא); (3) *emza'ei tevot*: the middle letter represents a word (e.g., ה' for the Tetragrammaton); (4) *sofei tevot*: the beginning of the word is dropped (e.g., אבן – אבן). The second type is when a group of words is abbreviated: (1) *rashei tevot*: the initial letters are used (e.g., א"ה – א"ה); (2) two letters are used of one or several words (e.g., אדם הראשון – אדה"ר); (3) when one of the words is very short, it is retained (e.g., שאלות ותשובות – שו"ת); (4) when an abbreviation is formed of a group of words, it may itself be divided (e.g., אלהינו מלך – אלהינו מלך).

(העולם אשר קדשנו במצותיו וצננו – בא"י אמ"ה אקב"ו). Such groups with the addition of vowels have often been rendered pronounceable (e.g., קר"ע שט"ן – קר"ע שט"ן, טוב, נדבות – קר"ע שט"ן, ראש, ערוב, שש, טוב, נדבות – קר"ע שט"ן, initial letters of verses recited before the *shofar* is blown); (5) such abbreviations are really *acrostics. In large groups, words may be left unrepresented (e.g., in the abbreviation for the Ten Plagues, דצ"ך עד"ש בא"ב, the Passover *Haggadah* omits the word מַכַּת before the כ standing for 6); (*sofei tevot*: the abbreviation is formed by a combination of final letters (e.g., אמ"ת – אמ"ת, see also no. 10); (7) *serugin* (trellis-writing): where only the initial word or letter is used when quoting a biblical verse; (8) *zeruf*: mystic combination of letters (see below); (9) combination of middle letters (e.g., תקיעה תרועה תקיעה – קר"ק); (10) initial letters in reverse order (e.g., אמ"ת – אמ"ת); (11) occasionally vernacular proper nouns and other words have been accepted and abbreviated in Hebrew (e.g., *Yahrzeit*, י"צ – י"צ).

Abbreviation of the Name of God

The name of God is probably the most often abbreviated word, due to its frequent appearance in Jewish writing and the reverence which is accorded it. It was abbreviated in antiquity, mishnaic, and talmudic times as ה' or יה'; in Targum Onkelos as ה' and ד'; and in the Middle Ages it was represented by ה' and varying numbers of *yod's*, *vav's*, strokes, and dots, from which developed the use of *yod's*. It has been estimated that there are over 80 substitutes for the Divine Name.

Abbreviation of Names

These are found in connection with euphemisms for the living and eulogies for the dead, in prayers, letters, etc. The Talmud (Git. 36a) reports that the *amoraim* Hīsa and Hoshaya signed themselves ס' and ע', respectively, and other names were abbreviated in talmudic times (e.g. Resh Lakish for R. Simeon b. Lakish). In medieval times the names of famous rabbis were abbreviated, vowels added, and the resultant abbreviation pronounced (e.g., רב"ן – רב"ן, a practice also adopted by and for later scholars and their families (e.g., רב"ן רבי יהודה לוי – רב"ן; רבי משה חיים לוצטו – רמח"ל). The general term for the talmudic sages was חז"ל – חז"ל. In the emancipation period, when the Jews had to adopt surnames, Hebrew abbreviations often formed the basis of "secular" names (e.g., Baeck, ב"ק – ב"ק). Hasidic leaders were referred to as אדמו"ר – אדמו"ר. The name Katz (כ"ץ – כ"ץ) stood for families of priestly descent, and Segal (סג"ל – סג"ל) for those of levite origin. On talmudic ossuaries the letters א"מ and ש' appear after the name of the deceased, while on later tombstones תהי נפשו צרוּהָ בְּצִדוֹר הַחַיִּים – תנצב"ה (see I Sam. 25:29), פה נקבר – פ"נ, פה טמון – פ"ט (meaning "here lies buried") are common. When referring in letters to deceased persons, it is customary to attach eulogistic abbreviations, such as הריני כפרת משכבו – הכ"מ, זכר צדיק לברכה – זצ"ל, פה טמון – פ"ט, זכרונו לברכה – ז"ל (Prov. 10:7); ע"ה – ע"ה; in correspon-

dence it became usual to prefix *letters and occasionally also printed matter and books with בעזרת ה' – בעז"ה, בע"ה, ב"ה ("With the help of God") or שויתני ה' לנגדי תמיד – שיל"ת ("I have set the Lord always before me"; Ps. 16:8). The addressee may be greeted with יצ"ו or ישמרהו צורו וגואלו – יצ"ו נטררה רחמנא or ישמרהו צורו וגואלו – נר"ו both meaning "May God protect him." The formula בחרם דרבנו גרשום – בחר"ג was used to affirm the secrecy of letters. The final greeting in the modern idiom is כל טוב סלה or כל טוב – כ"ט or כ"ט – דרישת שלום – ד"ש.

Names of Towns

The letters יבנה עיר אלהים – יע"א ("May God's city be rebuilt," referring to Jerusalem) are appended after the name of any city; after the name of a city in Israel (ת"ו – תבנה ותכונן); and after mentioning Jerusalem (תבנה ותכונן במהרה) עיר קדשנו תבנה ותכונן במהרה – ת"ו). The names of Diaspora towns mentioned in Hebrew writing are also abbreviated, e.g., ש"ם for Speyer, Worms, and Mainz; נ"ש for Nikolsburg; פ"פ for Frankfurt on the Main; and א"ד for the triple community of Altona-Hamburg-Wandsbeck.

Book Titles

The best-known abbreviations for *book titles are those for the Hebrew Bible, תנ"ך, composed of the initial letters of תורה, נביאים, and כתובים, and ש"ס for the Babylonian Talmud. Some Jewish classics have become known by the abbreviated form of their titles, thus almost completely obscuring the author's name and book title; thus the שני עשר לוחות הברית of Isaiah b. Abraham *Horowitz is invariably referred to as the של"ה, as is its author. At the beginning of books frequently appear abbreviations such as ה' צבאות or עזרי מעם ה' עושה or עמנו משגב לנו אלהי יעקב סלה – הצעמלא"ס while the Ashkenazi Jews often end with תם ונשלם שבח לאל בורא עולם – תושלב"ע. In the Middle Ages manuscripts were often completed with ברוך נתן or ברוך נתן – ליער כח – בגל"כ, derived from Isa. 40:29 (see *Hebrew Book Titles; *Manuscripts).

In Kabbalah

In medieval kabbalistic literature a combination of letters was termed *zeruf otiyot* (cf. Ber. 55a, etc.), while the term *gilgul* was introduced later. Abbreviations were used for frequently recurring concepts (e.g., אש רוח מים עפר – ארמ"ע, "fire, wind, water, earth") and the *notarikon* פרד"ס – פשוט רמז דרש סוד ("plain, symbolic, homiletic, esoteric"), describing the four types of biblical hermeneutics. The spread of mysticism led to an increasing use of abbreviation similar to the talmudic *simanim* (e.g., בראשית – בראשית – בראשית – בראשית); such terms are considered as possessing particularly profound and secret qualities (see *Magic). Abbreviations also appear on *amulets.

Misunderstandings and Misinterpretations

The increasing and inconsistent use of abbreviations has inevitably led to occasional confusion and made the study of Hebrew texts more difficult, a fact recognized in the 16th cen-

tury by Solomon Luria (*Yam shel Shelomo*, Hul. 6:6). Misinterpretations have occurred when ambiguous abbreviations were printed in full. In any case, difficulties arise when an abbreviation can be read in more than one way, so that, e.g., in a bibliographical context ד"ו could be read as דפוס ויניציאה ("Printed in Venice"), or דפוס וורשה ("Printed in Warsaw"), or דפוס וילנה ("Printed in Vilna"), or דפוס וינה ("Printed in Vienna"). Because of the risk of misrepresentation, no abbreviations may be used in a bill of divorce (Git. 36a and Sh. Ar., EH 126) or other religious documents. Misrepresentations have also occurred in the work of censors and Christian scholars (e.g., three *yod's* have been taken to denote the trinity). Hebrew abbreviations have been found on Christian amulets, and Christian writers have used kabbalistic methods, such as regarding a complete word as *notarikon* (e.g., אב כרא, בן רינה אב כרא). Because of the many obscurities in Hebrew writings, which Christian scholars were anxious to study, a guide to abbreviations was needed and it was a non-Jew, Johannes *Buxtorf the Elder, who produced the pioneer work *De Abbreviaturis Hebraicis* (1613). The first Jewish work of this kind, by Elijah *Levita, concentrated mainly on the masoretic ambiguities; lists of abbreviations were eventually added to Hebrew works and were followed by independent, comprehensive compilations. Of these, the following are the most important: J. Ezekiel, *Kethonet Yoseph: A Handbook of Hebrew Abbreviations* (Heb.-Eng., 1887); G.H. Haendler, *Erkhei ha-Notarikon* (1897); M. Heilprin, *Ha-Notarikon ...* (1872, 1930); A. Stern, *Sefer Rashei Tevot* (1926); S. Chajes, *Ozar Beduyei ha-Shem* (pseudonyms; 1933); S. Ashkenazi and D. Jarden, *Ozar Rashei Tevot ...* (1965; 1978); S. Ashkenazi, *Mefa'neah Ne'lamim* (1969); A. Steinsalz, *Rashei Tevot ve-Kizzurim be-Sifrut ha-Hasidut ve-ha-Kabbalah* (1968); U. Tadmor, *Ha-Notarikin ba-Ivrit ha-Yisre'elit, Leshonenu La-Am* 39, 225–57; Y. Ben-Tolila, *Ha-Ivrit ha-Medubberet, Leshonenu L-Aam* 40–41 (1990), 266–78.

[Ruth P. Lehmann]

Abbreviations in Jewish Folklore

Many abbreviations were misinterpreted (often quite intentionally) and caused misunderstandings which became part of the Jewish folklore. For example, the *Yaknehaz* abbreviation in the Passover *Haggadah*, denoting the order of the benedictions (*yayin, kiddush, ner, havdalah, zeman*), was understood as the German *jag'n Has* ("hunt the hare") and pictures of a hare hunt accompany the relevant passage in the printed *Haggadah*. Many folk etymologies are based upon the notion that the obscure word is an abbreviation; so, e.g., the word *afikoman* is explained by the Yemenite *Haggadah* as an abbreviation of *egozim* ("nuts"), *perot* ("fruits"), *yayin* ("wine"), *keliyyot* ("parched grain"), *u-vasar* ("and meat"), *mayim* ("water"), *nerd* ("spices"). The abbreviation of *Akum* for *Oved Kokhavim u-Mazzalot* ("worshiper of the stars and constellations") was interpreted by antisemitic propaganda (Rohling) as *Oved Christum u-Miryam* ("Worshiper of Christ and Mary").

[Dov Noy]

Abbreviations in Learning

Many abbreviations were set up to help students memorize rules such as in Hebrew grammar or in *Halakhah*. Of this type are *bg”d kf”t, lmn”r*, in classifying Hebrew characters which show the same phonetic behavior, or *shemelakhto bina* to mark the group of 11 servile letters as against the other 11 letters that only appear as radicals. These are well known. Here and there can be found local acronyms, as in Tetouan (Morocco), where the word *romah* based on “*wayiqqah ROMAḤ beyado*” (Num. 25:7) was adapted to summarize the *halakhot* that deal with the conditions under which a *shofar*’s hole can be repaired: *rubbo* (if the greater part of the *shofar* was kept untouched), *mino* (the hole can only be filled with a material of the *shofar*’s type), *hazar* (the original sound of the *shofar* did not change after the repair).

‘ABD AL-ḤAQQ AL-ISLĀMĪ (end of 14th century), Jewish convert to Islam. ‘Abd al-Ḥaqq was apparently a Moroccan Jew (the surname indicates a convert to Islam). We know next to nothing of his identity or his background. Towards the end of the 14th century, at the age of about 40, he converted to Islam. Sixteen years later he wrote a work in Arabic, *The Sword Extended in Refutation of the Rabbis of the Jews*, attacking the Jews and demonstrating the falsity of their beliefs. The text is an unsophisticated manual for disputations with Jews, and uses standard arguments of Islamic anti-Jewish polemic.

‘Abd al-Ḥaqq claims that the **dhimma*, or contract, between Islam and the Jews has been abrogated by the Jews themselves, as they are no longer genuine monotheists. Mistreatment of the prophets by Jews of biblical times shows this, as does the introduction of post-biblical feasts. The transmission of their Scriptures from early times cannot be trusted, and they have introduced falsifications into the texts, as can be seen from the presence of anthropomorphic passages in the Bible. The books of the Jews, in particular the biblical texts, he asserts, should thus be censored. Nonetheless, like other polemicists (e.g., *Samau’al al-Maghribi), ‘Abd al-Ḥaqq is able to claim authenticity for the biblical text when it agrees with his case, and, making use of knowledge from his Jewish background, he appeals to *gematria* to show that Muhammad and Mecca are referred to in the Bible – thus, in Genesis 12:9, where Abraham is said to have gone “towards the south,” *hanegbah* in Hebrew, ‘Abd al-Ḥaqq points out that the numeri-

cal value of the letters in this word, 65, is the same as that of the letters in the name of the city of *Mecca. By similar means he shows that king Ahab (in I Kings 20:6 and 22:35) was a believer in Muhammad.

[David J. Wasserstein (2nd ed.)]

ABDALLAH, YUSEF (late 19th–early 20th century), charlatan who revived messianic activity in Yemen in the 1890s. He began his activities no later than 1888 as the herald of the messiah. The leaders of the Jewish community in San’a, led by Ḥayyim *Ḥibshush, actively opposed him until they succeeded in persuading the police chief and the Turkish authorities in San’a to deport him from the city (1895) to the town of Shibām northwest of San’a, where he remained with little influence until his death. Abdallah struggled against his opponents by means of letters and poems. The latter-day discovery and publication of a three-page manuscript of his includes four poems which do not exhibit any extraordinary talent, being in fact trivial in comparison to run-of-the-mill Yemenite poetry. Surprisingly, its content is far from revealing messianic tendencies. It does not offer the slightest suggestion of his supposed status as a messiah, or as the messenger of the messiah. All that appears in the poetry in this respect is a plea for redemption and the hastening of the arrival of the messiah, motifs familiar in Hebrew poetry throughout the generations. What can be found there are complaints about his opponents in the Jewish community and the Turkish and Muslim authorities. As opposed to the negative picture described by Ḥibshush, Korah and most scholars (apart from Nini) find no deviation from the Jewish tradition of messianic expectations and observance of religious law in the poems.

[Yosef Tobi (2nd ed.)]

ABDALLAH IBN SABĀ’ (also called **Ibn al-Sawdā**; seventh century), supposedly a Jew of south Arabian origin, and regarded as the founder of the Shī’ite sect (one of the two main branches of Islam) shortly after Muhammad’s death. The reports by Arab historians concerning his role are contradictory and perhaps reflect the tendency to charge a Jew with partial responsibility for the internal feuds of the Islamic community. Abdallah asserted that Muhammad is the Messiah, who will appear a second time. Meanwhile, ‘Alī, the son-in-law of Muhammad, is his representative. After the assassination of ‘Alī (661), Abdallah allegedly denied that ‘Alī had died, asserting

that the slain man was a demon who had taken on 'Alī's features; 'Alī himself was hiding among the clouds, and would return to earth later to establish the Kingdom of Justice. The doctrine that not 'Alī, but someone of similar appearance, had been murdered, has its precedent in the teachings of a Christian sect which denied the crucifixion of Jesus, a belief which persists in the Christology of the *Koran (Sūra 4: 156). But the messianic concepts ascribed to Abdallah show traces of Jewish (two Messiahs) and Christian origin and differ from the messianic concepts which became generally recognized within the Shi'a. In these, the Messiah (who was identical not with 'Alī himself, but with one of his descendants) was hiding in a mountain in the vicinity of *Kūfa (in Iraq).

[Josef Horowitz]

ABDALLAH IBN SALĀM (seventh century C.E.), one of Muhammad's Jewish followers. The name of his father, Salām, was used only among Jews in the Arabia of that time. Abdallah's family is usually regarded as belonging to the Banū *Qaynuqā', one of the Jewish clans of Yathrib (Medina), although some associated it with the typically Arabic clan of the Zayd al-Lāt, which implies that they were under the protection of the latter. Abdallah is said to have been converted by Muhammad soon after the latter's arrival in Medina. When his former coreligionists told Muhammad "He [Abdallah] is our master and the son of our master" Muhammad invited them to follow Abdallah's example. The Jews refused, and only his immediate family, notably his aunt Khālida, embraced Islam. According to other versions, Abdallah's conversion occurred because of the strength of Muhammad's answers to his questions. Another account, which places Abdallah's conversion at a much later date, has more intrinsic plausibility. After Muhammad's death Abdallah was in the entourage of Caliph 'Uthmān and made a vain attempt to prevent his assassination. A year later he warned 'Alī against leaving Medina. If all the obviously legendary and biased accounts about Abdallah are eliminated, not much concrete information remains. His relationship to Ahmad ibn Abdallah ibn Salām, a translator of biblical writings, is unclear. Originally the Jewish scholars of Medina were presented as the questioners of Muhammad, and only later did Abdallah figure. The three questions ascribed to him form the core of the volume entitled *Questions of Abdallah ibn Salām*, first mentioned in 963, which is known in a number of adaptations as *A Thousand Questions*. Outside the context of this work Abdallah is repeatedly mentioned as the source for tales from biblical times. *Genizah* fragments have recently yielded a Jewish version of the Abdallah legend in which he appears as *Absalom.

[Josef Horowitz]

°ABD AL-MĀLIK IBN MĀRWAN (ruled 685–705), *Umayyad caliph who restored the unity of the young Arab Empire after years of civil wars. 'Abd al-Mālik built the Dome of the Rock and the al-Aqṣā Mosque in the Temple area in Jerusalem. The building of the Dome was an act of propaganda for the Muslim faith, partly directed against the still strong Christian community, as is proved by the inscriptions inside the Dome. The restoration of the Temple site to a state of splendor impressed mystically inclined Jewish circles. There is no information about the general situation of the Jews under 'Abd al-Mālik's rule. According to the majority of sources the armed rising of the Jewish pseudo-messiah Abū 'Isā of Isfahan was suppressed during his reign. The Jew Sumayr was master of the mint in Iraq during the monetary reforms of 'Abd al-Mālik.

ABDON (Heb. אַבְדוֹן), a name occurring in the Bible in several different contexts. (1) Abdon the son of Hillel, a minor judge, who came from a town in Ephraim, possibly to be identified with the village Fara'ata southwest of Shechem (Judg. 12:13–15). He "judged" Israel for eight years. The Bible states that "he had 40 sons and 30 grandsons, making 70 descendants who rode on 70 donkeys." This statement may be intended to indicate that Abdon and his descendants had widespread influence and wealth. (2) Abdon the son of Micah (II Chron. 34:20), probably corrupt for *Achbor the son of Micaiah (II Kings 22:12–14). (3) A Benjamite family (I Chron. 8:12, 30; 9:36).

ABDUCTION (or **Manstealing**; Heb. גְּנוּבַת נַפְשׁ, *genevat nefesh*), stealing of a human being for capital gain. According to the Bible, abduction is a capital offense. "He who kidnaps a man – whether he has sold him or is still holding him – shall be put to death" (Ex. 21:16); and, "If a man is found to have kidnapped a fellow Israelite, enslaving him or selling him, that kidnapper shall die" (Deut. 24:7). The first passage appears to prohibit the abduction of any person, while the latter is confined to Israelites only; the first appears to outlaw any abduction, however motivated (cf. *Codex Hammurapi*, 14), while the latter requires either enslavement or sale as an

essential element to constitute the offense. Talmudic law, in order to reconcile these conflicting scriptural texts or to render prosecution for this capital offense more difficult (or for both purposes), made the detention, the enslavement, and the sale of the abducted person all necessary elements of the offense, giving the Hebrew “and” (which in the translation quoted above is rendered as “or”) its cumulative meaning (Sanh. 85b, 86a). Thus, abduction without detention or enslavement or sale, like enslavement or sale or detention without abduction, however morally reprehensible, was not punishable (even by *flogging), because none of these acts was in itself a completed offense. On the other hand, even the slightest, most harmless, and casual use of the abducted person would amount to “enslavement”; and as for the “sale,” it does not matter that the sale of any human being (other than a slave) is legally void (BK 68b). In this context, any attempt at selling the person, by delivering him or her into the hands of a purchaser, would suffice. However, the attempted sale has to be proved in addition to the purchaser’s custody, because giving away the abducted person as a gift would not be a “sale” even for this purpose (Rashba to BK 78b). The term rendered in the translation quoted above as “kidnap” is *ganov* (“steal”). The injunction of the Decalogue, “Thou shalt not steal” (Ex. 20:13), has been interpreted to refer to the stealing of persons rather than the stealing of chattels. The reason for this is both because the latter is proscribed elsewhere (Lev. 19:11), and because of the context of the command next to the interdictions of murder and adultery, both of which are capital offenses and offenses against the human person (Mekh. Mishpatim 5). It has been said that this interpretation reflects the abhorrence with which the talmudic jurists viewed this particular crime; alternatively, it has been maintained that the reliance on the general words “Thou shalt not steal” made the interdiction of manstealing applicable also to non-Jews and hence amounted to a repudiation of slave trading, which in other legal systems of the period was considered wholly legitimate.

There is no recorded instance of any prosecution for abduction – not, presumably, because no abductions occurred, but because it proved difficult, if not impossible, to find the required groups of *witnesses. These would have been required not only for each of the constituent elements of the offense, but also for the prescribed warnings that first had to be administered to the accused in respect of the abduction, the detention, the enslavement, and the sale, separately. The classical instance of abduction reported in the Bible is Joseph’s sale into slavery (Gen. 37; cf. 40:15, “I was kidnapped from the land of the Hebrews”). In the Talmud there is a report from Alexandria that brides were abducted from under the canopy (BM 104a; Tosef. Ket. 4:9), not necessarily for enslavement or sale, but (as it appears from the context) for marriage to the abductors.

[Haim Hermann Cohn]

In Israeli Law

TRAFFICKING IN HUMAN BEINGS TO ENGAGE IN PROSTITUTION. At the beginning of 2000, in the framework of

Amendment 56 of the Penal Law, provisions were enacted that prohibited trafficking in human beings for engagement in prostitution. Pursuant to this amendment, section 203A of the Penal Law established a maximum punishment of 16 years’ imprisonment for anyone who “sells or purchases a person in order to engage him in prostitution or serving as a middleman in the selling or purchasing of a person for this purpose.”

Trafficking in human beings has been prohibited since the very dawn of the history of Jewish Law, in the framework of the commandment of “Thou shall not steal” (Ex. 20:12; Deut. 5:16) and the prohibitions concerning abduction mentioned above. “Joseph’s sale by his brothers was an ignominious episode of Jewish history and was regarded as having sealed the fate of the Ten Martyrs” (see Rubinstein). The Knesset’s enactment of the aforementioned amendment was in accordance with Basic Law: Human Dignity and Freedom, sec. 2 of which states: “There shall be no violation of the life, body, or dignity of any person as such,” while sec. 4 states that “All persons are entitled to protection of their life, body, and dignity.”

Jewish Law’s prohibition of abduction and the death penalty imposed on the abductor are only applicable upon the satisfaction of four cumulative conditions: an abduction of a human being; the abductee’s detention in the abductor’s premises; the abductee’s enslavement by the abductor; and the abductee’s subsequent sale to another (Maim., Yad, *Genevah* 9:2). Some of the *geonim* were lenient regarding the requirement that all four conditions be satisfied and convicted the abductor where he had abducted and sold, or abducted and enslaved (see in detail *Halakhah Berurah*, Sanh. 85b).

The Israeli legislator broadened the prohibition to include serving as a middleman, in addition to the elements of abduction, detention, and sale. Under Israeli Law both the abductor-seller and the buyer are equally culpable and share the same punishment, whereas under Jewish law the abductor is the sole offender. The need for deterrence led the Israeli legislator to broaden the circle of offenders, imposing criminal liability upon the seller, the middleman, and the buyer. With respect to punishment for trading in women, this facilitates punishment even if only some of those involved in the offense are actually caught, and even if the prime actor – the seller – is still at large (occasionally abroad) and hence difficult to capture. The Supreme Court stressed that the prohibition of trading in human beings is intended to prevent violations of human dignity, especially that of women sold for prostitution. Hence, section 203A of the Penal Law should be constructed broadly and applied to any transaction that results in a person being treated as property, be it by way of sale, day-hiring, borrowing, partnership, or any other creation of a proprietary connection to a person (Cr. A 11196/02 *Prodental v. State of Israel*, 57 (6) 40, per Justice Beinisch).

CHILD ABDUCTION. The Hague Convention on the Civil Aspects of International Child Abduction was signed in 1980. In 1991, Israel incorporated the Convention’s provisions into

Knesset legislation and empowered the Family Courts to enforce them. The goal of the Convention was to secure the prompt return of illegally abducted children to their countries of residence prior to their abduction.

We already find a claim of child abduction in the Bible, where Laban complains about Jacob's flight from Aram Naharaim together with his wives and children (i.e., Laban's daughters and grandchildren). Upon finding Jacob at Mt. Gilead, Laban cries: "What have you done, that you have cheated me, and carried away my daughters like captives of the sword. Why did you flee secretly, and cheat me, and did not tell me, so that I might have sent thee away with mirth and songs, with timbrel and lyre? And why did you not permit me to kiss my sons and my daughters farewell? Now you have done foolishly" (Gen. 31:26–28).

The Convention's point of departure is the provision that abduction is a violation of one of the parent's custodial rights, "under the law of the State in which the child was habitually resident immediately before the removal or the retention" of the child (Article 3(a) of the Convention). Consequently, cardinal importance attaches to the determination of where the minor's habitual place of residence was, prior to the abduction. In one of the judgments given in the Jerusalem District Court, an halakhic principle was invoked in order to determine the minor's customary place of residence. The minor's parents were observant Jews. The father – then resident with his family in Oxford while writing his doctoral thesis – did not observe the Second Day of Festivals ordinarily observed by Jews living outside Israel. His adherence to the Israeli custom in this respect led the Court to infer that the locus of his life had remained in Israel. Consequently, the child's removal to Israel could not be regarded as abduction (F.A. 575/04 (Jer.) *Anon. v. Anon.*). In reaching this conclusion the Court adduced extensive halakhic material, from the Talmud (TB Pes. 51a, 52), Maimonides (Yad, *Yom Tov* 8:2), Shulḥan Arukh (Oḥ 493:3), and the responsa (Radbaz, 4:73).

The Convention provides that there may be a justification for not returning the child if "it finds that the child objects to being returned and has attained an age and degree of maturity at which it is appropriate to take account of its views" (Article 13 of Convention, concluding phrase). One of the judgments includes a comprehensive discussion of how to determine whether the child is of an age and level that justifies taking account of his views. The Court noted that "in the State of Israel, as a Jewish state, consideration is accorded to the Jewish heritage, where the matter concerns consideration for the children's wishes and the age at which the law gives effect to the expression of their position" (F.A. (Jer) 621/04 *Anon. v. Anon.*). One of the sources upon which the decision was based was the mishnah in *Niddah* 5:6. This mishnah states that vows made by a girl aged 12 are considered efficacious, while between the ages of 11 and 12 the girl's level of intellectual maturity and comprehension are "examined." In the case of boys, his standing vis-à-vis vows is examined between the ages of 12 and 13, while after age 13 his vows too are fully ef-

ficacious, like those of a girl at age 12. The Babylonian Talmud ad loc. states that "the Holy One Blessed be He endowed woman with greater wisdom than the man," in light of the fact that the girl reaches maturity before the boy (cf. *Torah Temimah*, Gen. 2:22, §48). The District Court concluded that in the case in question, two of the four daughters were capable of expressing their position – which was against returning to the United States and in favor of staying in Israel. This position was adopted in consideration of their age, which is the age at which an undertaking for a vow is binding under Jewish Law. As such it is also an age at which the Court can form its impression that their wishes are of a nature that ought to be respected, pursuant to Article 13 of the Convention

The very enactment of the Hague Convention Law in Israel may be viewed as the endorsement of a fundamental principle of Jewish Law, namely, that the child is not an object to be moved from country to country, and abducted by one parent against the wishes of the second parent; but an independent legal entity, vested with both standing and rights (see also *Parent and Child).

°**ABDULLAH IBN HUSSEIN** (1882–1951), first king of the Hashemite Kingdom of *Jordan. Abdullah was born in Mecca, the second son of the *sharif* Hussein ibn Ali, into the Hashemite family that traced its descent from the prophet Muhammad and had been rulers of Mecca from the 11th century C.E. He grew up in Constantinople, where he received the traditional education of a Muslim gentleman and became, in effect, his father's political secretary. After Hussein had been installed as emir of Mecca in 1908, Abdullah was instrumental in the secret negotiations with the British that resulted in the "Arab Revolt" of 1916 and in the Allies' recognition of Hussein as king of the Hejaz. Toward the end of 1920 Abdullah moved north with a Bedouin army with the avowed intent of restoring his brother Faisal, who had just been evicted by the French, to the throne of Syria. At a meeting in Jerusalem in March 1921, Winston *Churchill, then British colonial secretary, offered Abdullah the administration of Transjordan. Out of this tentative arrangement grew the emirate of Transjordan, with Abdullah as hereditary ruler, under the general terms of the British mandate over Palestine, which comprised Transjordan, but with the clauses pertaining to the Jewish National Home expressly deleted. The police of the emirate, soon styled the "Arab Legion," developed into a field force during World War II under John B. Glubb and took on a Bedouin character

more and more. In 1946 a treaty with Britain awarded Abdullah formal independence, and he assumed the royal title forthwith. In 1948 the Arab Legion, with British connivance, occupied the greater part of Samaria and Judea (designated by the UN resolution of Nov. 29, 1947, as part of an independent Arab State). This was secured by Abdullah in the 1949 armistice with Israel, and he incorporated these territories into his kingdom, henceforth called Jordan. On July 20, 1951, Abdullah was assassinated as he left al-Aqṣā Mosque in Jerusalem. His murder was generally ascribed to revenge for his readiness to negotiate with Israel for the partition of Palestine and the annexation of its Arab sections. It was also the culmination of his long-standing feud with the Husseini family and its head Hajj Amīn, the former Mufti of Jerusalem.

Ever since he had arrived in Transjordan Abdullah had been dissatisfied with the barren, desolate piece of land allotted to him by the British and, from the outset, sought to expand his realm. His prime vision was of a multinational Hashemite Greater Syria, but as a pragmatist, he was ready to settle for Palestine or even for its Arab sections alone. Hence, even though Abdullah's published views of the Palestine problem did not deviate from those of Arab nationalists in general, his moderate style when addressing Westerners made them, if anything, more effective. In the Israeli War of Independence, the Arab Legion proved the most dangerous enemy Israel faced in the field. However, for much of the 30-year period of his political activity, Abdullah maintained secret contacts with Jewish leaders, assuring them of his readiness to cooperate on his own terms. The highlights of these contacts were an agreement in 1933 with the *Jewish Agency (subsequently disavowed by Abdullah) to lease about 70,000 dunams of crown land in the Jordan Valley and intermittent talks between Abdullah and certain Jewish leaders (prominent among whom were Golda *Meir and Eliyahu *Sasson) during the War of Independence. All these contacts were without tangible result, with the exception of the modifications in the 1949 armistice line with Jordan. Yet he continued his negotiations with Israel for a peace treaty or for a non-aggression pact until 1950. Abdullah was a confirmed Arab nationalist, but, self-possessed and of an ancient ruling family, he lacked that admixture of frustration and hatred that became a characteristic of the next generation's nationalism. Moreover, even before World War I, Arab nationalism had been welded to his vision of Hashemite aggrandizement, and this twin concept never lost its hold on him. Abdullah is best understood as an opportunistic politician, short-range realist, and dynastic dreamer, also in his dealings with the Jews of Erez Israel. The 1950 annexation of Arab Palestine (the "West Bank") not only led to his eventual murder but also completely changed the nature and the future of Jordan. He wrote *Memoirs of King Abdullah of Transjordan* (English tr., 1950) and *My Memoirs Completed* (English tr., 1954).

[Uriel Dann / Joseph Nevo (2nd ed.)]

°ABDUL MEJID I (1823–1861), 31st sultan of the Ottoman Empire; the elder son of Mahmud II and his favorite wife, Bezm-i 'Alem. On November 3, 1839, four months after he ascended the throne, he proclaimed the *Hatt-i Sherif* of Gulhane, which inaugurated the Tanzimat period and in which he pledged the security of life, honor, and property for all the subjects of the empire. Following this, many reforms were undertaken to implement the contents of the edict. During his reign the Crimean War broke out (1853–56). Under the pressure of England and France, his allies in the war, the Porte abolished the poll tax (1855), which had been levied upon Jews and Christians since the Arab conquest. Instead, a tax called *Bedel-i Askeri* (substitute for military service) was levied from non-Muslim conscripts in lieu of military service. The crisis which led to the war brought the rise of a new generation of statesmen at the Porte, led by Ali and Fu'ad Pashas, who were more open toward the west than their predecessors. In February 1856, just before the war ended, the sultan proclaimed a new reform edict (the *Hatti-Humayun*) in which he granted civil and political equality for his non-Muslim subjects in breach of the Muslim Law (the *shari'a*), which aroused much resentment among the Muslim majority. During Abdul Mejid's reign important reforms were undertaken in the army and in education (mainly to prepare government functionaries), in the currency, and above all in the administration of the provinces.

ABÉCASSIS, ELIETTE (1969–), French writer. Born in Strasbourg to a Sephardi family of Moroccan origin, Eliette is the daughter of French thinker Armand Abécassis, author of *La pensée juive*. Deeply imbued with the religious atmosphere of her childhood, Eliette Abécassis, after completing her studies in philosophy and literature at the prestigious Ecole Normale Supérieure, published her first novel in 1996. *Qumran*, a metaphysical and archaeological thriller, whose hero is a young Orthodox Jew and whose plot revolves around the famous Dead Sea Scrolls, was an instant bestseller. Her next two books were centered on the theme of evil and its contagion: *L'or et la cendre* (1997), a novel, and "Petite métaphysique du meurtre" (1998), an essay. To write the screenplay for Amos Gitai's Franco-Israeli film *Kaddosh*, Abécassis immersed herself for six months in the ultra-Orthodox Jerusalem neighborhood of Me'ah She'arim, an experience which,

in addition to the screenplay, provided her with the plot of a novel, *La repudiée* (2000). She also directed a short film, *La nuit de nocés* (2001).

[Dror Franck Sullaper (2nd ed.)]

ABEL (Heb. אָבֶל), the second son of Adam and Eve, murdered by Cain, his older brother (Gen. 4:1–9). According to the biblical story, Abel was a shepherd and Cain worked the soil. Each brought an offering to the Lord from fruits of his labor. Abel's sacrifice was accepted by the Lord, but Cain's offering was rejected. Cain, in his jealousy, killed his brother. Explanations of this story are usually sought in a traditional conflict between agriculture and nomadism. Thus the preferential treatment accorded Abel's sacrifice is seen as reflecting a supposed pastoral ideal in Israel. The narrative, however, does not in any way support the existence of such an ideal, nor is there any denigration of farming. On the contrary, working the land seems to be considered man's natural occupation (Gen. 2:15). The antithesis between the brothers is therefore less one of occupations than of qualities of offerings. Whereas Cain's offering is described simply as "of the fruits of the soil," Abel is recorded as having brought "of the choicest of the firstlings of his flock." The story, however, seems to be abbreviated. It lacks any description of the initial motivation and the occasion for the sacrifices and it fails to give the reasons for the rejection of Cain's offering. Neither does it explain how the Lord's response became known to the brothers. The etymology of Abel's name is not clear. There may be some intended connection with *hevel* ("breath, vapor, futility"), symbolizing the tragic brevity of his life (cf., e.g., Eccles. 1:2), though for some reason the derivation of the name is not given, as is the case with Cain. There may also be some relation to the Akkadian *aplū* or *ablu* ("son"), parallel to the usage of the names *Adam and *Enosh.

For Abel in *aggadah*, see *Cain.

BIBLIOGRAPHY: N.M. Sarna, *Understanding Genesis* (1966), 28–32; E.A. Speiser, *Genesis* (1964), 29–33; U. Cassuto, *Mi-Adam ad No'ah* (1953), 131–9.

ABEL, AVEL (Heb. אָבֶל). (1) Name, appearing either alone or with the addition of a further indicative place-name, of many places in Erez Israel and Syria. Four cities with this name are mentioned in the lists of Thutmose III. Its meaning is apparently "place of abundant water" (cf. Dan. 8:2–6, "stream"). (2) Avel was a town in ancient Erez Israel which was situated at the origin of the aqueduct of Sepphoris in the mishnaic period (Er. 8:7; Tosef. Er. 9[6]:26). It is the present-day village of al-Rayna, about 3 mi. (5 km.) S.E. of *Sepphoris.

[Michael Avi-Yonah]

ABEL, ELIE (1920–2004), U.S. journalist. Born in Montreal, Canada, Abel received a bachelor's degree from McGill University and a master's degree in journalism from Columbia University (New York) in 1942. He began his career in jour-

nalism at the Windsor, Ontario, *Daily Star* and at the *Montreal Gazette*. During World War II he served in the Royal Canadian Air Force. Abel was correspondent in Europe for the North American Newspaper Alliance and also worked for the Overseas News Agency. In 1949, he joined the *New York Times* and served for ten years in Washington, Detroit, Europe, and India. In 1961, he moved into broadcasting, becoming a regular correspondent on the NBC evening news program *The Huntley-Brinkley Report*. During the 1960s, he covered the State Department and served as the network's London bureau chief and chief diplomatic correspondent. After working with the *Detroit News* and NBC, he was named dean of the Graduate School of Journalism at Columbia (1969–79). He then moved to Stanford University (1979–91), serving as chairman of the Communications Department from 1983 to 1986. He also served as Faculty Senate chair (1985–86) and directed the university's program in Washington, D.C. (1993).

Among his many accolades, Abel was awarded the Pulitzer Prize (1958), a Peabody Award (1967), and two Overseas Press Club awards (1969 and 1970). In 1998 he received the Grand Prize for Press Freedom of the Inter-American Press Association for his efforts to fight proposed regulation of journalists.

Abel wrote many books, articles, and reviews. His first book, *Missile Crisis*, appeared in 1966 and was considered the definitive text on the Cuban crisis for decades after its publication. Abel is quoted as saying, "How close we came to Armageddon I did not fully realize until I started researching this book." *Roots of Involvement: The U.S. in Asia 1784–1971*, which he wrote with Marvin *Kalb, was published in 1971. His book about Averell Harriman, *Special Envoy to Churchill and Stalin, 1941–1946*, which he co-authored with Harriman, was published in 1975. Abel's last book, *The Shattered Bloc: Behind the Upheaval in Eastern Europe*, was published in 1990.

[Ruth Beloff (2nd ed.)]

ABEL, EMIL (1875–1958), Austrian physical chemist. He was born in Vienna, where in 1908 he became the first professor of physical chemistry at the Technische Hochschule and head of the Institute attached to the chair, and he established a large and vigorous school. In 1938 he was dismissed under the Nuremberg Laws and found refuge in England, where, until his retirement, he was in charge of the research laboratory of the Ever Ready Co. In an early series of brilliant papers on homogeneous catalysis, he insisted that "it is reactions which catalyse, not substances." Later he contributed many publications on the reactions which occur in the lead chamber process for making sulfuric acid. In England he worked on the basic mechanism of the dry battery cell and wrote on mechanisms based on electron transfer reactions.

[Samuel Aaron Miller]

°**ABEL, LOUIS FELIX** (1878–1953), French archaeologist. Abel was born in Saint-Uze (Drome), France, joined the Dominican Order in 1898, and served as professor at the Ecole Biblique in Jerusalem from 1903 until his death. His principal work was *Géographie de la Palestine*, 2 vols. (1934), the first dealing with physical geography, and the second with political geography and topography. With L.H. *Vincent, he wrote *Jerusalem ancienne et nouvelle* (1912–14), regarded as one of the best monographs on Christian Jerusalem. He also collaborated with Vincent in monographs on Bethlehem, Emmaus, and Hebron. Toward the end of his life, Abel published his *Histoire de la Palestine*, 2 vols. (1952), covering the period from Alexander the Great to the Arab conquest. His other works include studies on the topography of the Hasmonean Wars, an account of travels in the Jordan Valley and in the Dead Sea area, as well as a grammar of the Septuagint and the New Testament.

[Michael Avi-Yonah]

°**ABELARD (Abaelard), PETER** (1079–1142), French philosopher and theologian. Abelard composed the *Dialogus inter Philosophum. Judaeum et Christianum* (1141; published in PL, 178 (1855), 1611–82). In it a Jew and a Christian, who accept revelation as adequate justification of their creed, are challenged by a philosopher, an Arab by nationality, who accepts only reason and natural law as a basis for the discussion. The dialogue does not offer a final conclusion, but this might possibly reflect the author's emphasis on the method of discussion rather than on its results. In the dialogue the Jew accepts belief in God's revelation as the only norm for faith and conduct; he asks the philosopher, who leads the debate, to prove that such an attitude contradicts reason. In doing so he expresses his people's confidence that God will finally fulfill the biblical promises of a blissful future and compensate them for their depressed position in contemporary society, which he describes in realistic detail. Being forced to pay for survival is an everyday experience for the Jews. In contemporary circumstances they were unable to earn a livelihood from agricultural property; they had to rely on profits from money lending, an occupation which made them more odious to their environment. In his reply the philosopher emphasizes the contrast between this situation and the promise of prosperity in this world, which the Bible holds out for loyal obedience. He concludes that either the Jews have not lived and acted in accordance with divine command or their Law is not the truth. The Christian, according to Abelard's description, although a believer in the authority of revelation, explains his belief in spiritual values as the *summum bonum* in philosophical terms. Abelard used the apologetic writers of the patristic age as his source, wishing to prove that his own attitude as a philosophical interpreter of Christianity corresponded to the classical tradition of the church. The contemporary Jew in his *Dialogus* takes the place of the defender of particular traditions – Jewish or pagan – as depicted in the ancient ecclesias-

tical treatises adopting philosophical argument; this presentation precludes the possibility that Abelard intended to report a contemporary exchange of arguments. His work is an apology for his own life, and its fictional character is pointed out by the description of the narrative as a dream. On the other hand, the whole design indicates that such conversations with Jews were not unusual in his time. Abelard indeed had some personal contact with Jews and was present when one interpreted the Book of Kings. Abelard's knowledge of Hebrew was restricted to the word lists contained in the biblical studies of St. Jerome. But the educational program of this church father inspired Abelard's recommendation to his former wife Heloise that she and the nuns under her charge learn Hebrew for a genuine understanding of Scripture.

ABEL-BETH-MAACAH (Heb. אֲבֵל בֵּית־מַעֲכָה), also called **Abel-Maim** (II Chron. 16: 4) or simply **Abel** (II Sam. 20:18). It is the present Tell Abil (Abil al-Qamh) northeast of Kefar Giladi and south of Metullah. Pottery found on the surface of the tell dates to the Early Bronze Age and later periods. It may be one of the cities mentioned in the Egyptian Execration Texts (inscribed on figurines) from the early 18th century B.C.E. and is apparently also referred to in the list of cities (no. 92) captured by Thutmose III in Palestine and southern Syria in his first campaign (c. 1469 B.C.E.). In the 12th–11th centuries, it may have passed into the possession of the Danites when they settled in the north of the country, but it subsequently was considered part of (Beth-) Maacah, whose center comprised northern Golan and Bashan. In the days of David, it was a fortified place and “a city and a mother in Israel” (II Sam. 20:19) in which the rebel Sheba, the son of Bichri, was besieged when he fled from Joab's army. It was captured by the Arameans during the reign of Baasa, king of Israel (early ninth century) together with Ijon, Dan, and the rest of the northeastern part of the Israelite kingdom (I Kings 15:20; II Chron. 16:4). In the days of Pekah the son of Remaliah, Tiglath-Pileser III, king of Assyria, conquered all the eastern and northern parts of Israel and the capture of Abel-Beth-Maacah is specifically mentioned (II Kings 15:29). This event is also recorded in Assyrian inscriptions which describe this king's campaign of 733/32 B.C.E. and the annexation of the conquered areas to Assyria (these contain a reference to Abil (m) akka). The city was apparently included in the province of Megiddo. No subsequent mention is made of Abel-Beth-Maacah in ancient sources.

[Michael Avi-Yonah]

ABELES, OTTO (1879–1945), author and Zionist worker in Austria and Holland. Abeles, who was born in Bruen (Brno), Moravia, was a founder of the Jewish students' organization Veritas. He was also a founder of the Zionist movement in Bohemia and Moravia. After completing his studies at the University of Vienna, he became legal advisor to the Austrian railways. Abeles contributed articles to the Zionist newspaper *Die Welt* and other Zionist newspapers in German, and was an editor of the organ of the Zionist movement in Austria *Juedische Zeitung*. Together with Robert Stricker he founded the Zionist daily newspaper *Wiener Morgenzeitung*, working on its staff until 1926, when he became an emissary for Keren Hayesod and traveled through Western Europe as a lecturer. From 1930 he was director of Keren Hayesod in Amsterdam. He was deported to Bergen-Belsen concentration camp, and died immediately after its liberation. Among his works are *Besuch in Eretz Yisrael* (1926), impressions of his first journey to Palestine; *Die Genesung* (1920), a book of poems; and *Zehn Juedinnen* (1931), a book about famous Jewish women. With L. Bato he edited the almanac *Juedischer Nationalkalendar* (1915/16–1921/22).

BIBLIOGRAPHY: *Haolam* (Aug. 30, 1945 and Sept. 6, 1945); *Haaretz* (Aug. 24, 1945); *Davar* (Aug. 24, 1945).

[Getzel Kressel]

ABELES, SIMON (**Simele**; 1682–1694), alleged Christian martyr. The Jesuit chronicler John Eder relates that Simon, who was born into a Prague Jewish family, wanted to embrace Christianity at the age of 12. His father Lazar, a glover, was accused of having murdered him. During the investigation Lazar allegedly hanged himself in prison, and a fellow Jew, Loebel Kurtzhandel, was executed as his accomplice. Simon, although not baptized, was buried with honors in the Týn (Thein) church where his grave may still be seen.

ABELIOVICH, LEV MOYSSEYEVICH (1912–1985), Belorussian composer. Born in Vilna, Abeliovich studied at the Warsaw Conservatory with Kazimierz Sikorski (composition) in 1935–39, and when the Nazis invaded Poland in 1939, he fled to Minsk and studied composition at the National Conservatory with Vasily Zolotarev, graduating in 1941. After World War II, he devoted himself to composition and was later engaged in the study of Belorussian folk music. His compositions include four symphonies (1962, 1964, 1967, and 1970); *Symphonic Pictures* (1958); *Heroic Poem* (1957); three sonatas and the two-book cycle *Frescoes* (1972) for piano; three sonatas for violin and piano; and chamber music and songs.

[Marina Rizarev (2nd ed.)]

ABELLA, ROSALIE SILBERMAN (1946–), jurist, Canadian Supreme Court justice. Rosalie Abella was born in a *displaced persons camp in Stuttgart, Germany. She migrated to Toronto with her family in 1950. Her father, Jacob Silberman, had been a lawyer in Poland but was admitted to Canada as a garment worker as part of a government labor importation scheme. Many of her family, including an older sibling, were murdered in the Holocaust. She grew up “with a passion for justice,” and, as she explains, “As a Jew, I feel that, through the Holocaust, I have lost the right to stand silent in the face of injustice.”

She studied classical piano at the Royal Conservatory of Music, remaining an accomplished pianist, and attended the University of Toronto, where she earned a law degree in 1970. She practiced civil and criminal litigation until 1976, when she was appointed to the Ontario Family Court, becoming the youngest, the first female, and the first pregnant Jewish judge in Canadian history. While on the Family Court she served on the Ontario Human Rights Commission (1975–80) and the Premier's Advisory Committee on Confederation (1977–82), chaired the Ontario Labour Relations Board (1984–89), and was sole commissioner for the Royal Commission on Equality in Employment (1983–84) in which she made “employment equity” a strategy for reducing employment barriers unfairly imposed by “race, gender or disability.” “Employment equity” was subsequently implemented by the governments of Canada, New Zealand, Northern Ireland, and South Africa.

Leaving the Family Court in 1987, Abella became Boulton Visiting Professor at the McGill Law School (1988–92) and Distinguished Visiting Lecturer at the University of Toronto Law School (1989–92), chaired the Ontario Law Reform Commission (1989–92), and was director of the Institute for Research on Public Policy (1987–92). In 1992 she was appointed to the Ontario Court of Appeal, where she gained a reputation as a reform-minded judge and an internationally recognized expert on human rights. Believing that democracy is enhanced by an activist judiciary, Abella championed the Charter of Rights and Freedoms and participated in rulings extending the rights of Metis, racialized minorities, and gays. Sometimes regarded as controversial, she nevertheless finds it “unforgivable” for judges, in her words, “to exchange their independence for state approval” as happened during the Third Reich.

Abella served as a director of the International Commission of Jurists, the Canadian Institute for the Administration of Justice, and the McGill Institute for the Study of Canada, and she was a member of the Hebrew University International Board of Governors and the Committee on Conscience, U.S. Holocaust Memorial Council. She is a frequent and highly en-

gaging speaker on equality issues and a committed promoter of Canadian culture. In 2004 she was elevated to the Supreme Court of Canada. The author or editor of four books and over 70 articles, Abella has received 20 honorary degrees, is a specially elected fellow of the Royal Society of Canada, and has been honored by the Canadian Bar Association, the International Commission of Jurists, and B'nai B'rith. She is married to the distinguished Canadian historian Irving Abella.

[James Walker (2nd ed.)]

ABELMANN, ILYA SOLOMOVITCH (1866–1898), Russian astronomer. Abelman, who was born in Dvinsk, worked at several Russian observatories, mainly on the complex problems connected with the properties of meteor streams. He was concerned with the calculation of secular orbital perturbations exercised on these streams by the effects of planetary attraction. Abelman was also well known for his efforts to spread the appreciation of astronomy, which he did through numerous popular articles.

[Arthur Beer]

ABEL-MAUL (Gr. Ἀβελμαουλ), a city cited in the apocalyptic work the Greek Testament of Levi 2:3, 5 as the place where Levi received a vision of the seven heavens. The name is the Greek form of the Hebrew “Abel-Meholah,” mentioned in Judges 7:22 and in 1 Kings 4:12; 19:16. Abel-Meholah was situated in the mountains of Ephraim, a fact which calls into question the text of Testament of Levi 2:5 which associates it with the Sirion mountain (“the mountain of the shield,” a false etymology from Shiryon). In the Dead Sea fragment of Testament of Levi, however, the place where Levi received the vision is Abel-Main, an alternate form of Abel-Maim, the name which replaced the earlier *Abel-Beth-Maacah (cf. 1 Kings 15:26, 11 Chron. 16:4). Abel-Maim is in fact situated in the very northern part of Palestine and could easily be connected with the Sirion, the Anti-Lebanon. The confusion in Greek Testament of Levi is evidently the translator’s.

[Michael E. Stone]

ABEL-MEHOLAH (Heb. אֲבֵל מְהוֹלָה), ancient city in the Jordan Valley that was the birthplace of the prophet *Elisha (1 Kings 19:16). Abel-Meholah also appears in the Bible as a place through which the Midianites passed in their flight from *Gideon (Judg. 7:22) and as part of Solomon’s fifth administrative district, which comprised the towns of the Jezreel and Beth-Shean valleys (1 Kings 4:12). Eusebius identified the place in the Onomasticon with Bethmaela, 10 (Roman) mi. south of Beth-Shean. Accordingly, it is generally accepted that Abel-Meholah lay west of the Jordan at the southern end of the Beth-Shean Valley, apparently in the neighborhood of ‘Ayn

al-Ḥilwa near the point where the Wadi al-Māliḥ enters the Jordan, perhaps Tell Abu Sifri or Tell Abu Sus. Glueck suggested locating it in Transjordan and to identify it with Tell al-Maqlūb, but this has not been generally accepted.

[Michael Avi-Yonah]

ABEL SHITTIM or **SHITTIM** (Heb. אֲבֵל הַשִּׁטִּים), a town in the plains of Moab where the Israelites camped before crossing the Jordan (Num. 33:49; Josh. 2:1, 3:1). Several noteworthy events are connected with the place and its surroundings. Here Balaam attempted to curse the tribes (Num. 22–24; Micah 6:5) and the Israelites sinned with the daughters of Moab and were punished by a plague (Num. 25). Abel-Shittim is also mentioned in later sources. Zeno (259 B.C.E.) purchased wheat there for his Egyptian master. It was a flourishing town during the period of the Second Temple, renowned for its fertile date groves and grain fields. Josephus mentions a town Abila 60 ris (about 7 mi.) from the Jordan (Jos., *Ant.*, 4:1; 5:1). The early city has been identified by Glueck with Tell al-Hammām at the outlet of Wadi al-Kafrayn which runs from the Mountains of Moab to the Jordan Valley. Chalcolithic and Early Bronze Age I pottery and an abundance of potsherds from the Iron Ages I and II have been found on the tell. In the Hellenistic period, the inhabitants moved to a spot in the Jordan Valley to which they transferred the name of their previous settlement, today Khirbat al-Kafrayn. Captured by the Romans, Abel-Shittim escaped destruction during the Jewish War (66–70) and it was populated at least until the end of the Byzantine period.

[Michael Avi-Yonah]

ABELSON, HAROLD HERBERT (1904–2003), U.S. educator. Born in New York, he began his teaching career at City College in 1924, advancing from assistant psychologist in the educational clinic to professor in 1948, and dean of the school of education in 1952. His book *The Art of Educational Research, Its Problems and Procedures* (1933), his articles, and his investigations and interest in personality development reflect his belief that educational research should proceed on the basis of scientific principles. In 1944 he was appointed consultant to the office of the Adjutant General and in 1962 became president of the Interstate Teacher Educational Conference. Other books by Abelson include *The Improvement of Intelligence Testing* (1927) and *Putting Knowledge to Use: Facilitating the Diffusion of Knowledge and the Implementation of Planned*

Change (with E.M. Glaser and K.N. Garrison, 1983). The CCNY School of Education has established the Abelson Award for Excellence in Research, which is given annually for the most creative use of educational measurement in the Graduate Research Project.

[Ronald E. Ohl / Ruth Beloff (2nd ed.)]

ABELSON, JOSHUA (1873–1940), English minister. Born in Merthyr Tydfil (Wales), Abelson was ordained at *Jews' College in London, and occupied pulpits in Cardiff and Bristol. He became principal of the Jewish theological preparatory school Aria College in Portsmouth, after which he was appointed minister to the United Hebrew Congregation of Leeds. Abelson's works include *The Immanence of God in Rabbinical Literature* (1912), in which he examined the theory of the *Shekhinah* in the rabbinic sources, and its connection with the later development of Jewish mysticism. This work was followed by *Jewish Mysticism* (1913), the earliest serious study of the subject in English. He assisted Chief Rabbi Joseph *Hertz in the editing of Hertz's Commentary on the Pentateuch, published in 1929–36.

BIBLIOGRAPHY: JYB (1903–04, 1940); G. Scholem, *Bibliographia Kabbalistica* (1933²), no. 2; Scholem, *Mysticism* (1946²), 55.

[*Encyclopaedia Judaica* (Germany)]

ABELSON, PAUL (1878–1953), U.S. labor arbitrator. Abelson, who was born in Kovno, Lithuania, immigrated to the United States at the age of 14. He studied at the City College of New York and Columbia University and in 1906 published *The Seven Liberal Arts: A Study in Medieval Culture*. Abelson was deeply interested in adult education for immigrants. He lectured in Yiddish for the New York City Board of Education (1902–09), headed programs for adult education at the Educational Alliance, helped establish the Madison House Settlement (1899), and edited the English–Yiddish *Encyclopedic Dictionary* (1915). Abelson's career as a labor arbitrator began in 1910. He was appointed to the staff established by the agreement that settled the New York cloakmakers' strike of that year. The settlement introduced the concept of arbitration into the ladies' garment trade, and a form of impartial adjudication subsequently marked labor-management relations in much of New York City's apparel industry. Abelson later held posts as an arbitrator in the fur, millinery, men's hat, hosiery, Jewish baking, and jewelry trades, among others. After the passage of the National Recovery Act (1933), Abelson was appointed by President Roosevelt as government representative on seven apparel trades boards. He often served as impartial chairman in early stages of arbitration agreements, and his decisions built the precedents and procedures that became the customary law in these industries. His impartiality and mastery of the detailed situation within each industry were instrumental in his success.

[Irwin Yellowitz]

ABENAES, SOLOMON (**Abenaish, Abenyaex, Aben-Ayesh;** Heb. **Even Yaish**; c. 1520–1603), Marrano statesman. Born as Alvaro Mendes to a Converso family of Tavira, Portugal, Abenaes made a fortune in India by farming the diamond mines of the kingdom of Narsinghgrah. Still ostensibly a Christian, he returned to Europe, becoming a knight of Santiago, and lived successively in Madrid, Florence, Paris, and London. When the Spaniards seized Portugal in 1580, he embraced the cause of the pretender to the Portuguese throne Dom Antonio, prior of Crato, and became one of his most active supporters. In 1585 he settled in Turkey where he reverted to Judaism under the name Solomon Abenaes. Because of his wealth, experience, and connections, he came to be highly regarded at the Turkish court, renewing the position of Joseph *Nasi, who had died in 1579. He farmed the Turkish customs revenue and was created duke of Mytilene, one of the largest Aegean islands. He succeeded in maintaining his position, notwithstanding constant intrigues, for some 20 years. Like Nasi he had an elaborate information service all over Europe which proved highly useful to the Turkish government. Above all, Abenaes devoted himself to the cause of an Anglo-Turkish alliance against Spain, as the support of the claims of Dom Antonio to the Portuguese throne depended on this. For this purpose he maintained close contact with the Marrano group in England, headed by Dr. Hector *Nuñez and the queen's physician Roderigo *Lopez, his relative by marriage. Through them Abenaes was able to bring the Turkish government the first news of the defeat of the Great Armada in 1588. At one time he put forward the audacious plan of establishing Dom Antonio in the Portuguese dominions in India, from where he would be able to sail with strong forces and gain control of Portugal itself. Dom Antonio proved, however, weak and vacillating, and Abenaes accordingly broke with him; Dom Antonio in turn accused him of treachery. In 1591 Abenaes sent a personal representative, Solomon Cormano, to London to present his case before the queen, and in 1592 Judah Zarefati (Serfatim), with the same object. The execution of Roderigo Lopez in 1594 on the charge of attempting to poison the queen did not seriously affect Abenaes' position nor did the intrigues against him in Constantinople by David Passy, his Jewish rival, instigated by Dom Antonio and the French ambassador.

Abenaes was one of the architects of the Anglo-Turkish alliance which stemmed the menacing advance of the Spanish power at the close of the 16th century.

Shortly after his arrival in Turkey Abenaes secured the renewal, in his own favor, of the grant of *Tiberias and seven adjoining townships that had originally been made to Nasi. His name is thus associated with this important attempt to reestablish an autonomous Jewish life in Erez Israel. His son JACOB ABENAES (formerly Francisco Mendes) actually settled in Tiberias, but to his father's disappointment, instead of helping in political and administrative organization, spent his time in study.

[Cecil Roth]

ABENAFIA, JOSEPH (d. 1408), rabbi and physician. Abenafia, who was born in Catalonia, accompanied Martin I of Aragon to Sicily as his personal medical attendant and settled there in 1391. In 1396 he was appointed **dienchelele* (*dayyan kelali*). In 1399 he petitioned the king on behalf of all the Sicilian communities about certain proposed reforms. In 1404 he was nominated examiner of Jewish medical practitioners. Probably because his activities were connected with the king's interests, they encountered opposition within the community and in 1406 the Palermo community asked to be exempted from his authority.

[Attilio Milano]

ABENATAR MELO, DAVID (d. c. 1646), Marrano poet. Abenatar was born in the Iberian Peninsula, probably as Antonio Rodriguez Mello. He was arrested by the Inquisition and survived years of imprisonment and torture. After appearing as a penitent at an auto-de-fé, he escaped to Amsterdam and reverted to Judaism. In 1616 he was a founding member of the *talmud torah* (*Ez Hayyim*) society there and in the following year subsidized the publication of a prayer book in Spanish (*Orden de Roshasana y Kipur*); in 1622 he similarly printed a Passover *Haggadah*. In 1626 he published a remarkable translation of the Book of Psalms into Spanish verse (*Los CL. Psalmos de David: in lengua española en uarias rimas*) dedicated to "The Blessed God and the Holy Company of Israel and Judah, scattered through the world." The prologue contains an account of his sufferings. The work is more a paraphrase than a translation and contains several allusions to current events and the tyrannies of the Inquisition (cf. Psalm 30, at the end of which he mentions the auto-de-fé at which he himself appeared when 11 Judaizers were burned). He was probably the father of IMMANUEL ABENATAR MELO, *hazzan* of the Sephardi community of Rotterdam until 1682 and then of Amsterdam, and grandfather of DAVID ABENATAR MELO, member of the Yesiba de los Pintos and subsequently preacher and *hazzan* in Amsterdam. To the same family presumably belonged Diego Henriques Melo who, after trial by the Toledo Inquisition, escaped in 1618 to Amsterdam with his father, sister, and nephew.

[Cecil Roth]

ABENDANA, Sephardi family, with members widely dispersed among the ex-Marrano communities of Northern Europe. The name Abendana is Arabic in origin, commonly written in Hebrew אַבְנָנָא, אַבְנָנָא. Various branches of the family became differentiated by the cognomens Osorio, Belmonte, Naḥmias, Mendes (numerous in Hamburg), or, especially, de Brito. Isaac da Costa's statement that they were all descended from Heitor Mendes de Brito, who lived in Lisbon in the second half of the 16th century, is inaccurate. The Hamburg branch was founded by FERNANDO (Abraha) and MANOEL, sons of Manoel Pereira Coutinho of Lisbon whose five daughters were nuns at the convent of La Esperança. The earliest known member of the family in Amsterdam was Francisco Nuñez Pereira or Homem (d. 1625), who is reported to have arrived in Holland with the earliest (legendary) party of Marrano immigrants in 1598. Francisco entered the Jewish community under the name DAVID ABENDANA, after the death of his two sons, considered by his wife Justa (Abigail) to be the outcome of divine punishment for his sin in not having undergone circumcision. He was one of the founding members of the first Amsterdam synagogue. His son, IMMANUEL (1667), became *hazzan* of the community.

The family is also found at an early date in America. A DAVID ABENDANA lived in New York in 1681, and a MORDECAI ABENDANA died there in 1690.

[Cecil Roth]

ABENDANA, ISAAC (c. 1640–c. 1710), scholar of Marrano origin, younger brother of Jacob b. Joseph *Abendana. In 1662 Isaac went to England, where from 1663 he taught Hebrew at Cambridge and prepared for the university a translation of the Mishnah into Latin, receiving much encouragement from the local scholars. The work was completed in 1671 but remained unpublished; the manuscript, in six quarto volumes, is preserved in the Cambridge University Library. During this time, Isaac had been selling Hebrew books and manuscripts to the Bodleian Library in Oxford, and he moved to that city in 1689, teaching Hebrew at Magdalen College and elsewhere. From 1692 to 1699 he published a series of annual Jewish almanacs for Christian use, with learned supplements which he collected and republished later in a single volume entitled *Discourses on the Ecclesiastical and Civil Policy of the Jews* (Oxford, 1706; 2nd ed., 1709). He was in correspondence with several outstanding English scholars, especially Ralph Cudworth, master of Christ's College and regius professor of Hebrew at Cambridge. There is no authority for the statement that he studied medicine in his youth.

[Cecil Roth]

ABENDANA, ISAAC SARDO (c. 1662–1709), diamond merchant. Abendana, who was originally from Holland, went to India from London in about 1702. He settled in Pulicat on the Coromandel Coast before moving to Fort St. George (Madras). In the records of the British East India Company there he is referred to as a freeman. As a diamond expert and jeweler his advice was much sought. Thomas Pitt, governor of Fort St. George, with whom he became friendly, also consulted him. Abendana's testament is described in the court records as written in "certain characters and other numerous abbreviations unknown to all of us," probably a reference to Hebrew. It stipulates that his widow was to remarry, if at all, only "in a city where there is a synagogue." She remarried a German Lutheran in 1712, and the ensuing litigation is detailed in the Madras Record Office.

[Walter Joseph Fischel]

ABENDANA, JACOB BEN JOSEPH (1630–1685), biblical commentator and polemist, elder brother of Isaac *Abendana; probably born in Hamburg, of Portuguese parents. Together with Joshua Pardo and Imanuel Abenatar Melo he studied at the Academia de los Pintos in Rotterdam. In 1655 he became principal of the Maskil el Dal fraternity in Amsterdam, where he delivered a memorial address on the inquisitional martyr Abraham Nuñez Bernal. In 1658, after completing his studies, he was appointed *haham* in Amsterdam.

Around 1660 he was in contact with Adam Boreel, the continental Christian Hebraist of the circle dominated by John Dury and Samuel Hartlib, who commissioned him to translate the Mishnah into Spanish. The translation made by Abendana was used by later Christian scholars such as Surenhusius, but was never printed and is now regarded to be lost.

In 1660/1661, Jacob and Isaac published Solomon ibn Melekh's Bible commentary, *Mikhlol Yofi*, with a supercommentary, *Lekket Shikḥah* (3rd ed., 1965), on the Pentateuch, Joshua, and part of Judges (Vienna, 1818). The work was published with the approbations of Christian scholars, including the celebrated Johannes *Buxtorf of Basel. Jacob Abendana followed up his success with a Spanish translation of Judah Halevi's philosophical work *Kuzari* (published in Amsterdam, 1663, with a dedication to the British merchant-diplomat Sir William Davidson).

By the beginning of 1668, Jacob had joined his brother Isaac in England, and with him set about selling Hebrew books to a devoted clientele that included Henry Oldenburg, Robert Boyle, and Thomas Barlow of the Bodleian Library.

In 1681 Jacob became *haham* of the Spanish and Portuguese synagogue in London (which he had already visited in 1667–68). In that year he was host to Princess Anne, who came

to the synagogue during Passover, the first occasion on which a member of the royal family visited the Jews at prayer.

[Harm den Boer (2nd ed.)]

ABENDANAN (Ibn Danan or Ibn Dannān), Moroccan family of rabbis and scholars. The first known members of the family are ASASE, who emigrated from Morocco to Aragon in 1249, and MAIMON, who was apparently one of the refugees after the anti-Jewish massacres of 1391. Maimon went to Fez with his son MOSES, who became known as the "Rambam of Fez" and wrote many commentaries on the Talmud (which have remained in manuscript). In 1438, Moses was accused of attacking Islam and was sentenced to death; he narrowly escaped this fate, but was compelled to flee the country. It is likely that Maimon II, son of Moses, remained in Fez. His son (or grandson) Saadiah was born there. SAADIAH *IBN DANAN was a physician, halakhist, exegete, grammarian, lexicographer, philosopher, and poet. MAIMON, son of Saadiah, died a martyr's death before 1502 and was buried in Fez. His son SAMUEL (d. after 1566) was rabbi of Constantine (in Algeria), and was instrumental in passing important *takkanot*. According to tradition he was one of the 200 rabbis who ordained Joseph b. Ephraim *Caro. Samuel was the author of responsa and novellae, some of which were published in *Minḥat ha-Omer* (Djerba, 1950). His signature appears on numerous documents between 1526 and 1551, and he was the author of many interesting tales (J.M. Toledano, *Oẓar Genazim*, 1960, 13–16). SAADIAH II, the son (or grandson) of Samuel, participated in passing of *takkanot* between 1550 and 1578 and wrote a commentary on the Bible (still in manuscript). SAMUEL (1542–1621), his son, possessed an extensive knowledge of the local customs of the Jews of Maghreb and of the *takkanot* of Castile. He wrote many legal novellae and rulings as well as a history. SAADIAH III (d. 1680), the son of Samuel, was an *av bet din* and poet. He held discussions with Jacob b. Aaron *Sasportas (*Ohel Ya'akov* (1737), 2 and 3) and issued a number of *takkanot*. Some of his works are extant in manuscript. SAMUEL B. SAUL (1666–c. 1730) was the first editor of the Ibn Danan family chronicles and a history of the Jews of Fez. He is the supposed author of *Ahavat ha-Kadmonim* (edited Jerusalem, 1889), a prayer book according to the custom of Fez. SOLOMON (1848–1929) was an *av bet din*, halakhic authority, preacher, and kabbalist. During the last years of his life he was a member of the supreme *bet din* of appeal of Rabat. He was the author of the responsa *Asher li-Shelomo* (1901) and *Bikkesh Shelomo* (Casablanca, 1935). SAUL (1882–?), son of Solomon, halakhist and Zionist, founded a Ḥibbat Zion society in Fez in 1910. In 1933 he was appointed *av bet din* of Mogador and

Marrakesh, and in 1949 chief rabbi of Morocco and head of the supreme *bet din* of appeal. In 1965 he resigned and settled in Israel. He published *Hagam Shaul*, responsa (Fez, 1959). From other branches of this family were descended a number of rabbis, among them SOLOMON BEN SAADIAH, 17th-century scholar and physician, and ISAAC (1880–1910), author of *Le-Yizhak Rei'ah* (Leghorn, 1902).

[David Obadia]

ABENMENASSE (also **Abinnaxim**) family of courtiers in Spain. SAMUEL ABENMENASSE, probably born in Valencia, was appointed by Pedro III of Aragon (1276–85) as his *alfa-quim*, or physician and secretary for Arabic correspondence (thus being known as “Samuel Alfaquim”). He sometimes acted also as the king’s personal emissary. About 1280 he was tax farmer of the *baillía* of *Játiva where he held most of his property. He took part in several expeditions of Pedro, accompanying him to Sicily in 1283, and by royal order was exempted from taxation (1280, 1284) and from the obligation to wear the Jewish *badge (1283). Samuel was subsequently imprisoned for financial offenses and in 1285 was dismissed from all his offices. It is doubtful whether he is the Samuel Alfaquim who went to Granada and Morocco in 1292 and 1294 as Aragonese envoy. Samuel’s brother JUDAH (d. c. 1285) was active in affairs concerning the *baillía* of Játiva and vicinity. In 1282 he went to collect the tribute owed by the Muslims in Valencia. He was imprisoned in 1284 on charges of corruption.

ABENSUR, family originating in Spain. After the expulsion in 1492 its members are found in Morocco, Italy, Amsterdam, and Hamburg, distinguished as scholars, diplomats, and merchants.

In Spain its members included DON JACOB (c. 1365); SAMUEL (c. 1413), one of the leaders of the community of Valladolid; and ISAAC (c. 1490), a notable of Trujillo.

The branch in Morocco was founded by MOSES (I) known as Abraham [*sic*] the Hebrew, a forced convert to Christianity who returned to Judaism in Fez in 1496. His descendants include ISAAC (d. 1605), a *dayyan* in Fez, murdered as a result of one of his decisions; he collaborated with ABRAHAM and SAMUEL in editing the Castilian communal ordinances. MOSES (II) of Salé (17th century), was author of liturgical poems, elegies, and kabbalistic works including *Me'arat Sedeh ha-Makhpelah* (1910). SHALOM (d. before 1717), Hebrew gram-

marian, was author of *Shir Hadash* (1892) and other works. JACOB REUBEN (b. 1673), born in Fez, was the most celebrated member of the family, also recognized as a rabbinical authority in Europe; he was the author of *Kinot* for the Ninth of Av and responsa, *Mishpat u-Zedakah be-Ya'akov* (2 vols., 1894; 1903). Part of his large collection of letters and responsa by writers in Spain and Jerusalem and early Spanish exiles in Morocco were published in *Kerem Hemed* (1869–71), and are a valuable source of information on Moroccan Jewry. ISAAC was appointed British consul in Morocco in 1818; SAMUEL (1840) was agent of Emir Abd-el-Kader in Tangiers; AARON (c. 1850) represented Denmark there and his son ISAAC was British delegate to the legislative assembly of Tangiers and for 30 years president of the community. ISAAC LEON (b. Eliezer b. Solomon ha-Sephardi) settled in Ancona, Italy, after 1500. The *bet din* in Rome reversed one of his decisions, and in 1546 published the discussions which followed. He was the author of *Sefer Megillat Ester* (Venice, 1592), a defense of the *Sefer ha-Mitzvot* of *Maimonides against the criticisms raised by *Nahmanides.

Well known in the Amsterdam community were SOLOMON (d. 1620) and SAMUEL (d. 1665).

The Hamburg branch of the family was descended from the *Marrano Anrique Dias Millão who was burned at an auto-da-fé in Lisbon in 1609. Two of his sons reentered Judaism in Hamburg and took a prominent part in communal life. The elder, Paul de Millão, became known as MOSES, but for safety traded with the Iberian Peninsula under the name of Paul Direchsen. His elder son, JOSHUA (d. 1670), was a leader of the Hamburg community and was a personal acquaintance of Queen Christina of Sweden. The younger, DANIEL (d. 1711), became resident in Hamburg for the Polish crown, followed by his (?) son DAVID. JACOB, younger son of Joshua, was baptized in 1719, Louis XIV being his godfather. After dabbling in international politics and intrigues he became a French agent and assumed the name Louis. The family continued to be known in Hamburg until the 19th century.

[David Corcos]

ABENSUR, JACOB (1673–1753), Moroccan rabbi. Born in Fez, Abensur received a sound traditional education under Vidal *Sarfaty and Menahem *Serero, and among his fellow students was Judah ibn *Attar who later became Abensur’s colleague on the *bet din* of Fez. He also studied grammar, astronomy and Kabbalah and cultivated poetry and song. In 1693 he was appointed registrar of the *bet din* of Fez, and in 1704 rabbi and head of the *bet din*, serving in this capacity for 30 years, and subsequently at Meknès for 11 years and seven at Tetuán. Abensur was the most illustrious rabbi of Morocco of his

time. His extensive knowledge, his modesty, and his passion for justice and equality endeared him both to the intellectual elite and the ordinary people, but he incurred the enmity of some of his colleagues. In his old age, when the Jewish community of Fez was in decline as a result of famine and persecution, Jacob Abensur ordained five rabbis who constituted the “*Bet Din* of Five” and were responsible for the well-being of the community.

Abensur was consulted from far and wide on halakhic questions. Many of his responsa are scattered in the works of Moroccan rabbis; some of them have been collected and published under the title *Mishpat u-Zedekah be-Ya'akov* (2 vols., 1894; 1903). His *Et le-khol Hefez* (1893), a voluminous collection of liturgical poetry, has been published. His other works have remained in manuscript form.

ABENVIVES (Vives), Spanish family, members of which were in the service of the kings of Aragon between 1267 and 1295. The most influential member VIVES BEN JOSEPH IBN VIVES owned estates throughout Aragon and Valencia. An excellent administrator, he brought law and order to the estates under his jurisdiction but became unpopular. In August 1270 several Jews and Muslims proffered complaints against him, alleging that he was a usurer and sodomite, but he was absolved by King James I. In 1271 the king commissioned Vives to suppress a Muslim rising in Valencia. Vives made frequent loans to the king, amounting to at least 45,600 sueldos between 1271 and 1276, and was granted several royal estates as pledges. He was removed from office after James' death in 1276. Other members of the family include ISAAC, who was a tax collector in 1283; SAMUEL, who was granted estates in the area of Alfandech and held several bailiwicks between 1282 and 1295; and JOSEPH, who lent money to the crown and was granted several castles, and held minor administrative posts between 1271 and 1284.

ABER, ADOLF (1893–1960), musicologist. Born in Apolda, Thuringia, Aber was assistant at the Institute of Musicology, Berlin, music critic of the *Leipziger Neueste Nachrichten* from 1919 to 1933, and also a partner in the music-publishing firm of Friedrich Hoffmeister. Among his many writings were *Studien zu J.S. Bachs Klavierkonzerten* (1913); *Handbuch der Musikliteratur* (1922); *Die Musik im Schauspiel* (1926); and short biographies of Bach, Beethoven, and Brahms. In 1933, he joined the British publisher Novello & Co. as a musicologist, where he edited the new catalog of the publishing house. Aber edited musical works by German composers and introduced England

to the work of Fr. Joede, C. Bresgen, and Willhelm Rettch. In 1958, the German government awarded him for his work in disseminating German music in England and the Commonwealth countries.

ABERDAM, ALFRED (1894–1963), painter and graphic artist. Aberdam was born in Krystonopol, East Galicia (now Chervonograd, Ukraine) and received a traditional Jewish education in a *heder* while studying Hebrew with private teachers. In 1905–12 he lived in Lvov, where he finished high school. He decided to become an artist at the age of 14. At this time he came into contact with young Yiddish writers (Melech *Ravitch, Abraham Moshe *Fuks, and others) and with Zionist youth groups in Lvov. He attended their meetings and their lectures on Jewish artists. In 1913 he entered the Academy of Art in Munich, but unsatisfied with the conservative approach to art education there, he left for Paris and studied in private studios. At the beginning of World War I he was drafted into the Austrian army and was wounded and taken prisoner by the Russians. He was sent to Siberia and lived in Irkutsk and Krasnoyarsk, where he became acquainted with David Burliuk and other Russian futurists. In 1917 he was appointed people's commissar for the arts and inspector of the Irkutsk museum and organized an art school there. In 1920 he returned to Lvov. In 1921–22 he visited the Academy of Art in Cracow. In 1922–23 he lived in Berlin and visited the studio of Alexander Archipenko. From the end of 1923 he lived in Paris. In the 1920s and 1930s Aberdam's works were exhibited in salons and in private galleries. In this period he had three one-man shows. He maintained connections with Poland, showed his works in Polish exhibitions, and was a member of the *Plastycy Nowocześni* (“Contemporary Plastic Artists”) group. During the Nazi occupation Aberdam had to live underground and could not continue his artistic work. In 1944 he took part in the organization of the Society of the Jewish Artists of Paris. In 1949 and 1952 he visited Israel and had one-man shows. His personal artistic manner reached its maturity in the late 1920s and with time he became one of the most illustrious representatives of the École de Paris. His favorite modes were still-lives, landscapes, and genre scenes. He devoted a number of his works to the Holocaust (including *Deportation*, 1941–42, Ein Harod Art Museum, Israel).

[Hillel Kozovsky (2nd ed.)]

ABERDEEN, Scottish seaport, northeast of Edinburgh. In 1665 it was reported that a ship with sails of white satin had put into harbor with a large party of Jews, presumably on the way to join the pseudo-Messiah Shabbetai *Zevi in the Levant (A New Letter from Aberdeen in Scotland, Sent to a Person

of Quality, etc., by R.R., London, 1665). Marischal College in Aberdeen was possibly the earliest British university to give degrees to Jews (Jacob de *Castro Sarmento, 1739, followed by Ralph *Schomberg; perhaps neither professed Judaism at the time). A small community was established in Aberdeen by Polish and Russian Jews in 1893, and in 1966 numbered approximately 85. The Library of Marischal College contains a magnificent Hebrew illuminated Bible manuscript of the Sephardi type, probably originating in Naples. In 2004 approximately 30 Jews resided in Aberdeen. A refurbished community center and synagogue opened in 1983.

[Cecil Roth]

ABERLIN, RACHEL (2nd quarter of 16th century, Salonika (?)–1st quarter of 17th century, Damascus (?)). Aberlin is described as a mystic in *Sefer ha-Hezyonot* (“The Book of Visions”), the memoir of her contemporary R. Hayyim *Vital, the most prominent disciple of the greatest 16th century kabbalist, R. Isaac *Luria. Vital refers to “Rachel Aberlin” and “Rachel ha-Ashkenaziah” frequently in entries that provide rare insight into the mystical religiosity of early modern Jewish women in the period preceding Sabbateanism. He also refers to a “Rachel, sister of R. Judah Mishan,” the kabbalist who ratified Vital’s authority following Luria’s death. Although the connection between Rachel Aberlin and R. Judah Mishan’s sister cannot be established with certainty, Vital’s references suggest such an identity.

Aberlin settled in Safed in 1564 with her husband, Judah, a wealthy man who led the Ashkenazi community there until his death in 1582. As a wealthy widow, Aberlin became the patron of some of the leading rabbinic figures in her community. We are told by Vital that she established a complex in Safed, where he lived with his family. Vital’s references to Aberlin’s presence in Jerusalem and Damascus during his years in those cities imply that the two had a close relationship for decades.

Aberlin is portrayed in *Sefer ha-Hezyonot* as a woman who regularly experienced mystical visions, from pillars of fire to Elijah the Prophet. She is said to have been “accustomed to seeing visions, demons, souls, and angels,” as well as to have had clairvoyant abilities that were acknowledged by Vital, who affirmed that “most everything she says is correct.” Aberlin seems to have been an important figure for other women in her community, who regarded her as a spiritual leader. Aberlin’s position as the leader of a mystical sisterhood is also suggested by Vital’s description of her intervention in a dramatic case of spirit possession involving a young woman in Damascus in 1609. Vital’s numerous recollections of Aberlin evince his profound respect for her and her spiritual gifts. In a particularly striking example, Vital relates a dream that Aberlin shared with him in which she saw Vital sitting behind a desk covered with books, while behind him

a large heap of straw burned with a radiant fire but was not consumed. Vital explained to Rachel that this vision was a manifestation of Obadiah 1:18, “And the house of Jacob shall be a fire ... and the house of Esau for straw.” Aberlin, still in her dream, responded, “You tell me the words of the verse as it is written, but I see that the matter is actual, in practice, and completely manifest.” This dream demonstrates the distinction between the learned mysticism of the kabbalists and the visionary, ecstatic mysticism of their much less known female counterparts.

[J.H. Chajes (2nd ed.)]

ABIATHAR (Heb. אֲבִיָּאֲתָר; “the divine father excels”), son of *Ahimelech son of Ahitub of the priestly house of Eli of Shiloh (1 Sam. 22:20 ff.). Abiathar was one of David’s two chief priests. When the priests of the village of Nob were massacred by order of Saul because they had aided David, Abiathar alone escaped. He then reported the massacre to David, who asked him to join him as his priest. He brought with him an *ephod*, which was used by the priests as an oracle. David twice asked Abiathar to use the *ephod* to ascertain God’s command (1 Sam. 23:6, 9 ff.; 30:7 ff.). When David became king, Abiathar’s line was established as the priestly line of the royal court along with *Zadok’s (11 Sam. 8:17). It has been suggested, therefore, that the listing of Ahimelech (Abimelech) son of Abiathar as David’s priest (11 Sam. 8:17; 1 Chron. 18:16) should be emended to read Abiathar son of Ahimelech, as in the Syriac version. During *Absalom’s revolt David was forced to leave Jerusalem, but he sent Abiathar and Zadok there to inform him of the happenings in Absalom’s court (11 Sam. 15:25, 34 ff.). There they had freedom of movement and thus were able to deliver messages to David about the rebel’s intrigues (11 Sam. 17:15). Abiathar carried David’s message of reconciliation to Amasa and the elders of Judah (11 Sam. 19:12) and also served as David’s counselor (11 Sam. 15:27, 29; 17:15 ff.; 19:12 ff.; 1 Chron. 27:33–34). During the struggle for succession to David’s throne, Abiathar supported *Adonijah (1 Kings 1:7); hence Solomon, who was anointed by Zadok, banished Abiathar and his descendants to Anathoth and took away his privileges to act as priest in Jerusalem (1 Kings 1:19, 25; 2:22, 26, 35). The prophet Jeremiah was descended from the priests of Anathoth and Jeremiah may have been a descendant of Abiathar (Jer. 1:1).

In the *Aggadah*

Abiathar was indirectly responsible for the continuation of the line of David. Had Abiathar not been saved from the massacre of the priests of Nob, there would have been no *Jehoiada to save the sole survivor of the Davidic line from the massacre instigated by *Athaliah (Sanh. 95b). Abiathar’s replacement by Zadok as high priest is explained by the fact that the *Urim* and *Thummim* would not answer him when he consulted them (Sot. 48b). The Zohar (1 63b) illustrates his straitened circum-

stances thereafter (cf. 1 Kings 2:26) by the comment: "He who during David's lifetime lived in affluence and wealth, was reduced by Solomon to poverty."

BIBLIOGRAPHY: M. Cogan, *1 Kings* [AB] (2000), 177–78.

ABIATHAR BEN ELIJAH HA-KOHEN (c. 1040–1110), last of the Palestinian *geonim*. Abiathar studied under his father ELIJAH B. SOLOMON, president of the Palestinian academy, from 1062 to 1083. A responsum of Elijah addressed to Meshullam b. Moses of Mainz in 1070 was signed also by Abiathar under the title "*ha-Revi'i*" ("the Fourth") implying that he was fourth in rank at the yeshivah. With the capture of Jerusalem by the Seljuks in 1071 and the transfer of the academy to Tyre, Abiathar was appointed "the Third," and later vice president of the academy (*av ha-yeshivah*). In 1081, while his father was still alive, he was appointed *gaon*. Abiathar was involved in a long and bitter controversy with David b. Daniel, the Egyptian exilarch and president of the Fostat (Cairo) Academy, who sought to extend his authority (as had his father *Daniel b. Azariah) over the Palestinian academy and community. Abiathar described this controversy in a "Scroll," published as "*Megillat Abiathar*" by S. Schechter (JQR 1901/02), in which he gave an account of his family's battle against the would-be usurpers. He forcefully defended the special rights of Ereẓ Israel over the Diaspora. "Ereẓ Israel is not called exile; how, then, can an exilarch wield authority over it?" At the beginning of the First Crusade (c. 1095), Abiathar was in Tripoli (Syria). Nothing is known about his last years.

[Simha Assaf]

°ABICHT, JOHANN GEORG (1672–1740), German Lutheran theologian and Hebraist. Abicht studied at Leipzig and at Jena, where he was professor of Hebrew (1702–16). In 1729 he became professor of theology at the University of Wittenberg. His main field of interest was Jewish history and literature and, particularly, rabbinical Bible commentaries, some of which he translated into Latin. His publications are a selection of the Bible commentaries of Rashi, Ibn Ezra, and others, entitled *Selecta Rabbinico-Philologica* (Leipzig, 1705), which included also parts of Maimonides' *Code*; and a Latin translation of Isaiah di Trani's commentary on Joshua (Leipzig, 1712). His interest in the problem of cantillation in the Bible is illustrated by his Latin translation of *Sha'ar ha-Neginot* included as *Porta Accentuum* in Ch. Ziegler's *Accentus Hebraeorum* (1715).

Abicht also wrote a study on the anonymous chronicle *Sefer ha-Yashar* (1732); *Methodus Linguae Sanctae* on Hebrew grammar (1718); studies on Joshua (*Disputationes librum Josuae*, 1714), on the Sabbath (*De lege Sabbathi*, 1731), on Jonah (*De Jona fugiente*, 1702), and on slavery (*De Servorum*

hebraeorum acquisitione et servitiis, 1704); a commentary on Zechariah 10:7 (1704), and many other works.

ABIEZER (Heb. אֲבִיעֶזֶר; "my Father [God] is help," or "my Father [God] is hero"; variant **Iezer**, Heb. יֵעֶזֶר, Num. 26:30).

(1) A person and a tribal unit of the tribe of *Manasseh in three genealogical lists in the Bible and a clan in the story of *Gideon.

Iezer and the Iezerites head the list of six eponyms and clans, all sons of *Gilead son of *Machir son of Manasseh (Num. 26:29–33). These are depicted as the "rest" of the sons of Manasseh, including Abiezer, who received ten lots west of the Jordan (Josh. 17:1–6). A different genealogy for Manasseh appears in 1 Chronicles 7:14–19. Abiezer is represented as a person, not a clan, and is a brother of Ish-Hod and Mahlah, who is daughter of *Zelophehad in other lists. All three are children of Hammolecheth, sister of Gilead, but the text is obscure and there is no certainty as to whose sister she was.

The narrative account of the Book of *Judges attests the existence of the clan of the Abiezrites in the 12th century B.C.E. Joash, the father of Gideon, was surnamed "the Abiezrite" (Judg. 6:11) and his town was "Ophrah of the Abiezrites" (Judg. 6:24, 8:32). Ophrah, a cultic center, has been located by most scholars at al-Ṭayyiba on the heights of Issachar and north of Beth-Shean. When Gideon blew the horn to gather the people, the clan of Abiezer was the first to answer the call. Evidence from another century for the settlement of the Abiezrites in another region is furnished by the *Samaria Ostraca, which contain names of localities and some districts (nos. 13, 28). The districts, among them Abiezer (אֲבִיעֶזֶר), are all known from the genealogical lists of Manasseh. Two place names mentioned in several ostraca as being connected with Abiezer are the town of Elmatan at Immātin and Tetel (?) at al-Tell, which have been identified by W.F. *Albright. Both are south and west of Shechem. The biblical data and the epigraphic data about Abiezer have been regarded as evidence for the organic settlement of an ancient tribal unit in a group of adjoining towns. The tradition of the clan and its eponym were preserved, and the latter became the name of a district. The presence of Abiezer in two different regions may indicate a split of the clan during the process of settlement.

(2) Abiezer the Anathothite (from *Anathoth) was a member of "David's Mighty Men" or "the Thirty" (11 Sam. 23:27; 1 Chron. 11:28). In 1 Chronicles 27:12 Abiezer the Anathothite is mentioned among the generals of the militia as being in charge of the ninth division for the ninth month.

[Hanna Weiner]

ABIGAIL (Heb. אַבִּיגַיִל), name of two women in the Bible. (1) **ABIGAIL** wife of Nabal the Carmelite (see *Carmel) and later of David. Abigail is described as both beautiful and sagacious (1 Sam. 25:2). In return for “protecting” Nabal’s property, David requested a gift of provisions. When Nabal refused, David decided to exact his reward by force. Abigail, apprised of David’s approach with armed men, met David with food supplies and apologized for her husband’s behavior which she described as the churlish act of a worthless man. David, greatly impressed with Abigail, accepted the food and left in peace. When Nabal died ten days later David wed Abigail. She bore him a son Chileab (1 Sam. 3:3), called Daniel in 1 Chron. 3:1.

In the *Aggadah*

The Midrash is generous in praise of Abigail’s beauty, wisdom, and power of prophecy. She is counted among the four women of surpassing beauty in the world (the others are Sarah, Rahab, and Esther), and it is reported that even the memory of her inspired lust (Meg. 15a). Her wisdom was apparent during her first meeting with David when, despite both her own concern for her husband’s fate and David’s rage, she calmly put a ritual question to him. When David replied that he could not investigate it until the morning, she suggested that the death sentence on her husband be similarly postponed. She met David’s protest that Nabal was a rebel, with the retort: “You are not yet king” (*ibid.*). This conversation also revealed her powers of prophecy. The Holy Spirit was upon her when she told David “the soul of my lord shall be bound in the bundle of life” (Lam. R. 21:1); and she foretold David’s sin with Bath-Sheba when saying (1 Sam. 25:31), “That this shall be no grief unto thee (i.e., but another matter will)” (Meg. *ibid.*). However, her conduct in asking David “to remember thy handmaid” (1 Sam. *ibid.*), is said to be unbecoming to a married woman. In the following verse she was therefore addressed by David as “Abigal” (i.e., without the letter *yod*), to indicate that she had shown herself unworthy of the letter with which the name of God begins (Sanh. 2:3).

(2) **ABIGAIL** daughter of NAHASH, sister of David and Zeruah, mother of Amasa (11 Sam. 17:25; 1 Chron. 2:16). Her husband was Jether the Ishmaelite (1 Chron. 2:17) or Ithra the Jesraelite (11 Sam. *ibid.*). (The medieval commentator David Kimḥi surmised that he was known by different names, depending on the area in which he lived.) Concerning her father’s name, the Septuagint reads *Jesse instead of Nahash. A talmudic *baraita* also states that Nahash is Jesse (TJ, Yev. 8:3, 9c; Shab. 55). Thus, according to these traditions, Abigail would be David’s sister on his father’s side. In the Septuagint Abigail is written Abigaia. There is difficulty in explaining the meaning of the name. It is found on a Hebrew seal of the eighth or the seventh century B.C.E.: “To Abigail wife of Asijahu.”

ABI-ḤASIRA, family of kabbalists and pietists, most of whom lived in Morocco. **SAMUEL** (16th century), apparently of Moroccan origin, lived in Syria. He was renowned as a scholar of Talmud and practical Kabbalah. The first known member of the family in Morocco is **MAKLOUF** who lived in Dra. The local scholars wrote a special work (still in manuscript) on his eminence. **AYYUSH** and his two sons **JACOB I** and **YAḤYA** were all kabbalists. **JACOB II BEN MASOUD** (1807–1880) was a codifier and kabbalist, widely renowned for his great piety; people streamed to him to receive his blessings. Three times he tried to fulfill his dream of going to Erez Israel, but the community and even the government stood in his way. In the end, however, he left despite their protestations. He succeeded in making his way as far as Damanhur, near Alexandria, but there he died and was buried. The anniversary of his death is commemorated in many communities. Jacob’s works, almost all of which were published in Jerusalem, include *Doresh Tov* (1884); *Pittuḥei Ḥotam*, on the Torah (1885); *Yoru Mishpatekha*, responsa (1885); *Bigdei ha-Sered*, on the Passover *Haggadah* (1887, and Leghorn, 1890); *Ginzei ha-Melekh*, on Kabbalah (1889, 1961); *Maḥsof ha-Lavan*, on the Torah (1892); *Alef Bi-nah*, on the alphabet (1893); *Maḡelei Zedek* (1893); *Levonah Zakkah*, on the Talmud (1929); *Sha’arei Teshuvah* (1955); and *Yagil Ya’akov*, poems (Algiers, 1908; Jerusalem, 1962). **DAVID**, a kabbalist, was killed by a cannon shot at the instigation of the local *mukhtar* Mulai Muhammad in 1920. He wrote *Sekhel Tov* (2 vols., 1928) and *Petaḥ ha-Ohel* (3 vols., 1928). His brother **ISAAC** (1897–1970) emigrated to Israel in 1949, and the same year was appointed chief rabbi of Ramleh and district.

[David Obadia]

ABIHU (Heb. אֲבִיחֻ), second son of Aaron and Elisheba, daughter of Amminadab (Ex. 6:23; Num. 3:2, et al.). He is always mentioned together with his elder brother Nadab. He was anointed and ordained for the priesthood (Num. 3:3; cf. Ex. 28:1; 1 Chron. 24:1) and participated with his father, brother, Moses, and the elders in the rites accompanying the making of the covenant at the theophany at Sinai, on which occasion they “saw God” and ate a festive meal (Ex. 24:1–10). Although the exact function of Abihu in these rites is not specified, it is clear that the story represents a very ancient tradition, and that Abihu once played a definite, prominent, and positive role in the now lost history of the Israelite priesthood.

The death of Abihu occurred under mysterious circumstances. He was incinerated (although his clothes and those of his brother remained intact) together with Nadab, as the brothers offered “alien fire before the Lord” (Lev. 10:1–3; Num. 3:4; 26:61; cf. 1 Chron. 24:2). Aaron’s cousins, Mishael and

Elzaphan, were ordered to remove the bodies from the sacred precincts, and the customary mourning rites were suspended (Lev. 10:4–7). The precise nature of the incident is unclear, and neither the locale nor chronology is recorded. Some serious departure from the prescribed cultic ritual seems to be referred to. It has been suggested that they brought incense from outside the sacred area between the altar and the entrance to the Tent of Meeting. It was therefore impure. Abihu and his brother left no sons (Num. 3:4; 1 Chron. 24:2), and his priestly line was thus discontinued. Some scholars see behind the story of their deaths a forgotten tradition about inter-priestly rivalries and the elimination of two priestly houses. The name Abihu may be variously explained as meaning “the Father [God] is” (i.e., exists), “He [God] is Father,” and “Father is He” (a surrogate for God).

For Abihu in Aggadah, see *Nadab.

ABIJAH (Heb. אֲבִיָּה; “YHW(H) is my father”), king of Judah c. 914–912 B.C.E.; son of *Rehoboam (on the identity of his mother, see *Asa). In Kings, where he is referred to throughout as Abijam, it is stated only that he followed the sinful ways of his father, and that he was at war with *Jeroboam, king of Israel, throughout his reign. The Book of Chronicles, however, for its own theological reasons, unhistorically depicts him as a pious king who succeeded in wresting a sizable slice of territory from Jeroboam (11 Chron. 13:19). According to 1 Kings 15:19, it is likely that a political alliance existed between Abijah and *Ben-Hadad I, king of Aram-Damascus. Abijah had 14 wives, who bore 22 sons and 16 daughters (11 Chron. 13:21). One source of information for the Chronicler on the reign of Abijah was the Midrash of the prophet Iddo (*ibid.* 13:22).

ABILEAH, ARIE (1885–1985), Israel pianist. Born in Russia, Abileah gave his first concert at the age of six. He studied at the Conservatory of Petersburg under Marie Benoit, Liadov, and Glazounov and completed his artistic training in Geneva with Stavenhagen. He appeared as accompanist of Joseph *Szigeti, Joseph *Achron, and Maurice Maréchal. In 1914 he was appointed chairman of the piano department at the Music Academy in Geneva, a position he held until 1922. He was active in 1922–26 as a piano teacher in Tel Aviv. During 1926–32 Abileah performed at concerts in Paris and New York. In 1932 he settled in Jerusalem where he was appointed professor at the Music Academy and, as chairman of the Musicians’ Association, organized chamber music concert series. He made recordings for the Israel Broadcasting Authority.

ABILENE, district in Coele-Syria, centered around the city of Abila (modern Suq on the Barada River, 16½ mi. (27 km.) N.W. of Damascus) and extending over the western slopes of Mt. Hermon. Originally part of the Iturean principality, it was held by the tetrarch Lysanias the Younger in the time of Tiberius (Luke 3:1). Gaius Caligula granted it to Agrippa I (Jos., *Ant.*, 18:237) and after the latter’s death, the tetrarchy was administered by Roman procurators (44–53 C.E.) until Claudius gave it to Agrippa II (Jos., *Ant.*, 20:138) who ruled it until his death. The local legend connecting Abilene with Abel (al-Nabī Ābil) is spurious.

[Michael Avi-Yonah]

ABIMELECH (Heb. אֲבִימֶלֶךְ; “the [Divine] Father is King” or “the [Divine] King is Father”), king of *Gerar, who appears in several incidents in connection with Abraham and Isaac. Each of these patriarchs, fearing for his personal safety, represents his wife as his sister. Sarah’s honor is saved through a dream theophany in which Abimelech’s life is threatened; timely detection of the subterfuge preserves Rebekah’s virtue. In both instances the king’s integrity is manifest and he is righteously indignant at the deceit (Gen. 20; 26:1–11). Abimelech is also involved with both patriarchs in quarrels over wells (21:25; 26:15–16, 18–21). In both events he is accompanied by Phicol, chief of his troops (21:22, 32; 26:26), and concludes treaties (21:27–32; 26:28–31). Also, Beer-Sheba figures on each occasion (21:31; 26:33). The detailed similarities between the two stories and the resemblances of both to that of Genesis 12:10–20 have generally led critical scholars to assign Genesis 20–21 to the E source and Genesis 12 and 26 to J, regarding all three narratives as variants of a single tradition.

The name is ancient, and attested in the form Abi-milki as the name of the King of Tyre in the 14th century B.C.E., but because the Philistine migrations to Canaan do not antedate 1100 B.C.E., the title “King of the Philistines” (26:1, 8; cf. 18 – not in E) must be viewed as an anachronism.

[Nahum M. Sarna]

In the Aggadah

Abimelech was referred to as a righteous Gentile (Mid. Ps. 34). His attempted seizure of Sarah is explained by the fact that he was childless, and that he hoped to be blessed with offspring by marrying such a pious woman (PdRE 26). Among his punishments for his sin were that ruffians entered his house, that boils erupted on his body (Gen. R. 64:9), and that his household became barren (BK 92a). Abimelech, however, clearly did not consider himself to be the only one at fault. According to the aggadic commentary on his words “Behold it is for thee a covering of the eyes” (Gen. 20:16), he said to Abraham “You covered my eyes (i.e., by saying that Sarah was your sister), therefore the son which you will beget will be of covered eyes (i.e., blind).” This prophecy was fulfilled in Isaac’s old age (Gen. R. 52:12). The aggadic treatment of Isaac’s relations with

Abimelech is briefer. It records that, although he had heard of Rebekah's great beauty, Abimelech remembered his previous punishment, and therefore left her alone (Ag. Ber. 20). However, once Isaac had become so wealthy that people kept saying: "Rather the dung of Isaac's mules, than Abimelech's gold and silver," he became jealous, and claimed that Isaac's wealth was derived from his favors (Gen. R. 64:7).

ABIMELECH (for meaning, see previous entry), the male offspring of *Gideon the Abiezrite by his Shechemite concubine (Judg. 8:31). During the period of the Judges Abimelech became the ruler of Shechem through the support of his mother's family and the local oligarchy ("the lords of Shechem"; Judg. 9:2–3 et al.) who financed the hiring of a regiment of "worthless and reckless fellows" (9:4). With their aid, Abimelech murdered all but one of the 70 sons of Gideon (see *Jotham) in order to eliminate possible claims to the leadership of Shechem. He had reason for apprehension because of Gideon's special connections with this city. The Bible does not count Abimelech among the *Judges. He is not credited with having "saved" Israel. The placing of his story in the Book of Judges is apparently due to its connection with the traditions about the house of Gideon. At any rate, Abimelech maintained close ties with the Israelites, since he "ruled [not 'judged'] over Israel three years" (9:22). It is probable that the Manassites submitted to him because of his paternal lineage, though it is possible that he attained power solely by means of the support of his hired regiment. It would seem that Abimelech's connection with the Israelites did play a decisive role in contributing to his election as a ruler of Shechem. The preservation of normal relations with Israel was of vital importance to Canaanite Shechem which existed as a foreign enclave within the boundaries of the tribe of Manasseh. According to the narrative, the "lords of Shechem" acclaimed Abimelech "king" over them (9:6). However, all indications point to the fact that the title "king" was used because of the lack of a more appropriate term for the type of ruler that existed in various cities in Syria and Erez Israel who performed the functions and exercised the authority of a king. A ruler of this kind was chosen by the municipal institutions. There is evidence that the ruler was dependent on the city's institutions, which guarded their own status and power. Other non-monarchal rulers governed in Shechem at different times: Hamor the Hivite, ruler of Shechem in the days of Jacob (Gen. 34:2), was "chief of the country"; Lab'ayu, chief of Shechem during the 14th century B.C.E., known from the el-Amarna letters, was another such example. In the course of time a conflict arose between Abimelech and the "lords of Shechem," who had chosen him as their leader (Judg. 9:23). It appears that he wished to increase his power at the expense of the local oligarchy. The appointment of Zebul, who was among Abimelech's most prominent

supporters and who protected the latter's interests in Shechem as "the ruler of the city" (9:30), testifies to these aspirations. According to the Bible, the "lords of Shechem" placed "men in ambush against [Abimelech] on the mountain tops" (9:25) in order to prove his incompetence in the delicate area of security and to remove him from power. They even conspired with *Gaal son of Ebed (9:26), a non-local and non-Israelite personage, who headed an army of his own and who seduced the Shechemite population by underscoring the city's descent from Hamor the Hivite, its ancient founder (9:28–29). Possibly this reflects a split within the local population, part supporting Abimelech and part opposing him. Gaal apparently sought and found supporters among the Hivites (Horites) of Shechem, who were almost certainly a significant section of the city's population. It is a fact that Abimelech lost support precisely among the "lords of Shechem."

Since Abimelech had to be informed about the events in Shechem by Zebul's messengers (9:31), it would seem that he was not a permanent resident but lived outside the city proper. Abimelech hastened to Shechem and attacked Gaal and his confederates (9:39–40). Abimelech's supporters in Shechem drove Gaal from the city (9:41). The continuation of the story implies that Abimelech decided to turn the territory of Shechem into his private estate by conquest. He completely destroyed the city, slaughtered its inhabitants, and sowed it with salt (9:45). He then invested Thebez (9:50 ff.). During the siege of the tower of Thebez he was mortally wounded by a millstone thrown down on him by a woman (9:53). Badly injured, he asked his armor bearer to slay him rather than let him die disgracefully at the hand of a woman (9:54). Although the story of Abimelech is episodic, it represents a shift in Israelite attitudes leading to the establishment of the monarchy. There is an obvious continuity between the Israelites' request that Gideon be king over them and Abimelech's status as ruler of Israel. Only the period of the consolidation of the monarchal concept in Israel separated Abimelech's rule from the anointing of Saul.

[Hanoch Reviv]

ABINADAB (Heb. אֲבִינָדָב; "my [or "the"] Divine Father is generous"; the root אֲבִי is a common element in West Semitic names), the father of Eleazar, Aḥio, and Uzzah, who resided in Kiriath-Jearim. The ark was brought to Abinadab's home after its wanderings in the Philistine cities and remained

there for a period of 20 years. When David undertook to move the Ark by oxcart to Jerusalem (11 Sam. 6:3–4; 1 Chron. 13:7), Abinadab's son Eleazar was appointed to guard the ark (1 Sam. 7:1). Abinadab's two sons, Uzzah (perhaps identical with Eleazar) and Ahio, marched the one beside or behind and the other in front of it. Josephus relates that Abinadab and his sons were Levites (Ant., 6:18; 7:79), a datum unsupported by other sources.

ABIOB, AARON (1535?–1605?), rabbi, preacher, and biblical commentator. Abiob studied under Samuel *Medina, the greatest halakhic authority of his time. He was appointed rabbi, first in Salonika and subsequently in Constantinople and Usküb. Although a recognized authority in *halakhah*, he would refer cases which he did not wish to decide to his teacher in Salonika. His responsa frequently are quoted in the responsa of Samuel Medina and in those of Solomon b. Abraham Ha-Kohen of Serei. He published *Shemen ha-Mor* (Salonika, 1601), a collection of novellae of other commentators and his own exposition of rabbinic dicta in connection with the Book of Esther. He compiled commentaries on the Pentateuch, called *Korban Aharon*, developed from the discourses he delivered on Sabbaths and festivals. The work was never published and the manuscript is no longer extant. His commentary on Psalms, *Beit Aharon*, was also unpublished. His son Solomon succeeded him as rabbi of Usküb.

ABIR (Abramovitz), DAVID (1922–), Israeli aerospace engineer. Abir, who was born in Kaunas, Lithuania, and came to Palestine in 1934, was chief instructor of the Aero clubs of Palestine, which included the aviation unit of the Palmah (1943–46). He served in the Israel Air Force (1949–55) and was head of its engineering department in 1954–55. Abir was at the Haifa Technion from 1955 to 1972, serving as head of the department of mechanics in 1959–61 and then as dean (and professor) of the Faculty of Aeronautical Engineering (1962–64). He was employed at the British Aircraft Corporation, Bristol, U.K. (1964–65) as senior consulting assistant to the chief engineer on the Anglo-French Concorde supersonic aircraft project. Abir also worked (on leave from the Technion) at Israel Aircraft Industries Ltd., Engineering Division, in 1968–71, as director of advanced aircraft studies and chairman of research and development. He joined Tel Aviv University in 1972 as associate dean of the Faculty of Engineering (1972–80). Abir was deputy chairman of the Israel Space Agency, Ministry of Science and Technology (1983–87) and its director general in 1985–87. Abir was chairman of the National Committee for Space Research from 1972 and chairman of the National Committee on Data for Science and Technology from 1988, both at the Israel Academy of Sciences and Humanities. He served as president (1990–94) of the International Committee on Data for Science and Technology (CO-

DATA) of the International Council of Science (ICSU), Paris, France, and was a member of the Council of the International Committee on Space Research (COSPAR) of ICSU from 1972. He was a founding member of the Tel Aviv Academic College of Engineering (from 1996) and served as its deputy president for academic affairs (until 2002). Abir was a fellow of the Royal Aeronautical Society, London, U.K. (from 1965) and a member of the International Academy of Astronautics, Paris, France (from 1972). He contributed papers and articles and wrote and edited books and journals in the fields of aerospace and technology. He was active in the creation of Hebrew terminology in the aviation and related fields, in conjunction with the Israel *Academy of the Hebrew Language and other organizations.

[Samuel Aaron Miller / Bracha Rager (2nd ed.)]

ABISHAG THE SHUNAMMITE (Heb. אֲבִישָׁג הַשְּׁנַמִּית; “the [Divine] Father (?)”; meaning unknown; of *Shunem), an unmarried girl who was chosen to serve as *sökhenet* to King David. The term comes from a root *skn*, “attend to,” “take care,” and its noun forms can be applied to high officials in Hebrew (Is. 22:15) Abishag's role was of a lower status. She served as bed companion to David in the hope that her fresh beauty would induce some warmth in the old man (1 Kings 1:1–4, 15), and as his housekeeper. The notice (1:4) that “the king knew her not” serves less to impute decrepitude to David than to inform the audience that there would be no other claimants to David's throne than Solomon and Adonijah. When Solomon became king, *Adonijah, whose life Solomon had spared although he knew him to be a dangerous rival, asked *Bath-Sheba, Solomon's mother, to intercede on his behalf for permission to marry Abishag. Solomon correctly interpreted this request for the former king's concubine as a bid for the throne (See 11 Sam 12:8; 16:20–23), and had Adonijah killed (1 Kings 2:13–25). Some see in Abishag, who is described as “very fair” (1 Kings 1:4), the Shulammitte of the Song of Songs (Shulammitte being regarded as the same as Shunammite).

In the Aggadah

The *aggadah* identifies Abishag as the Shunammite who gave hospitality to Elisha the prophet (PDR 33). It relates that she was not half as beautiful as Sarah (Sanh. 39b). The fact that David did not make Abishag his legal wife is explained as due to his refusal to exceed the traditional number of wives (18) allowed to a king (Sanh. 22a, and Rashi, *ibid.*). Solomon's action is also vindicated on the grounds that the request made by Adonijah to be permitted to marry Abishag (1 Kings 2:13 ff.) represented a true threat to Solomon's position, as it is only the king, and not a commoner, who is allowed to make use of the servants of the deceased king (Sanh. 22a).

[Elia Samuele Artom]

ABISHAI, the son of Zeruiah, brother of *Joab and *Asahel and nephew of David. Abishai was one of David's most loyal military officers. He was one of David's three mighty men and is credited with killing 300 people (II Sam. 23:18). Additionally, he is said to have been the head of this group, and according to some versions he was the head of the thirty heroes (II Sam. 23:18; I Chron. 11:20). Abishai was one of the three generals who defeated Ish-Bosheth, Saul's son, and Abner, the commander of Saul's army. After the battle Abner killed Asahel (II Sam. 2:18 ff.). According to II Samuel 3:30, Abishai and his brother Joab eventually avenged their brother's death. However, the Septuagint apparently did not hold them responsible for this murder, reading *'arevu* ("lie in wait") instead of *haregu* ("killed") of the masoretic text. David, nevertheless, certainly thought both of them guilty (II Sam. 3:39). Abishai defeated the Canaanite confederation against David (II Sam. 10), and during Absalom's revolt he commanded one-third of David's forces (II Sam. 18:2). Additionally, he was instrumental in suppressing Sheba, the son of Bichri (II Sam. 20:6–10). He was also one of David's leading generals in other wars with the Philistines (II Sam. 21:15–17) and the Edomites (I Chron. 18:12); he rescued David at Nob from the threats of a Philistine giant, who has been referred to in some sources as Ishbibenob (II Sam. 21:16–17); and he was against the king's policy of making peace with his enemies (II Sam. 16:9–10, 19:23). Abishai's suggestion to kill Saul in his camp was refused by David (I Sam. 26:6 ff.).

In the Aggadah

Abishai's rescue of David (II Sam. 21:16–17) illustrates his piety and valor. David had been enticed over the Philistine border by Satan and there seized by Ishbibenob, the brother of Goliath. This was miraculously revealed to Abishai while he was bathing in preparation for the Sabbath. He was aided in his search for David by the fact that the earth contracted under him. On his way he encountered and slew Orpah. When Ishbibenob saw him approaching, he planted his spear in the ground and threw David up in the air saying: "Let him fall on it and perish." Abishai, however, pronounced the Divine Name, and David remained suspended in the air until he descended safely in answer to a prayer of Abishai. Abishai and David foiled the final attack of the enraged giant by weakening him with taunts about his mother's death at Abishai's hands (Sanh. 95a). Abishai was equal to 70,000 men of Israel (Mid. Ps. 17:4).

ABITBOL, Moroccan family of rabbis, *dayyanim*, talmudists, and jurists, who led the community of Sefrou. Information about the Abitbol family is found in many Moroccan documents (responsa, collections of letters, etc.), mostly unpublished. The British Museum houses a bulky manuscript (Margoliouth, Cat. 4 (1935), 161, Or. 11, 114), entitled *Sefer Iggerot u-Melizot*, containing poems, but mainly the exchange of correspondence between Moroccan rabbis between 1760 and

1810. The manuscript contains valuable information on the history of Moroccan Jewry in general, and the Abitbol family of Sefrou in particular.

(1) SAUL JESHUA BEN ISAAC (c. 1740–1809), called Rav Shisha (the Hebrew initials of his name). Rav Shisha became rabbi and *dayyan* in Sefrou at the age of 18, and served for 50 years. His rabbinical decisions were honored in rabbinical courts in Morocco during and after his lifetime. His responsa were collected by his descendants and published in Jerusalem under the title *Avnei Shayish* (1930¹, 1934²). The second volume also contained a collection of biblical and talmudic glosses, sermons, etc., entitled *Avnei Kodesh*, which are not his work, but that of another rabbi of Sefrou, Jekuthiel Michael Elbaz. The poet David Ḥasin composed two *piyyutim* to honor him and his son RAPHAEL (cf. *Tehillah le-David*, 1787). Jacob Berdugo mourned his death in a dirge (cf. *Kol Ya'akov*, 1844).

[Haim Zafrani]

(2) AMOR BEN SOLOMON (1782–1854), Moroccan scholar, codifier, and *dayyan*. Born in Sefrou, Abitbol maintained a yeshivah there at his own expense and supported needy scholars. Many communities turned to him with their halakhic problems. His voluminous library contained many rare manuscripts, among them hundreds of letters addressed to him and to his father from all parts of North Africa, particularly Morocco (Ms. British Museum no. Or. 11. 114; a second group is the Benayahu collection). These contain important information about valuable works and manuscripts. Some of his own and his father's responsa were published as *Minḥat ha-Omer* (1950). This volume includes a collection of his homilies, *Omer Man*, and 26 of his poems and elegies, including one *bakashah* in Arabic. Other responsa by him are scattered throughout the works of his Moroccan contemporaries. Some of his works are still in manuscript. His two sons, Ḥayyim Elijah and Raphael, were also well-known rabbinic scholars.

ABI ZIMRA, ISAAC MANDIL BEN ABRAHAM (16th century), liturgical poet who lived in Algiers. His father Abraham b. Meir Abi Zimra, born in Malaga, author of some poetical compositions, came "from the bitter expulsion of 1492 to the city of Tlemcen" (Abraham Gavison, *Omer ha-Shikhḥah*, 1748, 134a). Abraham Gavison, who knew Isaac, called him "the great poet" (*ibid.*, 122b). Over 60 of Isaac's *piyyutim*, which were strongly influenced by Arabic poetry, are to be found in various manuscripts. Until recently, various communities in North Africa recited his poems. A complete edition of poems was prepared by H.J. Schirmann, but never published.

ABKHAZIYA (formerly **Abkhaz Autonomous Soviet Socialist Republic**), within Georgia, Transcaucasia, on the eastern shore of the Black Sea. Formerly part of the Ottoman Empire, Abkhaziya became a Russian protectorate in 1810. During the czarist regime, since it lay beyond the *Pale of Settlement, Abkhaziya was barred to Jews from European Russia. In 1846 Jewish artisans were given permission to live temporarily in Sukhumi (now Sukhumi), the main city, and by 1897 there were 156 Jews. After the 1917 revolution the number of

Jews in Abkhaziya increased considerably. The 1959 census recorded 3,332 Jews (0.8% of the total population), 3,124 living in urban settlements and 208 in rural. The majority were concentrated in Sukhumi and most of them were Georgian Jews (see *Georgia). A new synagogue with accommodation for 500 congregants was built in 1960, and a congregation was reported active in 1963. After the dismantling of the Soviet Union in the 1990s, Abkhaziya proclaimed independence and cessation from Georgia, leading to a war in 1993 that ended with the defeat of the Georgian army and Russian troops intervening and separating the belligerents. The war caused the Jews of Abkhaziya to leave, mostly for Israel. Abkhaziya is not recognized by other governments as an independent country. See also *Caucasus.

[Yehuda Slutsky / Shmuel Spector (2nd ed.)]

ABLUTION (Heb. טְבִילָה; “immersion”), act of washing performed to correct a condition of ritual impurity and restore the impure to a state of ritual purity. The ritually impure (or unclean) person is prohibited from performing certain functions and participating in certain rites. Ablution, following a withdrawal period and, in some cases, other special rituals, renders him again “clean” and permitted to perform those acts which his impurity had prevented. Ablution must not be confused with washing for the sake of cleanliness. This is evident

from the requirement that the body be entirely clean before ablution (Maim., Yad, Mikvaot 11:16), but there may nevertheless be some symbolic connection. The abluitions, as well as the impurities which they were deemed to remove, were decreed by biblical law, and understood by the rabbis in religious and not in hygienic or magical terms. This is shown by R. Johanan b. Zakkai’s retort to his disciples who had questioned an explanation he gave to a non-Jew about ritual purity: “The dead do not contaminate and the water does not purify. It is a command (*gezeirah*) of God and we have no right to question it” (Num. R. 19:4).

Ablution is common to most ancient religions. Shintoists, Buddhists, and Hindus all recognize ablution as part of their ritual practice and there is ample evidence concerning its role in ancient Egypt and Greece (Herodotus, 2:37; Hesiod, *Opera et Dies*, 722). Most ancient peoples held doctrines about ritual impurity and ablution was the most common method of purification. In varying forms ablution is important to Christianity and Islam as well; this is hardly surprising since they are both post-Judaic religions. In Jewish history there have been several sects that have laid great stress on the importance of ablution. The *Essenes (Jos., Wars, 2:129, 149, 150) and the *Qumran community (Zadokite Document, 10:10 ff.; 11:18 ff. and other DSS texts) both insisted on frequent abluitions as did the Hemerobaptists mentioned by the Church Fathers. The *tovelei shaharit* (“morning bathers”) mentioned in Tosefta *Yadayim* 2:20 perhaps may be identified with the latter but more likely were an extreme group within the general Pharisaic tradition (Ber. 22a; Rashi, ad loc.).

In the Jewish tradition there are three types of ablution according to the type of impurity involved: complete immersion, immersion of hands and feet, and immersion of hands only.

Complete Immersion

In the first type of ablution the person or article to be purified must undergo total immersion in either *mayim hayyim* (“live water”), i.e., a spring, river, or sea, or a *mikveh, which is a body of water of at least 40 *se’ahs* (approx. 120 gallons) that has been brought together by natural means, not drawn. The person or article must be clean with nothing adhering (*hazizah*) to him or it, and must enter the water in such a manner that the water comes into contact with the entire area of the surface. According to law one such immersion is sufficient, but three have become customary. Total immersion is required for most cases of ritual impurity decreed in the Torah (see *Purity and Impurity, Ritual). Immersions were required especially of the priests since they had to be in a state of purity in order to participate in the Temple service or eat of the “holy” things. The high priest immersed himself five times during the service of the Day of Atonement. Other individuals had to be ritually pure even to enter the Temple. However, it became customary among the Pharisees to maintain a state of purity at all times, a fact from which their Hebrew name *Perushim* (“separated ones”) may have developed (L. Finkel-

stein, *The Pharisees* (1962³), 76 ff.; R.T. Herford, *The Pharisees* (1924), 31 ff.).

Total immersion also came to form part of the ceremony of *conversion to Judaism, although there is a difference of opinion concerning whether it is required for males in addition to circumcision, or in lieu of it (Yev. 46a). Since the destruction of the Temple, or shortly thereafter, the laws of impurity have been in abeyance. The reason is that the ashes of the *red heifer, which are indispensable for the purification ritual, are no longer available. Thus, everybody is now considered ritually impure. The only immersions still prescribed are those of the **niddah* and the proselyte, because these do not require the ashes of the red heifer and because the removal of the impurity concerned is necessary also for other than purely sacral purposes (entry into the Temple area, eating of "holy" things). The *niddah* is thereby permitted to have sexual relations and the proselyte is endowed with the full status of the Jew.

In addition to the cases mentioned in the Bible, the rabbis ordained that after any seminal discharge, whether or not resulting from copulation, total immersion is required in order to be ritually pure again for prayer or study of the Torah. Since this was a rabbinical institution, immersion in drawn water or even pouring nine *kav* (approx. 4½ gallons) of water over the body was considered sufficient. The ordinance was attributed to Ezra (BK 82a, b) but it did not find universal acceptance and was later officially abolished (Ber. 21b–22a; Maim., Yad, Kerī'at Shema 4:8). Nevertheless, the pious still observe this ordinance. The observant also immerse themselves before the major festivals, particularly the Day of Atonement, and there are ḥasidic sects whose adherents immerse themselves on the eve of the Sabbath as well. The Reform movement, on the other hand, has entirely abolished the practice of ritual ablu-tion. There was a custom in some communities to immerse the body after death in the *mikveh* as a final purification ritual. This practice was strongly discouraged by many rabbis, however, on the grounds that it discouraged women from attending the *mikveh*, when their attendance was required by biblical law. The most widespread custom is to wash the deceased with nine *kav* of water.

The immersion of the *niddah* and the proselyte require **kavvanah* ("intention") and the recitation of a benediction. The proselyte recites the benediction after the immersion because until then he cannot affirm the part which says "... God of our fathers ... who has commanded us." Since ablu-tion at its due time is a *mitzvah* it may be performed on the Sabbath, but not, nowadays, on the Ninth of Av or the Day of Atonement. Except for the *niddah* and the woman after childbirth whose immersion should take place after nightfall, all immersions take place during the day.

Vessels to be used for the preparation and consumption of food that are made of metal or glass (there is a difference of opinion concerning china and porcelain) and that are purchased from a non-Jew must be immersed in a *mikveh* before use. This immersion is to remove the "impurity of the

Gentiles" (a conception which was introduced, perhaps, to discourage assimilation), and is different from the process of ritual cleansing by which used vessels are cleansed to remove non-kosher food which might have penetrated their walls. This immersion is also accompanied by a benediction.

Washing the Hands and Feet

This second type of ablu-tion was a requirement for the priests before participating in the Temple service (Ex. 30:17 ff.).

Washing the Hands

This is by far the most widespread form of ablu-tion. The method of washing is either by immersion up to the wrist or by pouring ¼ *log* (approx. ½ pint) of water over both hands from a receptacle with a wide mouth, the lip of which must be undamaged. The water should be poured over the whole hand up to the wrist, but is effective as long as the fingers are washed up to the second joint. The hands must be clean and without anything adhering to them; rings must be removed so that the water can reach the entire surface area. The water should not be hot or discolored and it is customary to perform the act by pouring water over each hand three times (Sh. Ar., OḤ 159, 1960, 161). The handwashing ritual is commonly known as *netilat yadayim*, a term whose source is not entirely clear. It has been suggested that *netilah* means "taking" and thus the expression would be "taking water to the hands," but the rabbinic interpretation is "lifting of the hands" and is associated with Psalms 134:2.

Washing the hands is a rabbinic ordinance to correct the condition of *tumat yadayim*, the impurity of the hands, which notion itself is of rabbinic origin. Among the biblical laws of purity washing the hands is mentioned only once (Lev. 15:11). According to one tradition "impurity of the hands" (and washing them as a means of purification) was instituted by King Solomon, while another has it that the disciples of Hillel and Shammai were responsible for it (Shab. 14a–b). It seems that the custom spread from the priests, who washed their hands before eating consecrated food, to the pious among the laity and finally became universal. The detailed regulations concerning "impurity of the hands" constitute one of the 18 ordinances adopted in accord with the opinion of the school of Shammai against the school of Hillel, and it met at first with considerable opposition. In order to establish the practice the rabbis warned of dire consequences for those who disregarded it, even going so far as to predict premature death (Shab. 62b; Sot. 4b). R. Akiva, who personally disapproved of the ordinance, nevertheless used the limited water allowed him in prison for this ablu-tion rather than for drinking (Er. 21b). In the New Testament there are several references which suggest that Jesus and his disciples demonstrated their opposition to rabbinic authority by disregarding this ordinance (Mark 7:1; Matt 15:1; Luke 11:37).

The washing of the hands most observed today is that required before eating bread, although according to rabbinic sources washing after the meal before grace is considered

at least of equal importance. The reason given for this latter washing is to remove any salt adhering to the fingers which could cause serious injury to the eyes (Er. 17b). It is possible that these washings derive from contemporary Roman table manners, and there is also mention of washing between courses (*mayim emza'iyim*, Hul. 105a).

In modern times, priests have their hands washed by the Levites before they perform the ceremony of the Priestly Blessing during public prayer services. The laver thus has become the heraldic symbol for the Levites and often appears on their tombstones. Washing the hands is required on many other occasions, some of which are motivated by hygienic considerations and others by superstitious beliefs. A list of occasions for washing the hands was compiled by Samson b. Zadok in the 13th century: they include immediately on rising from sleep (in order to drive the evil spirits away), before prayer, after leaving the toilet, after touching one's shoes or parts of the body usually covered, and after leaving a cemetery (Tashbaz 276; Sh. Ar., OH 4:18).

The fact that ablution was so widespread in ancient religions and cultures makes it likely that the Jewish practice was influenced by contemporaneous cults. It is, however, difficult to ascertain the extent of this influence and it is possible that the rabbis were reacting against contemporary practices rather than imitating them. It is clear that, to the rabbis, the main purpose of any ablution was to become "holy" and the system they created was meant to keep the Jew conscious of this obligation. "(God is the hope [Hebrew "*mikveh*"] of Israel)' (Jer. 17:13); just as the *mikveh* cleanses the impure so will God cleanse Israel" (Yom. 85b).

[Raphael Posner]

Women and Ablution

Immersion for women following menstruation and childbirth is a rabbinic, not a biblical, requirement. The halakhic regulations appear particularly in TB *Niddah*, which discusses the practical consequences for male ritual purity of women's menstrual and non-menstrual discharges. On the eighth "white day," following the cessation of menstrual flow, the wife must immerse in the *mikveh* (ritual bath) before marital relations can resume. Jewish girls were traditionally taught to comply strictly and promptly with the regulations connected with the *niddah* (the menstruating woman). Ablution, which took place only after the body and hair had been thoroughly cleansed, had to be complete. *Halakhah* demanded a single immersion but three became customary. Post-menstrual and post-partum women usually visited the *mikveh* at night, often accompanied by other women.

In the first half of the 20th century, female ritual ablution declined significantly in North America, even among nominally traditional families, despite Orthodox exhortations in sermons and written tracts on the spiritual and medical benefits of *taharat ha-mishpahah* (family purity regulations), as these laws came to be called. Factors militating against ritual immersion included disaffection of Americanized children of

immigrants with their parents' Old World ways, the success of liberal forms of organized Judaism that did not advocate such ablutions, and the deterrent effect of ill-maintained and unhygienic *mikva'ot*. Many Jewish feminist writers of the late 20th century also condemned *taharat ha-mishpahah* regulations as archaic expressions of male anxiety about the biological processes of the female body that reinforced the predominant construction in rabbinic Judaism of women as other and lesser than men.

The 1980s and 1990s saw a resurgence in the numbers of Orthodox Jews and a new sympathy among non-Orthodox denominations for various previously discarded practices of traditional Judaism. In this era, positive new interpretations of ritual ablution developed, accompanied by construction of attractive modern *mikva'ot*. Orthodox advocates of *taharat ha-mishpahah* regulations praised the ways in which they enhanced the sanctity of marriage and human sexuality and extolled the feeling of personal renewal and rebirth that followed each immersion.

At the beginning of the 21st century, ritual ablution became a symbolic expression of a new spiritual beginning for both women and men in all branches of North American Jewish practice beyond the domain of *taharat ha-mishpahah*. In addition to conversion to Judaism, rituals developed incorporating *mikveh* immersion as part of bar mitzvah and bat mitzvah (coming of age); before Jewish holidays; prior to marriage; in cases of miscarriage, infertility, and illness; and following divorce, sexual assault, or other life-altering events. An indication of the probable long-term impact of this trend was the increased construction of *mikva'ot* by non-Orthodox communities.

ABNER (Heb. אֲבִינֵר, אֲבִינֵר), cousin of King *Saul and "captain of his host" (1 Sam. 14:50–51); from 1 Chronicles 8:33 it would appear that Abner was Saul's uncle. At court he occupied the seat of honor next to Jonathan, the crown prince (1 Sam. 20:25). In his conflict with Saul, David seems to have suspected Abner of plotting against him (24:10; 26:19). Abner did in fact accompany Saul in his pursuit of David, who taunted him with not guarding his master properly (26:16). After the death of Saul and three of his sons on Mount Gilboa, Abner made Saul's son *Ish-Bosheth king over Israel with his capital at *Mahanaïm in Transjordan, while Judah broke away and elected David as their king in Hebron (11 Sam. 2:8–11). During the subsequent warfare between Israel and Judah, Abner and

his men were routed by David's captain, Joab, at the Pool of Gibeon; Abner killed Joab's younger brother Asahel, but reluctantly and in self-defense. He then made a moving appeal to Joab to stop the fratricidal combat (2:12–32). Abner was reproved by Ish-Bosheth for having lain with Rizpah, the daughter of Aiah, a concubine of King Saul, thus possibly betraying his own aspirations to the kingship (3:7). In his anger Abner communicated with David and conspired with "the Elders of Israel" and Saul's own tribe of Benjamin to offer David the crown of a reunited Israel (3:12 ff.). At Hebron he and his son were well received and entertained, while his enemy Joab was away (3:20). Abner promised to rally the entire nation around David. On his return Joab reproached David and warned him against Abner's intrigue. Without the king's knowledge he lured Abner back to Hebron and murdered him at the city's gate (3:30). In this act he also avenged Asahel's death and rid himself of a potential rival, as David had probably promised the chief captaincy to Abner in return for making him king over all Israel. Shocked by this treacherous deed, David cursed Joab and his house. He had Abner buried with full honors; his beautiful dirge and tribute to Abner, "A prince and a great man has fallen this day in Israel," became famous (3:31 ff.). On his deathbed David charged his son Solomon to avenge Abner's murder (1 Kings 2:5, 32). According to one tradition Abner's tomb is in Hebron near the cave of *Machpelah.

[Gustav Yaacob Ormann]

In the Aggadah

Abner, a giant of extraordinary strength (Eccles. R. 9:11) was the son of the Witch of En-Dor (פֶּדֶרֶ 33). It was he who refuted Doeg's argument against the admission of Moabite women "in the assembly of the Lord" (see Deut. 23:4) and, supported by Samuel, he established the rule "a Moabite but not a Moabitess," thus enabling David to reign over Israel (Yev. 76b). Abner justified his slaying of Asahel as an action in self-defense, but since he could have merely wounded him, Abner deserved his violent death (Sanh. 49a). Although a pious man (Gen. R. 82:4) and a "lion in the law" (TJ Pe'ah 1:1, 16a) Abner was guilty of many misdeeds which warranted his death. It was in his favor that he had refused to obey Saul's command to kill the priests at Nob; but he should have intervened actively and prevented Saul from executing his bloody design (Sanh. 20a). Even if Abner could not have influenced the king in this matter (*ibid.*), he was guilty of having frustrated a reconciliation between David and Saul and of thinking little of human life (TJ Pe'ah 1:1, 16a). However he was right in espousing the cause of Saul's son Ish-Bosheth against David for he knew from tradition that God had promised two kings to the tribe of Benjamin, and it was therefore his duty to transmit the throne to the son of Saul the Benjaminite (Gen. R. 82:4).

ABNER OF BURGOS (also **Alfonso of Valladolid** or of **Burgos**; c. 1270–1340), apostate and anti-Jewish polemicist. Abner was practicing as a physician in Burgos in 1295, at the time of the appearance of the false prophet in *Avila. Some of those who had been confused by miraculous portents they had witnessed came to Abner for medical advice. Their reports shook Abner's own faith in Judaism, which was already troubled by doubts. The phenomenon of the sufferings of the Jews in exile and of the righteous had long disturbed him, and he experienced visions which he was unable to interpret. Finding no solution in the Bible or the doctrines of the Jewish and Arab philosophers, he turned to the New Testament and the works of the Christian theologians. Abner wrestled with this problem for 25 years. Jewish scholars tried to restore his faith, but he eventually became converted to Christianity when he was about 50. Some time after his conversion, he sent his disciple, Isaac b. Joseph ibn *Pollegar (Pulgar), a copy of a pamphlet setting forth his messianic theories. Pulgar responded with a work which he circulated among the Jewish communities in Spain. Abner subsequently published a number of books and tracts written in Hebrew and directed to Jews. Some were later translated into Castilian under his supervision. He also engaged in his old age in oral disputes with Jewish scholars, including *Moses b. Joshua of Narbonne. In 1334 he tried to convince the elders of Toledo that they had erred in fixing the date of Passover.

Abner was among the first apostates to formulate an ideological justification for conversion. He rejected the rationalist interpretations of the Torah current in his day and avoided taking a stand on the *Kabbalah, which was known to him. The theological system which he propounded accepts predestination, identified with astrological influences, as well as philosophic determinism. The theories expressed in his *Iggeret ha-Gezerah* ("Epistle on Fate") combine astrology with the doctrine of fatalism of Muslim theologians and the Christology of Paul and Augustine. Abner found the answer to the problem of salvation – individual salvation as well as the salvation of all Christians, who alone truly deserved the name "Israel" – in the doctrines of the Trinity and Incarnation, which he tried to ascribe to Aristotle and the aggadic Midrashim (following Raymond *Martini's *Pugio Fidei*). He proposed harsh measures for dealing with the Jewish question, including conversionist preaching, isolation of the Jews from the Christian population, and stirring up mob violence. These proposals he justified by means of malicious allegations about the Talmud. Following the example of the Karaites, Abner alleged that the Talmud contained an evil "Ten Commandments." He employed Karaite arguments against the Talmud in addition to the criticisms of contemporary rationalists and did not shrink from publishing blatant forgeries. He repeated current slanders that the Jews displayed a hostile and unethical attitude toward Gentiles and gave them a sharper edge.

Some of Abner's works have not yet been published and others have been lost, including his *Milhamot Adonai* ("Wars of the Lord") which he wrote in Hebrew and translated into

Castilian at the request of the Infanta Doña Blanca. Preserved in Castilian translation are Abner's major work *Moreh Zedek* ("Teacher of Righteousness"), under the title *Mostrador de Justicia*, and his tract *Minhat Kena'ot* ("Offering of Zeal"), directed against Isaac Pulgar. In the original Hebrew are *Sefer Teshuvot li-Meharef* ("Refutation of the Blasphemer"), a reply to Pulgar and other minor polemics. Pulgar assembled his arguments against Abner in his *Ezer ha-Dat* ("Aid to Faith"), in which, as customary in the works of other polemicists, he quotes from Abner's writings. Ḥasdai *Crescas, in his *Or Adonai*, quotes whole passages from Abner's works in order to refute them. Subsequently, the apostates *Solomon ha-Levi of Burgos (Pablo de Santa María) and Joshua Lorki (Gerónimo de Santa Fe) drew upon Abner's arguments. In conjunction with the *Pugio Fidei* of Raymond Martini, Abner's writings served as source material for later polemics against Judaism in Spanish Christian literature in general.

[Zvi Avneri]

ABOAB, Spanish family whose descendants remained prominent among the Sephardim of the Mediterranean world as well as in the ex-Marrano communities of Northern Europe. The origin of the name is obscure. The family produced many outstanding Jewish scholars in Spain (see Isaac Aboab, I and II). After the expulsion from Spain, it was found in North Africa, Turkey, Italy (where the form Aboaf became common), and elsewhere. Some members of the family, who fell victims to the forced conversion in Portugal in 1497, preserved the name in secret, resumed it when they reentered Judaism (sometimes with the addition of their baptismal surnames, e.g., Fonseca, Dias, Falleiro) and became outstanding in the communities of the Marrano Diaspora (see Samuel *Aboab, Isaac *Aboab de Fonseca). ABRAHAM, formerly Gonçalo Cardozo, who traded with the Iberian Peninsula under the name of Dionis Genis, was one of the deputies of the Jewish community of Amsterdam in 1638. ELIAS conducted a printing establishment there in 1643–44, and DANIEL SEMAH practiced medicine after graduating at Utrecht in 1667. DAVID, a convert, made his name in England by some pretentious publications, including *Remarks on Dr. Sharpe's Dissertations ... concerning ... Elohim and Berith* (London, 1751). He is possibly identical with the DAVID, born in Italy, who was excommunicated in Curaçao in 1746 after a bitter controversy with the rabbinate. Members of the family resident in Brazil in 1648–54 included MOSES, who later found his way to New York, where he is recorded in 1684. MOSES, formerly of Surinam, conducted learned religious dis-

cussions at Leghorn and elsewhere with the Christian scholar Veysiere de la Croze, who described them in his *Entretiens sur divers sulets ... de critique et religion* (Amsterdam, 1711?).

[Cecil Roth]

ABOAB, IMMANUEL (c. 1555–1628), protagonist of Judaism among the Crypto-Jews. The little that is known about his life is derived from his major work *Nomologia*, and from his letters to many Crypto-Jews in Western Europe. He was born in Porto into a New Christian family, his father being Henrique Gomes (Isaac Aboab). After his father's death when he was quite young, he was brought up by his grandfather Duarte Dias (Abraham Aboab, son of Isaac *Aboab II "the last gaon of Castile"; see accompanying genealogical tree), who negotiated with the Portuguese authorities for the entrance of the Castilian refugees into the country and was subsequently a victim of the forced conversion of 1497; he mentioned his grandfather quite often. In 1585 Aboab escaped to Italy, where he professed Judaism and studied Hebrew literature. In 1597 he had a religious discussion with an Englishman at Pisa; at the time he was one of the *parnasim* of the community, where his signature appears on some of the ordinances in 1599; subsequently he was in Reggio Emilia (where he was in contact with the kabbalist Menahem Azariah da *Fano) and Ferrara, where he had a debate with a Christian scholar on the translations of the Bible, claiming that the Hebrew version is the authentic one. He then moved to Spoleto, and later to Venice, where he is said to have delivered a discourse on the loyalty of the Jewish people before Doge Marino Grimani and the Grand Council in 1603. Four years later he was at Corfu, where he appeared on important business before the Venetian commander Orazio del Monte, with whom he later carried on a correspondence on the nature of angels. He probably spent some time in North Africa and Amsterdam. In Venice he became the *hakham* of the Spanish and Portuguese community until his departure to Israel late in life with a party of 36 relatives to join his daughter Gracia, who maintained two academies, in Safed and Jerusalem, and was in charge of the money collected for the support of the scholars. Aboab was a vigorous defender of Judaism, especially among his fellow Marranos who, while skeptical of Christianity, did not appreciate Jewish tradition. In the last years of his life, he wrote a forceful letter to a Marrano friend in France urging him to return to Judaism. The letter was filled with learned arguments and illustrations from history and was used in manuscript by later scholars. His principal work was his *Nomologia o Discursos legales*, written in Spanish between 1615 and 1625 in Venice, a defense of the validity and divine origin of the Jewish tradition and the Oral Law, published posthumously by his heirs (Amsterdam, 1629; 2nd ed. by I. Lopes, *ibid.*, 1727). The title of

the book, *Nomologia* ("The Theory of the Names") refers to the names of scholars from the days of Moses until his own time. The book was published at the persistent request of Sephardi Jews in Western Europe. Aboab claimed that the Written and Oral Laws were inseparable. Displaying a wide knowledge of Talmud and Kabbalah as well as Latin and secular learning, it includes much valuable historical information, especially about scholars who left Spain and Portugal after the expulsion. In chapter 29 Aboab conducted debates with two such Jews who denied the validity of the rabbinic traditions. His letters sent to Converso or ex-Converso acquaintances are a valuable source of information on the religious, theological, and social problems they encountered in Jewish communities where they settled. Aboab strongly criticized those who returned to the Iberian Peninsula after their difficult experience as Jews. His literary and religious projects were interrupted by his death in Jerusalem.

[Cecil Roth / Yom Tov Assis (2nd ed.)]

ABOAB, ISAAC I (end of the 14th century), rabbinic author and preacher; probably lived in Spain. His father seems to have been called Abraham and may have been the Abraham Aboab to whom *Judah b. Asher of Toledo (d. 1349) addressed responsa (*Zikhron Yehudah*, 53a and 60a). After devoting most of his life to secular affairs Isaac turned to writing and preaching.

Isaac's fame rests upon his *Menorat ha-Ma'or* ("Candlestick of Light"), one of the most popular works of religious edification among the Jews in the Middle Ages. Written "for the ignorant and the learned, the foolish and the wise, the young and the old, for men and for women," the work has had over 70 editions and printings (1st ed. Constantinople, 1514; Jerusalem, 1961) and has been translated into Spanish, Ladino, Yiddish, and German. Moses b. Simeon Frankfort of Amsterdam, who translated the work into Yiddish and wrote a commentary on it (*Nefesh Yehudah*, Amsterdam, 1701 and many subsequent eds.), also edited a shorter version under the title of *Sheva Petilot* ("Seven Wicks," Amsterdam, 1721; Sudzilkow, 1836). The book became a handbook for preachers and served for public reading in synagogues when no preacher was available.

Isaac wrote his book, apart from its practical aim, to return *aggadah* to its rightful place. Complaining that, because of lack of order in the sources, *aggadah* had been neglected in favor of legal casuistry, he argues that *aggadah* is an essential part of rabbinic tradition, as necessary for man as *halakhah*. According to Isaac, the *aggadah* carried the same authoritative weight as halakhic rabbinic writings. Thus, the reader is expected to believe that the *aggadah* is true, just as the *halakhah* is true. It has been suggested that he wanted to provide a structured compilation of *aggadah*, similar to that

which Maimonides, in his *Mishneh Torah*, had provided for the *halakhah*.

Developing the image of the seven-branched candlestick (cf. Num. 4:9), Isaac divides his work into seven *nerot* ("lamps"). These, in turn, are subdivided into main divisions, parts, and chapters. Using the three parts of Psalms 34:15 as general headings, he assigns the seven lamps to them in the following manner: (A) "Depart from evil," (1) guard against envy, lust, ambition; (2) be wary of sins attendant upon speech. (B) "Do good," (3) observance of *mitzvot* such as circumcision, rearing of children, prayer, festivals, honoring parents, founding a family, charity, justice; (4) study of Torah; (5) repentance. (C) "Seek peace and pursue it," (6) peace and love for fellowman; and (7) humility.

Sources

Into this rather loose framework Isaac fitted a wealth of aggadic material, culled from the Talmud and the vast midrashic literature. His use of passages from aggadic works now lost and the variants in the talmudic and midrashic texts he cites make the *Menorat ha-Ma'or* of great importance for establishing the text of the Talmud used in the Spanish-North African academies as distinct from that of the Franco-German school. Isaac is selective in using esoteric texts, and he fights shy of statements that may provoke doubt and heresy. While he agrees with Sherira Gaon that some of the sayings of the rabbis are imaginative exercises, he wants to limit their number. He contends that the great majority of aggadic statements are divinely inspired and, hence, beyond questioning. If they appear strange to us, it is because of our limited understanding. Isaac also quotes from the geonic literature, Alfasi, Rashi, the tosafists, Abraham Ibn Ezra, Maimonides, Abraham ibn Daud, Jacob Anatoli, Jonah of Gerona, Naḥmanides, Isaac ibn Latif, and Solomon b. Abraham Adret, the ritual compilations of Abraham b. Nathan of Lunel (*Ha-Manhig*) and (David) Abudarham, Bahya's *Hovot ha-Levavot*, Joseph Gikatilla's *Sha'arei Orah*, Asher b. Jehiel, and Jacob b. Asher's *Tur*. He often neglects to name the author from whose work he quotes, and his materials are derived many times from secondhand sources.

Thought

The *Menorat ha-Ma'or* is above all an ethical religious treatise. When discussing religious practices such as circumcision or Sabbath and Festival observances, Aboab limits himself to their underlying reasons and general importance. In his speculative views he combines the teachings of Maimonides, whose *Mishneh Torah* and *Guide* he cites constantly, with the ideas of the teachers of Kabbalah, though the complete absence of quotations from the Zohar has puzzled some scholars. In contrast to Maimonides he postulates that God's individual providence for man is unconditional. Isaac recognizes the need for the study of general sciences, of which, according to him, the rabbis of old were masters, and he quotes Plato, Aristotle, and "the physicians who have recently emerged among

the Gentiles.” He also reflects the rabbis’ ambivalent attitude to this world and the next: on the one hand, this world is merely a preparation for the next; on the other hand, the Jew must enjoy this world and the life given by God for serving Him and his fellowman.

Al-Nakawa’s Menorat-ha-Ma’or

Ever since S. Schechter described the *Menorat-ha-Ma’or* of Israel Al-Nakawa (d. 1391; MGWJ, 34 (1885), 114–26, 234–40) and H.G. Enelow published it (1929–34), the relationship between the two books has interested scholars, with most of them inclining toward the dependence of Aboab on Al-Nakawa. Certain scholars contend that this would imply the post-dating of Aboab’s work. The subjects discussed under their various headings are strikingly similar in the two works, but their arrangement is hardly more logical in one than in the other. In Aboab’s *Menorat ha-Ma’or* the choice of title is justified by the plan, and the need for an ordered presentation of *aggadah* is explained in the “Introduction,” whereas Al-Nakawa has nothing to say on this subject. (For the arguments in favor of the precedence of Al-Nakawa’s work see Israel b. Joseph *Al-Nakawa.)

Other Works

In the “Introduction” Isaac mentions that he had written two halakhic works: *Aron ha-Edut* (“Ark of Testimony”), whose tal-

ludic materials are arranged according to the Ten Commandments with the opinions of the *geonim* and later commentators in the margin; and *Lehem ha-Panim* (“Showbread”), devoted to prayers and blessings (unique manuscript in Schocken Library, Jerusalem).

The traditional portrait of Isaac Aboab is actually that of Isaac Aboab da Fonseca.

[*Encyclopaedia Hebraica*]

ABOAB, ISAAC II (1433–1493), rabbinical scholar. Known as the “last *gaon* of Castile,” Aboab was a disciple of Isaac *Cantanton and head of the Toledo Yeshivah. Joseph *Caro refers to him as one of the greatest scholars of his time. During the final years before the expulsion from Spain he headed a yeshivah in Guadalajara, where, in 1491, Isaac *Abrabanel studied with him. When the edict of expulsion was issued against the Jews of Spain in 1492, Aboab and other prominent Jews

went to Portugal to negotiate with King João II regarding the admission of a number of Spanish exiles into his country. He and 30 other householders were authorized to settle in Oporto where he died seven months later; a eulogy was delivered by his pupil Abraham Zacuto. He had two sons: JACOB, who ultimately settled in Constantinople where he published in 1538 his father's *Nehar Pishon*, and ABRAHAM, one of the forced converts of 1497 who retained their Jewish loyalties in secret. Abraham adopted the name Duarte Dias, and many of his descendants returned to Judaism (see *Aboab Family). Isaac Aboab's published works include the following: (1) a super-commentary on Nahmanides' commentary on the Pentateuch (Constantinople, 1525; Venice, 1548, etc.); (2) *Nehar Pishon*, homilies on the Pentateuch and other biblical books, edited by his son Jacob (Constantinople, 1538); (3) talmudic excursions (*Shitot*) and novellae (those to *Bezah* were published in the responsa of Moses Galante (Venice, 1608) and *Sefer Shitot ha-Kadmonim* (1959); those to *Bava Mezia* are quoted by Bezalel Ashkenazi in his *Shitah Mekubbezet*); (4) responsa, appended to *Sheva Einayim* (Leghorn, 1745). Oxford and Cambridge manuscripts contain some of his novellae (on *Ketubbot* and *Kiddushin*), as well as homilies. A commentary on Jacob b. Asher's *Arba'ah Turim*, quoted and used by Joseph Caro and later authorities, and a commentary on Rashi (on the Pentateuch), as well as many responsa, are no longer extant.

Marx, *Studies in Jewish History and Booklore* (1944), 80, 85, 88–89, 431–2; idem, in: *JQR*, 20 (1907/08), 240–71 (add. and corr., *ibid.*, 2 (1911), 237–8).

[Zvi Avneri]

ABOAB, ISAAC DE MATTATHIAS (1631–1707), Dutch Sephardi scholar. His father Manuel Dias Henriques (1594–1667) was born in Oporto into a Marrano family, a descendant of Isaac *Aboab II. After escaping from the Inquisition in Mexico he reverted to Judaism as Mattathias Aboab in Amsterdam in 1626. Isaac was a wealthy East India merchant trading with Spain and Portugal under the assumed name of Dennis Jennis. Although not a rabbi, as generally stated, he patronized rabbinical works and was a prolific writer and copyist. His only published work is a brief handbook of moral conduct, first written for his son in Hebrew but published in Portuguese under the title of *Doutrina Particular* (Amsterdam, 1687, 1691, reprinted by M.B. Amzalak, Lisbon, 1925). He advised his son to read Spanish books from time to time for his entertainment. He also wrote (1685) a morality play (*Comedia*) on the life of Joseph, and compiled a history and genealogy of his own family.

[Cecil Roth]

ABOAB, JACOB BEN SAMUEL (d. c. 1725), Venetian rabbi. He was the third son of Samuel Aboab, whom he succeeded as rabbi of Venice and whose biography he wrote (introduction to Samuel Aboab's responsa *Devar Shemu'el* (Venice, 1702)). He studied mathematics and astronomy and enjoyed a high repute for his extensive knowledge. Jacob's halakhic decisions are included in contemporary works. He corresponded with Christian scholars on biographical and bibliographical topics relating to Jewish literature. Among his correspondents were Christian Theophil Unger, a Silesian pastor, and the Frankfurt scholar Ludolf Hiob. An index to *Yalkut Shimoni* and a work on the ingredients of the incense of the sanctuary, both in manuscript, are ascribed to him. His responsum on the chanting of the Priestly Blessing is included in the collection *Meziz u-Meliz* (Venice, 1716), and a poem of his is appended to *Kehunnat Avraham* (Venice, 1719) by Abraham Cohen of Zante.

BIBLIOGRAPHY: Zunz, *Gesch*, 245; S. Wiener, *Kohelet Moshe*, 2 (1897), 253ff.; Loewenstein, in: *MGWJ*, 48 (1904), 679–80, 689–701.

[Yehoshua Horowitz]

ABOAB, SAMUEL BEN ABRAHAM (1610–1694), Italian rabbi. Aboab was born in Hamburg, but at the age of 13 he was sent by his father to study in Venice under David Franco, whose daughter he later married. After serving as rabbi in Verona, he was appointed in 1650 to Venice. At the age of 80 he had to leave Venice for some unknown cause and wandered from place to place, until the authorities permitted him to return shortly before his death. Aboab was renowned for both his talmudic and general knowledge and was consulted by the greatest of his contemporaries. He had many disciples. Modest, humble, and of a charitable nature, he devoted himself with particular devotion to communal matters. He was responsible for obtaining financial support from Western Europe for the communities in Erez Israel, and in 1643 collected funds for the ransoming of the Jews of Kremsier taken captive by the Swedes. Aboab was one of the most energetic opponents of the Shabbatean movement. At first he dealt with its followers with restraint, in the hope of avoiding a schism and the possible intervention of the secular authorities. Subsequently, however, he adopted a more rigorous attitude. When *Nathan of Gaza reached Venice in 1668, Samuel was among the rabbis of Venice who interrogated him on his beliefs and activities. His published works include *Devar Shemu'el*, responsa (Venice, 1702) published by his son Jacob. It is prefaced by a biography and his ethical will to his sons, and has an appendix called *Zikkaron li-Venei Yisrael* on the investigation of Nathan of Gaza in 1667–68; *Sefer ha-Zikhronot* (Prague, between 1631 and 1651), contains ten principles on the fulfillment of the commandments. Two more of his works, *Mazkeret ha-Gittin* and *Tikkun Soferim*, exist in manuscript. Some of his letters were published by M. Benayahu (see bibliography). Two of his sons, Abraham and Jacob, succeeded him after his death. His other two sons were JOSEPH and DAVID. Joseph had acted as

his deputy during his wanderings; eventually he settled in Erez Israel. He wrote halakhic rulings on *Jacob b. Asher's *Arba'ah Turim* and died in Hebron.

[Abraham David]

ABOAB DA FONSECA, ISAAC (1605–1693), Dutch Sephardi rabbi. Aboab was born in Castro Daire, Portugal, of a Marrano family, as Simao da Fonseca, son of Alvaro da Fonseca *alias* David Aboab. He was brought as a child to St. Jean de Luz in France and then to Amsterdam, where he was given a Jewish upbringing; he was considered the outstanding pupil of R. Isaac *Uzziel. At the age of 21, Aboab was appointed *hakham* of the congregation Bet Israel. After the three Sephardi congregations in Amsterdam amalgamated in 1639, he was retained by the united community as senior assistant to R. Saul Levi *Morteira. In 1641, following the Dutch conquests in *Brazil, Aboab joined the Amsterdam Jews who established a community at *Recife (Pernambuco) as their *hakham*, thus becoming the first American rabbi. He continued for 13 years as the spiritual mainstay of the community. After the repulse of the Portuguese attack on the city in 1646, Aboab composed a thanksgiving narrative hymn describing the past sufferings, *Zekher Asiti le-Niflaot El* (“I made record of the mighty deeds of God”), the first known Hebrew composition in the New World that has been preserved. He also wrote here his Hebrew grammar, *Melekheth ha-Dikduk*, still unpublished, and a treatise on the Thirteen Articles of Faith, now untraceable. After the Portuguese victory in 1654, Aboab and other Jews returned to Amsterdam. Morteira having recently died, Aboab was appointed *hakham* as well as teacher in the *talmud torah*, principal of the yeshivah, and member of the *bet din*; in this capacity he was one of the signatories of the ban of excommunication issued against *Spinoza in 1656. Aboab became celebrated as a preacher, and some of his sermons and eulogies have been published. The Jesuit Antonio de Vieira, comparing him with his contemporary *Manasseh b. Israel, observed that Aboab knew what he said whereas the other said what he knew. It was a pulpit address delivered by Aboab in 1671 which prompted the construction of the magnificent synagogue of the Sephardi community in Amsterdam; he preached the first sermon in the new building on its dedication four years later. Along with most of the Amsterdam community, Aboab was an ardent supporter of *Shabbetai Zevi, and was one of the signatories of a letter of allegiance addressed to him in 1666; he also published *Viddui* (“Confession of Sins,” Amsterdam, 1666). Aboab translated from Spanish into Hebrew the works of the kabbalist Abraham Cohen de *Herrera, *Beit Elohim* and *Sha'ar ha-Shamayim* (Amsterdam, 1655). His novellae on trac-

tate *Kiddushin* and a work on reward and punishment entitled *Nishmat Hayyim* have not been published. His most ambitious production was a rendering of the Pentateuch in Spanish together with a commentary (*Parafraſis Commentada sobre el Pentateucho*, Amsterdam, 1688). Aboab died at the age of 88 on April 4, 1693. The bereavement of their spiritual guide was so keenly felt by Amsterdam Jewry that for many years the name of Aboab and the date of his death were incorporated in the engraved border of all marriage contracts issued by the community. The breadth of Aboab's interests in non-Hebrew as well as Hebrew literature is illustrated in the sale catalogue of his library which appeared shortly after his death, one of the earliest known in Hebrew bibliography.

[Cecil Roth]

ABOMINATION. Three Hebrew words connote abomination: תועבה (*to'evah*), שקץ (*shekez, sheqez*) or שקיז (*shikkuz, shiqquz*), and פגול (*piggul*); *to'evah* is the most important of this group. It appears in the Bible 116 times as a noun and 23 times as a verb and has a wide variety of applications, ranging from food prohibitions (Deut. 14:3), idolatrous practices (Deut. 12:31; 13:15), and magic (Deut. 18:12) to sex offenses (Lev. 18:22ff.) and ethical wrongs (Deut. 25:14–16; Prov. 6:16–19). Common to all these usages is the notion of irregularity, that which offends the accepted order, ritual, or moral. It is incorrect to arrange the *to'evah* passages according to an evolutionary scheme and thereby hope to demonstrate that the term took on ethical connotations only in post-Exilic times. For in Proverbs, where the setting is exclusively ethical and universal but never ritual or national, *to'evah* occurs mainly in the oldest, i.e., pre-Exilic, passages of the book (18 times in ch. 10–29; 3 in the remaining chapter). Moreover, Ezekiel, who has no peer in ferreting out cultic sins, uses *to'evah* as a generic term for all aberrations detestable to God, including purely ethical offenses (e.g., 18:12, 13, 24). Indeed, there is evidence that *to'evah* originated not in the cult, and certainly not in prophecy, but in wisdom literature. This is shown not only by its clustering in the oldest levels of Proverbs but also in its earliest biblical occurrence where the expression *to'avat Mizrayim* (Gen. 43:32; 46:34; Ex. 8:22, ascribed to the J source) refers to specific contraventions of ancient Egyptian norms. Furthermore, Egyptian has a precise equivalent to *to'evah*, and it occurs in similar contexts, e.g., “Thus arose the abomination of the swine for Horus' sake” (for a Canaanite-Phoenician parallel, note *t'bt š'rt* – Tabnit of Sidon (third century B.C.E.) – in Pritchard, *Texts*, 505). Thus the sapiential

background of the term in the ancient Near East is fully attested. True, *to'evah* predominates in Deuteronomy (16 times) and Ezekiel (43 times), but both books are known to have borrowed terms from wisdom literature (cf. Deut. 25:13ff., and Prov. 11:1; 20:23) and transformed them to their ideological needs. The noun *sheqez* is found in only four passages where it refers to tabooed animal flesh (e.g., Lev. 11:10–43). However, the verb שִׁקֵּץ, found seven times, is strictly a synonym of תֵּעַב (e.g., Deut. 7:26; the noun may also have had a similar range). *Shiqquz*, on the other hand, bears a very specific meaning: in each of its 28 occurrences it refers to illicit cult objects. *Piggul* is an even more precise, technical term denoting sacrificial flesh not eaten in the allotted time (Lev. 7:18; 19:7); though in nonlegal passages it seems to have a wider sense (Ezek. 4:14; cf. Isa. 65:4). According to the rabbis (Sifra 7:18, etc.) the flesh of a sacrifice was considered a *piggul* if the sacrificer, at the time of the sacrifice, had the intention of eating the flesh at a time later than the allotted time. Under these circumstances, the sacrifice was not considered accepted by God and even if the sacrificer ate of it in the allotted time he was still liable to the punishment of **karet*, i.e., the flesh was considered *piggul* by virtue of the intention of the sacrificer. This is an extension of the biblical text according to which he would be liable for punishment only if he ate it at the inappropriate time. The rabbis based their interpretation on the biblical passage “It shall not be acceptable” (Lev. 7:18). They reasoned: How could the Lord having already accepted the sacrifice then take back His acceptance after it was later eaten at the wrong time.

[Jacob Milgrom]

ABOMINATION OF DESOLATION, literal translation of the Greek Βδέλυγμα ἐρημώσεως (I Macc. 1:54). This in turn, evidently goes back to a Hebrew or Aramaic expression similar to *shiqquz shomen* (“desolate,” i.e., horrified – for “horrifying” – “abomination”; Dan. 12:11). Similar, but grammatically difficult, are *ha-shiqquz meshomem*, “a horrifying abomination,” (disregard the Hebrew definite article?; *ibid.* 11:31); *shiqquzim meshomem*, “a horrifying abomination,” disregarding the ending of the noun? (*ibid.* 9:27); and *ha-peshat' shomem*, “the horrifying offense” (*ibid.* 8:13). According to the Maccabees passage, it was something which was constructed (a form of the verb οἰκοδομέω) on the altar (of the Jerusalem sanctuary), at the command of *Antiochus IV Epiphanes, on the 15th day of Kislev (i.e., some time in December) of the year 167 B.C.E.; according to the Daniel passages, it was something that was set (a form of *ntn*) there. It was therefore evidently a divine symbol of some sort (a statue or betyl [sacred stone]), and its designation in Daniel and Maccabees would then seem to be a deliberate cacophemism for its official designation. According to II Maccabees 6:2, Antiochus ordered that the Temple at Jerusalem be renamed for Zeus Olympios – “Olympian Zeus.” Since Olympus, the abode of the gods, is equated with heaven, and Zeus with the Syrian god “Lord of

Heaven” – Phoenician B'al Shamem, Aramaic Be'el Shemain (see Bickerman) – it was actually Baal Shamem, “the Lord of Heaven,” who was worshiped at the Jerusalem sanctuary during the persecution; and of this name, *Shomem*, best rendered “Horrifying Abomination,” is a cacophemistic distortion.

[Harold Louis Ginsberg]

ABONY, town in Pest-Pilis-Solt-Kiskun county, Hungary, located southeast of Budapest. One Jew settled there in 1745; the census of 1767 mentions eight Jews. The Jewish population ranged from 233 in 1784 to 431 in 1930, reaching a peak of 912 in 1840. The Jewish community was organized in 1771 concurrently with the organization of a *Chevra Kadisha*. The community's first synagogue was built in 1775. The members of the community consisted of merchants, shopkeepers, artisans, peddlers and, starting in 1820, tenant farmers. From 1850 onward Jews were able to own land. A magnificent new synagogue was built in 1825 that was mentioned in a responsum by Moses *Sofer. A Jewish teacher was engaged for the community in 1788, and a Jewish school was opened in 1766 and moved to a separate building in 1855. In 1869 a Neolog community was established in town. It was in Abony that the Austro-Hungarian *kolel* of Jerusalem was established in 1863. Among the rabbis of Abony were Jacob Herczog (1837–57), author of *Pert Ya'akov* (1830); Isaac (Ignác) *Kunstadt (1862–82), author of *Lu'ah Eretz*, 1–2 (1886–87); Béla Vajda (1889–1901), author of a history of the local Jewish community; and Naphtali Blumgrund (1901–18). In April 1944, the Neolog community of 275 was led by Izsák Vadász.

According to the census of 1941, Abony had 315 Jewish inhabitants and 16 converts identified as Jews under the racial laws. Early in May 1944, the Jews were placed in a ghetto which also included the Jews from the following neighboring villages in Abony district: Jászkarajenő, Kocsér, Tószeg, Törtel, Újszász, and Zagyvarékas. After a few days, the Jews were transferred to the ghetto of Kecskemét, from where they were deported to Auschwitz in two transports on June 27 and 29. In 1946, Abony had a Jewish population of 56. Most of them left after the Communists took over in 1948 and especially after the Revolution of 1956. By 1959, their number was reduced to 19, and a few years later the community ceased to exist. The synagogue is preserved as a historic monument.

[Alexander Scheiber / Randolph Braham (2nd ed.)]

ABORTION. Abortion is defined as the artificial termination of a woman's pregnancy.

In the Biblical Period

A monetary penalty was imposed for causing abortion of a woman's fetus in the course of a quarrel, and the penalty of

death if the woman's own death resulted therefrom. "And if men strive together, and hurt a woman with child, so that her fruit depart, and yet no harm follow – he shall be surely fined, according as the woman's husband shall lay upon him; and he shall pay as the judges determine. But if any harm follow – then thou shall give life for life" (Ex. 21:22–23). According to the Septuagint the term "harm" applied to the fetus and not to the woman, and a distinction is drawn between the abortion of a fetus which has not yet assumed complete shape – for which there is the monetary penalty – and the abortion of a fetus which has assumed complete shape – for which the penalty is "life for life." Philo (Spec., 3:108) specifically prescribes the imposition of the death penalty for causing an abortion, and the text is likewise construed in the Samaritan Targum and by a substantial number of Karaite commentators. A. *Geiger deduces from this the existence of an ancient law according to which (contrary to talmudic *halakhah*) the penalty for aborting a fetus of completed shape was death (*Ha-Mikra ve-Targumav*, 280–1, 343–4). The talmudic scholars, however, maintained that the word "harm" refers to the woman and not to the fetus, since the scriptural injunction, "He that smiteth a man so that he dieth, shall surely be put to death" (Ex. 21:12), did not apply to the killing of a fetus (Mekh. SbY, ed. Epstein-Melamed, 126; also Mekh. Mishpatim 8; Targ. Yer., Ex. 21:22–23; BK 42a). Similarly, Josephus states that a person who causes the abortion of a woman's fetus as a result of kicking her shall pay a fine for "diminishing the population," in addition to paying monetary compensation to the husband, and that such a person shall be put to death if the woman dies of the blow (Ant., 4:278). According to the laws of the ancient East (Sumer, Assyria, the Hittites), punishment for inflicting an aborting blow was monetary and sometimes even flagellation, but not death (except for one provision in Assyrian law concerning willful abortion, self-inflicted). In the Code of *Hammurapi (no. 209, 210) there is a parallel to the construction of the two quoted passages: "If a man strikes a woman [with child] causing her fruit to depart, he shall pay ten shekalim for her loss of child. If the woman should die, he who struck the blow shall be put to death."

In the Talmudic Period

In talmudic times, as in ancient *halakhah*, abortion was not considered a transgression unless the fetus was viable (*ben keyama*; Mekh. Mishpatim 4 and see Sanh. 84b and Nid. 44b; see Rashi; *ad loc.*), hence, even if an infant is only one day old, his killer is guilty of murder (Nid. 5:3). In the view of R. Ishmael, only a *Gentile, to whom some of the basic transgressions applied with greater stringency, incurred the death penalty for causing the loss of the fetus (Sanh. 57b). Thus abortion, although prohibited, does not constitute murder (Tos., Sanh. 59a; Hül. 33a). The scholars deduced the prohibition against abortion by an a fortiori argument from the laws concerning abstention from procreation, or onanism, or having sexual relations with one's wife when likely to harm the fetus in her womb – the perpetrator whereof being regarded

as "a shedder of blood" (Yev. 62b; Nid. 13a and 31a; *Havvat Ya'ir*, no. 31; *She'elat Yavez*, 1:43; *Mishpetei Uziel*, 3:46). This is apparently also the meaning of Josephus' statement that "the Law has commanded to raise all the children and prohibited women from aborting or destroying seed; a woman who does so shall be judged a murderess of children for she has caused a soul to be lost and the family of man to be diminished" (Apion, 2:202).

The Zohar explains that the basis of the prohibition against abortion is that "a person who kills the fetus in his wife's womb desecrates that which was built by the Holy One and His craftsmanship." Israel is praised because notwithstanding the decree, in Egypt, "every son that is born ye shall cast into the river" (Ex. 1:22), "there was found no single person to kill the fetus in the womb of the woman, much less after its birth. By virtue of this Israel went out of bondage" (Zohar, Ex., ed. Warsaw, 3b).

Abortion is permitted if the fetus endangers the mother's life. Thus, "if a woman travails to give birth [and it is feared she may die], one may sever the fetus from her womb and extract it, member by member, for her life takes precedence over his" (Oho. 7:6). This is the case only as long as the fetus has not emerged into the world, when it is not a life at all and "it may be killed and the mother saved" (Rashi and Meiri, Sanh. 72b). But, from the moment that the greater part of the fetus has emerged into the world – either its head only, or its greater part – it may not be touched, even if it endangers the mother's life: "*ein dohin nefesh mi-penei nefesh*" ("one may not reject one life to save another" – Oho. and Sanh. *ibid.*). Even though one is enjoined to save a person who is being pursued, if necessary by killing the pursuer (see *Penal Law), the law distinguishes between a fetus which has emerged into the world and a "pursuer," since "she [the mother] is pursued from heaven" (Sanh. 72b) and moreover, "such is the way of the world" (Maim., Yad, Roze'ah 1:9) and "one does not know whether the fetus is pursuing the mother, or the mother the fetus" (TJ Sanh. 8:9, 26c). However, when the mother's life is endangered, she herself may destroy the fetus – even if its greater part has emerged – "for even if in the eyes of others the law of a fetus is not as the law of a pursuer, the mother may yet regard the fetus as pursuing her" (Meiri, *ibid.*).

Contrary to the rule that a person is always fully liable for damage (*mu'ad le-olam*), whether inadvertently or willfully caused (BK 2:6, see *Penal Law, Torts), it was determined with regard to damage caused by abortion, that "he who with the leave of the *bet din* and does injury – is absolved if he does so inadvertently, but is liable if he does so willfully – this being for the good order of the world" (Tosef., Git. 4:7), for "if we do not absolve those who have acted inadvertently, they will refrain from carrying out the abortion and saving the mother" (*Tashbez*, pt. 3, no. 82; *Minhat Bik.*, Tosef., Git. 4:7).

In the Codes

Some authorities permit abortion only when there is danger to the life of the mother deriving from the fetus "because it is

pursuing to kill her” (Maim. *loc. cit.*; Sh. Ar., פמ 425:2), but permission to “abort the fetus which has not emerged into the world should not be facilitated [in order] to save [the mother] from illness deriving from an inflammation not connected with the pregnancy, or a poisonous fever ... in these cases the fetus is not [per se] the cause of her illness” (*Paḥad Yizḥak*, s.v. *Nefalim*). Contrary to these opinions, the majority of the later authorities (*aḥaronim*) maintain that abortion should be permitted if it is necessary for the recuperation of the mother, even if there is no mortal danger attaching to the pregnancy and even if the mother’s illness has not been directly caused by the fetus (Maharit, Resp. no. 99). Jacob *Emden permitted abortion “as long as the fetus has not emerged from the womb, even if not in order to save the mother’s life, but only to save her from the harassment and great pain which the fetus causes her” (*She’elat Yavez*, 1:43). A similar view was adopted by Benzion Meir Hai *Ouziel, namely that abortion is prohibited if merely intended for its own sake, but permitted “if intended to serve the mother’s needs ... even if not vital”; and who accordingly decided that abortion was permissible to save the mother from the deafness which would result, according to medical opinion, from her continued pregnancy (*Mishpetei Uziel*, *loc. cit.*). In the Kovno ghetto, at the time of the Holocaust, the Germans decreed that every Jewish woman falling pregnant shall be killed together with her fetus. As a result, in 1942 Rabbi Ephraim Oshry decided that an abortion was permissible in order to save a pregnant woman from the consequences of the decree (*Mi-Ma’amakim*, no. 20).

The permissibility of abortion has also been discussed in relation to a pregnancy resulting from a prohibited (i.e., adulterous) union (see *Ḥavvat Ya’ir*, *ibid.*). Jacob Emden permitted abortion to a married woman made pregnant through her adultery, since the offspring would be a *mamzer* (see **Mamzer*), but not to an unmarried woman who becomes pregnant, since the taint of bastardy does not attach to her offspring (*She’elat Yavez*, *loc. cit.*, s.v. *Yuḥasin*). In a later responsum it was decided that abortion was prohibited even in the former case (*Lehem ha-Panim*, last *Kunteres*, no. 19), but this decision was reversed by Ouziel, in deciding that in the case of bastardous offspring abortion was permissible at the hands of the mother herself (*Mishpetei Uziel*, 3, no. 47).

In recent years the question of the permissibility of an abortion has also been raised in cases where there is the fear that birth may be given to a child suffering from a mental or physical defect because of an illness, such as rubeola or measles, contracted by the mother or due to the aftereffects of drugs, such as thalidomide, taken by her. The general tendency is to uphold the prohibition against abortion in such cases, unless justified in the interests of the mother’s health, which factor has, however, been deemed to extend to profound emotional or mental disturbance (see: Unterman, Zweig, in bibliography). An important factor in deciding whether or not an abortion should be permitted is the stage of the pregnancy: the shorter this period, the stronger are the considerations in

favor of permitting abortion (*Ḥavvat Ya’ir* and *She’elat Yavez*, *loc. cit.*; *Beit Shelomo*, פמ 132).

Contemporary Authorities

Contemporary halakhic authorities adopted a strict approach towards the problem of abortion. R. Isser Yehuda *Unterman defined the abortion of a fetus as “tantamount to murder,” subject to a biblical prohibition. R. Moses *Feinstein adopted a particularly strict approach. In his view, abortion would only be permitted if the doctors determined that there was a high probability that the mother would die were the pregnancy to be continued. Where the mother’s life is not endangered, but the abortion is required for reasons of her health, or where the fetus suffers from Tay-Sachs disease, or Down’s syndrome, abortion is prohibited, the prohibition being equal in severity to the prohibition of homicide. This is the case even if bringing the child into the world will cause intense suffering and distress, to both the newborn and his parents. According to R. Feinstein, the prohibition on abortion also applies where the pregnancy was the result of forbidden sexual relations, which would result in the birth of a *mamzer*.

Other halakhic authorities – foremost among them R. Eliezer *Waldenberg – continued the line of the accepted halakhic position whereby the killing of a fetus did not constitute homicide, being a prohibition by virtue of the reasons mentioned above. Moreover, according to the majority of authorities, the prohibition was of rabbinic origin. In the case of a fetus suffering from Tay-Sachs disease R. Waldenberg ruled: “it is permissible ... to perform an abortion, even until the seventh month of her pregnancy, immediately upon its becoming absolutely clear that such a child will be born thus.” In his ruling he relies inter alia on the responsa of *Maharit* (R. Joseph *Trani) and *She’elat Ya’vez* (R. Jacob *Emden), who permit abortion “even if not in order to save the mother’s life, but only to save her from the harassment and the great pain that the fetus causes her” (see above). R. Waldenberg adds: “... Consequently, if there is a case in which the *halakhah* would permit abortion for a great need and in order to alleviate pain and distress, this would appear to be a classic one. Whether the suffering is physical or mental is irrelevant, since in many instances mental suffering is greater and more painful than physical distress” (*Ziḥ Eliezer*, 13:102). He also permitted the abortion of a fetus suffering from Down’s syndrome. Quite frequently, however, the condition of such a child is far better than that of the child suffering from Tay-Sachs, both in terms of his chances of survival and in terms of his physical and mental condition. Accordingly, “From this [i.e., the general license in the case of Tay-Sachs disease] one cannot establish an explicit and general license to conduct an abortion upon discovering a case of Down’s syndrome ... until the facts pertaining to the results of the examination are known, and the rabbi deciding the case has thoroughly examined the mental condition of the couple” (*ibid.*, 14:101).

In the dispute between Rabbis Feinstein and Waldenberg relating to *Maharit*’s responsum, which contradicts his

own conclusion, R. Feinstein writes: “This responsum is to be ignored ... for it is undoubtedly a forgery compiled by an errant disciple and ascribed to him” (p. 466); and regarding the responsum of R. Jacob Emden, which also contradicts his own conclusion, he claims that “... the argument lacks any cogency, even if it was written by as great a person as the *Ya’vez*” (p. 468). In concluding his responsum, R. Feinstein writes of “the need to rule strictly in light of the great laxity [in these matters] in the world and in Israel.” Indeed, this position is both acceptable and common in the *halakhah*, but in similar cases the tendency has not been to reject the views of earlier authorities, or to rule that they were forged, but rather to rule stringently, beyond the letter of the law, due to the needs of the hour (see Waldenberg, *ibid.*, 14:6).

In the State of Israel

Abortion and attempted abortion were prohibited in the Criminal Law Ordinance of 1936 (based on English law), on pain of imprisonment (sec. 175). An amendment in 1966 to the above ordinance relieved the mother of criminal responsibility for a self-inflicted abortion, formerly also punishable (sec. 176). In this context, causing the death of a person in an attempt to perform an illegal abortion constituted manslaughter, for which the maximum penalty is life imprisonment. An abortion performed in good faith and in order to save the mother’s life, or to prevent her suffering serious physical or mental injury, was not a punishable offense. Terms such as “endangerment of life” and “grievous harm or injury” were given a wide and liberal interpretation, even by the prosecution in considering whether or not to put offenders on trial.

The Penal Law Amendment (Termination of Pregnancy) 5737–1977 provided, *inter alia*, that “a gynecologist shall not bear criminal responsibility for interrupting a woman’s pregnancy if the abortion was performed at a recognized medical institution and if, after having obtained the woman’s informed consent, advance approval was given by a committee consisting of three members, two of whom are doctors (one of them an expert in gynecology), and the third a social worker.” The law enumerates five cases in which the committee is permitted to approve an abortion: (1) the woman is under legally marriageable age (17 years old) or over 40; (2) the pregnancy is the result of prohibited relations or relations outside the framework of marriage; (3) the child is likely to have a physical or a mental defect; (4) continuance of the pregnancy is likely to endanger the woman’s life or cause her physical or mental harm; (5) continuance of the pregnancy is likely to cause grave harm to the woman or her children owing to difficult family or social circumstances in which she finds herself and which prevail in her environment (§316). The fifth consideration was the subject of sharp controversy and was rejected *inter alia* by religious circles. They claimed that the cases in which abortion is halakhically permitted – even according to the most lenient authorities – are all included in the first four reasons. In the Penal Law Amendment adopted by the Knesset in December 1979, the fifth reason was revoked.

The Israeli Supreme Court has also dealt with the question of the husband’s legal standing in an application for an abortion filed by his wife; that is, is the committee obliged to allow the husband to present his position regarding his wife’s application? The opinions in the judgment were divided. The majority view (Justices Shamgar, Ben-Itto) was that the committee is under no obligation to hear the husband, although it is permitted to do so. According to the minority view (Justice Elon), the husband has the right to present his claims to the committee (other than in exceptional cases, e.g., where the husband is intoxicated and unable to participate in a balanced and intelligent consultation, or where the urgency of the matter precludes summoning the husband). According to this view, the husband’s right to be heard by the committee is based on the rules of natural justice, that find expression in the rabbinic dictum: “There are three partners in a person: The Holy One blessed be He, his father and his mother” (Kid. 30b; Nid. 31a; C.A. 413/80 *Anon. v. Anon.*, P.D. 35 [3] 57). Elon further added (p. 89): “It is well known that in Jewish law no ‘material’ right of any kind was ever conferred upon the parents, even with respect to their own child who had already been born. The parents relation to their natural offspring is akin to a natural bond, and in describing this relationship, notions of legal ownership are both inadequate and offensive” (C.A. 488/97 *Anon. et al. v. Attorney General*, 32 (3), p. 429–30). This partnership is based on the deep and natural involvement of the parents in the fate of the fetus who is the fruit of their loins, and exists even where the parents are not married, and *a fortiori* is present when the parents are a married couple building their home and family. When the question of termination of a pregnancy arises, each of the two parents has a basic right – grounded in natural and elementary justice – to be heard and to express his or her feelings, prior to the adoption of any decision regarding the termination of the pregnancy and the destruction of the fetus.

[Menachem Elon]

ABRABANEL, family in Italy. After the expulsion of the Jews from Spain, the three brothers, Isaac, Jacob, and Joseph, founders of the Italian family, settled in the kingdom of Naples. The family tree shows the relationships of the Italian Abrabanel. Because of their considerable wealth and capabilities the Abrabanel brothers reached a position of some power both in relation to the Naples authorities and their coreligionists. ISAAC was a financier, philosopher, and exegete; JACOB led the Jewish community in Naples; and JOSEPH dealt in grain and foodstuffs. All three were included among the 200 families exempted by the Spaniards when they expelled the Jews from the kingdom of Naples in 1511. Isaac had three sons, JUDAH (better known as the philosopher Leone Ebreo); JOSEPH, a noted physician who lived first in southern Italy where he treated the famous Spanish general Gonsalvo de Cordoba, then moved to Venice, and later to Ferrara where he died; and SAMUEL, who married his cousin BENVENIDA (See *Abrabanel, Benvenida), a woman of such talent that the Spanish viceroy in Naples, Don Pedro of Toledo, is said to have chosen her to teach his daughter Eleonora. Samuel, who commanded a capital of about 200,000 ducats, was such an able financier that Don Pedro used to seek his advice. When his father-in-law Jacob died, Samuel succeeded him as leader of the Naples community. In 1533, when Don Pedro issued a new edict expelling the Neapolitan Jews, Samuel managed to have the order suspended. However, his efforts were unavailing when the viceroy renewed the edict in 1540, and in the next year all the remaining Jews were compelled to leave the kingdom of Naples. Samuel now moved to Ferrara where he enjoyed the favor of the duke until his death. Benvenida continued her husband's loan-banking business with the support of her pupil Eleonora, now duchess of Tuscany, and extended it to Tuscany. To lighten her burden she took her sons JACOB and JUDAH and ISAAC, Samuel's natural son, into the management of the widespread business. Three years after Samuel's death in 1547, a struggle broke out over the inheritance among the three sons: Jacob and Judah (the recognized sons of Samuel and Benvenida) on the one hand and Isaac (the natural son) on the other. The struggle, which dealt with the legal validity of Samuel's will, involved some of the period's most famous rabbis: R. Meir b. Isaac Katzenellenbogen (Maharam), R. Jacob b. Azriel Diena of Reggio, R. Jacob Israel b. Finzi of Recanati, R. Samuel de Medina, R. Joseph b. David Ibn Lev, and R. Samuel b. Moses Kalai. The conflict was settled apparently by Maharam's arbitration in 1551. One of Benvenida's sons-in-law who became a partner in her business was JACOB, later private banker of Cosimo de' Medici, and his financial representative at Ferrara. Following Jacob's advice, Duke Cosimo invited Jews from the Levant to settle in Tuscany in 1551 to promote trade with the Near East, granting them favorable conditions. Members of the family living in Italy, especially Venice, after this period, Abraham (d. 1618), Joseph (d. 1603), and Veleida (d. 1616), were presumably descended from the Ferrara branch.

ABRABANEL, ABRAVANEL (Heb. אַבְרָבָנֵאל; inaccurately **Abarbanel**; before 1492 also **Abraaniel** and **Brabanel**), Sephardi family name. The name is apparently a diminutive of Abravan, a form of Abraham not unusual in Spain, where the "h" sound was commonly rendered by "f" or "v." The family, first mentioned about 1300, attained distinction in Spain in the 15th century. After 1492, Spanish exiles brought the name to Italy, North Africa, and Turkey. Members of the family who were baptized in Portugal at the time of the Forced Conversion of 1497 preserved the name in secret and revived it in the 17th century in the Sephardi communities of Amsterdam, London, and the New World. The family was also found in Poland and southern Russia. Of recent years Sephardi immigrants from the eastern Mediterranean area have reintroduced it into western countries. It is also common in Israel.

The first of the family who rose to eminence was JUDAH ABRABANEL of Córdoba (later of Seville), treasurer and tax-collector under Sancho IV (1284–95) and Ferdinand IV (1295–1312). In 1310 he and other Jews guaranteed the loans made to the crown of Castile to finance the siege of Algeciras. It is probable that he was *almoxarife* ("collector of revenues") of Castile. Another eminent member of the family was SAMUEL of Seville, of whom Menahem b. Zerah wrote that he was "intelligent, loved wise men, befriended them, was good to them and was eager to study whenever the stress of time permitted." He had great influence at the court of Castile. In 1388 he served as royal treasurer in Andalusia. During the anti-Jewish riots of 1391 he was converted to Christianity under the name of Juan Sanchez (de Sevilla) and was appointed comptroller in Castile. It is thought that a passage in a poem in the *Cancionero de Baena*, attributed to Alfonso Alvarez de

Villasandino, refers to him. He and his family apparently later fled to Portugal, where they reverted to Judaism and filled important governmental posts. His son, JUDAH (d. 1471), was in the financial service of the infante Ferdinand of Portugal, who by his will (1437) ordered the repayment to him of the vast sum of 506,000 reis blancs. Later he was apparently in the service of the duke of Braganza. His export business also brought him into trade relations with Flanders. He was father of Don Isaac *Abrabanel and grandfather of Judah *Abrabanel (Leone Ebreo) and Samuel *Abrabanel.

[Cecil Roth]

ABRABANEL, BENVENIDA (also known as **Benvegnita, Bienvenita**; c. 1473–after 1560), one of the most influential and wealthiest Jewish women of early modern Italy. Benvenida was the daughter of Jacob Abrabanel (d. 1528), one of three brothers of Isaac *Abrabanel (1437–1508). She married Isaac's youngest son, Samuel (1473–1547), bringing a very large dowry. By 1492, Benvenida and much of the family had settled in Naples, where her father and then her husband led the Jewish community. Benvenida appears to have raised six children of her own along with an illegitimate son of Samuel's. One of her adult daughters lived in Lisbon, apparently as a Crypto-Jew, and was known for her charity and piety. Eleanora de Toledo (1522–1562), the second daughter of Pedro de Toledo, who became Viceroy of the Spanish rulers of Naples in 1532, was also raised in Benvenida's house. Benvenida was renowned for her religious observance and her generosity; she fasted daily and ransomed at least a thousand captives. In 1524–25, Benvenida became an enthusiastic supporter of the messianic pretender David *Reuveni (d. 1538); she sent him money three times, as well as an ancient silk banner with the Ten Commandments written in gold on both sides, and a Turkish gown of gold. In 1533, Benvenida and several Neapolitan princesses successfully petitioned Emperor Charles v to delay the expulsion of the Jews of Naples for ten years. The Abrabanel family left Naples in 1541

when Jews were required to wear a badge, and ultimately settled in Ferrara, a major Sephardi refuge. Doña Gracia (*Nasi) Mendes (c. 1510–1569) settled in Ferrara in 1548; although it is not known if the two women ever met, the interests of their families did not always coincide. In 1555–56, when Doña Gracia attempted to persuade Ottoman Jewish merchants to boycott the papal port of Ancona, the Abrabanel family, particularly Benvenida's son Jacob, took the side of Ancona. Samuel Abrabanel died in 1547 leaving a will filed with and witnessed by Christians in which Benvenida was made general heir to all his movable and immovable property. Samuel's illegitimate son challenged the will on the rabbinic grounds that a woman cannot inherit; from 1550 to 1551, this became a major dispute among the rabbis of Italy and Turkey. Despite this controversy, Benvenida took over Samuel's business affairs, receiving permission from the Florentine authorities to open five banking establishments in Tuscany with her two sons, Jacob and Judah. Later she quarreled with Judah over his marriage and cut him off completely in 1553. Although Benvenida wielded great power, she herself left very few words in the historical record. Beyond a defense of women receiving gifts attributed to her, one folk remedy in her name is found in a British Library manuscript.

[Howard Tzvi Adelman (2nd ed.)]

ABRABANEL, ISAAC BEN JUDAH (1437–1508), statesman, biblical exegete, and theologian. Offshoot of a distinguished Ibero-Jewish family, Abrabanel (the family name also appears as **Abравanel**, **Abarbanel**, **Bravanel**, etc.) spent 45 years in Portugal, then passed the nine years immediately prior to Spanish Jewry's 1492 expulsion in Castile. At that time an important figure at the court of Ferdinand and Isabella, he chose Italian exile over conversion to Christianity. He spent his remaining years in various centers in Italy where he composed most of his diverse literary corpus, a combination of prodigious biblical commentaries and involved theological tomes.

Like his father Judah, Abrabanel engaged successfully in both commerce and state finance while in Lisbon. After his father died he succeeded him as a leading financier at the court of King Alfonso V of Portugal. His importance at court was not restricted to his official sphere of activities. Of a loan to the state of 12,000,000 reals raised from both Jews and Christians in 1480, more than one-tenth was contributed by Abrabanel himself. When in 1471, 250 Jewish captives were brought to Portugal after the capture of Arcila and Tangier in North Africa by Alfonso V, Abrabanel was among those who headed the committee which was formed in Lisbon to raise the ransom money.

Abrabanel launched his literary career in Lisbon as well. In addition to a short philosophic essay entitled "The Forms

of the Elements" (*Zurot ha-Yesodot*), he wrote his first work of biblical exegesis, a commentary on a challenging section in the Book of Exodus (*Ateret Zekenim* ("Crown of the Elders")), and began a commentary on the Book of Deuteronomy (*Mirkevet ha-Mishneh* ("Second Chariot")) as well as a work on prophecy (*Maḥazeh Shaddai* ("Vision of the Almighty")). He was also in touch with cultured Christian circles. His connections with members of the aristocracy were not founded only on business but also on the affinity of humanism. His letter of condolence to the count of Faro on the death of the latter's father, written in Portuguese, provides a striking example of this relationship.

The period of tranquility in Lisbon ended with the death of Alfonso V in 1481. His heir, João II (1481–1495), was determined to deprive the nobility of their power and to establish a centralized regime. The nobles, led by the king's brother-in-law, the duke of Bragança, and the count of Faro, rebelled against him, but the insurrection failed. Abrabanel was also suspected of conspiracy and forced to escape (1483). Although denying guilt, he was sentenced to death *in absentia* (1485). He evidently managed to transfer a substantial part of his fortune to Castile, and stayed there for a while in the little town of Segura de la Orden near the Portuguese border. Thereafter, Abrabanel quickly established himself as a leading financier and royal servant. By 1485, he had relocated to the Spanish heartland at Alcalá de Henares in order to oversee tax-farming operations for Cardinal Pedro González de Mendoza, the "third king of Spain." The initial total involved was the vast sum of 6,400,000 maravedis, with Abrabanel earning 118,500 maravedis per year as commission. As collateral he put up, without restriction, all that he owned. Abrabanel also supported the campaign of Ferdinand and Isabella against Granada, Islam's last Iberian citadel, offering extensive loans.

Ferdinand's and Isabella's signing of an order of expulsion against Jews in Spain and her possessions took Abrabanel by surprise. After the edict of expulsion had been signed, on March 31, 1492, Abrabanel was among those who tried in vain to obtain its revocation. Abrabanel relinquished his claim to certain sums of money which he had advanced to Ferdinand and Isabella against tax-farming revenues, which he had not yet managed to recover. In return he was allowed to take 1000 gold ducats and various gold and silver valuables out of the country with him (May 31, 1492).

Though occupied with worldly affairs, Abrabanel continued to pursue scholarship and produce works in Spain. Most notably, he composed commentaries on Joshua, Judges, and Samuel soon after arriving in Castile. Among other things, these commentaries attest to Abrabanel's novel approaches to questions concerning the authorship and origins of biblical books, some of which imply the impress of a humanist sense of historicity on his exegesis. Seen from this vantage-point, these commentaries offer perhaps the earliest example of Renaissance stimulus in works of Hebrew literature composed beyond Italy.

After the 1492 expulsion, Abrabanel passed two years

in Naples. Here he completed his commentary on Kings (fall 1493). But he was again prevented from devoting his time to study for long, eventually coming to serve in the court of Alfonso II. Abrabanel tells of wealth recouped in Italy and renewed fame “akin to that of all of the magnates in the land.” Abrabanel’s fortunes turned again, however, when the French sacked Naples (1494). His library was destroyed. Before departing Naples, Abrabanel managed to complete a work on dogma (*Rosh Amanah* (“Principles of Faith”)) structured around Maimonides’ enumeration of 13 foundational principles of Judaism. Abrabanel now followed the royal family to Messina, remaining there until 1495. Subsequently he moved to Corfu where he began his commentaries on Isaiah and the Minor Prophets (summer 1495) and then to Monopoli (Apulia), where early in 1496 he completed the commentary on Deuteronomy which he had begun in Lisbon, as well as his commentaries on the Passover *Haggadah* (*Zevah Pesah*), and on *Avot* (*Nahalat Avot*). Of the same period are his works expressing the hopes for redemption which at times explain contemporary events as messianic tribulations – *Ma’yenei Yeshu’ah*, *Yeshu’ot Meshiho*, and *Mashmi’a Yeshu’ah*. Two other works addressed the problem of the world’s createdness, *Shamayim Hadashim* (“New Heavens”) and *Mifalot Elohim* (“Wonders of the Lord”). In 1503, Abrabanel settled at last in Venice. He was engaged in negotiations between the Venetian senate and the kingdom of Portugal in that year, for a commercial treaty to regulate the spice trade. He now finished commentaries on Jeremiah and Ezekiel, Genesis and Exodus, and Leviticus and Numbers. In a reply to an enquiry from Saul ha-Kohen of Candia, he mentions that he was engaged in composing his book *Zedek Olamim*, on recompense and punishment, and *Lahakat ha-Nevi’im*, on prophecy (a new version of *Mahazeh Shaddai* which had been lost in Naples), and in completing his commentary on Maimonides’ *Guide of the Perplexed*. Abrabanel died in Venice and was buried in Padua. Owing to the destruction of the Jewish cemetery there during the wars in 1509, his grave is unknown.

[Zvi Avneri / Eric Lawee (2nd ed.)]

Abrabanel as Biblical Exegete

Though Abrabanel’s writings traverse many fields, they mainly comprise works of scriptural interpretation. It was in his role as a biblical interpreter that Abrabanel was most emphatic about his originality as a writer.

In his general prologue to his commentaries on the Former Prophets, Abrabanel spelled out some of his main procedures and aims as an interpreter of Scripture. To ease the task of explaining biblical narratives, Abrabanel would “divide each of the books into pericopes.” These would be smaller than the units devised by his 14th century Jewish predecessor, Gersonides, but larger than the ones fashioned by “the scholar Jerome, who translated Holy Writ for the Christians.” Before explaining a pericope, he would raise questions or “doubts” about it. Overall, Abrabanel’s interpretive aim was twofold: explanation of the verses “in the most satisfactory way pos-

sible” and exploration of “the conceptual problems embedded therein to their very end.” In short, he would explore both Scripture’s exegetical and doctrinal-theological dimensions. Abrabanel warns that such interpretation yields lengthy commentary. In his commentary on the Pentateuch these questions have no fixed number, sometimes amounting to over 40, but in his commentary to the Prophets he limits himself to six. Despite the marked artificiality of this method, Abrabanel states that he chose it as a means of initiating discussion and encouraging investigation.

Abrabanel’s exegesis combines a quest for Scripture’s contextual sense (*peshat*) with other levels of interpretation. His repeated and emphatic statements about the primacy of *peshat* notwithstanding, Abrabanel incorporates midrashim into his commentaries often and occasionally digresses into detailed explanations of them. At the same time, he says that he describes Rashi’s overindulgence in midrashic interpretation as “evil and bitter.” Like some *geonim* and Spanish interpreters before him, Abrabanel distinguishes rabbinic dicta that reflect a “received tradition,” which he says are indubitably true and hence binding, from midrashim that reflect fallible human reasoning. The latter can be rejected. Abrabanel’s criticisms of individual midrashim can be unusually blunt (“very unlikely,” “evidently weak,” and so forth) even as Abrabanel often uses Midrash as a vehicle to extract maximal insight and meaning from the biblical word.

Abrabanel’s commentaries evince a dialogue with a wide variety of earlier commentators. The predecessor who most shaped his exegetical program was *Nahmanides. Like this earlier Spanish scholar, Abrabanel devotes considerable attention to questions of scripture’s literary structure and argues for the biblical text’s chronological sequentiality wherever possible.

Abrabanel was ambivalent about philosophically oriented biblical interpretation as practiced by Maimonides and his rationalist successors. He vehemently fought the extreme rationalism of philosophical interpretation (for example in Joshua 10, Second Excursus) as well as interpretations based on philosophical allegory. At the same time he himself had recourse, especially in his commentary on the Pentateuch, to numerous interpretations based on philosophy, as when he interprets the paradise story. Abrabanel refers to kabbalistic interpretation only rarely.

At times, he points to errors and moral failings in the heroes of the Bible. For example, he criticizes certain actions of David and Solomon and points out some stylistic and linguistic defects of Jeremiah and Ezekiel.

Among the innovations in Abrabanel’s exegesis are the following:

(1) His comparison of the social structure of society in biblical times with that of the European society in his day (for example, in dealing with the institution of monarchy, 1 Samuel 8). He had wide recourse to historical interpretation, particularly in his commentaries to the Major and Minor Prophets and to the Book of Daniel.

(2) Preoccupation with Christian exegesis. He disputed christological interpretations, but he did not hesitate to borrow from Christian writers when their interpretation seemed correct to him.

(3) His introductions to the books of the prophets, which are much more comprehensive than those of his predecessors. In them he deals with the content of the books, the division of the material, their authors and the time of their compilation, and also draws comparisons between the method and style of the various prophets. His investigations at once reflect the spirit of medieval scholasticism and incipient Renaissance humanism.

Abrabanel's commentaries were closely studied by a wide variety of later Jewish scholars, such as the 19th-century biblical interpreter Meir Loeb ben Jehiel Michael (*Malbim), as well as by many Christian thinkers from the 16th through 18th centuries, some of whom translated excerpts from his biblical commentaries into Latin.

[Avraham Grossman / Eric Lawee (2nd ed.)]

Abrabanel's Thought

The religious thought of Abrabanel appears in no single volume, but is distributed throughout his works. His religious teachings reflect ongoing dialogues with the major figures of earlier medieval Jewish theology, especially Maimonides. Abrabanel typically evaluates earlier views on a given issue, and then sets forth his own teachings. In doing so, he displays considerable philosophic depth and theological erudition. Among Abrabanel's main theological concerns were the world's creation, prophecy, history, politics, and eschatology.

CREATION. God's creation of the world *ex nihilo* stands as the Archimedean point of Abrabanel's religious thought. This view, which alone conforms to the teaching of the Torah, is also sustained by arguments from reason. Abrabanel refutes a number of competing cosmogonies influenced by different streams in ancient and medieval philosophy: the idea of the visible world's eternity, associated in the Middle Ages with Aristotle; the hypothesis of its creation from eternal matter, associated with Plato; and the doctrine of eternal creation. Abrabanel's teaching that God voluntarily created the world from nothing informs his understanding of the universe as a place ruled by God's infinite power in which the miracles of the Bible occurred according to their literal description.

PROPHECY. Prophecy is another cornerstone of Abrabanel's theology. The form in which Abrabanel discusses prophecy is influenced by the Aristotelian-Ptolemaic cosmology and the medieval Jewish philosophers who preceded him, particularly Maimonides. The influence of the latter was largely negative rather than positive, a stimulus that provoked a negative response, but which shaped the character of that response.

Abrabanel vigorously attacked the naturalistic view of prophecy and Judaism advanced by Maimonides, notably in his commentary on the *Guide* (2:32–45). According to this view, prophecy is a natural function of human beings that

arises from an individual's achievement of moral, and especially intellectual, perfection. By contrast, Abrabanel argues that prophecy is an essentially supernatural phenomenon in which the prophet is chosen by God. As the miraculous creation of God, prophecy supplies insight that is qualitatively superior to natural or scientific knowledge: the latter is probable and refragable, whereas the former is certain and infallible.

HISTORY. Abrabanel bases his understanding of history upon the Scriptures, which has been established as a perfect source of truth. This is the history of the universe as well as of man. The foundation is the personal God who creates the universe *ex nihilo*. As such, the universe presents no pre-existent nature to limit the absolute power of God. Neither does God relinquish control over the universe to nature, which, intervening between God and man, exercises a mechanical providence over humanity. Abrabanel thus rejects the naturalism of Maimonides and his followers adopted from the Neoplatonized Aristotelianism of medieval science. What befalls man is directly attributable to God, human freedom, or supernatural beings. The major outlines of Abrabanel's theory of history correspond essentially with the rabbinic view. God created the universe according to a grand design which culminates in the salvation of righteous mankind and the vindication of Judaism. Adam was created by God and placed in Eden to realize his spiritual potentialities. Instead, he chose to disobey God by eating of the forbidden tree of knowledge. For this sin, Adam became subject to death and was condemned to live on an inhospitable earth. Ultimately, through Noah, Abraham, and Jacob, the people Israel was developed to continue God's plan of salvation. God exercised a special providence over them, revealing the Torah and giving them the land of Israel, which was perfectly suited for spiritual realization and the reception of prophecy. Yet the Jews sinned against God, and after the destruction of the First Temple were sent into exile, which will continue until the advent of the Messianic Age when the history of this universe will come to an end.

POLITICS. Some of Abrabanel's most trenchant ideas lie in the sphere of politics. The view of Abrabanel on government reflects his religious convictions. The need for the state is temporal, arising with the expulsion of Adam from Eden and ending in the Messianic Age. As a product of spiritual exile, no state is perfect, some are better than others, but none provides salvation. The best possible state serves the spiritual as well as the political needs of its people, as does the state based on the principles of Mosaic law. In his commentaries on Scripture, Abrabanel presents somewhat conflicting views of the optimum society. However, its basic structure along Mosaic lines is presented clearly in his comments upon Deuteronomy 16:18. Two legal systems are provided for, civil and ecclesiastical. The civil system consists of lower courts, a superior court, and the king; the ecclesiastical system consists of levites, priests, and prophets. The officials of the lower courts, which possessed municipal jurisdiction, were chosen by the people. The supe-

rior court or Sanhedrin, possessed national jurisdiction, and was appointed by the king, primarily from among the priests and levites. A significant feature of Abrabanel's political convictions generally is seen in this structure: the diffusion of political power. Abrabanel's distrust of concentrated authority is echoed in his intensely negative opinion of monarchy. He considered monarchy a demonstrable curse, and the insistence of ancient Israel upon human kings in place of God's (theocratic) sovereignty, a sin for which it paid dearly. Monarchy's inferiority as a form of government is demonstrable on philosophical and not only on scriptural grounds.

ESCHATOLOGY. Abrabanel produced a substantial eschatological corpus several years after his arrival in Italy. As part of an exhaustive study of the classical (biblical-rabbinic) and medieval Jewish eschatological tradition, he set forth a powerful messianic message that included a specific forecast for the end of days, or for major events anticipating it: the year 1503. Spain's expulsion of her Jews was one significant context for Abrabanel's messianic writings. Christian missionizing based on christological interpretation of biblical and rabbinic sources was another. Just how convinced Abrabanel was by his undeniably vivid apocalyptic rhetoric is hard to say.

Abrabanel's vision of the Messiah and of messianic times differs considerably from Maimonides' naturalistic one. The Messiah will possess superhuman perfection. The days of the Messiah will see miracles in abundance such as unprecedented agricultural fertility. At that time the Jews will be revenged on their enemies in extraordinary ways, the dispersed Jews will return to Israel, the resurrection and judgment will take place, and all Jews will live in Israel under the Messiah, whose rule will extend over all mankind. Though it is often said that Abrabanel's messianic speculations contributed significantly to the powerful messianic movements among the Jews in the 16th and 17th centuries, there is little evidence to support this claim.

Lawee, *Isaac Abarbanel's Stance Toward Tradition* (2001); idem, "Isaac Abarbanel's Intellectual Achievement and Literary Legacy in Modern Scholarship: A Retrospective and Opportunity," in: *Studies in Medieval Jewish History and Literature*, 3 (2000), 213–47.

ABRABANEL, JUDAH (called **Leone Ebreo** or **Leo Hebraeus**; c. 1460–after 1523), physician, poet, and one of the foremost philosophers of the Renaissance. Abrabanel was born in Lisbon, the eldest son of Don Isaac *Abrabanel and was instructed by his father in Jewish studies and in Jewish and Arabic philosophy. He also studied medicine and is mentioned in the register of Lisbon physicians of 1483. When his father was forced to flee from Portugal, in 1483, Judah followed him. At the time of the expulsion of the Jews from Spain (1492), he secretly sent his one-year-old son to Portugal with his nurse, but

King John II had the infant seized and baptized. This tragedy weighed heavily on Abrabanel for many years, as is evident from his frequently published poem "*Telunah al ha-Zeman*" ("Complaint against the Time"), composed in 1503. There is, however, reason to believe that the son ultimately returned to the religion of his people and to his family. Abrabanel later settled in Naples where he continued to practice medicine. The physician *Amatus Lusitanus reports that in 1566 he saw in Salonica a philosophical work on the harmony of the heavens which Abrabanel had composed for *Pico della Mirandola (d. 1494). This work is no longer extant. This indicates that he visited Florence (where Pico lived) at that time. His spiritual affinity with the circle of scholars of the Platonic Academy in Florence, particularly with its leading exponents Pico and Marsilio Ficino, may have originated in this visit. Some scholars, however, believe that the person for whom the book was meant was Pico's nephew (d. 1533).

Abrabanel was back in Naples in 1494. When the city was captured by the French in 1495, he went to Genoa, but he returned to Naples and in 1501 was teaching medicine and "astrology" at the university there. From then on, his name occurs in various documents as physician to the Spanish viceroy, Don Gonsalvo de Córdoba. On the title pages of the second (1541) and third (1545) editions of his *Dialoghi di Amore*, he is described as a convert to Christianity. This statement is lacking, however, in the first edition as well as in those subsequent to the third, even in the Latin version of 1564 with its elaborate dedication to a church dignitary. It is very likely, therefore, that it has no foundation in fact, and may have been added merely to stimulate the sale of the work or to emphasize its orthodoxy from the Christian standpoint. There are in fact some passages in the text in which the author speaks of himself as a Jew.

Judah Abrabanel was a skillful versifier, and apart from the elegy on his son's disappearance, he composed three short poems (c. 1504) commending his father's works, and another of 52 stanzas in memory of his father and extolling his commentary on the Latter Prophets (c. 1520). These were included in the printed editions. His reputation rests on his *Dialoghi di Amore*, first published in Rome in 1535. Mariano Lenzi, the editor, claims to have rescued the work "from the obscurity in which it was buried" after the author's death. The precise date of composition is uncertain. According to the author's statement in the text he had reached the middle of the Third Dialogue in 1502, but it is not known when he completed it. The Fourth Dialogue which Abrabanel intended to write never reached Lenzi, and it may never have been written. Almost certainly the book was written in Italian (the conjectures that it was composed in Hebrew or in Spanish are untenable). A Hebrew translation was made after 1660 by Joseph Baruch of Urbino; its style is cumbersome and difficult.

Philosophy

Following Plato's example, Abrabanel presented his ideas in the form of dialogues, of which there are three. The names of

the dialogists, Philone and Sophia, who are depicted as platonic lovers, reflect Abrabanel's belief that love elevates to the pinnacle of wisdom. In the character of Sophia we find here the first female in Jewish and non-Jewish literature that is described as an active philosopher. The principal and central theme of the work, from which the discussion branches out in a number of directions, is love, which he regards as the source, the dominating and motivating force, and the loftiest goal of the universe. He investigates and expounds the nature of love and its operation in God, in matter and form, in the four elements, in the spheres, in the constellations, in the terrestrial world and all that it contains from man, his soul, his intellect, and senses, to animals, plants, and inanimate things. Thus, Abrabanel's discourse in the *Dialoghi* rises stage by stage to the bold concept which rounds out his theory, that the goal of love is not "possession," but the pleasure of the lover in his union with the idea of the beautiful and the good, embodied in the beloved. Hence, the sublime end of love, which fills the entire world as a supernal force, is the union of the creation and all creatures with that sublime beauty (which is at the same time sublime goodness and sublime intellect) which exists in God. Such a union, which constitutes an act of both will and intellect, the intellectual love of God (*amore intellettuale di Dio*), is desired and enjoyed also by God. This covenant of mutual love between the universe and its creator forges a mighty "circle of love" which sustains all components of the cosmos, from the outermost sphere to the rock within the earth, in one living, blessed movement, from God and to God. Out of this central theme there flows a remarkable stream of thoughts on many diverse subjects – reflections on religion, metaphysics, mysticism, ethics, aesthetics (especially valuable), logic, psychology, mythology, cosmology, astrology, and astronomy – a vision embracing the spiritual and material universe and its metaphysical goal. Original interpretations of biblical and rabbinic traditions as well as of Greek myths occupy a considerable place in these speculations. Abrabanel always endeavors to reconcile Jewish and Greek teachings, and the revered Plato and his school with Aristotle and his Arab commentators. Among the philosophers by whom he was influenced were *Maimonides and Ibn *Gabirol. The wealth and profundity of the ideas make the *Dialoghi* one of the most important works in metaphysics produced by the European Renaissance. The work had a widespread influence in its time. Twenty-five editions and printings (12 in Italian and 13 in various translations) appeared between 1535 and 1607, and between 1551 and about 1660 it was translated seven times into four languages (French, Latin, Spanish, and Hebrew). In its wake there appeared, especially in 16th century Italy, a large number of essays and dialogues on love, almost all of which borrowed basic ideas from Abrabanel's work. At the same time his unique concept of love permeated the lyrical poetry of the epoch in Italy, France, and Spain. His influence is discernible also in Michelangelo's *Sonnets* and Torquato Tasso's *Minturno*. Among the philosophers who were influenced by Abrabanel, mention should be made of Giordano Bruno and *Spinoza,

whose small library contained the *Dialoghi*. But by the end of the 16th century the influence of the work had dwindled. R. Isaac *Alatrini of Modena incorporated various passages in his commentary on the Song of Songs, entitled *Kenaf Renanim*, preserved in manuscript in Oxford and elsewhere. Modern editions include a facsimile edited by C. Gebhardt with elaborate introduction and bibliography (*Bibliotheca Spinozana*, 3, 1929); an edition by Caramella in the series of Italian classics *Scrittori d'Italia* (1929); an anonymous early translation into Hebrew, sometimes ascribed to Leone *Modena (Lyck, 1871); and an English translation by F. Friedeberg-Seeley and Jean H. Barnes (1937). A new Hebrew translation, with an extensive introduction and notes, was published in Jerusalem in 1983 by M. Dorman.

[Hiram Peri / Avraham Melamed (2nd ed.)]

ABRACADABRA, magic word or formula used mainly in folk medicine, as an incantation against fevers and inflammations. Several origins for the obscure word have been proposed, most of them regarding it as a derivative of an Aramaic demon-name, now unrecognizable. It occurs first in the writings of Severus Sammonicus, a gnostic physician of the second century C.E. In the same manner as Abracadabra, the name of Shabriri, the demon of blindness, and other magic words were used in Jewish magic, incantations, and amulets. An amulet still in use among some Oriental Jews utilizes a talmudic formula:

(Pes. 112a; Av. Zar. 12b)

ABRAHAM (originally **Abram**; Heb. אַבְרָהָם, אַבְרָם), first patriarch of the people of Israel. The form "Abram" occurs in the Bible only in Genesis 11:26–17:5, Nehemiah 9:7, and 1 Chronicles 1:26. Otherwise, "Abraham" appears invariably, and the name is borne by no one else. No certain extra-biblical parallel exists. *A-ba-am-ra-ma*, *A-ba-ra-ma*, *A-ba-am-ra-am* occur in 19th-century B.C.E. Akkadian cuneiform texts. *Abm* appears in Ugaritic (Gordon, *Ugaritic Textbook* (1965), pp. 286, 348, text 2095, line 4), but is most likely to be read *A-bi-ra-mi* (*Palais Royal d'Ugarit*, 3 (1955), p.20, text 15.63, line 1). There is no evidence that Abram is a shortened form of Abiram. As

to the meaning of Abram, the first element is undoubtedly the common Semitic for “father”; the second could be derived from Akkadian *raāmu* (“to love”) or from West-Semitic *rwm* (“to be high”). “He loved the father” or “father loves” is a far less likely meaning than “he is exalted with respect to father” i.e., he is of distinguished lineage. The meaning “exalted father” or “father is exalted,” while less satisfactory, cannot be ruled out. No Hebrew derivation for Abraham exists. In Genesis 17:5 “the father of a multitude [of nations]” is a popular etymology, although it might possibly conceal an obsolete Hebrew cognate of Arabic *ruhām*, “numerous.” More likely, Abraham is a mere dialectic variant of Abram, representing the insertion of *h* in weak verbal stems, a phenomenon known from Aramaic and elsewhere.

The Biblical Data: Genesis 11:26–25:10

The main details of Abraham’s life are recorded in Genesis 11:26–25:10. They do not form a continuous narrative but refer to a series of isolated incidents. Son of *Terah, Abraham was the tenth generation from Noah through the line of Shem (Gen. 11:10–26). His two brothers were Nahor and Haran. His wife was Sarai or *Sarah, a paternal half sister (11:29; 20:12). The family migrated from “Ur of the Chaldees” (11:31), the apparent birthplace of Abraham (11:28; 15:7; Neh. 9:7; cf. Josh. 24:2–3), heading for Canaan. It was during the stay at Haran that Abram, then aged 75, received the

divine call and promise of nationhood in response to which he proceeded to Canaan together with his wife and nephew *Lot (Gen. 12:1–5). At Shechem he received a further promise of national territory and built an altar before continuing his wanderings in the region between Beth-El and Ai. In this area, too, he built an altar and invoked the divine name, thereafter journeying toward the Negev (12:6–9). (See Map: Abraham’s Journeys.)

Driven by famine to Egypt, the patriarch represented his wife as his sister in order to avert personal danger. Sarah was taken to Pharaoh’s palace, but released when the deception was uncovered as a result of divine visitations (12:10–20). Abraham returned to Canaan and resumed his peregrinations. At this time, Lot left the clan because of quarrels over pasturelands and departed (13:5–9). This incident was followed by a reiteration of the divine promises of nationhood and possession of the land (13:14–17). Abraham again built an altar, this time in Hebron (13:18). Abraham “the Hebrew” next appears in the role of military chief, described in terms of the ideal “noble warrior,” leading a force of 318 retainers against an invading coalition of eastern kings who had captured Lot in plundering *Sodom and Gomorrah. The patriarch rescued his nephew and restored the booty. On his return he was blessed by *Melchizedek, priest-king of Salem, to whom he paid tithes. He refused, however, the offer by the king of Sodom of a share in the recovered spoils (ch. 14). Once again, Abraham received

Map showing route of Abraham’s wanderings and other main routes of the ancient East.

confirmation of the divine promises, now sealed through an elaborate covenant ceremony (ch. 15).

Ten years had now elapsed since the first promise of abundant offspring, but Sarah remained childless. She therefore presented her maidservant *Hagar to her husband as a second wife. *Ishmael was born of the union, Abraham being then 86 years old (16:1ff.). The Bible is silent about the next 13 years. Then Scripture reports that God reaffirmed and strengthened the promise of a rich posterity. Abraham and Sarah were to beget "a multitude of nations" and kings would issue from them (17:1–8). It is at this point that their names were changed from Abram and Sarai to Abraham and Sarah, respectively (17:5, 15). In addition, the institution of *circumcision was ordained as an ineradicable token of the immutability of God's covenant with Abraham and his posterity (17:9–14). Sarah was explicitly promised a son to be called *Isaac, through whom the covenant would be maintained (17:16–19, 21). Abraham then performed circumcision on himself and on Ishmael, as well as upon all males in his household (17:23–27).

Alongside the terebinths of Mamre three messengers appeared to the patriarch who entertained them hospitably and learned from them of the impending birth of his son and heir (18:1–10). Sarah was amused by these tidings as had been Abraham earlier (18:12; cf. 17:17), but the Lord Himself confirmed their truth (18:14). He also revealed His decision to destroy Sodom and Gomorrah. Abraham pleaded for revocation of the sentence for the sake of an innocent nucleus that might be found therein. None such could apparently be found, although Lot was saved from the subsequent destruction through the merit of Abraham (18:16–19:29). The patriarch journeyed to the Negev area and settled between Kadesh and Shur. While in Gerar, he again passed off his wife as his sister. King *Abimelech took Sarah into his palace, but released her unharmed after being rebuked in a dream theophany (ch. 20). The time of fulfillment of the divine promise was now at hand. Sarah, aged 90 (17:17), bore the 100-year-old Abraham a son who was named Isaac (21:1–3, 5). This event, however, proved to be a cause of domestic disharmony. Sarah demanded the expulsion of Hagar and Ishmael. It was only divine intervention in favor of Sarah that persuaded the distressed Abraham to agree (21:9–21). At this time, at Abimelech's initiative, the patriarch concluded a pact of non-aggression, which also regulated the watering rights in the Beer-Sheba area. He subsequently spent considerable time in the land of the Philistines (21:22–34).

The climax of Abraham's life was the divine command to sacrifice Isaac in the land of Moriah (see **Akedah*). Abraham obeyed unhesitatingly and his hand was stayed only at the last moment by an angel. Having passed the supreme test of faith, the patriarch now received, for the last time, the divine blessing – the promise that his descendants would be as numerous as the stars of heaven and the sands on the seashore; they would seize the gates of their foes; all the nations of the earth would bless themselves by his progeny (22:1–19). Abraham's

subsequent acts were concerned with winding up his affairs. The death of Sarah in Kiriath-Arba (Hebron) was the occasion for acquiring the cave of *Machpelah, as a family sepulcher, from Ephron the Hittite (ch. 23). Then, Abraham commissioned his senior servant to travel to Haran to find a wife for Isaac, the idea of a local Canaanite daughter-in-law being thoroughly repugnant to him (ch. 24). After Isaac's marriage to Rebekah, Abraham himself remarried. Several children were born of this marriage to Keturah, like Isaac and Ishmael the eponyms of nations. Thus was fulfilled the promise (Gen 17:4) that Abraham would be the father of many nations. However, he willed all his possessions to Isaac, gave his other sons gifts and sent them away to the land of the East. Abraham died at the age of 175 and was buried in the cave of Machpelah by Isaac and Ishmael (25:1–11).

The Biblical Data: In the Rest of the Bible

Mention of Abraham in the rest of the Bible is overwhelmingly in connection with the divine promises, and usually there is simultaneous reference to all three patriarchs. The few points of contact with the Abrahamic biography are mainly confined to the Book of Genesis (26:1; 35:27; 49:31), though the exodus from Ur and the change of name are mentioned in the late books (Neh. 9:7; cf. Josh. 24:2–3; I Chron. 1:26). A cryptic reference to Abraham's idolatrous ancestry is to be found in Joshua 24:2, while Isaiah (29:22) seems to cite some widely known tradition not otherwise recorded in the Bible. Abraham is called God's "servant" (Gen. 26:24; Ps. 105:6, 42) and "friend" (Isa. 41:8; II Chron. 20:7), and though the patriarch is not an ethnographic figure, Israel is called "the offspring of Abraham" (Isa. 41:8; Jer. 33:26; Ps. 105:6; II Chron. 20:7) and "the people of the God of Abraham" (Ps. 47:10). Surprisingly, "God of Abraham" as a generalized divine epithet appears only this once. Otherwise, Abraham is invariably associated with the other patriarchs in divine appellations.

The Image of Abraham

The picture that emerges from the biblical texts suggests a wealthy head of a large establishment, a semi-nomadic tent dweller (Gen. 12:8; et al.), whose peregrinations are confined mainly to the central hill country of Palestine and the Negev and who clings to the periphery of a few great urban centers. He possesses flocks, silver and gold, slaves (*ibid.* 12:5, 16, et al.), and a private army (14:14). He makes military alliances (14:13), has dealings with kings (12:15ff.; 14:18ff.; 17:22ff.; 21:22–32), and negotiates the purchase of land with city notables (23:2–20). Abraham is peace loving (13:8–9), magnanimous and principled in victory (14:22ff.), hospitable to strangers (18:1ff.), concerned for his fellowmen (18:23–33), obedient to God and his laws (26:5), and committed to transmitting to his posterity the ideals of justice and righteousness that he espouses (18:19). He is the very symbol of the God-fearing man (22:12) and the man of supreme faith (15:6; 22; Neh. 9:8). He is privy to divine decisions (Gen. 18:17; cf. Amos 3:7) and is also termed "a prophet" (Gen. 20:7) in that he can intercede with God on another's behalf (cf. Deut. 9:20; Jer. 7:16).

The Critical View

The disconnected and fragmentary nature of the narrative, as well as stylistic considerations, seem to point to a composition based on various oral traditions and written sources. Among followers of the documentary theory, there is a broad measure of agreement in respect of source division among JE and P, but little consensus as to the age and historic value of the material used by these sources. No external records have been found as yet that refer by name to Abraham or to any personage directly connected with him. In the absence of such synchronistic controls, and in the light of the difficulties of the biblical chronological data (see *Chronology), the place of the patriarch in the framework of history cannot be precisely determined. The attempts in the mid-20th century to marshal sociological and onomastic evidence from archeological discoveries at Nuzi, Mari, and elsewhere to provide a historical setting for Abraham in the second millennium B.C.E. have not withstood the test of time. Most alleged parallels between the Abrahamic stories have been shown to be faulty (e.g., wife-sister marriage), or not to be confined to a specific period in the second millennium (e.g., surrogate motherhood). Contemporary scholarship tends to see Abraham as a fictitious symbolic model of faith, as a figure who legitimates the claims of Israel to its land, and whose actions foreshadow the deeds of his children. Some of the tales of Abraham foreshadow the actions of Israelite kings, notably David (see *Patriarchs).

Whatever the age and source of the individual units, it is quite clear that in its present form the cycle of Abrahamic traditions is a unified and symmetrical historiographic composition. These traditions are encased within a framework of genealogies – the first listing the patriarch's ancestors (Gen. 11:10–32) and the second his descendants (25:1–18). The action opens and closes in a Mesopotamian setting (12:1–4; 24:4ff.). The first utterance of Abraham to God is an expression of doubt (15:2–8); his last is one of supreme confidence in the workings of divine providence (24:7). Finally, both the first and last communications from God to Abraham involve agonizing decisions and tests of faith, and they are cast in a strikingly similar literary mold: almost identical language is used in the case of both calls (12:1; 22:2); the exact destination is withheld in both cases; the motif of father parting with son is shared by each narrative; the tension of the drama is heightened by the accumulation of descriptive epithets (*ibid.*); in each instance Abraham builds an altar (12:8; 22:9); and in each he receives divine blessings of similar content (12:2–3; 22:17–18).

[Nahum M. Sarna / S. David Sperling (2nd ed.)]

In the Aggadah

In aggadic literature Abraham is regarded as having observed all the commandments (Yoma 28b; Kid. 4:14; et al.) even though they had not yet been revealed. He acted in strict conformity with the Oral Law: "No one occupied himself so much with the divine commandments as did Abraham" (Ned. 32a). He even muzzled his animals that they should not graze in

the fields of others (Gen. R. 41:6). Abraham instituted the morning prayer (Ber. 26b), and the precepts of the **zizit* and **tefillin* originate from him (Mid. Hag. to Gen. 14:23). These statements probably constitute a polemic against Christian *antinomianism which was prevalent toward the end of the first century C.E. and which later maintained that the commandments of the Torah were a punishment inflicted upon Israel. Abraham's principal virtue was that he was the first to recognize God, which is variously stated to have taken place when he was one, three, ten, or 48 years old (Gen. R. 95:2; 64:4). His recognition of God sprang from the notion that every citadel must have a leader (*ibid.* 39:1). Abraham waged a strenuous battle in the cause of spreading the idea of monotheism and won over many converts. When he smashed the idols of his father, an idol manufacturer, King *Nimrod had him thrown into a fiery furnace from which he was delivered by the angel Gabriel (Pes. 118a).

Abraham became a priest (Gen. R. 55:6), after the priesthood was taken from Melchizedek and given to him (Ned. 32b; Gen. R. 46:5; et al.). He was one of the great prophets, with whom God spoke not in dreams or visions but while he was in full possession of his normal cognitive faculties. "God omitted no blessing in the world with which He did not bless him" (SER 6). Through coins bearing his image Abraham's fame spread (Gen. R. 39:11). Around his neck was hung a precious stone which brought masses flocking to him, for whoever looked on it was healed (BB 16b, et al.). He was granted the privilege of blessing others (Tanḥ. Lekh Lekha 5), and his blessing spread upon all who came into contact with him (Gen. R. 39:12). Renowned for his hospitality to strangers, he had open doors to his house on all four sides (Gen. R. 48:9) and himself waited on his guests, and taught them the Grace after Meals, thus bringing them to believe in God (*ibid.* 54:6). Because of his proselytizing activities, he is regarded as the father of all proselytes, who are given the patronymic Abraham.

Abraham was circumcised on the Day of Atonement by Shem the son of Noah, "and every year the Holy One, blessed be He, looks upon the blood of the covenant of our patriarch Abraham's circumcision and forgives all our sins" (PdRE 29). Circumcision was one of the ten trials wherewith Abraham was tried (see later) and by virtue of it he sits at the gate of hell and does not permit the circumcised to enter (Gen. R. 48:8). The phrase, "entry into the covenant of Abraham our father," used to this day for the ceremony of circumcision, is already found in the Damascus Document 12:11 (ed. Ch. Rabin, *Zadokite Documents* (1958²), 60–61). According to an early tradition Abraham underwent ten trials (Avot 5:3) of which different lists are given in the Midrashim (ARN 33:2; Mid. Ps. to 18:25; 98; PdRE 26). In answer to the sectarians who sought thus to prove the weakness of Abraham's faith, the sages emphasized that it is only the righteous, who are certain to pass the test, who are tried (Gen. R. 55:1–2). "Lovingkindness is spread abroad" (Gen. R. 60:2) and the world and all therein are preserved because of Abraham's merit. The manna (Tanḥ. Buber, Ex. 34), victory in war (Gen. R. 39:16; Esth. R. 7:13), and gen-

eral forgiveness of Israel's sins (Song R. 4:6) are ascribed to his merit. The dramatic description of Abraham's appeal to save the people of Sodom (Gen. 18:23–33) is given a new dimension in the Midrash, which compares his arguments with God to those of Job (Gen. R. 49:9). According to this Abraham employed a "cleaner" language than did Job (*ibid.*).

In this connection the Midrash emphasizes the extreme contrast between the basic hospitality of Abraham and the spurious "hospitality" of the people of Sodom (Ag. Ber. 25). It is of interest to note that the Akedah is regarded as more of a trial of Abraham than of Isaac. In a desire to compare the trial of Abraham with that of Job, the *aggadah* assigns to Satan a role in the drama of Abraham as well (Sanh. 89b). The disciples of Abraham have "a benign eye, a humble spirit and a lowly soul" (Avot 5:19). Abraham however is not regarded as beyond criticism. The Talmud states that "Abraham our father was punished and his descendants enslaved in Egypt" because he pressed scholars into military service (based on Gen. 14:14), went too far in testing God, and prevented men from "entering beneath the wings of the Divine Presence" (based on Gen. 14:21; Ned. 32a). Moreover, Abraham hesitated to circumcise himself, whereupon Mamre rebuked and encouraged him (Gen. R. 42:8). In a biting comment, Rava denied Abraham the right to intercede on behalf of his people: In time to come Israel will ask of God: "To whom shall we go – to Abraham to whom Thou didst say, 'Know of a surety that thy seed be a stranger in a land that is not theirs, and shall serve them; and they shall afflict them...' and yet he did not plead for mercy for us?" (Shab. 89b).

The prevailing Hellenistic outlook influenced the description of Abraham in the Apocrypha. He is the founder of a city and a legislator, the two principal functions of a great leader according to the Hellenistic concept, and his wisdom is described in extravagant terms. According to the Apocrypha his recognition of God stemmed from his knowledge of astronomy which he taught to the great men of his generation. Hence there developed the idea that Abraham was an expert in many and varied spheres. The Book of Jubilees even declares that he instructed men in the art of improved plowing, so as to conceal the seeds from the ravens (11: 18–24). His Babylonian origin is emphasized in conformity with the contemporary outlook which regarded that country as the cradle of mysticism. On the basis of Genesis 17:5 Abraham was deemed to be the progenitor of the Spartans too (I Macc. 12:20–22; II Macc. 5:9). The Testament of *Abraham and the Apocalypse of *Abraham are devoted to him. Philo deals with him in his *De Migratione Abrahami*, while extracts from Hellenistic Jewish writers about him have been preserved by Eusebius. In IV Macc. 14:20; 15:28 Abraham typifies the ability to withstand oppression. The background of this description of Abraham was the persecution of the Jews of Alexandria at that time.

[Israel Moses Ta-Shma]

In Jewish Philosophy

Over the generations, Jewish thinkers, from Philo Judaeus of Alexandria to Joseph *Soloveitchik and Yeshayahu *Leibowitz,

have regarded Abraham as the archetypal believer, in accordance with the image of Abraham in the Hebrew Bible and Midrash: his origins in pagan environs (Josh. 24:2); the testimony of Genesis 15:6 that Abraham "believed in the Lord", and Abraham's absolute obedience to divine commandments, beginning with his leaving his homeland (Gen. 12:1) and culminating in his binding of his son Isaac (Gen. 22:2; see **Akedah*). In addition to this biblical image of Abraham, Jewish philosophers found in rabbinic Midrashim views of Abraham according to which he smashed the prevalent idols and came to believe in the one God (Gen. R. 38); Genesis 12:5 ("and the persons he had acquired in Haran") was interpreted to mean people Abraham converted (Gen. R. 39:14; cf. Targum Onkelos and Rashi to Gen. 12:5); and Genesis 34:12 ("He took him outside and said: Look at the sky") was understood as meaning that Abraham no longer had anything to do with astrology.

Eventually two paradigms evolved, in which the image of Abraham came to reflect two basic approaches to Jewish philosophy. According to the first school of thought, in which religion was understood rationally, Abraham was seen as a philosopher whose faith in God was the conclusion of scientific reasoning. According to the other school of thought, Abraham was seen as a believer whose faith and experience of divine revelation transcended his earlier philosophical or scientific speculation.

The first view of Abraham as a philosopher is found in Hellenistic Jewish literature. *Philo Judaeus of Alexandria described Abraham as an autodidact philosopher who concluded that God exists. Philo interpreted Abraham's wanderings and wars allegorically as a process of coming to know God (*De Abrahamo* 68). Philo's younger contemporary, the historian *Josephus Flavius, similarly attributed to Abraham the spreading of monotheism after he had rationally deduced the existence of God who cares providentially for human welfare (*Antiquities* 1, 7:155–56) and who had instructed the Egyptians in the ancient Chaldean sciences, such as arithmetic and astronomy, which were later transmitted to the Greeks (*Antiquities*, 167–68).

This view of Abraham as a philosopher is also found in medieval Jewish thought. *Maimonides characterized Abraham as a natural philosopher who independently articulated the Aristotelian cosmological proof of an incorporeal unmoved mover of the heavenly sphere. Paradoxically, for Maimonides, in *Judah Halevi's famous phrase, the "God of Abraham" effectively was identified with the "God of Aristotle." During his wanderings from Mesopotamia to Canaan, Abraham then spread his concept of a transcendent God (Yad, Avodah Zarah 1:3; *Guide of the Perplexed* 3:29), and became "the father of the whole world by teaching them faith" (*Responsa*, ed. Blau, 293). Only Moses, "the father of all prophets" (Commentary on Mishnah Avot 4:4; *Guide of the Perplexed* 3:54) was of a higher rank than Abraham (*Guide* 2:45). It should be noted that, in Maimonides' view, prophecy itself was understood to be a thoroughly rational phenome-

non (Commentary on Mishnah, Introduction to Sanhedrin ch. 10, sixth principle; see *Prophecy). Nevertheless, Maimonides states that Abraham and Moses prophetically grasped the supranatural understanding of creation *ex nihilo* and thus differed from the Aristotelian philosophic belief in the world's eternity (Guide 2:13, 17, 23).

The Hellenistic and medieval Jewish view of Abraham as philosopher is also found in modern Jewish thought. Nachman *Krochmal's *Guide of the Perplexed of the Time* pictures Abraham as a philosopher who deduced the teleological proof from design of God's existence and as the first monotheist who affirmed the "Absolute Spirit."

The other school of thought, which identifies Abraham as the first believer, is most clearly enunciated by *Judah Halevi, whose *Kuzari* (4:16) juxtaposes "the God of Abraham" (identified with the *Tetragrammaton) with "the God of Aristotle" (identified with the name *elohim*). "The God of Abraham" is the personal God of the Bible, who is loved and known through the direct experience called "taste" (Arab. *dhauq*; Heb. *ta'am*), whereas the impersonal "God of Aristotle," who is indifferent to the world and to human affairs, is known through rational speculation (Arab. *qiyas*; Heb. *hekesheh, hakashah*). In Halevi's view, Abraham himself underwent a radical transformation in his life: after composing the *Sefer *Yezirah* in his early years as a philosopher, Abraham merited divine revelation and true faith, as a consequence of which he was prepared to obey any divine commandment (*Kuzari* 4:24–27). Halevi thus partially accepts the rationalist view of Abraham as a philosopher, but it was as a prophet, receiving divine revelation, and not as a natural philosopher, that Abraham attained his spiritual greatness.

Following Halevi, Isaac *Arama argued that philosophy and faith are unrelated. Philosophers know what can be demonstrated and deny whatever cannot be demonstrated, but reject the concept of "faith" (*Hazut Kashah* 3). Arama's works describe in detail the gradual progression of Abraham's faith, beginning with his transition from idolatry to a scientific-philosophic conclusion regarding the existence of one God (*Akedat Yizhak* 16), which in turn led to practical application in loving *imitatio Dei*. Abraham's spiritual progression culminated in his religious faith in reward and punishment and in his fear of God, which were realized in his binding of his son Isaac as an expression of his absolute obedience to God (*Hazut Kashah* 3).

In the 20th century, Joseph Soloveitchik's *Lonely Man of Faith* (1965) presents a view of Abraham as dissatisfied with his early Mesopotamian contemplation of remote and alienating skies, which had led him to conclude that there is one God. As he progressed, Abraham needed personal revelation. In contrast with the view of Halevi and Arama, according to which Abraham passed from an earlier philosophic or scientific contemplative stage to prophetic receiving of divine revelation, or Soloveitchik's understanding of Abraham as undergoing a personal experience of revelation, Yeshayahu Leibowitz describes Abraham as reaching his faith as a result

of a voluntary, religious decision and not as the conclusion of rational contemplation. Abraham, in Leibowitz's view, represents "faith for its own sake," namely an unreasoned obedience to the divine commandment, without any human benefit or expectation of reward.

Several Jewish thinkers have also dealt with Abraham's personality, including judging his questionable behavior in Egypt (Gen. 12) and Gerar (Gen. 20), when, fearing that he might be killed, he presented his wife Sarah as his sister. *Saadia Gaon's *Book of Beliefs and Opinions* deals with the charge that Abraham lied, and justifies his behavior by suggesting that Abraham phrased his statement ambivalently, since "sister" could mean any relative, thus permitting his words to be interpreted as if they were true. Conversely, *Nahmanides did not hesitate to criticize Abraham's behavior, not so much for his misleading words but for thereby leading the people to great sin and for causing his "righteous wife" to stumble (Commentary to Gen. 12:10, 20:12). Abraham's sin resulted from his insufficient trust in God's assistance. Isaac Arama's presentation (discussed above) of Abraham's gradual spiritual progress and the development of his personality attributed his behavior in these incidents to an early stage, when Abraham had not yet attained perfect faith in divine providence and utter trust in divine assistance (*Binding of Isaac* 16).

[Hannah Kasher (2nd ed.)]

In Christian Tradition

Next to Moses, Abraham is the Old Testament figure most frequently referred to in the New Testament, being mentioned 72 times. The Evangelists emphasize the physical descent of Jesus, from Abraham through David (Matt. 1:1, 2–17; Luke 3:34), but Christian tradition considers Abraham essentially in the spiritual sense as the father of all believers destined to inherit the divine promises. According to Paul (Rom. 4; Gal. 3:7–9), to the authors of the Epistle of James (2:21–23) and the Epistle to the Hebrews (11:8–10), Abraham, because of his "faith" (cf. Gen. 15:6, and see above), became the repository of the divine promises through whose seed all nations of the earth would ultimately be blessed (cf. Gen. 12:2–4). Hence all Christians, through their faith in the Messiah, are the children of Abraham to the extent that Abraham's righteousness because of his faith (and not because of his belief in the Law) is imparted to all believers in Jesus (Rom. 4:13–25). The *Church Fathers interpret the figure of Abraham in moral and typological terms. They emphasize his obedience to God in leaving his homeland (Ambrose), thus prefiguring the Apostles' following of Jesus (Augustine). His submission to God's will in all trials, even to the point of being prepared to sacrifice his son (see **Akedah*) has been taken as a prefiguration of the death of Jesus. The New Testament mentions once "Abraham's bosom" (Luke 16:22) – a rabbinic term referring to the place of repose of the righteous in the hereafter. In the writings of *Luther and of the 19th-century philosopher S. Kierkegaard, Abraham figures as the paradigm of the man of faith whose total commitment to God is based not on reason but on pure faith.

In Islamic Tradition

“The [book] leaves of Abraham” are mentioned, together with those of Moses, in two of the older suras (87:19; 53:37) of the Koran. This indicates that Abraham was known to Muhammad as one of the fathers of the monotheistic belief from the beginning of the latter’s career; however, Muhammad must have learned that Abraham did not promulgate a book. When Muhammad began to fill his suras with stories of the prophets, Abraham received a large share, mainly on the basis of material drawn from talmudic legends. Abraham, by his own reasoning, recognized that his Creator was God and not a shining star, the moon, or the sun. He smashed the idols of his father, was thrown into a furnace, was miraculously saved, and migrated to the Holy Land. Though long childless, he believed in God’s promise of a son and, when a son was born to him, he was prepared to sacrifice him at God’s command. It is remarkable that Ishmael, later so prominent in the Koran, does not appear in any connection with his father during the middle Meccan period, e.g., Sura 29:26, “We [God] gave him [Abraham] Isaac and Jacob, and bestowed on his posterity the gift of prophecy and the book.” Also, 11:24, “We brought her [Sarah] the good tidings of Isaac and, after Isaac, Jacob” (cf. similar statements in 37:112–3 and 21:72). During this period, Ishmael is not treated as an individual in a story, but is merely mentioned as a name in a series of prophets and saints, together with such biblical personalities as Aaron, Job, or Elisha, i.e., far removed from Abraham. Just as there is no connection between Abraham and Ishmael, so there is none between Abraham and the building of the Kaaba, the sanctuary of Muhammad’s native city, until late in Muhammad’s prophetic career (e.g., Sura 2:118ff.).

There is also little doubt that, in one form or another, he heard the story of Abraham as the founder of the Holy Temple of Jerusalem, as told in the Book of Jubilees (22:23–4). The story goes back to 11 Chronicles 3:1, according to which Solomon built the Temple on the same Mount of Moriah on which Abraham was to sacrifice Isaac (Gen. 22:2). The Book of Jubilees elaborates the story and lets Abraham say that he has built this house in order to put his name on it in the country which God has given to him and to his posterity, and that it will be given to him (Jacob) and to his posterity forever. With the aid of the new material Muhammad constructed the ingenious theory that Abraham built the Kaaba together with his son Ishmael (2:121), father of the Arabs, and thus founded the religion of Islam, which he, Muhammad, promulgated among his own people. The very word Islam and the idea contained in it, namely that of complete dedication to God, is connected with the story of Abraham, e.g., Sura 2:125, “When God said to him [Abraham], ‘dedicate yourself to God [*aslim*],’ he said, ‘I dedicate myself to the Lord of the Worlds.’” Or (22:77): “This is the religion of your father Abraham. He called you *muslimin*,” i.e., those who dedicate themselves to God. This expression goes back to Genesis 17:1 in the version of Targum *Onkelos, where Abraham is admonished by God to become *shelim*, and the subsequent definition of a proselyte as one who dedicates

himself to his Creator (*hishlim azmo la-bore*; cf. Goldziher, in: M. Steinschneider, *Polemische und apologetische Literatur in arabischer Sprache* (1877), 266, n. 56). Muhammad emphatically states that Abraham was neither a Jew nor a Christian (Sura 2:140/134; 3:6760); this new knowledge did not lead him back to his original primitive universalism, but, on the contrary, made Islam, the religion of Abraham, father of the Arabs, exclusive, the “best religion” (3:110/106), prior in time, and therefore in quality, to all others.

The koranic story of Abraham, which contains many rabbinical legends, is fully covered by H. Speyer in *Die biblischen Erzählungen im Qoran* (1961, pp. 120–86; see also Moubarac in *bibl.*). The enormous expansion of these stories in Islamic religious, historical, and narrative literature has been researched by four generations of Jewish scholars, beginning with A. *Geiger (*Was hat Mohammed aus dem Judenthume aufgenommen*, 1833) up to B. Heller (especially in *EJ*, and in *EIS*², s.v. *Ibrāhīm*). These researches show that the legends had been spread in Arabia in very early times. *Umayya ibn Abī al-Salt, Muhammad’s contemporary and rival, also knew the tales about Abraham.

[Shelomo Dov Goitein]

In Medieval Hebrew Literature

The various legends about Abraham scattered in midrashic literature formed the basis from which medieval Hebrew writers tried to construct a coherent story of his birth, his youth, and his recognition of the one God. The medieval story was written in a few versions. Three stories, published by A. *Jellinek in his *Beit ha-Midrash* (one long and detailed version and two short legends, see bibliography), are replete with motifs and elements which are not midrashic, but probably originated with the medieval authors. Abraham’s recognition of the existence of only one God, which made him the first monotheist, and Abraham as a martyr, are the two principal recurring motifs. In the narratives centered around the first motif, Abraham was left in a cave immediately after birth because Nimrod, the god-king of Babylonia, who had had an astrological warning that a child would be born that year who would dethrone him, decreed that all male children be killed. In the cave the angel *Gabriel nursed Abraham, who within a few days could already walk and talk. Upon his return to his father’s house, he began to spread monotheistic belief.

In the medieval work *Sefer ha-Yashar*, which renders the biblical stories in a medieval style (see *Fiction: The Retelling of Bible Stories), the story of Abraham, told in detail, is based both upon midrashic and medieval literatures, to which the anonymous author added details of his own. In one of the stories about Abraham known in the Middle Ages (the earliest version is found in 12th-century sources), Abraham in his youth went to study with Shem, the son of Noah. Together they made a *golem*, that is, a person out of earth and water who miraculously came to life. Such stories were later told about the prophet *Jeremiah and *Ben Sira, who claimed to be his grandson. This *golem* story is undoubtedly connected with an-

other medieval belief about Abraham, mainly that he was the author of *Sefer Yezirah* ("Book of Creation"), one of the first cosmological writings in Hebrew, which was extensively used by Jewish mystics who saw it as a revelation of the mystical way in which the heavenly and earthly worlds were created. It was believed that proper use of the knowledge in *Sefer Yezirah* would also enable the mystics to create a *golem*, and that the work contained the process of reasoning that Abraham followed to establish the unity of God. To medieval philosophers and mystics, Abraham had been not only a person, but also a symbol. In the controversy that raged around the study of philosophy in Spain and in Provence at the beginning of the 14th century, the philosophers were accused of interpreting the story of Abraham and Sarah allegorically, through seeing the figures of Abraham and Sarah as personifications of the relationship between matter and form (according to Aristotelian philosophy). The kabbalists on the other hand, saw Abraham as a personification of *Hesed* ("loving-kindness"), the fourth of the Ten **Sefirot* (see **Kabbalah*).

[Joseph Dan]

In the Arts

Early literary treatment of episodes in the life of Abraham in addition to the sacrifice of Isaac (see **Akedah*) have been found in medieval English miracle plays, such as the *Histories of Lot and Abraham*, and in the 15th-century French *Mistere du Viel Testament*, which deals with Abraham's complete life. The outstanding Renaissance work on the theme is one of a series of Italian religious dramas, the *Rappresentazione de Abram e di Sara sua moglie* (1556). The episode involving Hagar has also inspired some plays, notably *Hagar dans le desert* (1781) by the French Comtesse de Genlis, and a Dutch drama *Hagar* (1848) by the convert Isaac **da Costa*, who saw in Hagar's return to Abraham's tent Islam's ultimate reconciliation with Christianity. The outstanding Jewish work of fiction based on the theme is *Yesod Olam* ("Foundation of the World") by Moses ben Mordecai **Zacuto*. Based on midrashic sources, this play, dramatically insubstantial though it is, is significant by reason of its being one of the earliest plays to be written in Hebrew.

The story of Abraham has inspired greater creative endeavor in the pictorial arts. Scenes from the patriarch's life have been illustrated in paintings, sculpture, manuscript illuminations, and mosaics. Usually represented as a white-bearded old man, armed with a knife, Abraham was a favorite subject not only for Christian artists (as a prefiguration of Jesus), but also for Moslems. Two rare examples of cyclic treatment are the 12th-century mosaics in the cathedral of San Marco, Venice, and a set of 16th-century Flemish tapestries by Bernard van Orley. Varying combinations of important episodes are found in fifth-century mosaics in the church of Santa Maria Maggiore, Rome; in the sixth-century manuscript known as the Vienna Genesis; in the sixth-century mosaics in Ravenna; in the bronze doors of San Zeno, Verona, the altar of Verdun, and the frescoes of Saint-Savin, Poitou (all 12th

century); and in Ghiberti's bronze doors at the Florence baptistry (15th century).

Episodes particularly favored by Christian artists were Abraham's encounter with Melchizedek, the visit of the three angels, and the *Akedah*. In the first, stress was laid on the dual significance of the scene, Abraham's offering of tithes to the priest-king symbolizing the presentation of gifts to the infant Jesus by the three Magi, and Melchizedek's offering of bread and wine to Abraham prefiguring the Eucharist. The Melchizedek episode appears in the works at Rome, Ravenna, and Poitou referred to above and in the 13th-century portal of Amiens cathedral, and it inspired Tintoretto's painting for the Scuola di San Rocco, Venice (16th century). Melchizedek is usually depicted wearing a crown and bearing a chalice, while Abraham is often shown as a knight in armor. The visit of the angels has been variously interpreted by Christian artists. In the eastern church the angels were seen as a prediction of the Trinity and there are many icons on this theme, notably the delicate painting by Andrei Rublev (1422), now in Moscow. In western countries, their announcement of the impending birth of Isaac was thought to prefigure the Annunciation, and this traditional medieval reading inspires the Rome mosaics, the Verdun altar, the doors of San Zeno, and the 12th-century Psalter of Saint Louis (Paris). From the 17th century onward this incident was taken as the archetype of hospitality, inspiring such post-Renaissance paintings as those of **Rembrandt* (1636, now in Leningrad), Murillo, and the Tiepolos. The dismissal of Hagar – whom the Church took to prefigure the superseded "Old Law," Sarah symbolizing the New – was popular in the 17th century particularly with Dutch artists, mainly because it offered opportunities for domestic and emotionally dramatic scenes. The episode was thus exploited by Rubens, Rembrandt, Nicolaes Maes, and Jan Steen. A French artist of a later period who treated the same subject was Corot. A parable in the Gospel of Luke (16:22) was responsible for a quaint treatment of Abraham in representations of the Last Judgment on Gothic cathedrals such as Paris, Rheims, Bourges, and Bamberg. Here the saved souls are shown being gathered into "Abraham's bosom." Among modern Jewish artists, Chagall, who was particularly fascinated by the life of Abraham, painted many scenes from the patriarch's life story, including the circumcision of Isaac.

The most popular representation of Abraham in Jewish art was that showing the *Akedah*. This appears on the western wall of the **Dura-Europos* synagogue of the third century C.E. This theme lent itself to representations in the continuous or narrative style, in which a sequence of events is represented without frame or formal interruptions, as in the mosaic floor of the **Bet Alfa* (sixth century C.E.) synagogue. Other popular themes were the appearance of the three angels to Abraham and his condemnation to death through fire by Nimrod. An outstanding example of the latter is found in a British Museum illuminated manuscript (Ms. Add. 27210) where Abraham is rescued by two figures, not found in other illustrations. An elderly bearded male with outstretched arms is seen in the

foreground, while in the background is an angel with clearly defined wings. It is improbable that both these figures represent angels as they appear of different age and complexion. The older figure may therefore represent God, a fact which would suggest a Christian illuminator.

[Helen Rosenau]

The story of Abraham provided the basis for several musical compositions from the late 18th century onward. The Hagar and Ishmael episode was the theme of oratorios, notably Scarlatti's *Agar et Ismaele esiliati* (1683) and Giovanni Battista Vitali's *Agar* (1671). Of the few works on the sojourn in Egypt, the oratorio *Sara in Egitto* (1708) probably holds the record among "pasticcios" – works in which several composers collaborated or were used – since the setting of the libretto was entrusted to no fewer than 24 composers. Schubert's first song, written in March 1811, was "*Hagars Klage*." The only opera on this subtheme, *Agar au désert* (1806) by Etienne Nicolas Méhul, was never performed. Michael *Gnessin wrote an opera on Abraham's youth, during his visit to Erez Israel in 1922. Prominent among the more specifically Jewish compositions are the Ladino (Judeo-Spanish) romances, *Cuando el Rey Nimrod*, *Abram Abinu*, and *En primero alabaremos*, which reflect the legend of Abraham's birth found in the *Sefer ha-Yashar*; some also mention the *Akedah*. The romanza *El Dios de cielo de Abraham* used to be sung in Tetuan, Morocco.

ABRAHAM, family of U.S. merchants. **ABRAHAM ABRAHAM** (1843–1911), son of a Bavarian immigrant, and Joseph Wechsler, himself an immigrant, established a dry goods store in Brooklyn, New York, in 1865. It became Brooklyn's largest department store, with six branches in metropolitan New York. On Wechsler's retirement in 1893 Abraham and the brothers Isidore and Nathan *Straus took over the firm, which they named Abraham & Straus. However, the *Straus' main interest remained focused on Macy's. Abraham's son-in-law, SIMON F. ROTHSCHILD (1861–1936), succeeded to the presidency of A. & S. in 1925, and from 1930 to 1936 was chairman of its board. Another son-in-law, CHARLES EDUARD BLUM (1863–1946), was president from 1930 to 1937 and board chairman from 1937 to 1946. In 1937 WALTER N. ROTHSCHILD (1892–1960), a grandson of Abraham Abraham and son of Simon F. Rothschild, became A. & S. president and served as board chairman from 1955 to 1960. Subsequently A. & S. became a unit in the chain known as Federated Department Stores, Inc. Abraham's great-grandson, and son of Walter N. Rothschild, WALTER N. ROTHSCHILD JR. (1920–2003), was president of A. & S. from 1963 to 1969. He served as chairman of the New York Urban Coalition from 1970 to 1973 and as chairman of the National Urban Coalition from 1973 to 1977. The family participated actively through all the generations in general and Jewish philanthropies but became remote from Jewish life.

[Hanns G. Reissner]

ABRAHAM, APOCALYPSE OF, a work of the second century C.E., extant only in the Slavonic version of a Greek translation of a presumably Hebrew original. Several variant forms of the Slavonic exist, including reworked versions in the medieval Eastern church sacred histories known as the *Palaiai*. The late Christian editing gives it a flavor which is strange to the Jewish reader. But only one interpolation can be identified as Christian and that not with certainty. Although translations of the book have been accessible to western scholars for 50 years, it is little known.

The book opens with a legend of Abraham's discovery of God (ch. 1–8), a theme well known from the *aggadah* and early Christian literature. This tells of Abraham's tragicomic adventures as an assistant in his father's business of making and selling idols, and culminates in his realization and recognition of the Creator. The legend concludes with a voice urging Abraham to leave his father's house, which is immediately destroyed by lightning.

A further heavenly call commands him to fast for 40 days and to offer the sacrifice described in Genesis 15:9. This leads to the main visionary section of the book. The angel Iael (Mss. Ioal, Iloel, etc.) appears (ch. 10–11) and leads him

to the place of the sacrifice; the victims appear miraculously (ch. 12). The vulture (Gen. 15:11), later unmasked as Azazel, tells Abraham to flee the “holy heights” and to leave the angel (ch. 13). At the angel’s bidding, Abraham refuses to listen to Azazel (ch. 14). The furnace (Gen. 15:17) appears, and angels carry up the sacrificial victims while the wings of the undivided dove serve to carry Abraham and his angelic guide to heaven (ch. 15).

Trembling, Abraham sees the Divine Glory (ch. 16), praises God, and prays for instruction (ch. 17). He is then enabled to contemplate the four-faced cherubim (ch. 18) and bidden to look down on the several lower heavens, which open under him. He observes the angels of the seventh and sixth heavens, and the stars in the fifth (ch. 19–20). The lower heavens remain undescribed, for he next sees an overall picture of the world (ch. 21). He also sees a great multitude of people, some on the right and some on the left. This is “the Creation.” Those on the left are all the generations of mankind, those on the right, the chosen people (ch. 22). Next he is shown several scenes such as the Fall, the Temple, and its destruction (ch. 23–27), which form a condensed history of the world. As these are explained to him, he dares to ask some questions, such as “Why does God will (or permit) evil?” and “How long shall the suffering of the elect people last?” The rather obscure answers appear to contain an assertion of human free will (ch. 24). A computation of “eons” and “hours” is briefly sketched (ch. 28).

Finally (ch. 29) “a man” appears. He is worshipped by the heathen of the left side: from the right some revile him, others worship him. Azazel, who is contradictorily described both as coming from the left side and as a descendant of Abraham, also worships him. The “man’s” function is “the remission for (?) the heathen in the last days,” at which time the chosen people shall be tried by him. Although his description is followed by an eschatological prediction, he does not seem to be an instrument of the final deliverance. Abraham’s vision ends with a statement about the “eon of righteousness” (ch. 29).

Back on earth he prays for further instruction, which he receives in the form of another prediction of the last things, including ten chastisements prepared for the heathen (ch. 30) and the salvation of the people at the hands of the elect one (ch. 31). There follows a short prediction of the Egyptian servitude and the deliverance – a paraphrase of Genesis 15:13–14 (ch. 32). This serves as the conclusion of the book, which thus fits neatly into the framework of a Midrash on Genesis 15.

The Jewish origin of the book cannot be doubted. The author’s main concern, the nation’s destiny, is discernible even in the peculiar passage about “the man.” The most obvious and perhaps the correct explanation of this passage is to declare it a late Christian interpolation, yet “the man” does not fit the medieval Christian concept of Jesus. His function is not clearly messianic. This problematic passage therefore may have originated in some Judeo-Christian sect, which saw Jesus as precursor of the Messiah, or it may be Jewish, badly rewritten

by an early Christian editor. Perhaps it reflects a Jewish view of Jesus as an apostle to the heathen, an explanation which would make it unique, and indeed startling.

The Apocalypse of Abraham is perhaps the last important product of the Apocalyptic movement. Possibly influenced by IV *Ezra, it reflects the plight of the Jews as the “people despised by the nations.” However, the destruction of the Temple is not fresh in the author’s memory. The characteristic, elaborate pseudepigraphic framework is missing and not all the extant recensions present it as a first-person account by Abraham. Within the tight framework of a simple version, the book successfully presents several important apocalyptic themes, including speculation about a transcendent God presiding over the heavens, a view of history as a sequence of periods, and an attempt to “compute the date of the end.” Dualistic and deterministic tendencies are clearly present, but not strongly developed. There is, indeed, no special emphasis on any point of doctrine. The author, aiming at a re-statement of ideas developed by his predecessors, is not too eager to break fresh ground. This impression, however, must be qualified by the possibility that the book has been abbreviated or badly edited, although it has survived as a remarkably complete literary unit.

[Jacob Licht]

ABRAHAM, DAVID (1909–), Indian motion picture actor. Born in Bombay of a Bene Israel family, he used David as his professional name. Though trained in law, he took up acting in 1937 and subsequently appeared in over 100 Hindustani films, becoming widely known for his comedy roles. He toured the U.S. in 1952 as member of the Indian Film Delegation. Also active in the Indian Olympic Association, he was weight-lifting referee at the Olympic Games, Helsinki, 1952, and Fourth Maccabiah, Israel, 1953.

ABRAHAM, GERALD (1904–1988), British musicologist. Abraham was born in Newport, Isle of Wight. Although largely self-taught in the field, he became a highly respected authority on Russian music, learning Russian and Slavonic languages in the course of his work; he published three books devoted to Russian music. He also wrote *A Hundred Years of Music* (1938) and *Chopin’s Musical Style* (1939), a small, serious scholarly work. He was employed by the BBC in various capacities, including assistant controller of music during 1935–47 and 1962–67.

Abraham was the first professor of music at Liverpool University, teaching there from 1947 to 1962, exposing his students to Russian music on an academic level. He was president of the Royal Music Association from 1969 to 1974, becoming a Commander of the Order of the British Empire in the latter year.

Among his publications were a collection of his essays, *Slavonic and Romantic Music* (1968), and the *Concise Oxford History of Music* (1979), in which the broad range of his interests was fully displayed. He edited monographs or symposia on Schubert, Schumann, Sibelius, Handel, Tchaikovsky, Borodin, and others, as well as the *New Oxford History of Music* (1955–86); he also served as chairman of the editorial board of the *New Grove Dictionary of Music and Musicians*.

ABRAHAM, KARL (1877–1925), German psychoanalyst. Born in Bremen to religious parents, Abraham was Germany's first psychoanalyst and a major figure in both the organizational and scientific development of psychoanalysis. Abraham received his early clinical experience at a mental hospital in Dalldorf. He became acquainted with Freud's work through Bleuler and Jung in Zurich, and first met Freud in 1907. A deep friendship and professional alliance bound the two men until Abraham's death. Abraham's work covered almost every field of psychoanalysis, but his most significant contributions through pioneering studies were in the fields of libidinal development, character formation, the psychoses, and addiction. He investigated the effects of infantile sexuality and family relationships on the child's mental development, and drew a correlation between characteristic mental disorders and the problems at different stages of the child's mental development. Toward the end of his life, Abraham concentrated almost exclusively on manic-depressive psychosis, where he paralleled and deepened Freud's work. This work is written up in his paper of 1911 translated in 1927 as "Notes on the Psychoanalytic Investigation and Treatment of Manic-Depressive Insanity and Allied Conditions." Abraham related melancholia to regression to the oral level and to the loss of love and its patterning after mourning. Schizophrenia, too, is a regression from a traumatic situation to an early infantile level of development. Abraham was president of the Berlin Psychoanalytical Society from its founding until his death. He was also secretary (1922–24), and then president (1924–25), of the International Psychoanalytical Association. Most of his research work appears in his *Clinical Papers and Essays on Psychoanalysis* (1955) and his published correspondence with Freud in *A Psychoanalytic Dialogue* (1965).

ABRAHAM, MAX (1875–1922), German theoretical electro-physicist. Born in Danzig, Abraham was an assistant to the physicist Max Planck. He worked in turn at Goettingen (1900), Cambridge (England), and in the U.S. In 1909 he became professor of mechanics in Milan, but in 1915 was expelled as an enemy alien. He then served in the German army. In 1919 he was appointed professor of physics at the Technische Hoch-

schule Stuttgart. Abraham studied the dynamics of electrons, and his two-volume *Theorie der Elektrizitaet* went through eight editions between 1904 and 1930.

ABRAHAM, OTHER BOOKS OF. In addition to the Apocalypse of Abraham, extant in Slavonic, and the Testament of Abraham, preserved in a number of versions, there are several references in the literature of the first centuries of this era to works attributed to Abraham. Among the apocryphal works included in the early Christian lists attributed to Pseudo-Athanasius and Nicephorus, there is a book entitled *Abraham*. Its length is given as 300 stichoi. Similar, unclear references may be found in Apostolic Constitution 6:16 and elsewhere. More significant is Epiphanius' account (*Adversus Haereses* 38:5) of the Sethian Gnostic sect as "composing certain books in the name of great men... of Abraham, which they say to be an apocalypse and is full of all sorts of wickedness." Origen refers to a book relating a contest between good and evil angels over the salvation or perdition of Abraham's soul (*Homilies on Lk.* 35). It has been suggested that this incident may be related to the weighing of the soul, whose good and evil deeds are of equal measure, as described in *Testamentum Abraham* (A, 12f.). Yet, it must be noted that these two stories are far from identical, and Origen is probably drawing on a different Abraham book. An Arabic *Life of Abraham* is mentioned by James (*Apoc. Anecd.* 2, 81). Armenian works called *The Story of Abraham, Isaac and Mambres, The Ten Temptations of Abraham, History of Abraham, Memorial of the Patriarchs Abraham, Isaac, and Jacob* and others exist in manuscripts (e.g., Erevan 569, 717, 1425 et al.), but have never been studied.

[Michael E. Stone]

ABRAHAM, OTTO (1872–1926), ethnomusicologist. Born in Berlin, Abraham graduated in medicine at Berlin University in 1894 and thereafter dedicated himself to psychoacoustics and the physiology of music. From 1896 to 1905 he was assistant to Carl Stumpf (1868–1936) at the Berlin Institute of Psychology, and collaborated with E.M. von *Hornbostel in the establishment of the "Phonogrammarchiv" in 1900 which is known for its unique historical collections of music of the world. Abraham's work on tone perception was one of the pioneer studies in the psychology of music. His studies, mostly with Hornbostel, on the non-Western musical traditions and his suggested methods for transcribing this music put him among the founders of modern systematic ethnomusicology. Abraham introduced the first German attempt to record non-Western music. He recorded on wax cylinders a visiting Siamese court orchestra, music from South Africa and Japan, Armenian and Muslim songs, and Indian and Am-

erindian music. Between 1903 and 1906, Abraham and Hornbostel published important studies based on their tonometric measurements and transcriptions of those recorded examples. Among his articles are “Wahrnehmung kürzester Töne und Geräusche” (1898), “Studien Ueber das Tonsystem und die Musik der Japaner” (1902–3), “Phonographierte Tuerkische Melodien” (1904), “Phonographierte Indianermelodien aus Britisch-Colombia” (1906), “Zur Akustik des Knalles” (1919), and “Zur Psychologie der Tondistanz” (1926).

[Israela Stein (2nd ed.)]

ABRAHAM, SAMUEL (d. 1792), merchant in Cochin. Abraham, who was probably of Polish birth, arrived in Cochin in about 1757 and served both the Dutch and English East India Companies. Abraham chiefly traded in timber for shipbuilding and to a lesser extent in paper, rice, pepper, and iron. He advanced large loans to the Dutch and English companies. With other leading Jewish merchants, he was entrusted with confidential diplomatic missions by the Dutch governor. His house was a meeting place for local princes, dignitaries, and merchants. Abraham established the first known contact between the Jews of Cochin and those of the Western Hemisphere with a Hebrew letter to the Jewish congregation of New York (c. 1790). It was accompanied by an outline history of the Jews in Malabar.

[Walter Joseph Fischel]

ABRAHAM, TESTAMENT OF, apocryphal story of the death of Abraham. It is preserved in two Greek versions, the longer one being the more original. There are also Arabic, Coptic, Ethiopic, and Romanian versions. The book is part of an extensive literature of testaments and, in addition to the Testament of Abraham, there exist Testaments of Adam, Isaac, Jacob, the Twelve Patriarchs (sons of Jacob), Job, etc. The dependence of the book upon Jewish aggadic sources and the absence of Christian motifs with the exception of a possible influence of New Testament phraseology upon the actual wording show that the Testament of Abraham was composed by a Jew, writing in Greek, and was possibly based on a Hebrew (or Aramaic) original. The exact date of its composition is unknown. The book utilizes both Midrashim about Abraham and the *aggadah* about the death of Moses (see Assumption of *Moses). Thus, the reluctance of Abraham to accept his death from the hand of the archangel Michael is founded upon the narrative of Moses' death in Jewish sources. Finally Abraham is prepared to accept God's decision, if the angel will show him the whole universe. This wish is fulfilled and the author includes in his book interesting apocalyptic material.

The heavenly judge is Abel, the son of Adam, because God wants humanity to be judged by a man (see *Son of Man). At the end, Abraham is killed by deception on the part of the Angel of Death.

[David Flusser]

ABRAHAM ABELE BEN ABRAHAM SOLOMON (1764–1836), talmudic scholar in Lithuania. Abraham, who was known as Abele Poswoler, was a pupil of Solomon of Wilkomir. In his youth he became rabbi in Poswol (near Kovno) and in 1802 was appointed head of the Vilna *bet din*, a position which he held for 30 years. In 1835 he intervened in the dispute between the publishers of the Romm Talmud and those of the Slavuta Talmud. The Slavuta publishers had started their enterprise first and claimed that the Romm family had intruded on their domain. When the Jewry of Erez Israel was in financial straits in 1822, Abraham appealed to the wealthy Jews of Poland and Lithuania to aid the *yishuv* but the appeal was of limited success. Abraham did not publish many responsa and talmudic novellae, but some were preserved in the works of his contemporaries. Of particular interest is the fact that Abraham, although a devout Jew, gave his approbation to the *Te'udah be-Yisrael* by Isaac Baer Levinsohn, one of the leading Russian *maskilim*.

His novellae and responsa appeared in a book called *Be'er Abraham* from a manuscript with the *Be'er ba-Sadeh* commentary by Rabbi Shmuel David Movshowitz (Jerusalem Institute, Jerusalem, 1980). The book contains a commentary on tractate *Berakhot*, novellae and halakhic rulings (from different books), and 112 responsa on different subjects in the four parts of the Shulḥan Arukh.

[Yehoshua Horowitz]

ABRAHAM ABUSCH BEN ZEVI HIRSCH (1700–1769), German rabbi and halakhist. He was also called Abraham Abusch Lissa and also Abusch Frankfurter, from the towns Lissa and Frankfurt where he served as rabbi, after having been rabbi of Mezhirech. After the interregnum brought about by the departure of Jacob Joshua *Falk, the community of Frankfurt approached him to become its rabbi. The community of Lissa was reluctant to part with him and only did so after much persuasion on the part of the communal leaders of Frankfurt. His pious and meek disposition and the stories of his charitable deeds became legendary. The name of Abraham Abusch is associated with a *cause célèbre*, “the *Cleves get”

(divorce; see *Lipschuetz, Israel). Although several renowned rabbis approved the divorce Abraham persisted in his opinion that it was invalid. The members of his community supported him by enacting a regulation barring from the Frankfurt rabbinates anyone who had approved the divorce. For some time, he also held the important position of *parnas* or president of the “*Councils of the Lands.” Although he was renowned as a talmudic scholar, few of his writings have survived. Several of his works appeared under the title *Birkat Avraham*: (1) novellae on five tractates of *Seder Mo’ed* (1881); (2) commentary on the Passover *Haggadah* (1887), with a supplement, *Maḥazeh Avraham* (1908); (3) a volume also known as *Kaneh Avraham* (1884), kabbalistic commentary on Genesis; (4) a commentary on *Berakhot* (1930); and (5) on *Ruth* (1934). He also wrote *Darkhei ha-Ḥayyim*, on remedies, medicines, and charms (1912). His ethical will was also published (1806).

[Alexander Tobias]

°**ABRAHAM A SANCTA CLARA** (c. 1644–1709), Augustinian friar and anti-Jewish propagandist; court preacher in Vienna from 1677. His numerous sermons and tracts violently attacked the Jews along the traditional lines of popular anti-Jewish hatemongering. He charged the Jews with causing the plague by witchcraft, denounced them along with the devil as Christianity’s worst enemy, and gave currency to the *host desecration libel. The coarse language and style of his sermons and tracts influenced the Viennese brand of *antisemitism (and its disseminators such as S. *Brunner, J. *Deckert, and K. *Lueger) and of *National Socialism.

Jahrhunderts* (1905), index. **ADD. BIBLIOGRAPHY:** F. Schillinger, *Abraham a Sancta Clara: pastorale et discours politique dans l’Autriche du xvii^e siècle* (1993).

ABRAHAM BAR ḤIYYA (Ḥayya; d. c. 1136), Spanish philosopher, mathematician, astronomer, and translator. Little is known about Abraham’s life apart from the fact that he lived in Barcelona. Two titles by which he was known provide clues to his public activity. One was *Savasorda*, a corruption of the Arabic *ṣāḥib-al-shurṭa*, originally meaning “captain of the bodyguard,” but by Abraham’s time denoting a functionary whose duties were both judiciary and civil, the exact scope of which can only be surmised. A court position was not unique for a Jew in Christian Spain at that time, and Abraham would have been useful for his mathematical and astronomical knowledge, his skill in surveying, and his linguistic abilities (he states in his writings that from his early youth he “gained honor before princes and royalty”). The other title, *nasi*, was not uncommon in Spanish Jewry and although in this instance also the exact significance is undetermined, it appears to denote an office within the Jewish community exercising a judiciary

function with the power of imposing punishments and regulating communal taxation.

The only incident known from his life is a clash with his distinguished contemporary in Barcelona, *Judah b. Barzilai al-Bargeloni. This occurred at a wedding which Abraham insisted on postponing because the stars were not propitious, whereas Judah wished to proceed with the ceremony as he held astrological beliefs to be “a custom of the Chaldeans.” At some period of his life Abraham visited France – perhaps Provence – which at that time was ruled by the count of Barcelona. It appears that this visit was connected with the problems of land surveying.

The dates and places of his birth and death are unknown. A manuscript dated 1136 refers to him as “of blessed memory” but this could be a later interpolation. However, Plato of Tivoli, who cites him as a collaborator in his translations up to 1136, does not mention Abraham in connection with a translation in 1138. As there is no evidence of his having lived subsequently, it has been assumed that he died c. 1136.

Philosophy

Concentrating on cosmogony, Abraham held that all things were first created in potentiality where they could be divided into matter, form, and not-being. In order to actualize them, God removed the not-being and joined form to matter. Matter is divided into pure matter and the dregs of matter, while form is divided into closed form and open form. The first stage in the process of creation is the emanation of a light from the closed form. This closed form is too pure to combine with matter and is identified with the form of angels, souls, etc. The light shines on the open form, qualifying it to combine with matter; one part of the open form combines with the pure matter and from this juncture the firmaments are created; the other part joins the dregs, thereby creating the four elements and the beings of the corporeal world. A further emanation of light over the firmament causes that form already attached to matter to change its place – and this brings about the creation of the moving stars; while a further emanation of light touches that matter which can change its form, and from this are formed all that fly, swim, and go. Man is the summit of creation, distinguished by his rational faculty. He has free will and can choose between the right way and sinning; if he sins, he still has the possibility of repentance. The way to repentance is always open, but the reward of eternal life is only for the God-fearing and God-acknowledging. All aspects of this world are transient and the important consideration is the world to come. The saintly individual lives an ascetic life in this world in order to be rewarded in the next. By observing the Torah, Israel obtains the reward of the world to come. Just as time had a beginning, so it must have an end and this will usher in the era of salvation when the wicked will be destroyed and only Israel and any others who accept the Torah will survive. Only Israel will be resurrected – the righteous to eternal life, the wicked to eternal justice.

Although points of similarity with other medieval think-

ers are frequently discernible in Abraham's philosophical work, his writings contain an original admixture of Neoplatonic, Aristotelian, and rabbinic ideas, with original interpretations. He was sufficiently independent to reject philosophical for rabbinical theories when he deemed necessary, and his philosophy falls into no ready-made categories. He was one of the very first to write on scientific and philosophic subjects in Hebrew and many of the terms coined by him have passed into accepted Hebrew usage. His Hebrew is simple and lucid, similar in style to the later Midrashim.

Mathematical Works

Abraham was the author of the first encyclopedic work in Hebrew, *Yesodei ha-Tevunah u-Migdal ha-Emunah* ("Foundations of Understanding and Tower of Faith"). This was probably based on translations from the Arabic (it was published by Steinschneider in *Hebraetsche Bibliographie*, vol. 7, Sp. tr. by J.M. Millás Vallicrosa, 1952). Only sections have been preserved and these deal with geometry, arithmetic, optics, and music. He also wrote about mathematics in his *Hibbur ha-Meshihah ve-ha-Tishboret* ("Treatise on Mensuration and Calculation"; Sp. tr. by J.M. Millás Vallicrosa, 1931), the original object of which was to help French Jews in the measurement of their fields. This is the first Hebrew work to show that the area of a circle is πr^2 and is the first known work – after an Egyptian papyrus of the 18th century B.C.E. – to give the formula of a truncated pyramid. It was published by M. Guttmann (2 pts., 1912–13). Plato of Tivoli translated the work into Latin in 1145 as *Liber Embadorum* ("The Book of Areas") and this introduced Arabic trigonometry to the West. It was the chief source for the writings of the celebrated mathematician, Leonardo Fibonacci of Pisa.

Astronomical Works

Abraham's main astronomical work, known as *Hokhmat ha-Hizzayon*, consisted of two parts. The first part, *Zurat ha-Arez ve-Tavnit Kaddurei ha-Raki'a* ("Form of the Earth and Figure of the Celestial Spheres"), is a geography – "a short review of lands according to the seven climates" – which long remained the chief source of geographical knowledge among Jews (it was published by M. Jaffe and Jonathan b. Joseph in Offenbach, 1720; Sp. tr. by J.M. Millás Vallicrosa, 1956). The second part, *Heshbon Mahalekhot ha-Kokhavim* ("Calculation of the Courses of the Stars"; with Sp. tr. by J.M. Millás Vallicrosa, 1959), was often quoted; it incorporates a complete section on intercalation. The whole work is probably the first exposition of the Ptolemaic system in Hebrew and was the first complete textbook on astronomy in that language.

Abraham further considered problems of intercalation in his *Sefer (or Sod) ha-Ibbur* ("Book of Intercalation"), which was written in 1122 "to enable the Jews to observe the festivals on the correct dates." This work explains the principles of intercalation and shows how to calculate the Hebrew and Arabic years (publ. by H. Filipowski, London, 1851). It was often quoted by later authorities and was accepted as authoritative.

Mention should also be made of the astronomical and astrological tables compiled by Abraham which were also often quoted, although never published. They include reckonings for year-cycles, the New Moon, the Egyptian, Arabic, Roman, and Alexandrian years, etc.

Astrology and Eschatology

Another of Abraham's smaller compositions was his letter to Judah b. Barzillai al-Bargeloni, defending astrology in connection with the above-mentioned incident at the Barcelona wedding (publ. by Z. Schwarz, 1917). However, the main source of knowledge of Abraham's astrological views is to be found in *Megillat ha-Megalleh* ("Scroll of the Revealer"; publ. by A. Posnanski, 1924; Sp. tr. by J.M. Millás Vallicrosa, 1929). This is an eschatological book, the first by a European rabbi, written with the object of determining the end of time. After working out a correspondence between the seven days of Creation with seven eras of world history, Abraham came to the conclusion that redemption would come to the world in the year 1383 C.E. and resurrection in 1448. He adduces proofs from both the Bible and astrology. This work was of considerable influence, for example, on *Judah Halevi, whose theory of the transmission of the prophetic spirit derives from it, and on the kabbalists, particularly those of the German school. Most of *Abrabanel's astrological knowledge was derived from this work, parts of which were translated into Latin and French.

Knowledge of Abraham's philosophy is partly derived from this work but even more from his *Hegyon ha-Nefesh ha-Azuvah* (publ. by E. Freimann, Leipzig, 1860; Eng. tr. by G. Wigoder, "Meditation of the Sad Soul," 1969). This deals with creation, repentance, good and evil, and the saintly life. The emphasis is ethical, the approach is generally homiletical – based on the exposition of biblical passages – and it may have been designed for reading during the Ten Days of Penitence. It is less frequently quoted than Abraham's other works. A so-called "lost work" called *Geder Adam* is probably identical with *Hegyon ha-Nefesh*. Apart from his original compositions, Abraham collaborated in several of the translations made by Plato of Tivoli from Arabic to Latin. These played an important role in the transmission of Arabic scientific knowledge to Europe. There is also a translation of *De Horarum Electionibus*, a work on algebra by Ali ibn Aḥmad al-Imrānī made by Abraham; it is not known whether he did this on his own or in collaboration with Plato of Tivoli.

[Geoffrey Wigoder]

ABRAHAM BAR JACOB (c. 1669–1730), convert to Judaism who worked as a copper engraver in Amsterdam. Born in Germany, Abraham b. Jacob had been a Christian pastor in the Rhineland before converting to Judaism. He was particularly celebrated for his collaboration in the Amsterdam *Haggadah* of 1695 to which he contributed a series of engravings partly copied from the *Icones Biblicae* of Mattheus Merian of Basle and a map of Palestine with Hebrew lettering. This work set a new fashion in *Haggadot* and served as a model for more than 200 years. Abraham b. Jacob’s other works include the title pages to Joseph b. Ephraim *Caro’s *Shulḥan Arukh* (1697–98), Isaiah b. Abraham *Horowitz’s *Shenei Luḥot ha-Berit* (1698), and Joseph b. Ḥayyim Sarfati’s *Yad Yosef* (1700); an amulet for women in childbirth; and a wall calendar for 130 years with baroque illustrations. The engraving of a portrait of *hakham* Isaac *Aboab da Fonseca of Amsterdam, painted by Joseph b. Abraham, is also ascribed to him.

BIBLIOGRAPHY: Wolf, *Bibliotheca*, 3 (1727), 39; Roth, *Art*, 444, 445, 521. **ADD. BIBLIOGRAPHY:** A. Yaari, *Mehkarei Sefer* (1958), 250–51; H. Brodsky, in *Jewish Art*, 19 (1993/4), 148–57; idem, in: *Journal of the Israel Map Collectors Society*, 13 (1996) 37–43.

ABRAHAM BEN ALEXANDER KATZ OF KALISK (**Kalisz**; 1741–1810), ḥasidic leader in Poland and Erez Israel. He was a disciple of *Dov Baer of Mezhirech. According to ḥasidic tradition he first studied under *Elijah b. Solomon, the Gaon of Vilna. He joined the *Talk*, an ḥasidic conventicle whose precise nature is unknown. Abraham gave expression to the ḥasidic principle of serving God with fervor in a bizarre fashion, “turning somersaults in the streets and marketplaces” and ridiculing talmudic scholars. These exaggerated practices were among the reasons for the excommunication pronounced on the Ḥasidim by the rabbinical court of Vilna in 1772.

In 1777 Abraham immigrated to Erez Israel with the group of Ḥasidim led by *Menahem Mendel of Vitebsk. He first settled in Safed and later in Tiberias, where he spent his last years. After the death of Menahem Mendel, Abraham succeeded him as head of the ḥasidic groups in Erez Israel. His cordial relations with the founder of the Ḥabad movement, *Shneur Zalman, came to an end after the latter published his

Tanya in 1796; Abraham expressed his disillusionment with Shneur Zalman’s philosophical system, and Shneur Zalman, who was also treasurer of the fund in Russia, retaliated by stopping the flow of contributions. Abraham emphasized the importance of the ḥasidic group, independent of the authority of a *zaddik*. He believed in *dibbuk haverim*, a close association between comrades who through contemplation and self-abnegation arrive together at a state of mystical ecstasy. His sayings and letters are collected in *Ḥesed le-Avraham* (1851) and *Iggerot Kodesh* (1927).

ABRAHAM BEN ALEXANDER (Axelrad) OF COLOGNE (13th century), kabbalist. A disciple of R. *Eleazar b. Judah of Worms, he immigrated to Spain where he probably studied with the kabbalist R. Ezra. Solomon b. Abraham *Adret knew him personally in his youth, and tells of his extraordinary oratorical gifts, and the interesting material in his sermons (Responsa no. 548). Abraham wrote a treatise concerning the Tetragrammaton, *Keter Shem Tov*, in which he tried to achieve a synthesis between the mysticism of the Jewish pietists (Ḥasidim) in Germany based on combinations of letters and numbers, and the Kabbalah of the **Sefirot* (with which he had become acquainted in Provence or in Spain). His text is composed of a short summary of his system and represents a kind of cosmological symbolism that relies on the conclusion provided by Abraham *Ibn Ezra in his *Sefer ha-Shem*, as well as on the statements of the kabbalists R. Ezra and R. Azriel. The work, which is extant in numerous manuscripts, was first published independently in Amsterdam in 1810. It also appeared under the title *Ma’amar Peloni Almoni* in the collection of writings *Likkutim me-Rav Hai Gaon* (1798). A new edition was published by Jellinek (1853). In Samson b. Eliezer’s work *Barukh she-Amar* (1795), *Keter Shem Tov* is attributed to Menahem Ashkenazi, another disciple of Eleazar of Worms. Benjacob is wrong in stating that there is another work entitled *Keter Shem Tov* by Abraham consisting of a mystic commentary to Psalms, Joshua, and Judges.

[Gershon Scholem]

In one of the manuscripts found in Jerusalem, *Keter Shem Tov* is entitled *Ma’amar be-Kabbalah Nevu’it*, a “Treatise on Prophetic Kabbalah,” and this title indicates the role played by this Ashkenazi figure in transmitting certain Ashkenazi modes of thought to Barcelona, where Abraham *Abulafia’s prophetic Kabbalah made its first step.

ABRAHAM BEN AVIGDOR (d. 1542), rabbi and author. For 20 years, Abraham served as the rabbi of Prague. One of his pupils was Abraham Jaffe, the father of Mordecai *Jaffe. In 1534 Abraham and the famous *shtadlan* Joseph (Joselmann) of Rosheim framed 23 *takkanot* designed to adjudicate an inter-communal dispute in Bohemia and to restore harmony in the community. After the expulsion of the Jews from Bohemia in 1541, Abraham composed the *selihah* beginning “*Anna Elohei Avraham*,” recited in the Polish ritual on Yom Kippur. According to David *Gans, Abraham had a knowledge of “all the seven sciences.” His works included (1) glosses on the *Tur Oraḥ Hayyim* by Jacob b. Asher, published in Prague and Augsburg both in 1540; (2) a supercommentary on Rashi’s Bible commentary, quoted in the *Devek Tov* of Simeon Ossenburg, and in *Minḥat Yehudah* by Judah Leib b. Obadiah Eilenburg (1609); (3) decisions, quoted by Moses Isserles and Joel Sirkes.

[Yehoshua Horowitz]

ABRAHAM BEN AZRIEL (13th century), liturgical commentator, one of the “Elders of Bohemia.” Abraham was a disciple of the great German pietists, *Judah b. Samuel he-Ḥasid and *Eleazar b. Judah of Worms (Rokeah) as well as of *Baruch b. Isaac of Regensburg, the latter two being his chief teachers. *Isaac b. Moses Or Zaru’a was his disciple. About 1234 he wrote *Arugat ha-Bosem* (“Spice Garden”), a commentary on liturgical poems (edited by E.E. Urbach with commentary, 1939). The work reveals a comprehensive knowledge of every branch of Jewish learning: masoretic text and vocalization, exegesis and grammar, the halakhic and aggadic Midrashim, the two Talmuds and their early expositors, and philosophical and kabbalistic literature. All obscure references in the *piyyuṭim* are explained in great detail. As a result of its prolixity, the book did not have a wide circulation and is only rarely quoted in later literature. However, after Abraham *Berliner discovered the manuscript in the Vatican library, scholars realized its importance. Abraham’s main sources are: Abraham Ibn Ezra, Eleazar Rokeah, Judah Ḥayyuj, Judah b. Samuel he-Ḥasid, Joseph Kara, Jacob Tam, Moses of Taku, Rashi, Solomon Parḥon, Samuel b. Meir, Nathan b. Jehiel of Rome, and Maimonides. He was the first of the French and German scholars to make full use of the whole of Maimonides’ work. The quotations in the book give an insight into the nature and character of many books no longer extant, by authorities such as Samuel b. Meir and Eleazar Rokeah (who is mentioned by name more than 170 times) and by scholars whose names were previously unknown. Abraham was known for his critical insight and independence and did not hesitate to contradict his teacher, Eleazar Rokeah. His quotations from the halakhic and aggadic literature, the *Tosefta*, and the Babylonian and Palestinian

Talmuds are valuable, for there are many differences between his texts and those appearing in the printed editions.

ABRAHAM BEN BENJAMIN ZE’EV BRISKER (d. 1700), Lithuanian author and preacher. After the decree of expulsion from Lithuania in 1655 Abraham went to Vienna, where he became a pupil of R. Shabbetai Sheftel *Horowitz. After the expulsion of the Jews from Vienna in 1670 Abraham returned to Brest Litovsk and continued his studies under R. Mordecai Guenzburg and R. Zevi Hirsch. At the end of his preface to *Zera Avraham* he described his tribulations: “Most of my days were spent in sorrow, and I studied under difficulties and in wandering.” He mentions his intention “to immigrate to the Holy Land” which, however, he did not fulfill. He signed himself “*Alluf Abraham*” as one of the representatives of Brest Litovsk at the meeting of the *Council of the Lands in Lublin in 1683. Abraham is the author of *Asarah Ma’amarot*, a commentary on *Avot*, chapter 6 (Frankfurt on the Oder, 1680); *Zera Avraham*, which includes sermons on “the connection between the weekly portions, and other verses, Midrashim and commentaries according to a literal interpretation” (Sulzbach, 1685); and *Perush al Eser Atarot* – a kabbalistic work (Frankfurt on the Oder, 1968). In the preface to *Asarah Ma’amarot* he refers to his unpublished works *Berit Avraham* (a brief summary of the decisions of Shabbetai b. Meir ha-Kohen and *David b. Samuel ha-Levi on *Yoreh De’ah*) and *Ḥesed Avraham*, a kabbalistic commentary on the weekly scriptural portions.

[Yehoshua Horowitz]

ABRAHAM BEN DANIEL (1511–1578), Italian rabbi and poet. Abraham, who was born in Modena, was employed as tutor by Jewish families in various Italian cities from 1530. Later, he became rabbi and preacher in Ferrara. He composed numerous religious and liturgical poems. According to his statement these numbered more than 5,000. Some poems deal with autobiographical occasions; others celebrate historical events (e.g., the false accusation against the Jews in Rome, 1555). Several are dedicated to his family and friends, or written as prayers for them. The poems which include elegies and **azharot* are almost all written in Hebrew, a few, in Aramaic. In 1553 he collected his liturgical and religious poems under the title, *Sefer ha-Yashar*. Later he prepared a second, larger collection in two volumes, now lost, entitled *Sefer ha-Yalkut* (this might, however, be the title of another work of his). A third collection (unless it is part of *Sefer ha-Yalkut*) is in the Montefiore Collection.

[Umberto (Moses David) Cassuto]

ABRAHAM BEN DAVID MAIMUNI (c. 1246–c. 1316), *nagid* of Egyptian Jewry. Abraham was the eldest son of R. David, the grandson of Maimonides. During his father's old age he shared the position of *nagid* with him for ten years. After his father's death he remained *nagid* and was successful in 1313 in convincing a large group of Karaites, among whom were some wealthy men and intellectuals, to return to Rabbanite Judaism.

[Eliyahu Ashtor]

ABRAHAM BEN DAVID OF POSQUIÈRES (known as **Rabad**, i.e., **Rabbi Abraham Ben David**; c. 1125–1198); talmudic authority in Provence. Abraham was born in Narbonne, and died in Posquières, a small city near Nîmes famous for the yeshivah he established there. He lived during a remarkable period of remarkable development of intellectual activity in southern France. His father-in-law, Abraham b. Isaac, who headed the rabbinical court in Narbonne, exerted considerable influence on Abraham ben David, whose brilliance he fully appreciated. Abraham studied with Moses b. Joseph and *Meshullam b. Jacob of Lunel, two of the most respected and influential scholars of the time. Meshullam encouraged the methodical transmission of the philosophic, scientific, and halakhic learning of Spanish Jews to French Jewry, and his influence on Abraham in this respect was great. It also seems safe to assume that the enlightened atmosphere of his circle widened the scope of Abraham's learning so that he developed into a keen and resourceful halakhist, undisputed master in his own field, and highly knowledgeable in developments in related areas (philosophy and philology). He encouraged Judah ibn Tibbon, who had translated the first chapter of Bahya ibn Paquda's *Ḥovot ha-Levavot* at the request of Meshullam of Lunel, to complete the translation. Meshullam stimulated Abraham's literary creativity by having him compose a treatise (*Issur Mashehu*, in: S. Assaf, *Sifran shel Rishonim* (Jerusalem, 1935, 185–98; M. Hershler, Jerusalem, 1963)) on an important problem of Jewish ritual law.

A mature scholar, prominent in Montpellier and Nîmes, and a man of great wealth (it has been suggested that he dealt in textiles), he settled permanently in Posquières, except for a short period (1172–73) when he fled to Narbonne and Carcassonne as a result of hostility on the part of the local feudal lord. He founded and directed a school to which advanced students from all parts of Europe flocked and he provided for all the needs of indigent students out of his own pocket. Some of his students and close followers, *Abraham b. Nathan ha-Yarḥi, Isaac ha-Kohen, *Meir b. Isaac, *Jonathan b. David

ha-Kohen of Lunel, Asher b. Saul of Lunel, and his own son *Isaac the Blind (of Posquières) became distinguished rabbis and authors in the principal Jewish communities of Provence, thus extending Abraham's influence and contributing to significant literary developments at the end of the 12th and the beginning of the 13th centuries. He himself asserted that his word was law in all Provence (*Temim De'im* (Lvov, 1812), 12a–b, no. 113). Scholars from Franco-Germany, Spain, North Africa, Italy, Palestine, and Slavic countries knew, studied, and respected him. *Naḥmanides describes his erudition and piety with great awe and Solomon b. Abraham *Adret says that Abraham revealed unfathomed depths of the law “as if from the mouth of Moses, and explained that which is difficult” (*Torat ha-Bayit, Beit ha-Nashim*, introduction).

Rabad's literary activity was original and many sided. His works may be classified under the headings of codes of rabbinic law, commentaries on various types of talmudic literature, responsa, homiletic discourses, and critical annotations and glosses (*hassagot*) on standard works of rabbinic literature. His writings are characterized by precision in textual study, persistence in tracing statements back to their original source, discovery of later interpolations, and logical analysis of problems. He was one of the most skillful practitioners of the critico-conceptual method of talmudic study – probing into the inner strata of talmudic logic, defining fundamental concepts, and formulating disparities as well as similarities among various passages in the light of conceptual analysis. As a result, abstract, complex concepts, which were discussed fragmentarily in numerous, unrelated sections of the Talmud, are for the first time defined with great vigor and precision. This critical methodology was the first clean break from the geonic method of Talmud study. By doing so, Rabad approached each rabbinic subject unaided by the wisdom of the previous generations. On the one hand, he viewed each subject as part of the greater talmudic whole; yet on the other hand, he only commented on what interested him. Thus, his commentaries may be described as annotatory rather than cursory, that is, closer to the tosafistic method of textual elucidation and analysis than the method of complete, terse textual commentary associated with Rashi or R. Hananel. Many of his theories and insights were endorsed and transmitted by subsequent generations of talmudists and incorporated into standard works of Jewish law up to the Shulḥan Arukh and its later commentaries. Indeed, his talmudic commentaries had an enormous impact on the next generation of talmudic scholars, notably *Naḥmanides and his disciple, Solomon ben Abraham *Adret. Even though they continued to quote him frequently, the scholarship and reputation of these and other scholars of the succeeding generations overshadowed Rabad's work. Rabad's talmudic commentaries firmly established his position among Jewish scholars. With the first publication of Rabad's *hassagot* alongside Maimonides' text of the *Mishneh Torah* in the early 16th century, Rabad's reputation shifted from that of commentator on the Talmud to commentator on the *Mishneh Torah*.

Some medieval writers, notably Ḥasdai Crescas (*Or Ado-*

nai, introduction) assert that Abraham wrote a commentary on the entire Talmud and Menahem b. Solomon *Meiri described him as “one of the greatest of the commentators” (*Beit ha-Behirah*, passim). Only sections of this imposing undertaking have been preserved and only two complete commentaries on *Bava Kamma* (Kaidan, 1940; Jerusalem, 1963²) and *Avodah Zarah* (New York, 1960) have been published; sizable extracts are to be found in the *Shitah Mekubbezet* of Bezalel Ashkenazi and citations from it are quoted in the writings of the *rishonim*. His commentary and *tosafot* to the first two chapters of *Kiddushin* have been published by Wacholder, in: *HUCA* 37 (1966), Heb. sect. 65–90.

The most important of his codes, which included *Hilkhot Lulav*, *Hibbur Harsha'ot* (on power of attorney), and *Perush Yadayim*, is the *Ba'alei ha-Nefesh* (first edition Venice, 1602). A complete and better edition was published by Y. Kafah (1964). In seven, close-knit chapters, Abraham formulated and discussed in great detail the laws relating to women. The last chapter of the work entitled *Sha'ar ha-Kedushah* (“the gate of holiness”) describes the moral norms and pious dispositions which enable man to achieve self-control in sexual matters and to attain purity of heart and action. The common denominator of all his codes is their preoccupation with practical matters, unlike Maimonides, whose theoretical concept of codification necessitated the inclusion of all laws, even those of no practical value. Abraham's codes are predicated on exposition and commentary and provide complete source references.

Abraham wrote commentaries on the Mishnah, which had gradually become subservient to and assimilated in the Talmud as a unit of study, with the result that as late as the 12th century, commentaries on the Mishnah were rare and fragmentary. Abraham's full-fledged commentaries on *Eduyyot* and *Kinnim* (both published in the standard editions of the Talmud), two abstruse, academic treatises, were original and also very influential. (The commentary on *Tamid*, ascribed to Abraham, is not his.) At the beginning of the *Eduyyot* commentary he himself declared: “In all these matters I have nothing to fall back upon, neither a rabbi nor a teacher. I beseech the Creator to guide me correctly in this matter.” Unlike Maimonides, who strove to distill the quintessence from intricate discussions, in order to render the Mishnah an independent subject of study, Abraham was interested primarily in interpreting those obscure sections of the Mishnah which had no further explanation in the Talmud, passing over those passages satisfactorily explained in the Talmud, merely giving cross references.

His commentaries on the tannaitic Midrashim are of special historic importance, because he was probably the first medieval scholar (but see *Hillel b. Eliakim of Greece) to have written exhaustive commentaries on these texts. While his commentaries on the *Mekhilta* and *Sifrei* are quoted, only the commentary on *Sifra* is extant (first edition Constantinople, 1523; scientifically edited by I.H. Weiss, Vienna, 1862). The commentary, which pays considerable attention to the nature and method of the *Sifra* and, therefore, to problems of talmu-

dic hermeneutics, begins with an emphatic prologue on the necessity of tradition “in order to harass the opinions of the heretics (*minim*) who refuse to obey and believe.”

The *hassagot*, critical scholia, with which his name is inextricably linked, were his last works. He composed copious *hassagot* on the *halakhot* of Alfasi, on the *Sefer ha-Maor* of *Zerahiah b. Isaac ha-Levi, and the *Mishneh Torah* of Maimonides. As the Hebrew term *hassagah* denotes, these glosses are both criticism and commentary, dissent and elaboration, stricture and supplement; they are not exclusively polemical, although the polemical emphasis varies in intensity and acuity from one to the other. The critique on Alfasi is mild and objective; that on Maimonides may be described as moderate, marred by occasional outbursts of intemperate invective; while that on Zerahiah ha-Levi is caustic and personal. Abraham began by reviewing Alfasi and taking exception to some of his halakhic interpretations and normative conclusions. In answer to his criticisms Nahmanides wrote his *Sefer ha-Zekhut*. When the *Sefer ha-Maor* appeared, Abraham felt that Zerahiah ha-Levi had carried the criticism of Alfasi to unjustified lengths and that often Zerahiah was captious and carping for no good reason. Anticipating the more comprehensive refutation of Nahmanides in *Millhamot*, Abraham penned a sharp answer to the strictures of Zerahiah. He accused him, inter alia, of plagiarism, amateurishness, excessive reliance on Rashi and the French school, and general incompetence. The book, called *Katuv Sham*, was published in full for the first time in Jerusalem (1960–2). Extracts from it had been published previously in the Romm edition of the Talmud, and elsewhere. This work climaxes a lifetime process of mutual criticism and attack – the acrimonious exchange in *Divrei ha-Rivot* and Zerahiah's criticism of Abraham's *Ba'alei ha-Nefesh* and *Kinnim* commentary (*Sela ha-Mahaloket*, latest edition, ed. Kafah, 1964). Abraham's critique of Maimonides, written in cryptic and in a style often difficult to understand, became a standard companion of Maimonides' text (from the Constantinople edition, 1509). These *hassagot* are highly personal and unsystematic. Rabad does not comment on every aspect of each section of the entire *Mishneh Torah*. However, his glosses are very wide ranging, containing every conceivable form of annotation: criticism concerning interpretive matters, textual problems, local customs and the like, and many forms of commentary, listing the source, reconstructing Maimonides' explanation of a text, showing the derivative process followed by Maimonides in the formulation of a law, warding off possible criticism, and the like. Abraham claimed that Maimonides “intended to improve but did not improve, for he forsook the way of all authors and his cut and dried codification, without explanations and without references, approximated *ex cathedra* legislation too closely.” Rabad's *hassagot* are not limited to points of law; he was quick to take Maimonides to task for his philosophical opinions as well. For instance, contrary to Maimonides' assertion that God is incorporeal and that to think of God as having a body makes one a heretic, Rabad claims that there “were many who were greater and

better than him who followed this path due to what they saw in verses, and even more due to rabbinic homilies that confuse the mind” (see *Mishneh Torah*, Laws of Repentance 3:7). Later generations did not view this statement as disagreeing with Maimonides, but as recognition of the need to think of God in anthropomorphic terms.

Abraham wrote many responsa, some of them printed in *Tummat Yesharim* (Venice, 1622). A more complete compendium was issued by Y. Kafah (1964). He wrote a few homilies, as testified by many *rishonim*, but only his homily on Rosh Ha-Shanah has been printed (London, 1955).

One type of literature, the kabbalistic, which came into prominence during his lifetime, is not represented in his writings. It is known, however, that he exerted formative influence upon it through his children, who, having learned mystical teachings from him, became literary leaders and guides in the emergent Kabbalah. Later kabbalistic writers such as Isaac of Acre, Shem Tov b. Gaon, and Menahem Recanati claimed Abraham as one of their own, worthy of receiving special revelation.

[Isadore Twersky / David Derovan (2nd ed.)]

ABRAHAM BEN DOV OF MEZHIRECH (known as *ha-Malakh* (“the Angel”); 1741–1776), ḥasidic sage. A contemporary who watched Abraham on the Ninth of *Av bewail the destruction of the Temple, remarked: “Then I understood that it was not in vain that he was named by all ‘the Angel,’ for no man born of woman could have such power.” A solitary ascetic who mainly concentrated on study of Kabbalah, Abraham did not emulate the tradition of popular aspects of Ḥasidism instituted by the Ba’al Shem Tov and by his father, considering them “too earthly.” His ideal of the **zaddik* was directly opposed to the usual type of such ḥasidic leaders, being “one who is incapable of leading his contemporaries, one whom they would not tolerate because he is immersed in learning and unable to descend ‘to the lowest grade’ in order to lift up his generation.” In his youth Abraham was a friend of *Shneur Zalman of Lyady with whom he studied Talmud and Kabbalah in Mezhirech. He was the author of a commentary on the Pentateuch *Ḥesed le-Avraham* (Czernowitz, 1851). His son, Shalom Shraga (1766–1803) of Prohobist, was the father of Israel of *Ruzhyn (Ryshyn), the first of the Ruzhyn dynasty.

[Nachum Arieli]

ABRAHAM BEN ELIEZER HA-LEVI (called *ha-Zaken*; c. 1460–after 1528), kabbalist. Born in Spain, Abraham was a pupil of Isaac Gakon (in Toledo?). While still in Spain he wrote several kabbalistic treatises of which his *Masoret ha-Hokhmah* (“Tradition of Wisdom”), on the principles of the Kabbalah, has been preserved (KS, 2 (1925), 125–30; 7 (1931), 449–56). After the expulsion of the Jews from Spain in 1492, Abraham wandered through Italy, Greece, Turkey, and Egypt until about 1514 when he moved to Jerusalem with the school of the Egyptian *nagid*, R. Isaac ha-Kohen *Sholal. In Jerusalem, he was one of the most respected scholars of the yeshivah and became widely known through his literary and religious activities. A letter of his from the year 1528 deals with Beta Israel (*Kovez al Yad*, 4 (1888), 24). He presumably died soon afterward; in 1535, R. *David b. Solomon ibn Abi Zimra mentions him as someone long dead.

The expulsion of the Jews from Spain shocked Abraham deeply. His activities as an apocalyptic kabbalist probably date from the time of this national disaster. Like many of his contemporaries, such as Abraham *Zacuto, Isaac *Abrabanel, and others, he believed that the year 1524 would be the beginning of the messianic era, and that the Messiah himself would appear in 1530–31. He devoted himself to elaborating his conviction. He searched for proof in the Bible and the Talmud as well as in kabbalistic literature, and he tried to arouse the Jewish people to prepare for the coming deliverance through penitence. Abraham is one of the best stylists in kabbalistic literature. In 1508 in Greece he wrote the treatise *Mashreh Kitrin* (“Untier of Knots,” 1510), with explanations of the Book of Daniel. This book, like all other works of Abraham, was ably written in the apocalyptic prophetic vein. Later he wrote *Ma’amar Perek Ḥelek*, an explanation of the talmudic statements on the messianic redemption at the end of the tractate *Sanhedrin*. In 1517, in Jerusalem, Abraham wrote his extensive commentary on the *Nevu’at ha-Yeled* (“The Child’s Prophecy”) in the same vein (still in manuscript). It is unlikely that Abraham was the author of the *Nevu’at ha-Yeled* itself. His commentary contains an apocalyptic survey of Jewish history, from the fall of the Second Temple to his own day. In 1521 he wrote *Iggeret Sod ha-Ge’ullah* (“The Epistle of the Mystery of Redemption”) in which, following his views, he interpreted the statements of the *Zohar on redemption (also in manuscript). Abraham issued many calls to penitence, in one of which (1525) he expressed himself in detail on the appearance of Martin *Luther. Thus, he prepared the way for the coming activities of Solomon *Molcho. Various other kabbalistic writings of Abraham have been preserved: *Ma’amar ha-Yihud* (“Essay on the Unity of God”); *Megillat Amrafel* (“Scroll of Amraphel”), published in part in KS, 7 (1930–31), probably identical with his commentary on the Song of Songs; *Tiferet Adam* (“Glory of Man”); and *Livyat Ḥen* (“Chaplet of Grace”; the latter two not extant). His instructions (*hora’ah*) on the recitation of the prayer *Makhnisei Raḥamim* have been published as have his penitential prayers seeking the intercession of angels (*Kerem Hemed*, 9 (1856), 141ff.). Abraham is in no

way to be linked with the kabbalistic work *Gallei Rezayya* nor is he the author of the apology of the Kabbalah, *Ohel Mo'ed* ("Tent of Meeting"). He has often been confused with other scholars of the same name, among them *Abraham b. Eliezer ha-Levi Berukhim.

[Gershom Scholem]

The writings and activity of this kabbalist have drawn substantial attention in scholarship in the last generation. Some of Abraham ha-Levi's kabbalistic views are close to theories found in the circle of kabbalists who produced the literature known as *Sefer ha-Meshiv*, and he preserved the earliest version of the famous legend about R. *Joseph della Reina's abortive attempt to bring about the advent of the Messiah. It seems that his messianic and magical concerns are also related to the tenor of this vast kabbalistic literature.

ABRAHAM BEN ELIEZER HA-LEVI BERUKHIM (c. 1515–1593), pious ascetic and Safed kabbalist. Born in Morocco, he immigrated to Palestine probably before 1565. In Safed he joined Moses *Cordovero's circle and became a friend of Elijah de *Vidas. When Isaac *Luria went to Safed (late 1569), Abraham joined his school and was a member of its "fourth group." Ḥayyim *Vital had a great affection for him and in several places quotes kabbalistic sayings of Isaac Luria which he had heard from Abraham. Vital quotes Luria as saying that in the "origins of the souls of the Safed kabbalists," Abraham derived from the patriarch Jacob. Abraham was a visionary and ascetic, who preached piety and morality, and called for repentance. He was called the "great patron of the Sabbath" and he went out on Friday mornings to the markets and streets to urge the householders to hurry with the preparations for the Sabbath meals and close their shops early so that they would have time to purify themselves for the Sabbath. Almost nothing is known about his life. Many legends have been preserved about his piety and about Luria's affection for him. His *Tikkunei Shabbat* were printed at the end of *Reshit Hokhmah ha-Kazar* (Venice, 1600) and thereafter in numerous editions as a separate book. On the other hand, his *Ḥasidut*, containing the rules of pious behavior which he established for his group in Safed, circulated in manuscript even in

the Diaspora, and was published by Solomon Schechter (*Studies in Judaism*, 2nd Series (1908), 297–9). He was the first editor and collector of articles of the *Zohar which had not been included in the Mantua edition of 1558–60; these were afterward published under the title *Zohar Ḥadash*. It is not clear whether he was the author of *Gallei Rezayya*, parts of which were published in his name (1812). It is probable that Tobiah ha-Levi, author of *Hen Tov*, was his son.

ABRAHAM BEN ELIJAH OF VILNA (1750–1808), talmudic and midrashic scholar. Abraham received most of his education from his father *Elijah b. Solomon Zalman, "the Vilna Gaon." He acquired complete command of rabbinic literature and much general knowledge. He had a strikingly critical approach to history and literature. Even before *Zunz, Abraham investigated the nature and development of the Midrashim and had written a valuable introduction to his edition of *Midrash Aggadot Bereshit* (Vilna, 1802). His work *Rav Pe'elim* (1894), an alphabetical index of all the midrashic works known to him, contains critical observations on 130 Midrashim. Abraham wrote a universal geography, *Gevulot Erez* ("The Earth's Boundaries," published anonymously, Berlin, 1821). He composed commentaries on several tractates of the Talmud and on *Midrash Rabbah*, glosses and notes to the Jerusalem Talmud, a book on weights and measures in the Talmud, another on place-names mentioned in Talmud and Midrash, and several other works, some unpublished. Abraham was active in communal affairs and was one of the *parnasim* of the Vilna Jewish community. Together with his brother, Judah Loeb, he published several of his father's works, and incorporated in them explanatory material from his father's oral teaching.

[Simha Assaf]

ABRAHAM BEN ḤALFON (15th or 16th century), Hebrew poet in Yemen. His verse follows the genre of Spanish poetry in its meter, style, and content. Y. Tovi published his poems in 1991. Their subjects include moral and ethical exhortations, songs for weddings and circumcisions, religious verse, and hymns for special occasions and festivals. If he is identical with the person of the same name mentioned in the *Sefer ha-Musar* (pp. 46, 84, 151) of Zechariah Al-Dahri, he must have flourished in the 16th century, not in the 15th as was formerly believed.

[Yehuda Ratzaby]

ABRAHAM BEN ḤAYYIM (Heilprin; d. 1762), leader of the Jewish community in Lublin city and province, Poland. Abraham b. Ḥayyim at times represented the Lublin community in the assemblies of the Council of Four Lands. From 1753 to 1757 he acted as *parnas* of the Council, an office previously held by his grandfather, Abraham Abele b. Israel Isser, and his son's father-in-law, the physician Abraham Isaac *Fortis (Ḥazak). During Abraham b. Ḥayyim's tenure, one of his sons, Moses Phinehas, acted as the *ne'eman* ("treasurer") of the Council of the Four Lands. Other members of his family served in several communities as rabbis or communal leaders. In the controversy that arose over the connection of Jonathan *Eybeschutz with the *Shabbatean movement, Abraham and his son Jacob Ḥayyim of Lublin strongly supported Eybeschutz. Abraham was described by contemporaries as "princely and munificent," but nothing is now known of his occupation. He died in Lublin at an advanced age. The Bet ha-Midrash de-Parnas Academy, which he founded, existed in Lublin until the destruction of the community during World War II.

ADD. BIBLIOGRAPHY: Halpern, Pinkas; M. Balaban, *Die Judenstadt von Lublin* (1919).

[Israel Halpern]

ABRAHAM BEN ḤAYYIM, THE DYER (Dei Tintori; 15th century), Italian pioneer of Hebrew printing from Pesaro. Though Abraham may have been active in Hebrew typesetting and printing by 1473, his name as a printer appeared for the first time in two books printed in *Ferrara in 1477 – Levi b. Gershom's commentary of Job and Jacob b. Asher's *Tur (Yoreh De'ah)*, using the first 40 pages which Abraham *Conat had printed in *Mantua in 1476.

Five years later (1482) at *Bologna, Abraham printed a Pentateuch with Targum Onkelos and Rashi's commentary, probably the first printed book with vocalization and cantillation. In the colophon, the proofreader Joseph Ḥayyim praises Abraham as "unequaled in the realm of Hebrew printing and celebrated everywhere."

Israel Nathan *Soncino and his son Joshua Solomon secured Abraham's services for the work on the first printed Hebrew Bible – with vocalization and cantillation – which left the press at Soncino in February 1488. The edition of the Psalms, with R. David Kimḥi's commentary of 1477, and the Five Scrolls, with Rashi and with Abraham Ibn Ezra's commentary on Esther (1482–83?), may also have been printed by Abraham (see *Incunabula).

Friedberg, *Toledot ha-Defus ha-Ivri bi-Medinot Italyah...* (1956²), index. **ADD. BIBLIOGRAPHY:** P. Tishbi, in: *Kiryat Sefer*, 60 (1986), 908–18.

ABRAHAM BEN HILLEL (Ben Nissim) OF FOSTAT (Egypt; d. 1223), scholar, poet, and physician. Abraham is probably identical with Abraham the Pious (he-Ḥasid or he-Ḥaver) referred to frequently by his friend Abraham b. Moses b. *Maimon in his writings. In 1167 Abraham b. Hillel, Maimonides, and other rabbis signed a *takkanah* to safeguard the observance of the laws of family purity in Egypt (Maimonides, *Teshuvot* (Responsa), ed. by A.H. Freimann (1934), 91–94). In 1196 Abraham wrote *Megillat Zuta*, describing satirically the exploits of an adventurer called *Zuta (and his son) who imposed himself repeatedly on the Jewish community of Egypt. *Megillat Zuta* is written in rhymed prose with a prologue and epilogue in metered verse. The number of manuscripts extant seems to attest the popularity of the work, which was first published by Neubauer (JQR, 8 (1896), 543 ff.). Abraham and Josiah b. Moses verified a responsum by Jehiel (?) b. Eliakim Fostat, which deals with the controversy concerning the reference, in legal documents and during prayers, to the person of the reigning *nagid*. After Abraham's death his collection of books was put up for sale in the Palestinian synagogue of Fostat under the auspices of Abraham b. Moses b. Maimon. The library contained 75 medical works, about 30 Hebrew books, among them biblical books, works on Hebrew grammar, a copy of the Mishnah, part of a talmudic tractate, Maimonides' *Book of Precepts and Guide*, as well as several copies of Saadiah's *Siddur*.

[Jefim (Hayyim) Schirmann]

ABRAHAM BEN ISAAC (Gerondi; mid-13th century), *hazzan*, kabbalist, and *paytan* in Gerona (Spain). One of the greatest kabbalists of his time, he was a pupil of *Isaac the Blind from whom he learned the mystical intentions of the prayers according to the Kabbalah. Gerondi later enlarged on this teaching and introduced it into his own order of the prayers. Although his work *Kabbalah me-Inyan ha-Tefillah le-Rabbi Avraham* ("Tradition Concerning Prayer, According to R. Abraham") was not published until 1948 (see Scholem in bibl.), his contemporaries quote various ideas on the subject of prayer from it. *Nahmanides held him in great esteem and tradition has it that he eulogized Abraham and offered a prayer in kabbalistic style by his grave. Abraham's hymn for the eve of Rosh Ha-Shanah, **Aḥot Ketannah* ("Little Sister"), which describes the sufferings of the Jewish people in exile, has become well known. It is as yet unclear whether other hymns signed Abraham b. Isaac Ḥazzan are wholly or in part his work, or whether they were composed by another writer of the same name.

BIBLIOGRAPHY: G. Scholem, *Reshit ha-Kabbalah* (1948), 128, 243–8; Schirmann, *Sefarad*, 2 (1956), 291–4, 692; Zunz, *Poesie*, 311, 410; Davidson, *Ozar*, 4 (1933), 355.

[Jefim (Hayyim) Schirmann]

ABRAHAM BEN ISAAC BEN GARTON, first known Hebrew printer. He produced Rashi's commentary on the Pentateuch, completed at *Reggio Calabria on Feb. 17, 1475. Although this book bears the earliest date, it was not necessarily the first Hebrew book (see *Incunabula) printed, as it may have been preceded by others which have disappeared, or bear no date of publication. The only extant copy of the book, in the De' Rossi Collection in the Palatine Library, Parma, Italy, is slightly defective; it is in folio and contains 116 pages of 37 lines each. The text of this edition is significantly different from later ones. De' Rossi formerly owned another copy which was lost in transit. Abraham's country of origin is unknown, but it is conjectured that he came from Spain. No other book that came from his press is known.

Roth, *Jews in the Renaissance* (1959), 169–73; Pavoncello, in: *Klarchos* (Reggio di Calabria), 21–22 (1964), 53–57. **ADD. BIBLIOGRAPHY:** P. Tishbi, in: *Kiryat Sefer*, 60 (1986), 865–69.

[Abraham Meir Habermann]

ABRAHAM BEN ISAAC HA-KOHEN BEN AL-FURAT (11th century), Egyptian physician and philanthropist. His father Isaac ha-Kohen b. al-Furat was a highly respected physician in Fostat (Old *Cairo) and his uncle Solomon ha-Kohen b. Joseph was the *gaon* in Palestine. Abraham held a high position in the government and was probably one of the court physicians. He may also have been president of the Jewish community; hence his honorary title ("prince of the community"). Apart from his general scholarship, Abraham also appears to have been learned in the Talmud. His erudition, nobility of character, and philanthropy are lauded in several poems and letters found in the Cairo *Genizah*.

BIBLIOGRAPHY: Mann, *Egypt*, 1 (1920), 28, 83ff.; 2 (1922), 26, 54ff., 81ff., index; Mann, *Texts*, 2 (1935), 151; Goitein, in: *HUCA*, 34 (1963), 179.

[Jacob Mann]

ABRAHAM BEN ISAAC HA-KOHEN OF ZAMOŚĆ (18th century), Polish rabbi and author. Abraham served for a short period as head of the *bet din* in Tarlow, but, as he was extremely wealthy, he was able to resign his position and in 1754 returned to Zamość, his birthplace. There he occupied himself with both religious and secular studies. He knew German, Polish, and Latin. In 1753 he was a member of the Zamość delegation to the central committee session of the *Councils of the Lands, held at Jaroslav. In 1754 he participated in the conference held at Constantinov where he was a signatory to the ban passed there on the printers of the Sulzbach Talmud. From this time, he played an active role in Polish Jewish life

and became widely known. In the *Emden-*Eybeschuetz dispute he opposed the official line of the Council of Four Lands which supported Eybeschuetz and he defended Jacob Emden (with whom he corresponded in 1759–60). He strove zealously against any mystical messianic and Shabbatean revival and signed the 1753/54 letters of protest against the Shabbateans. *Beit Abraham*, his book of responsa and talmudic novellae, was printed in 1753; the book contained also the novellae of his father Isaac b. Abraham ha-Kohen, as well as his own halakhic novellae, in an appendix called *Minḥah Belulah*.

BIBLIOGRAPHY: Preface to *Beit Abraham* (1753); J. Emden, *Sefer ha-Shimmush* (1758), 81a; Z. Horowitz, *Kitvei ha-Ge'onim* (1928), 138, no. 2; M. Tamari (ed.), *Zamość bi-Ge'onah u-ve-Shivrah* (1953), 41, 48–49; Halpern, Pinkas, index.

[Yehoshua Horowitz]

ABRAHAM BEN ISAAC OF GRANADA, Spanish kabbalist, putative author of *Berit Menuḥah* ("The Covenant of Rest"), one of the main works of the *Kabbalah. Nothing is known of his life or of the era to which he belongs. In the introduction to his commentary on *Sefer *Yeẓirah*, Moses *Botarel gives a long quotation from *Sefer ha-Berit* ("The Book of the Covenant") written by a scholar called Abraham b. Isaac of Granada. But both language and contents prove that this book was not written by the author of *Berit Menuḥah*, which was without doubt composed in Spain during the 14th century. It explains the innermost meaning of the vocalization of God's name in 26 different ways. However, only the first ten ways were printed, and this only in a very corrupt form (Amsterdam, 1648): Ḥ.J.D. *Azulai saw more than twice this number in a manuscript. The actual content of this work is very enigmatic as, in many respects, its symbolism and mysticism do not correspond with the conventional Kabbalah. The influence of Abraham *Abulafia's Kabbalah is recognizable but the language-and-letter-mysticism of Abulafia is combined with a complicated light-mysticism. Moreover, the book's aim was to provide a systematic basis for the so-called Practical Kabbalah. The few clear passages reveal the author as a profound thinker and visionary. In eight places, he quotes his own thought process as the words of "the learned Rabbi *Simeon bar Yoḥai," mostly in Aramaic. But these quotations are not to be found in the *Zohar, and in view of their style and contents do not belong there. The work was highly regarded by later kabbalists, especially by Moses *Cordovero and Isaac *Luria, who read their own thinking into Abraham's symbolism. Cordovero wrote a lengthy commentary on part of the book. Abraham quotes two more of his own works, *Megalleh ha-Ta'alamot* ("Revealing Hidden Things") and *Sefer ha-Gevurah* ("The Book of Power"), on the names of God and Practical Kabbalah. His *Hokhmat ha-Zeruf* ("Science of Letter Combinations"), 12 chapters in the spirit of Abulafia, is preserved in manuscript form (Margoliouth, Cat, no. 749, vi), but he is not the author of the *Sefer ha-Ḥeshkek* ("The Book of Desire," *ibid.*, 748); Aaron *Marcus endeavored to prove that Abraham was identical with Abraham b. Isaac of Narbonne, author of *Eshkol*,

and in doing so he tried to date the *Berit Menuḥah* two centuries earlier, however, his argument is not tenable.

BIBLIOGRAPHY: Margoliouth, *Cat*, 3 (1935), 24–27; Jacob ha-Levi, *Kunteres She'lot u-Teshuvot min ha-Shamayim*, with commentary *Keset ha-Sofer* by A. Marcus (1895), 18–26; G. Scholem, in: *Soncino Blaetter (Festschrift Aron Freimann)* (1935), 54–55.

[Gershom Scholem]

ABRAHAM BEN ISAAC OF MONTPELLIER (d. c. 1315), talmudist of Provence, a contemporary of Menahem b. Solomon ha-*Meiri. Little is known of his life. He was born in Montpellier about 1250, and toward the end of his life settled in Carpentras. Abraham b. Isaac was known for his liberal outlook. When *Abba Mari Astruc wrote to him concerning the Maimonidean controversy and the proposed prohibition of the study of philosophy to anyone under 25 years old Abraham urged Abba Mari to desist from the controversy because freedom of thought and opinion should not be suppressed (*Minḥat Kena'ot*, 92). Abraham wrote a commentary on most of the Talmud, based principally on the views of Maimonides. He gives a brief commentary on the text in the style of Rashi; at the end of each topic he gives the practical *halakhah* derived from it. Only a minor part of this commentary has been published, including his commentary on *Kiddushin* appearing in the Romm 1880 edition of the Talmud (wrongly ascribed to Isaac of Dampierre) and those on *Yevamot*, *Nedarim*, and *Nazir* (New York, 1962). His commentaries to many other tractates were familiar to later scholars such as Moses *Alashkar and Menahem de *Lonzano, but they were not generally known. *David b. Ḥayyim ha-Kohen of Corfu wrote: “I have hitherto heard nothing of him as an authority” (*Responsa*, Bayit 5, Heder 1), but at the end of that same responsum he added that he had come across the commentary “and I rejoiced greatly ... he was an outstanding scholar.” Some of Abraham’s responsa are extant. In addition to those which appear at the end of his commentary to *Nazir* there are those which appear in *Teshuvot Hakhmei Provinzyah* (1967), ed. by A. Sofer. There is no evidence that he was related to *Solomon b. Abraham of Montpellier. It is strange that he does not mention in his works the names of any scholars after Moses b. Naḥman.

BIBLIOGRAPHY: Avraham min ha-Har, *Perush al Massekhet Yevamot Nedarim ve-Nazir*, ed. by M.J. Blau (1962), preface; I. Lévi, in: *REJ*, 38 (1899), 102–22; Shatzmiller, in: *Sefunot*, 10 (1966), 17–18.

[Israel Moses Ta-Shma]

ABRAHAM BEN ISAAC OF NARBONNE (known as **Rabi Abad**; c. 1110–1179), talmudist and spiritual leader of Provence; author of *Sefer ha-Eshkol*, the first work of codification of the halakhic commentary of southern France, which served as a model for all subsequent compilations. Abraham was a student of *Isaac b. Merwan ha-Levi and *Meshullam b. Jacob of Lunel. It is probable that Joseph *Ibn Plat, too, was one of his teachers. Abraham apparently spent some time in Barcelona

where, it seems, he also studied with *Judah b. Barzillai al-Bargeloni. He was *av bet din* in his native Narbonne, and his prestige was such that he was cited by the early scholars simply as “the Rabbi, *Av Bet Din*.” *Benjamin of Tudela speaks of him as “principal of the yeshivah” in Narbonne. Among his renowned students were *Zerahiah ha-Levi and *Abraham b. David of Posquieres, who became his son-in-law. Abraham’s halakhic compendium *Sefer ha-Eshkol* is an abridged version of the *Sefer ha-Ittim*, by Judah b. Barzillai al-Bargeloni, with additions from Rashi, R. Tam and his contemporaries, and Abraham himself. In the main, he omitted the geonic responsa and those of Alfasi. As most of the *Ittim* was lost, the *Eshkol* took on additional significance, in that it rescued a part, at least, of the extensive source material in the *Sefer ha-Ittim*. The very ambitious enterprise of excerpting Judah b. Barzillai al-Bargeloni’s book was carried out with the support and under the inspiration of his teacher, Meshullam b. Jacob, who encouraged the introduction of Spanish *halakhah* and tradition into Narbonne. The *Eshkol* was first published by Zevi Benjamin *Auerbach (1869) with an introduction and commentary, but doubts about the authenticity of at least parts of Auerbach’s manuscript were expressed by Shalom *Albeck. The ensuing controversy was inconclusive. Auerbach’s manuscript is rich in additions, the exact origin of which is not clear. Although there are no grounds for accusing Auerbach of willfully tampering with the manuscript, the version of the *Eshkol* that Albeck had in hand is undoubtedly the authentic one. Albeck himself published part of the *Sefer ha-Eshkol* (with introductions and notes) and his son Hanokh *Albeck completed this edition (1935–38). Abraham played a vital role as the principal channel through which the Spanish traditions passed into Provence and from there to northern France. At the same time, he emphasized the local traditions of the “Elders of Narbonne,” of which he also made great use. His eclecticism is clear from the fact that he also gave due consideration to north-French halakhic traditions, using his personal authority to decide between the various traditions. Abraham was the recipient of numerous queries. A collection of his responsa has been published (ed. Kafah, Jerusalem, 1962) and another is extant in the Guenzburg Collection. Several of the responsa were published by S. Assaf in *Sifran shel Rishonim* (1935), and in *Sinai*, 11 (1947). He also wrote commentaries to the entire Talmud (except for the Order of *Kodashim*) which were quoted by his contemporaries and by later scholars, such as Zerahiah ha-Levi, *Naḥmanides, Solomon b. Abraham *Adret, and others, but only his commentary on the second half of the tractate *Bava Batra* is extant (in a Munich manuscript, a fragment of which was published in *Ozar ha-Hayyim*, 12, 1936). The commentary resembles that of *Samuel b. Meir (Rashbam), which served, in a way, as a transition from Rashi’s commentary to the novellae of the tosafists, except that Abraham makes greater use of the earlier commentators and quotes them verbatim. He also excerpted Judah b. Barzillai’s *Sefer ha-Din*.

BIBLIOGRAPHY: Gross, in: MGWJ, 17 (1868), 241–55, 281–94; Assaf, in: *Madda'ei ha-Yahadut*, 2 (1926/27), 17; Benedikt, in: *Tarbiz*, 22 (1950/51), 101–5; I. Twersky, *Rabad of Posquières* (1962), 7–10.

[Simha Assaf]

ABRAHAM BEN ISRAEL OF BRODY (1749–1836), Italian kabbalist. He resided in Leghorn and Trieste but finally settled in Ferrara where he remained 30 years. He was known as an ascetic who frequently fasted an entire week and studied six days and nights consecutively. He would purchase rabbinic works and distribute them to needy scholars. It was believed in Ferrara that his profound piety more than once saved the Jewish community from disaster. Among his publications are *Likkutei Amarim* (“Gleanings,” Zolkiev, 1802), which include a commentary on the *Pirkei Shirah* and extracts from kabbalistic works, and *Devar ha-Melekh* (Leghorn, 1805–08) on the 613 commandments.

BIBLIOGRAPHY: Ghironi-Neppi, 15; Fuenn, Keneset, 15.

[Nathan Michael Gelber]

ABRAHAM BEN JEHIEL MICHAL HA-KOHEN of Lask, Poland (d. c. 1800), kabbalist and rabbinical emissary. Abraham was renowned for his asceticism, fasting during the week and eating only on the Sabbath. He settled in Jerusalem shortly after 1770. Ten years later he returned to Europe as an emissary to collect funds on behalf of the rabbis of Jerusalem, and was then involved in a number of disputes with them regarding these collections. He traveled extensively and is known to have been in Nice for four years, in Ferrara (where he met Graziadio Neppi), Glogau, Berlin, and Warsaw. Wherever he went, he exhorted the Jewish community to repentance and good deeds and encouraged more intensive communal activity, including the building of synagogues. On his return to Jerusalem (1790) he was arrested and held ransom for the failure of the Jewish community to pay taxes. He died in prison, probably as a result of maltreatment. The best known of his kabbalistic works are *Ve-Hashav lo ha-Kohen* (1884), *Ve-Shav ha-Kohen* (Leghorn, 1788), *Beit Ya'akov* (Leghorn, 1792), *Ayin Panim ba-Torah* (Warsaw, 1797).

BIBLIOGRAPHY: Yaari, Shelu'ei, 550, 553–6.

ABRAHAM BEN JOSEPH (Yoske) OF LISSA (Leszno; d. 1777), communal leader in Poland. Abraham, son of the rabbi of Zlotow, was apparently wealthy and engaged in trade. In the 1730s he represented *Great Poland on the *Councils of the Lands. He presided over the Council as *parnas* in 1739–43 and 1751–53. He also served as *ne'eman* (“treasurer”) of the Council during his last term as *parnas* and later in the 1750s and 1760s. While *parnas*, Abraham attempted to arbitrate the dispute between Jonathan *Eybeschutz and Jacob *Emden (to whom he was related by marriage). The Council of the Four Lands was drawn into this controversy which stirred the Jewish world. Abraham, who was then serving his second term

as *parnas* of the Council, tried to settle the dispute without taking a definite side. His brothers, especially Moses, lived in Lissa and also took part in the leadership of the community. The family was renowned for its wealth, its strong principles, and its charitableness. The sources do not indicate their means of livelihood but it is likely that they were merchants.

ADD. BIBLIOGRAPHY: Halpern, Pinkas; Y. Trunk, “*Leberur Emdato shel Abraham ben Yoske, Parnas Va'ad Arba Arazot, be-Mahloket bein Yonatan Eybeschutz ve-Ya'akov Emden*,” in: *Zion*, 33 (1968), 174–79.

[Israel Halpern]

ABRAHAM BEN JOSIAH TROKI (1636–1687), Karaite poet and mystic; son of the physician Josiah b. Judah b. Aaron of Troki, Lithuania, who was a disciple of the famous Jewish scholar and kabbalist, Joseph Solomon *Delmedigo from Candia. According to A. *Firkovich, Abraham was the personal physician of King Jan III Sobieski of Poland and of Grand Duke Sigismund II. Abraham was one of the leaders of the Karaite communities of Lithuania and one of the signatories to the decisions of their assemblies.

His writings include (1) *Beit Avraham*, a collection of mystical treatises; (2) *Beit ha-Ozar*, a medical work completed in 1672 (manuscript in St. Petersburg, Evr. I 733); (3) *Massa ha-Am*, seven treatises whose content is uncertain (according to J. *Fürst, they describe the condition of the Jews and Judaism); Firkovich reports that Abraham personally translated this work into Latin and sold it to the Dominican Order in Vilna; (4) *Pas Yed'a*, miscellaneous treatises (perhaps a 17th-century anti-Christian Rabbanite treatise *Pas Yed'a Katava*, written by Yehudah Briel, which Abraham owned or copied); (5) *Sefer Refu'ot* (manuscript in St. Petersburg, Evr. I 732), a medical work, also containing information on the history of the Jews in Lithuania; S. *Poznanski identifies this with a collection of medical prescriptions in Latin mentioned by Fürst and Firkovich; (6) three liturgical poems, one appearing in a Karaite prayer book (ed. Vilna, vol. 4, p. 102) and two in manuscript. Abraham is not to be confused with *Abraham b. Josiah Yerushalmi.

ABRAHAM BEN JOSIAH YERUSHALMI (c. 1685–after 1734), Karaite scholar, one of the most important authors in the Crimea, *hazzan* and teacher of Torah, from *Chufut-Kaleh. The agnomen Yerushalmi probably indicates that his father, Josiah, made the pilgrimage to Jerusalem. His religious philosophical treatise *Emunah Omen*, written in 1712 (pub. Eupatoria, 1846), dealt with the following subjects: the divine origin and eternity of the Torah; which religion is the true

one, the Karaite or the Rabbanite?; does tradition permit Jews to study the secular sciences? Abraham defended the Karaite conception of the Torah, arguing that the differences between the rabbinic and Karaite views about fulfillment of the commandments are insignificant. He shows respect for the talmudic authorities and later Rabbanite scholars with whose work he was well acquainted. Although opposed to the study of secular sciences (except in the service of the Torah), Abraham was familiar with both Karaite and Rabbanite philosophical and scientific literature. Abraham's numerous other works include homiletical discourses, liturgical poetry incorporated in the Karaite prayer book, and *Sha'ol Sha'al* (Ms. St. Petersburg, Evr. II A 322), a treatise on the laws of ritual slaughter. Abraham was the grandfather of Benjamin b. Samuel *Aga.

ABRAHAM BEN JUDAH BEN ABRAHAM (15th century), the “Elder,” Karaite biblical exegete and liturgical poet of Constantinople. In his main work *Yesod Mikra*, a commentary of the Bible, Abraham quotes Rabbanite as well as Karaite authorities and refrains from polemics against the Rabbanites. It is preserved in two manuscripts (Jewish Theological Seminary and Leyden) both transcribed by his grandson Judah b. Elijah Tishbi (in 1511 and 1518, respectively). Fifteen liturgical poems by Abraham are included in the Karaite prayer book.

[Jakob Naphtali Hertz Simchoni]

ABRAHAM BEN JUDAH LEON (second half of 14th century), disciple of Ḥasdai *Crescas. Abraham came to Spain from his native Candia (Crete) sometime after 1375, the year in which he completed a Hebrew translation of Euclid's *Elements*. In 1378, he finished his quadripartite theological tome entitled *Even Shetiyyah* (“Foundation Stone”) “in the house of my master ... Don Ḥasdai Crescas.” The nature of the relationship between this work and Crescas' teachings remains a matter of debate, though the two contain many similarities. Abraham's work is often called *Arba'ah Turim* (“Four Columns”) on the basis of the title page of the lone manuscript in which it survives.

Lawee, “The Path to Felicity: Teachings and Tensions in *Even Shetiyyah* of Abraham ben Judah, Disciple of Hasdai Crescas,” in: *Mediaeval Studies*, 59 (1997), 183–223.

[Eric Lawee (2nd ed.)]

ABRAHAM BEN MAZHIR (first half of the 12th century), head of the Damascus yeshivah. Abraham, the son of a prominent Damascus Jew, married into the family of Gaon Solomon ha-Kohen b. Elijah, founder of the Damascus yeshivah, a continuation of the Palestinian yeshivah. When Solomon ha-Kohen's son Mazli'ah settled in Fostat, Abraham became the head of the yeshivah, and served in this capacity during the 1130s and 1140s.

[Eliyahu Ashtor]

ABRAHAM BEN MORDECAI HA-LEVI (late 17th century), Egyptian rabbi and author. In 1684 Abraham succeeded his father as head of the Egyptian rabbinate. His son-in-law, the physician Ḥayyim b. Moses Tawil, published a collection of Abraham's responsa (arranged in the order of the four *Turim*) and a treatise on divorce entitled *Ginnat Veradim* (Constantinople, 1716–17) and *Ya'ir Netiv* (1718), respectively. In Venice, Abraham printed his father's responsa *Darkhei No'am* (1697–98), adding to it his own treatise on circumcision which involved him in a halakhic controversy with his contemporaries. He annulled the ban on reading *Peri Hadash* by *Hezekiah Da Silva – imposed by Egyptian rabbis in the previous generation. A collection of brief decisions and rules entitled *Gan ha-Melekh* was printed at the end of *Ginnat Veradim*. His remaining works, consisting of Bible commentaries, sermons, and eulogies, have remained in manuscript.

[Yehoshua Horowitz]

ABRAHAM BEN MOSES BEN MAIMON (1186–1237), theologian, exegete, communal leader, mystical pietist, and physician. Little was known about him prior to the discovery of the Cairo *Genizah, which has preserved many of his writings, in part autographic. Born in Fustat, Egypt, on the Sabbath eve, the 28th of Sivan/June 1186, he was the only son of the great Jewish philosopher Moses *Maimonides (1135/8–1204). His mother was the sister of Ibn Almali, a royal secretary who had married Maimonides' only sister. He was an exceptionally gifted child as his father himself testifies:

Of the affairs of this world I have no consolation, save in two things: preoccupation with my studies and the fact that God has bestowed upon my son Abraham, grace and blessings similar to those he gave to him whose name he bears [i.e. the Patriarch Abraham] ... for, in addition to his being meek and humble towards his fellow men, he is endowed with excellent virtues, sharp intelligence and a kind nature. With the help of God, he will certainly gain renown amongst the great (Maimonides' letter to Joseph ben Judah, *Epistulae*, ed. D. Baneth, p.96).

He studied rabbinics, and possibly philosophy and medicine,

with his father, who groomed him from childhood by having him attend his audience chamber. At his father's death in 1204, Abraham became leader of Egyptian Jewry at the tender age of 18. The mystical testament Maimonides supposedly addressed him is spurious. It was not until 1213 that he was appointed *nagid*, an office which became his descendants' privilege for almost two centuries. Following his appointment, a temporary controversy erupted among the Jews of Egypt over the practice of evoking his name in public prayer. As representative of the Jewish community to the Ayyubid government, he enjoyed personal relations with the Muslim authorities and men of letters, especially after he became court physician to the Ayyubid Sultan al-Malik al-Kamil (reg. 1218–38), Saladin's brother. His acquaintances include the Arab historian Ibn Abi Usaybi'a, who described him and his professional skills:

Abu-l-Muna Ibrahim, son of the *ra'is* Musa ibn Maymun was born in Fostat, Egypt. A celebrated physician, learned in the art of medicine, and excellent in its practice, he was employed in the service of al-Malik al-Kamil Muhammad b. Abu Bakr b. Ayyub. He also came frequently from the palace to treat the sick in the al-Nasiri hospital in Cairo, where I met him in the year 631/1234 or 632/1235 while I was practicing there. I found him to be a tall sage, lean in body, of pleasant manners, refined speech, and distinguished in medicine. Ibrahim, son of the *ra'is* Musa died in the year (...) and thirty and six hundred (*History of Physicians*, ed. Mueller, p. 118).

Despite the temporal and spiritual turmoil of the period, he proved to be an able administrator, a charismatic teacher, and an independent and influential scholar. Although he recognized the incompatibility of leadership and spiritual perfection, he was dedicated to his political vocation as a means of reversing religious decline. Abundant letters in the Genizah give witness to the multiple social and administrative chores to which he attended with the humility of a pietist and the determination of a leader. Hampered, as was his father, by pastoral responsibilities, he nonetheless produced notable works in six main areas: 1) responsa, 2) polemics, 3) exegesis, 4) theology, 5) *halakhah*, and 6) ethics. Despite their originality, his writings have survived in a fragmentary state. A unique letter, addressed in 1232 to R. Isaac b. Israel Ibn Shuwaykh, head of the Baghdad Academy, has preserved an autobiographical account of his literary activity:

I have not yet had the leisure to complete the compositions begun after my father's demise, [namely] a detailed commentary on the Talmud and a work explaining the principles of the *Hibbur* [i.e. Maimonides' *Code*]. However, the Lord has assisted me in completing one work in the Arabic tongue, based on the principles of fear and love (of God), entitled *Compendium for the Servants of the Lord*. I have revised and almost entirely copied it, and part of it has been broadcast to distant lands. True enough I have begun the Torah commentary of which thou hast heard, and which I would have completed within a year or so were I to find relief from the sultan's service and other tasks. However, I can only devote to it short hours on odd days, for I have not yet finished revising the first composition stated to

be almost complete, a small part remaining to be finished with Heaven's help. On this account I have covered only close to half the book of Genesis of the Torah commentary I am composing. When I shall have concluded the revision of [my] composition, of which the greater part is [already] finished, I shall endeavor with all my might to complete the Torah commentary and subsequently also a commentary on the Prophets and the Hagiographa, Heaven, willing. But 'the work is long' and the day and the workers are as described by Rabbi Tarfon (Avot 2: 15), and "there are many thoughts in a man's heart but the counsel of the Lord that shall stand" (Prov. 19:21) (Rosenblatt, 1:124–5)

Responsa

Numerous items have been discovered in the Genizah since the single manuscript of his responsa was published by A. Freimann, Jerusalem, 1937. As head of the Cairo Rabbinical Court, he corresponded on legal matters with countries as far flung as Yemen (Cf. Responsa, p. 107–36), Byzance (p. 93), and Provence (p. 1). These responsa afford an opportunity of assessing his important communal rôle. Their content discusses, among other things, problematic passages in his father's halakhic and philosophical writings, ritual matters and customs, exegetical remarks, and apostates, a concern in his time. Besides certain social ordinances (*takkanot*) he introduced, of special historical interest are his responsa concerning the burning of the *Guide for the Perplexed*, and specific pietist practices. Questioners include prominent scholars such as R. Solomon b. Asher of Provence, Me'ir b. Barukh, disciple of R. Abraham b. David of Posquières, and Joseph b. Gershon and R. Anatoli b. Joseph, both *dayyanim* from France who had settled in Alexandria.

Polemics

Some lengthier responsa reply to the halakhic and philosophical detractors of his father's works, thereby strengthening Abraham's own prestige. In 1213 he composed in Arabic replies to Daniel Ibn al-Mashita's strictures on his father's *Book of Precepts and Code*, published as *Birkhat Avraham* (Lyck, 1865) and *Ma'aseh Nissim* (Paris, 1867). Later, Abraham declined when requested by his father's disciple Joseph Ibn Shimon to excommunicate Ibn al-Mashita for his discourteous remarks about Maimonides in his *Taqwim al-adyan* ('Redress of Religion') and his commentary on Ecclesiastes. Abraham's *Milhamot ha-Shem* ("Wars of the Lord," ed. princeps Vilnius, 1821), written in Hebrew after 1235, in which he defends his father's eschatology, immaterial conception of the Godhead, rationalizing methods, and metaphorical interpretations, was singularly directed against the criticism of the rabbis of Provence, whom he accuses of a pagan anthropomorphism influenced by their Christian environment (see *Maimonidean Controversy). Interestingly, the text was interpreted mystically in the 16th century by Eliezer Eilenberg of the kabbalistic school of Abulafia.

Exegesis

Though Maimonides' philosophical writings set out to determine a proper understanding of problematic scriptural pas-

sages, his unfulfilled ambition to compose a complete biblical commentary was to be taken up by Abraham in Arabic. Of his proposed Bible commentary only that on Genesis and Exodus, completed in 1232, has survived. A disciple of the Andalusian rationalist school, he generally prefers literal meaning, though he is not adverse to *midrash*. He quotes the generic and Spanish exegetes, especially Abraham Ibn Ezra, and even adduces the opinions of Rashi. Particularly noteworthy are comments cited in the names of his grandfather Maimon b. Joseph, and father, Moses Maimonides. He does admit moderate philosophical interpretation, adopting some of his father's doctrines, especially in connection with prophetic visions, which he calls "mysteries." The latter term he applies too to his own pietistic interpretations inspired by Sufi concepts and practices projected back into the patriarchal past. "His explications of the Bible and the Talmud are so graceful, so lucid, so persuasive that one is almost convinced that his *derash* is *peshat*, that his moralistic and pietist interpretation constitutes the literal meaning of the text" (S.D. Goitein). Despite its pleasant style, the commentary did not attain wide recognition, probably because it was not rendered into Hebrew, and has survived in a single manuscript, published, with a modern Hebrew translation, by E. Wiesenberg (London, 1958). Like his father, Abraham also applied metaphorical interpretations to the *midrash*. His *Ma'amar al Odot Derashot Hazal* (ed. Margalio), twice translated into Hebrew, is an extract from his *Kifaya*.

Theology and Halakhah

Abraham's magnum opus *The Compendium for the Servants of the Lord* (in Arabic: *Kifayat al-abidin*; in Hebrew: *Ha-Maspik le-Ovedei ha-Shem*), completed circa 1232, is a sum of theology, *halakhah*, and ethics. Of the 10 original volumes unfortunately only a small, nonetheless substantial, portion has been preserved in various libraries. This loss deprives us of a definitive assessment of his approach to legal and ethical issues. Written in a lively and attractive Arabic, but at times repetitive and digressive, it circulated widely, reaching Provence in the West, and was read at least into the 18th century in the East. Abraham had been the first to institute as a central textbook of rabbinic study his father's *Mishneh Torah*, of which his own codified program of Jewish law and ethics, likewise referred to as the *Hibbur*, has been called an Arabic version. Although relying heavily upon it, both halakhically and structurally, the *Kifaya* is an independent work betraying a very definite shift in emphasis. Departing from his father's prescriptive mode, Abraham stresses, in a descriptive tone, the spiritual significance of the traditional Jewish precepts (*mitzvot*, divine commandments) and the "mysteries" they conceal, in much the same manner as al-Ghazali did in his classical Islamic summa, *Ihya ulum ad-din* ("Revival of the Religious Sciences"). While sharing his father's dedication to strict adherence to the intricacies of religious ritual, he is sometimes at variance with his father's rulings. After one such discrepancy, he writes:

Had my father heard [my explanation], he would have admitted it just as he had ordained to admit the truth. Indeed, we always observed that he would agree even with his slightest pupil with what was right, despite the breadth of his knowledge, which never belied the breadth of his religious integrity (Dana, p. 71).

Following his father's distinction between the elite and the masses, he devotes its initial sections to the "common way," i.e. religious obligations incumbent upon the community as a whole, whereas the last sections, of a markedly pietistic tendency, expound the "special way," reserved for the elect few. Of particular interest are his ritual reforms set out in the chapters on prayer, which include such Islamic-influenced practices as ablution of the feet before worship, standing in ordered rows during prayer, kneeling and bowing, and raising the hands in supplication. Some of these had existed in Temple times but had been abandoned in reaction to Christian worship. Indeed, Abraham justified the adoption of Muslim customs and symbols as restorations of lost Jewish traditions, which, having fallen into oblivion, had been preserved by the Sufis. Using his prerogative as *nagid*, he endeavored to enforce these far-reaching measures. Although intended to improve the spiritual decorum of the synagogue, they were not to go unchallenged by the Egyptian establishment. Despite his office and family prestige, which considerably furthered the pietists' aims, his opponents, headed by the Nathanel and Sar Shalom families, who had presided over the Fostat Academy, even protested to the Sultan al-Malik al-Adil, accusing the Jewish pietists of "unlawful changes." Abraham retaliated with a memorandum signed by 200 of his followers, in which he states that his pietist practices were carried out solely in his private synagogue. He further replied to charges of "false ideas" and "gentile customs" in a special tract in defense of the pietists, whom he considers spiritually "superior to the scholars." His commentary on the Talmud and the work explaining the principles of the *Hibbur* (i.e., Maimonides' *Code*) have not survived.

Ethics

A large portion of the ethical chapters was published together with an English translation by S. Rosenblatt under the title *High Ways to Perfection*. Though in many respects he conducted himself – and indeed was considered – as the continuator and interpreter of Maimonides' doctrine, his personal style was markedly different. Though he repeatedly states that he lived according to his father's principles, he transferred the latter's elite intellectualist system to the ethical plane, molding it into a pietistic way of life rather than a philosophical one. In fact, Abraham expressed reservations about philosophy in his *Milhamot ha-Shem*:

Fools have imagined in their silliness that whoever engages in science is a heretic denying the Torah, and whoever studies philosophy follows their creed concerning the principles of the faith. Now we oppose their opinion that the world is pre-existent with the belief of the Torah, refuting them with replies and proofs to clarify the creed of the Torah that the world is ad-

ventitious and created ... as our Sages enjoined us: "Be eager to learn Torah; know what answer to give to the unbeliever" (Avot 2:19). We act likewise towards all their opinions which contradict the faith of the Torah. But, for all that, we are not to contradict their belief in the unity of the Creator (p. 59).

While recognizing the superiority of scientific speculation over the passive performance of the Law, Abraham considers the esoteric accomplishment of the precepts to be superior to philosophy. Indeed, in the *Kifaya*, he states with a note of opposition, reminiscent of Juda Halevi:

God has enabled [the true adherents of the Law who have grasped its secret meaning] to understand by means of His Law what the scientists and philosophers do not understand, and He has established for them, by means of His signs and miracles, proof for what the latter deny ...

The pivotal difference being not one of theory but of practice, Abraham's foremost goal was to become a *ḥasid* rather than a *ḥakham*. While recognizing the importance of strict observance of religious law and of intellectual accomplishment, he insists more heavily on man's ethical achievements. In his day, the great spread of Islamic Sufi brotherhoods in Egypt constituted an immediate spiritual model. Under its sway, he tried to promote a form of pietism which earned him the epithet by which he is often referred to in later literature, Abraham *he-ḥasid* ("the Pious"). The *Kifaya* preaches an extreme form of Sufi-like asceticism, whereas Maimonides, though acknowledging in his *Commentary on Avot* the merit of self-mortification, rejects it in favor of the golden mean of temperance. The fourth and final section, presents the ethical stages of the "special way," modeled on the well-known stations (*maqamat*) of classical Sufi manuals: sincerity, mercy, generosity, gentleness, humility, faith, contentedness, abstinence, mortification and solitude, whose mystical goal, *wusul* ("arrival"), culminated in the encounter with God and the certitude of his light. Entrance to the "path" is subject to an initiatory ritual such as the bestowal of a mantle, as Elijah did:

By casting his cloak over [Elisha], Elijah hinted to him... that Elijah's spiritual perfection would be transferred to him and that he [Elisha] would attain the degree which he himself had attained. Thou art aware of the ways of the ancient saints [*awliya*] of Israel, which are not or but little practised among our contemporaries, that have now become the practice of the Sufis of Islam, "on account of the iniquities of Israel", namely that the master invests the novice [*murid*] with a cloak [*khirqah*] as the latter is about to enter upon the mystical path [*tariq*]. "They have taken up thine own words" (Deuteronomy 33:3). This is why we moreover take over from them and emulate them in the wearing of sleeveless tunics and the like (Rosenblatt, 2: 266).

Abraham openly admires the Muslim Sufis, whose practices, he claims, ultimately derive from ancient Israelite custom. After having stated that the true dress of the ancient prophets of Israel was similar to the ragged garments (*muraqqāʿat*) of the Sufis, he declares:

Do not regard as unseemly our comparison of that [the true dress of the prophets] to the conduct of the Sufis, for the latter imitate the prophets [of Israel] and walk in their footsteps, not the prophets in theirs. (Rosenblatt, 2: 320).

He finds biblical counterparts for Sufi ascetic exercises such as combating sleep, solitary retreats in dark places, weeping, nightly vigils and daily fasts, as in the following passage:

We see the Sufis of Islam also profess the discipline of mortification by combatting sleep. Perhaps such a practice is derived from the statement of David: 'I will not give sleep to mine eyes, nor slumber to mine eyelids' (Ps. 132:4) ... Observe then these wonderful traditions and sigh with regret over how they have been transferred from us and appeared amongst a nation other than ours whereas they have disappeared in our midst. My soul shall weep in secret ... because of the pride of Israel that was taken from them and bestowed upon the nations of the world (Rosenblatt, 2:322).

One of the most typical aspects of the Sufi path is the necessity of the spiritual guidance of an experienced teacher who has traversed all the stages of the path in order to initiate the spiritual wayfarer into its intricacies. Abraham sees the origin of this principle in the discipline of the ancient prophets:

Know that generally in order for the Way to attain successfully its true goal [*wusul*], it must be pursued under the guidance [*taslik*] of a person who has already attained this goal, as it is said in the tradition: "Acquire a master" (Avot 1:6). The biblical accounts concerning masters and their disciples are well known; Joshua the servant of Moses was one of his disciples, who, having attained the goal, succeeded him. The prophets adopted the same conduct. Samuel's guide [*musallik*] was Eli, Elijah was that of Elisha, and Jeremiah that of Barukh son of Neriah. Moreover the "disciples of the prophets" were thus called because the prophets were their spiritual guides. This practice was adopted by other nations (the Sufis), who instituted in imitation of Jewish custom the relation between *shaykh* and servant, master and disciple ... If the wayfarer is capable and remains faithful to instructions, he will attain his goal through the guidance of an accomplished master (Rosenblatt, 2: 422).

The denomination "the disciples of the prophets" is a key to the process of recovering from the Sufis the lost "prophetic discipline." Its restoration was a prerequisite to the return of prophecy itself, whose imminence was predicted by Maimonides. The absence of the final chapter of the *Kifaya* which dealt with the attainment of the ultimate goal (*wusul*), is an irretrievable loss.

Other Works

Abraham refers to other compositions now lost, such as a treatise on truth, and an explanation of the 26 premises of the introduction to the second part of the *Guide*. It has been shown that the *Kitab al-hawd* and the *Taj al-'arifin*, ascribed to him by the 17th century chronicler Sambari, probably belong to other authors. Some manuscripts erroneously attribute to him the *Sodot ha-Moreh* ("Secrets of the Guide"), in fact by Abraham *Abulafia. His authorship of the folktale *Ma'aseh Yerushalmi* (Jerusalem, 1946), is unlikely.

Influence

Abraham was at the hub of a pietistic circle of a sectarian nature whose adepts were dissatisfied with formal religion. Partly inspired by Abraham Abu ar-Rabia (d. 1223), also known as *he-ḥasid*, whom he calls “our Master in the Way,” this circle included Abraham Maimonides’ father-in-law, Hananel ben Samuel, and his own son Ovadiah (1228–1265) author of the mystical *al-Maqala al-Hawdiyya* (“Treatise of the Pool”). Despite an enormous literary output, the movement did not engender a widespread community of ascetics similar to Sufism, probably because of the vehement opposition to Abraham’s ritual reforms. Indeed, this opposition, as well as the movement’s own elitist character seriously impeded its spread. With the general decline of Oriental Jewry, his Sufi-type Jewish pietism sank into oblivion, though some of its mystical elements were possibly absorbed into the nascent Kabbalah. However, the exegetical and ethical writings of several of his direct descendants perpetuated his tendency to temper Maimonides’ spiritual ideology with Sufi mysticism. Later authorities, such as the 13th cent. Karaite Yefet b. Za’ir, *Sefer ha-Hinnukh*, Aaron ha-Yarḥi, R. *David ibn Abi Zimra, Moses al-Ashkar, Joseph *Caro, Abraham Ibn Migash, and Mas’ud *Rakah, utilize his works, which were still being read in the 18th century. Abraham Maimonides passed away on Monday, 18 Kislev, 1237. Eliezer b. Jacob ha-Bavli (*Diwan*, no. 199) composed an elegy for him in which he wrote:

Who believed wholeheartedly in his Lord,
Counted to him as righteousness?
Who arose and, with the hand of reason, overthrew the idols
of ignorance,
Reducing its image to shivers?
Who established in Memphis [= Egypt] an inn, opening its
gates to wayfarers?
Who bound upon the altar of understanding, like young lambs,
the offspring of thought?
With whom did his Lord make a covenant between the pieces,
with flaming torches?
’Twas Abraham, who, the day of his demise, rent our hearts
and inner parts.

Although his father’s blessing of greatness had been fulfilled, Abraham’s renown may have been greater still had he not been overshadowed by Maimonides’ towering figure.

[Paul Fenton (2nd ed.)]

ABRAHAM BEN MOSES HA-KOHEN HA-SEPHARDI (late 15th and early 16th centuries), Italian rabbi. A scion of a prominent priestly family in the Spanish city of Cuenca, Abraham went to Italy at about the age of 20 in the wake of the expulsion from Spain. He resided first in Ferrara, then moved to Bologna, where he was appointed rabbi. He became involved in the controversy concerning the litigation between Abraham Raphael Finzi of Bologna and Immanuel di Norzi of Ferrara. The former did not wish the case to be tried in Ferrara, because of Norzi’s strong influence there. When R. Abraham *Minz insisted that the Ferrara court had jurisdiction, a controversy ensued. The rabbinical opinions expressed on both sides were published under the title *Piskei ha-Ga’on R. Liva mi-Ferrara ve-Rav Avraham Minz* (Venice, 1519), and included that of Abraham b. Moses. The dispute was brought before the rabbinical authorities of Poland, who agreed with Abraham b. Moses. His learning won particular praise from R. Jacob *Pollak, the father of Polish talmudic scholarship, and from R. Moses *Isserles (in his supplements to the *Sefer Yuḥasin*). Attacked by Minz as a “contentious priest” (cf. Hos. 4:4) and a “smooth-talking Sephardi,” Abraham countered by deeming the abusive epithets titles of honor and stating at the same time that he had never previously had a dispute with anyone. The rest of his responsa, his commentary on the *She’iltot*, sermons, and comments on Rashi’s commentary on the Pentateuch, remain unpublished. He published an edition of the *Sefer Ḥasidim* (“Book of the Pious”) with an introduction and an index (Venice, 1538). His son-in-law, the husband of his daughter Paloma, was the historian Joseph ha-Kohen.

[Jacob Haberman]

ABRAHAM BEN NATHAN (end 11th–beginning 12th century), talmudic scholar and *dayyan* in Fostat, where he was active in the first quarter of the 12th century. His father Nathan was the *av bet din* of the Palestinian academy (probably at Tyre). Abraham also lived in Erez Israel toward the end of the 11th century and his signature is affixed to a document issued at Ramleh. In 1102, however, he was in Fostat, and his signature appears as the first on an attestation document. In a *genizah* document dated from 1116 Abraham is described as the “great, distinguished rabbi,” and in letters he is addressed as “foundation stone and leader of the yeshivah” and “pride of the judges and support of the *nasi*”; he is also designated as *reish bei rabbanan* and *rosh ha-seder* (head of the academy). It is assumed that Abraham held the officially recognized office of *dayyan al-Yahud* (“judge of the Jews”), regarded by the authorities as the representative dignitary of the Jews second to the *nagid*.

BIBLIOGRAPHY: Mann, *Egypt*, 1 (1920), 194, 267; 2 (1922), index.

[Moshe Nahum Zobel]

ABRAHAM BEN NATHAN (Abu Ishāq Ibrahim ibn ʿAṭā; c. 1025), first *nagid* of the Jewish community of Kairouan. He was court physician to Badis, the viceroy of Tunisia, and to al-Muʿizz his son and successor, who became independent ruler. Abraham did much for the Jewish communities of North Africa. Two poems praising the *nagid* for his communal activities are extant. Ishāq ibn Khalfon, the court poet, dedicated several of his poems to his benefactor. He was honored in a song of praise by R. *Hai Gaon. Abraham exchanged responsa with R. *Samuel b. Hophni, the *gaon* of Sura. The latter's son, R. Israel, dedicated a book on liturgical laws to him.

[Simha Assaf / Abraham David (2nd ed.)]

ABRAHAM BEN NATHAN HA-YARHI (c. 1155–1215), Provençal talmudic scholar. His name “Ha-Yarhi” is the Hebrew translation for “of Lunel” where he spent many years. He was born at Avignon and was related to *Isaac b. Abba Mari. He studied with the scholars of Lunel, with Abraham b. David of Posquières, and in Dampierre in northern France, under the tosafist Isaac the Elder, and other scholars of his circle. Abraham wandered through many countries, and visited Toledo, Spain, in 1194. Later he settled there and apparently became a member of the rabbinical court (before 1204). He left Toledo again, went to France, and returned to Spain in 1211.

During his travels Abraham made a point of “observing the customs of every country and every city” and noted that “they [the Jews] varied in their religious practices and that they were divided into 70 languages.” He recorded various customs, particularly concerning prayer and other synagogue usages, in a book which he called *Manhig Olam* known popularly as *Sefer ha-Manhig* (Constantinople, 1519; republished by A.N. Goldberg, Berlin, 1855). This work has come down in a corrupt form. Chapters and paragraphs are omitted and the printed text contains many mistakes. Various attempts have been made (by Freimann, Toledano, and Raphael) to correct it and fill some of the lacunae. The correct text however has been preserved in the manuscripts. In this book he describes the customs of both southern and northern France, of Germany, England, and Spain. His literary sources include the Talmuds and the Midrashim, the works and responsa of the *Geonim* and the writings of French, Spanish, and other scholars. This work is the first book of *minhagim* (local customs) written in Europe. Its explicit purpose was to show that there is a halakhic basis for every *minhag*. The need for such a compilation was mainly the result of the

spread of the halakhic works of the Spanish authorities in Provence, which took place at that time and caused confusion and misunderstanding at both places (see Asher b. Saul). Abraham also wrote a commentary to *Massekhet Kallah Rabbati* (Tiberias [Jerusalem], 1906; JQR, 24 [see bibliography]) and *Mahazik ha-Bedek* on the laws of ritual slaughtering and forbidden foods (lost). Some of Abraham's responsa are preserved (S.A. Wertheimer, *Ginzei Yerushalayim*, 1 (1896), 19–32).

ABRAHAM BEN N... HA-BAGHDADI (10th century), communal leader in Babylonia. Information on Abraham is to be found in the poems of praise dedicated to him by one Abraham ha-Kohen, who seems to have been his secretary. He held a military command under the caliph and was a protector of the Jewish community. The reopening of the yeshivah of *Sura about 988 is attributed to him. He also maintained friendly relations with *Hai Gaon. There is reason to believe that Abraham ha-Baghdadi was a member of the *Netira family; he was possibly the son of Netira II and the grandson of Sahl, who was the son of Netira I. One of his sons was named Sahl, probably after his great-grandfather.

[Abraham David (2nd ed.)]

ABRAHAM BEN SAMUEL HE-ḤASID (of Speyer; 12th century), rabbi and liturgical poet, the brother of R. *Judah b. Samuel he-Ḥasid. Abraham b. Samuel and *Judah b. Kalonymus, together with R. Shemariah b. Mordecai, later constituted the *bet din* of *Speyer, and are referred to as “the wise men of Speyer.” *Eliezer b. Nathan of Mainz describes Abraham as “the sun of our orphaned age.” Abraham's retort to a baptized Jew is recorded in the *Sefer Nizzahon*. In contrast to his father and brother, who were both famous for their mysticism and pietism, Abraham was known for his esoteric teachings and only slight traces of esoteric ideas can be found in his writings. Abraham wrote four elegies in which he described Jewish suffering during the first two Crusades (1096 and 1147).

[Jacob Freimann]

ABRAHAM BEN SAMUEL OF DREUX (second half of 13th century), rabbinical scholar in northwestern France. Abraham was the chief spokesman in a religious disputation in Paris with Paul, a Spanish “cordelier” (conceivably to be identified with Pablo *Christiani) under the reign of Philip the Bold (1270–85). He evidently wrote a commentary on the Book of Daniel, from which was derived an explanation of Daniel 9:24 mentioned in the record of the controversy. It was formerly thought he came from Dreux.

ABRAHAM BEN SHABBETAI HA-KOHEN (1670–1729), poet, physician, artist, and philosopher. Born in Crete when the island was under Venetian rule, he studied medicine and philosophy at the University of Padua and then practiced on the island of Zante. He was the author of *Kehunnat Avraham* (Venice, 1719), a paraphrase of portions of Psalms in rhymed verse in various meters, to which was appended *Benei Keturah*, a similar paraphrase of *Pirkei Shirah*. The title page of the book is followed by an engraved self-portrait of the author, who was also probably responsible for other engravings in the book. He also published a volume of homilies on the Pentateuch, *Kevod Hakhamim* (Venice, 1700).

[Cecil Roth]

ABRAHAM BEN SIMEON OF WORMS (15th century), pseudonym of the unknown author of a supposedly comprehensive guide to “the divine magic” according to the Kabbalah, especially the conjuration of the Guardian Angel who presides over every man’s spiritual life. The author tells at length the story of his life and describes his wanderings that began in the year 1409 and lasted for decades. He lists the heroic deeds which he accomplished with magic devices. The author alleges that he wrote the book for his young son Lamech. The book is found in numerous German, French, and English manuscripts, dating from the 16th to the 18th centuries. Part of it was translated (c. 1700) into Hebrew under the name *Segullat Melakhim* (“Treasure of Kings”). The book was no doubt written originally in German, although the author claims it to be a translation from Hebrew. The question of its authorship, whether Jewish or Christian, is a matter of dispute. The general style of the book shows the author’s knowledge of Hebrew. The work may well have been written by a Jew, with the passages with clearly Christian content added later. It may also have been written by a Christian kabbalist who had read the writings of *Pico della Mirandola and Johannes *Reuchlin. The German version was printed at the beginning of the 19th century, bearing, however, the date 1725. The book has had great influence among those interested in the occult in England and France since the end of the 19th century. In its English version (1898) it is attributed to Abra Melin “The

Mage,” which is but a corruption of the name Abramelin, mentioned as the main teacher of the author. Abramelin seems to be taken from Abraham Elymas, the latter being the name of a magician mentioned in the Acts of the Apostles. The magic material in the book is essentially of Jewish origin, and constitutes one of the main channels of Jewish influence on late Christian magic. The German and the French–English versions differ considerably.

[Gershom Scholem]

ABRAHAM BEN SOLOMON (c. 1400), Oriental biblical exegete, possibly from Yemen. His commentary on the Bible is written in Arabic, but contains some Hebrew excerpts. He makes use of very early midrashic sources, some otherwise unknown, quotes “Simeon b. Yoḥai in the Zohar,” and draws upon authorities who preceded him, primarily Saadiah Gaon, Jonah ibn Janaḥ, Nathan b. Jehiel, Tanhum b. Joseph Yerushalmi, and David Kimḥi. In his commentary, Abraham draws linguistic parallels between Arabic, Aramaic, and Hebrew, and includes details of the life of Jews and Arabs in the Orient. Parts of his commentary, known as *Midrash Alzi’ani*, written about 1422, are extant in various Yemenite manuscripts in Jerusalem, Oxford, and London. The British Museum manuscript, copied in 1513, contains his commentary on the Early Prophets, while a Bodleian manuscript, comprising three volumes, includes that on the Early Prophets, Jeremiah, and Ezekiel.

[Yehoshua Horowitz]

ABRAHAM BEN SOLOMON OF SAINT MAXIMIN (15th century), French physician. César Nostradamus praises Abraham as a scholar, philosopher, and physician of Provence (*Histoire et Chronologie de Provence* (1624), 618). It was probably Abraham and other Jewish physicians who drew the attention of René of Anjou, count of Provence (1409–1480), to the deplorable situation of the Jews in his kingdom. René issued a decree in 1454, which lessened the hardships brought about by the proclamation of Charles II forcing all Jews to wear the wheel-shaped badge. It also confirmed the right of Jews to practice medicine. René set an example by making Abraham his personal physician and exempting him from all taxes levied on Jews. It has been suggested that Abraham may be identical with Abraham Avigdor II (1433–1488) of Marseilles (REJ, 6–7 (1883), 294). Gottheil (EJ, 1 (1928), 120) adds that Abraham might be the son of Solomon b. Abraham Avigdor I, the translator.

[Isidore Simon]

ABRAHAM BEN SOLOMON OF TORRUTIEL (b. 1482), chronicler. Born in Spain, after the Expulsion of 1492 he was brought to Fez by his 70-year-old father, Solomon of Torrutiell, an expert in Talmud and a pupil of R. Isaac *Canpanton. In Fez he participated actively in the life of the Jewish community. In 1510 he wrote his Hebrew chronicle, probably not preserved in its entirety. As he indicates in the introduction, his plan was to continue the *Sefer ha-Kabbalah* of Abraham *Ibn Daud. In the first part of his book he gives additions to that work, including some Jewish sages not enumerated by Ibn Daud. In the second part he continues the history of Jewish scholars and scholarship up to 1463, in his own time. The third section is a chronicle of Spanish kings seen from a Jewish perspective, followed by the history of the expulsion of the Jews from Spain and their establishment first in Portugal and later on in Fez, until 1510.

In his introduction he speaks of his intention to include in his book the prognostications of Abraham *Zacuto. From this and other indications it has been concluded that Abraham used for his chronicle the works of Abraham Zacuto (*Sefer Yuhasin*) and Joseph b. *Zaddik of Arévalo. Detailed analysis of the three works shows all used the same Hebrew source, consisting of a chronology of Jewish scholars and a scanty summary of a well-known Spanish world chronicle. Abraham also mentions traditions which are not found in the works of the other two authors. Particularly valuable are his notes on the fate of the Spanish exiles, based on his personal eyewitness observations. The work, first published in Neubauer's *Chronicles* (V. 101ff.), has appeared in a Spanish translation by J. Bages (Granada, 1921). He seems to be also the author of a kabbalistic work, *Avnei Zikkaron*, translated into Spanish by F. Cantera (1928).

Moreno (tr.), *Dos crónicas hispanohebreas del siglo xv* (1992).

[*Encyclopaedia Hebraica* / Angel Saenz-Badillos (2nd ed.)]

ABRAHAM DOV BAER OF OVRUCH (d. 1840), rabbi and ḥasidic leader in the Ukraine. Abraham succeeded his father David as rabbi of Khmelnik. He subsequently became rabbi in Ovruch and Zhitomir. He was a devoted disciple of Nahum of Chernobyl, and after Nahum's death kept in contact with his son Mordecai. Abraham Dov went to Erez Israel in 1831, settling in Safed, where he became leader of the Ḥasidim. During the calamities which struck Safed at that time, caused by

Druze attacks and an earthquake, Abraham organized relief and encouraged the people to remain. His teachings are recorded in his book *Bat Avin* (Jerusalem, 1847).

[Adin Steinsaltz]

ABRAHAM EL-BARCHILON, fiscal agent of Sancho IV of Castile, 1284–95. Abraham was born in Toledo. His close connection with Don Lope de Haro, a grandee of Sancho's court, helped to augment his influence. After holding various fiscal offices, Sancho leased him his principal state revenues, including the prerogative to mint gold coins, the collection of the debts of Jewish creditors, receipts from fines and penalties imposed for fiscal offenses, export duties, and the arrears of all the taxes farmed during the reign of Sancho's father, Alfonso X. Abraham was also authorized to regain for the Crown all alienated estates. A series of documents of 1287–88 dealing with this matter bears his signature in Hebrew. Abraham continued in office even after Lope de Haro's execution in 1289, now working in partnership with the poet Todros Halevi.

BIBLIOGRAPHY: Baer, Spain, 1 (1961), 131–3; Baer, *Urkunden*, 1, pt. 2 (1936), 72–77, 89 ff.; Neuman, Spain, 2 (1942), 245 ff., 338.

ABRAHAM GAON (tenth century), head of the Palestinian yeshivah. Abraham was a great-grandson of the *gaon* *Aaron b. Meir who was involved with *Saadia in the calendar controversy of 921–22. The view that Abraham was the founder of the Palestinian gaonate has been shown to be untenable, since this gaonate existed at least a century before Abraham and its supremacy was then recognized by its Babylonian counterpart. Manuscripts of genealogical tables mentioning Abraham refer to four of his sons. One of them, Aaron, became the successor to his father's successor, Josiah, *av bet din*. Isaac was "third man" (i.e., next in rank to the *av bet din*) under Abraham's immediate successor, Joseph ha-Kohen, i.e., while Meir was head of the academy (*rosh ha-seder*), probably in Egypt.

BIBLIOGRAPHY: S. Poznański, *Babylonische Geonim...* (1914), 4–5, 84, 97; Mann, *Egypt*, 1 (1920), 71, no. 6; S. Assaf and L.A. Mayer (eds.), *Sefer ha-Yishuv*, 2 (1944), 89, 127; Abramson, *Merkazim*, 31, 32.

ABRAHAM GERSHON OF KUTOW (d. c. 1760), ḥasid, talmudic scholar, and kabbalist. He was probably born in Kutow (Kuty), Ukraine, where his father was rabbi. He was the brother-in-law of *Israel b. Eliezer Ba'al Shem Tov. As a youth, he moved to Brody where he continued to study at a *klaus*. According to ḥasidic tradition, Abraham resented his sister's marriage to the Ba'al Shem Tov and at first slighted him, but later became one of his most ardent disciples. In 1747 he went to Erez Israel, intending to spread the teachings of Ḥasidism there, settling first in Hebron and later in Jerusalem. He formed especially close ties with the Sephardi scholars in Jerusalem and in other countries. The correspondence between him and Israel Ba'al Shem Tov is an important source of information for the beginnings of the ḥasidic movement. According to a tradition transmitted by R. Israel of Kuznitz,

R. Abraham Gershon told the Besht how ideal prayer is connected to a divestment of corporeality and the speech of the *Shekhinah* from the throat of the person who prays.

[Adin Steinsaltz / Moshe Idel (2nd ed.)]

ABRAHAM HA-BAVLI (apparently early 11th century), grammarian. Abraham ha-Bavli is mentioned by Abraham Ibn Ezra and Jacob b. Meir (Rabbenu Tam). His *Sefer ha-Shorashim* (“Book of Roots”), only part of which has been published (1863), deals with roots of one to four letters, interchanges in the order of the root letters, homonymic roots, and an elision or interchange of one of the root letters for another letter. Some scholars mistakenly identify him with the Karaite grammarian David b. Abraham *Alfasi.

BIBLIOGRAPHY: A. Neubauer, in: *Journal Asiatique*, 2 (1863), 195. **ADD. BIBLIOGRAPHY:** A. Maman, *Comparative Semitic Philology in the Middle Ages from Saadia Gaon to Ibn Barun (10th–12th cent.)* (2004).

[Meir Medan]

ABRAHAM HA-LEVI (15th century), leader of the Jerusalem community. Abraham went on a mission to the Mediterranean islands and Italy in 1455, two years after the Turkish capture of Constantinople. The capture had aroused many messianic hopes among Jews in Jerusalem. These hopes were strengthened by the tales told by pilgrims from Babylonia, Persia, and Yemen. They told of a war in Ethiopia against the Christians, an earthquake in Jerusalem which uncovered remains of the First Temple, the expulsion of the Franciscans from Mount Zion, and the dream of an aged Babylonian kabbalist to the effect that the “Prince” (Guardian Angel) of Israel would overcome the “Prince” of Edom (Rome). Abraham also appealed for help in maintaining the holy places of Jerusalem. In the course of his mission he arrived at Corfu, then under Venetian rule. There he was denounced to the authorities, who destroyed his credentials. Abraham’s letters are an important source for the history of the Jewish community in Jerusalem in the 15th century.

BIBLIOGRAPHY: A. Neubauer, in: *Kobez al Jad*, 4 (1888), 45–50; A. Yaari, *Iggerot Erez Yisrael* (1943), 88–89; Yaari, Sheluḥei, 211–2.

[Avraham Yaari]

ABRAHAM ḤAYYIM BEN GEDALIAH (1750–1816), Galician rabbi. Abraham studied under his father Gedaliah b. Benjamin Wolf, who was *av bet din* in Zloczow. He was a disciple of *Dov Baer the “Maggid of Mezhirech,” *Jacob Joseph of Polonnoye, and *Jehiel Michel of Zloczow. He was also a pupil of the two brothers: Samuel Shmelka Horowitz of Nikolsburg and Phinehas Levi Horowitz, his first father-in-law. When Isachar Baer (his father-in-law by his second marriage) immigrated to Erez Israel, Abraham Ḥayyim succeeded him as *av bet din* of Zloczow. He was a brilliant exegete and facile writer, possessed of an easy, graceful style, and is referred to

as a “learned exponent of ḥasidic thought.” His *Orah Ḥayyim* (Zolkiew, 1817) on the Bible is a treasury of thoughts and sayings of the ḥasidic rabbis. It was published posthumously by his stepson, Joseph Azriel b. Ḥayyim Aryeh Leibush, with an introduction by Ephraim Zalman Margolioth, who praises his piety and charity and gives biographical details. Abraham Ḥayyim wrote a commentary on *Pirkei Avot*, *Peri Ḥayyim* (1873), and a commentary on the *Haggadah*, under the same name (1873).

[Mordecai Ben-Yehzekiel]

ABRAHAMITES (also “Nový Bydžov-Israelites”), Bohemian judaizing sect, a product of the Counter-Reformation. They revered the Old Testament, rejected the Trinity, abstained from pork, and rested on Saturday; some members practiced circumcision. The existence of the sect became known to the authorities in 1747 in the region of *Nový Bydžov. A commission of inquiry was then appointed and proceedings were instituted against 60 Abrahamites, which lasted until 1748, when the leader, Jan Pita, a tailor, and three others were executed. As Pita admitted to having had contact with Nový Bydžov Jews, one of them, R. Mendel, was burnt at the stake (1750) after separate proceedings; others of the accused Jews adopted Catholicism. The sect continued clandestinely until the patent of toleration of non-Catholics was issued in 1781, when the Abrahamites came into the open. However, since they refused to comply with an official injunction to declare themselves either Christian or Jewish, they were deported to garrisons on the Hungarian border and the men forced into military service. The sect subsequently disintegrated.

BIBLIOGRAPHY: Prokès, in JGGJČ, 8 (1936), 147–308; *Dr. Blochs Wochenschrift* (1903), 476–7, 509–11; J. Moštik, *Sekta tak zvaných israelitů severovýchodních českách* (1938).

ABRAHAM JOSHUA HESCHEL OF APTA (Opatow; d. 1825), Polish ḥasidic **zaddik*, known as “the Rabbi of Apta.” He was the disciple of *Elimelech of Lyzhansk (Lezhaisk) and possibly also of the *maggid* *Jehiel Michel of Zloczow (Zolocher). He served as rabbi of the communities of Kolbuszowa Apta (Opatow) from 1809 to 1813 and Jassy (Moldavia), in 1813–14 settling in Medzibozh (Podolia), where he lived until his death. Abraham strongly opposed the *maskilim* in Brody for disseminating what he considered heretical ideas among Russian Jewry. Following the discriminatory legislation passed by Czar *Alexander I, depriving Jewish contractors (arendars) and taverners of their livelihood, Abraham and Isaac of Radzivilow ordered a public fast. As president of the Volhynian *kolel*, he was active in fundraising for the community in Erez Israel. Acknowledged as an authority by many *zaddikim* in his old age, Abraham was called upon to excommunicate deviationists in the controversy between the Bratslav and

*Przysucha (Pshiskha) Ḥasidim, and did his best to promote unity and peace in the ḥasidic camp.

Abraham left instructions that his sole epitaph should be *Ohev Yisrael* (a lover of Israel), a description by which he is remembered among the Ḥasidim. The problems of Jewish leadership and care for his people exercised his imagination, and he would recount fantastic “reminiscences” about the events he said that he had witnessed in former incarnations as high priest, a king of Israel, *nasi*, and exilarch. His revelations were regarded by the Ḥasidim as mysteries of the type experienced by *Rabbah b. Bar Ḥana. A religious ecstatic, he delivered homilies on Sabbaths and festivals emphasizing love of the Creator and the importance of cleaving (**devekut*) to Him. He exerted a wide popular influence. His adherents believed that the violent gestures with which he accompanied the sermons denoted *hitpashetut ha-gashmiyyut* (the shedding of bodily existence). One of Abraham Joshua Heschel’s contemporaries recounts that “in the midst of the meal, when the spirit was upon him, he cried out in a loud and dolorous voice and gesticulated; his head fell back almost to his heels, and all the people who sat round the sacred table... trembled and feared... and he started to relate secrets of the Torah and hidden mysteries; he opened his saintly mouth and spoke with great fervor; his face was [like] a torch, he raised his voice in ecstasy.” Nevertheless, Abraham Joshua Heschel concentrated on the system of practical Zaddikism and held that the *zaddik* “through his wisdom lifts up Israel to bind them to heaven and to bring prosperity, blessing, and life from the source of blessings.” His works include *Torat Emet* (Lemberg, 1854) and *Ohev Yisrael* (Zhitomir, 1863).

Abraham’s son ISAAC MEIR (d. 1855) succeeded his father as *zaddik* of Medzibozh, later moving to nearby Zinkov. His grandson MESHULLAM ZUSSIA (d. 1886) was also *zaddik* in Zinkov; he edited his grandfather’s sermons, *Ohev Yisrael*. His descendants continued to be revered as *zaddikim* in various places in Podolia (Krolevets, Kopycznce, Ternopol).

[Avraham Rubinstein]

ABRAHAM JUDAEUS BOHEMUS (Abraham of Bohemia; d. 1533), banker and tax collector. Abraham first served as banker to Ladislas II, king of Hungary and Bohemia. He emigrated to Poland in about 1495 and settled in *Cracow. Armed with recommendations from Ladislas and Maximilian I of Germany, he soon became banker to the Polish king Alexander Jagellonski and later to Sigismund I. In 1512 Sigismund appointed him collector of the taxes paid by the Jews in Greater Poland and Masovia, and in 1514 the office was extended to include the Jews throughout Poland. The king

warned the Jews, and especially the rabbis, to cooperate with him and not to interfere with him by excommunicating him, or in any other way. Abraham was several times acknowledged to be under the sole jurisdiction of the king. Abraham used his influence to act as **shtadlan* at the royal court for his fellow Jews. Sigismund had to remind the Jews of Cracow to pay the promised 200 florins to Abraham “for defending them against accusations brought up against them.” In 1518 Abraham was granted freedom of commerce and banking in all Poland. According to tradition he was the father (or grandfather) of Mordecai *Jaffe.

ABRAHAM OF BEJA (second half of 15th century), Portuguese traveler and linguist. He was apparently also a Hebrew scholar and styled “rabbi” for that reason. In 1485 King João II of Portugal sent João Perez of Covilhão across Africa to investigate the country of the mythical Christian king Prester John, and to discover the land route to India. Impressed by Abraham’s knowledge of languages, King João sent him across the Mediterranean to join up with the expedition together with another Jew, Joseph Capatiero, who already had travel experience in the East. In due course he linked up with Perez in Egypt and continued with him as far as Ormuz in India. At that point he was left to return westward by the caravan route, via Damascus and Aleppo.

[Cecil Roth]

ABRAHAM OF SARAGOSSA (early ninth century), merchant in Muslim Spain who traded mostly with the Franks and eventually settled in the Frankish kingdom. There he received (around 835) a *privilegium* from Louis the Pious, one of the three extant privileges granted to Jewish merchants by a Carolingian monarch. It became the standard for succeeding privileges, including the following aspects: court oaths and trial procedures, services and representation, right to trade, and imperial protection. According to this privilege, Abraham entrusted himself to the emperor in a manner similar to a royal vassal.

ABRAHAM OF SARTEANO (late 15th century), Italian Hebrew poet. Abraham was born in Sarteano, Tuscany. He wrote a poem of 50 tercets entitled “*Sone ha-Nashim*” (“The Woman Hater”) in which he denounces women, drawing examples from the Bible, from rabbinic legends, and from Greek and Roman history and mythology. The poem aroused a spirited

literary controversy over the merit of women which continued into the 16th century. Abraham's remarks were challenged by Avigdor Fano in *Ozer Nashim* and by Elijah *Genazzano in *Melizot*.

[Jefim (Hayyim) Schirmann]

ABRAHAMS, family of English rabbis and scholars. **ABRAHAM SUZMAN** (c. 1801–1880) migrated from Poland to England in 1837, becoming principal *shohet* in London in 1839. He spent the end of his life in Palestine. He wrote an autobiography *Zekhor le-Avraham* (1860). His son **BARNETT** (1831–1863) was the *dayyan* of the Sephardi community in London (although himself an Ashkenazi) and was appointed principal of Jews' College in 1856. A graduate of [University College, London, he was the first English rabbi to hold a British university degree. He died at the age of only 32 of acute rheumatism. Barnett's three sons, Joseph, Moses, and Israel, devoted their lives to serving the Jewish community. **JOSEPH** (1855–1938) was rabbi in Melbourne, Australia, from 1883 to 1923 and rabbi emeritus from 1924 until his death. He helped found the United Jewish Education Board of Victoria and was its president (1896–1901). He wrote a number of monographs on Jewish subjects, the most important one being *The Sources of Midrash Echah Rabba* (Berlin, 1883). **MOSES** (1860–1919) was the minister of the Jewish community of Leeds. He was the author of *Aquila's Greek Version of the Hebrew Bible* (1919). Israel *Abrahams was a noted scholar.

[Cecil Roth]

ABRAHAMS, family of English athletes. **SIR ADOLPHE ABRAHAMS** (1883–1967), physician and author, studied at Cambridge, where he was sculling champion (1904–05). During World War I he was a major in the Royal Medical Corps and subsequently held several important medical posts in London hospitals. He was also medical officer in charge of the British Olympic teams from 1912 until 1948, president of the British Association of Sports and Medicine, and a fellow of the Royal Society of Medicine. His many publications included: *The Photography of Moving Objects* (1910); *Indigestion* (1920); *Woman – Man's Equal?* (1954); and two books written with his brother, Harold: *Training for Athletes* (1928) and *Training for Health and Athletics* (1936).

SIR SIDNEY ("SOLLY") ABRAHAMS (1885–1957), British colonial official, brother of Adolphe and Harold. Born in Birmingham, he studied at Cambridge and entered the British Colonial Service, becoming town magistrate in Zanzibar (1915), advocate general, Baghdad (1920), attorney general

of Zanzibar (1922), chief justice of Uganda (1933–34), Tanganyika (1934–36), and Ceylon (1936–39). A noted athlete, he represented Cambridge in the long jump (1904–06) and the 100-yard dash (1906), and competed for Great Britain in the 100-meter race and long jump in the 1906 Olympics, finishing fifth in the long jump with a leap of 6.21 meters. He also competed in the long jump at the 1912 Olympics, finishing in 11th place with a jump of 6.72 meters, just shy of 22-feet. Sidney was elected president in 1947 of Britain's oldest athletic club, the London Athletic Club, becoming the first Jew to hold the post.

HAROLD MAURICE ABRAHAMS (1899–1978), athlete and lawyer who became the first European to win an Olympic sprint title when he won the 100-meter dash in 1924. Born in Bedford, he began racing at the age of eight following his brother Solly, and at the age of 12 won his first 100-yard race in 14.0 seconds. He won the English public schools' 100-yard dash and long jump titles in 1918. He studied at Cambridge, where he won eight victories against Oxford in the 100-yard, 440-yard, and long jump from 1920 to 1923. Harold was also the president of the university's Athletic Club.

At the 1920 Antwerp Olympics, Harold was a member of the sixth place 4 × 100-meter team, but failed to advance past the preliminary heats in the sprints or long jump. In 1924 Harold established a British long jump record of 24 feet, 2½ inches, a record that stood for the next 32 years. Six months before the 1924 Games, Harold hired a personal coach, Sam Mussabini, thus becoming the first British amateur to pay for a personal trainer. At the 1924 Olympics, he won a silver medal in the 4 × 100-meter (41.2), and finished in sixth place in the 200-meter finals. For the 100-meter final, his key British rival, Eric Liddell, withdrew from the competition because it was held on Sunday and Liddell was a devout Christian. Facing his main competition against Americans Jackson Scholz and Charles Paddock – the 1920 gold medallist and world-record holder – Harold surprised everyone by winning the gold medal in 10.6 seconds.

Soon after his Olympic triumph of 1924, he suffered an injury while long jumping and retired from international athletics. He remained a prominent figure in the athletics world however, and was captain of the British Olympic team (1928) and chairman of the British Amateur Athletic Board from 1968 to 1975. He also reported on athletics for English press and radio. During World War II, he served in the Ministry of Economic Warfare, was head of the statistics section (1941–42), and in 1946 became an assistant secretary at the Ministry of Town Planning. He became one of the most famous Olympic athletes in history with the release of the film *Chariots of Fire* in 1981, which told of the struggles of Harold, Liddell, and Mussabini.

Philip Noel-Baker, Britain's 1912 Olympic captain and a Nobel Prize winner, wrote of Harold in 1948: "I have always believed that Harold Abrahams was the only European sprinter who could have run with Jesse Owens, Ralph Metcalfe, and

the other great sprinters from the U.S. He was in their class, not only because of natural gifts – his magnificent physique, his splendid racing temperament, his flair for the big occasion – but because he understood athletics, and had given more brainpower and more willpower to the subject than any other runner of his day.”

Harold wrote several books, including *Sprinting* (1925), *Athletics* (1926), *The Olympic Games, 1896–1952*, and *The Rome Olympiad* (1960).

[Elli Wohlgeleinter (2nd ed.)]

ABRAHAMS, ABRAHAM (also known as **Abraham ben Naphtali Tang**; d. 1792), English scholar; grandson of the Prague *dayyan* Abraham Taussig Neu-Greschel (d. 1699) and like his grandfather signed himself with the Hebrew initials ת״נ״ג (*TNG*) and therefore generally known as Tang. Apparently born and brought up in London, Abrahams was well-grounded in Jewish and secular studies. In 1772 under the pseudonym “A Primitive Hebrew” he published an English translation of the mishnaic tractate *Avot* including *Maimonides’ commentary and observations of his own. He also wrote two parallel mystical commentaries in Hebrew on Ecclesiastes (1773, unpublished), which include a concise account of classical mythology, with quotations from Ovid, Vergil, and Seneca. A Hebrew treatise (unpublished) attempts to establish the politico-historical setting of the talmudic reference to the “sages of Athens” (Bek. 8b). Abrahams also translated into Hebrew William Congreve’s *Mourning Bride* (1768, Ms. in Jews’ College, London). He had some ability as a scribe and copied and illuminated a Passover *Haggadah* (now in the Jewish Museum, London). He was a pronounced English patriot and a political radical.

Another ABRAHAM ABRAHAMS (d. 1813) criticized the tax system in Hampstead in the *Book of Assessment* (1811), the earliest work of this type by an English Jew.

[Cecil Roth]

ABRAHAMS, ABRAHAM (1897–1955), English author, editor, and Zionist leader. Abrahams was head of the Jewish Telegraphic Agency’s New York Bureau in 1933 and editor of *The Jewish Standard* from 1940 to 1948, after which he took an increasingly active part in the strengthening of the Zionist Revisionist Movement. For a time he was political secretary of the Revisionist Party in England. Abrahams published *Poems* (1932) and *Background of Unrest* (1945); his wife, Rachael Beth-Zion Abrahams, was also a writer and journalist.

ADD. BIBLIOGRAPHY: J.B. Schectman, *Fighter and Prophet: The Jabotinsky Story – The Last Years* (1961), index.

ABRAHAMS, ABRAHAM ISAAC (1720–1796), religious official and merchant, who was known throughout the American Colonies as a *mohel* and Hebrew teacher. He spent most of his life in New York City. The Congregation Shearith Israel directed him to “keep a public school in the *hebra* [community hall] to teach the Hebrew language, and translate the same into English, also to teach English Reading, Writing and Cyphering.” He was “rabbi” of the congregation from 1761 and *hazzan* from 1766. In addition to his religious duties, he was a distiller, snuff maker, tobacconist, and merchant, and was elected a constable in New York City in 1753.

[Leo Hershkowitz]

ABRAHAMS, GERALD (1907–1980), British lawyer, chess master, and writer on chess. Abrahams was born in Liverpool. At 18 he developed the “Abrahams Defense” adopted by many noted players. He won several championships in Britain and prizes in international master tournaments. His books include *Teach Yourself Chess* (1948); *The Chess Mind* (1951); *Technique in Chess* (1961); and *Let’s Look at Israel* (1966). Abrahams also wrote several original works on Jewish identity, including *The Jewish Mind* (1961), and many works on law.

[William D. Rubinstein (2nd ed.)]

ABRAHAMS, ISAAC (1756–1832?), physician. He was the first Jewish graduate of Columbia (Kings) College, receiving an A.B. degree from that institution in 1774. At commencement he delivered a Latin oration “On Concord.” After 1786 Abrahams took up permanent residence in New York where he became involved in the affairs of the synagogue, as he previously had done in Philadelphia and Baltimore. He served as president of the Congregation Shearith Israel in 1801. There is some difficulty in an exact identification since there was at least one other contemporary of the same name.

[Leo Hershkowitz]

ABRAHAMS, ISRAEL (1858–1925), English scholar. In 1902 he was appointed reader in rabbinic and talmudic literature at Cambridge, succeeding Solomon *Schechter. He played a considerable role in the university, both personal and scholastic, and had some distinguished non-Jewish pupils. For many years his home was the focus of university Jewish life. His influence was greater, however, as a writer than as a teacher, and over many years he was the chief exponent of Jewish scholarship in England. Although in some respects a popularizer, even his most ephemeral writings were nevertheless distinguished by their scholarship, just as his most learned writings did not lack charm. He was also one of the founders of and most devoted workers for the *Jewish Historical Society of England and similar bodies. In religion, he favored extreme

reform and was the intellectual bulwark of the Jewish Religious Union when it was established in 1902, and of the Liberal Jewish Synagogue which developed out of it. Though not ordained as rabbi or minister, he was a frequent lay preacher. His most important works were his *Jewish Life in the Middle Ages* (1896; 2nd ed. by C. Roth based on author's materials, 1932); *Studies in Pharisaism and the Gospels* (2 vols., 1917–24); *Hebrew Ethical Wills* (2 vols., 1926); notes to the *Authorized Daily Prayer Book* edited by his father-in-law, S. Singer (1914); and numerous collections of essays on Jewish literature. His weekly literary causeries and reviews over the signature I.A. were for many years a feature of the **Jewish Chronicle*, and when in 1919 the anti-Zionist *Jewish Guardian* was founded, he was among its literary mainstays. Nevertheless, he was an ardent advocate of the establishment of a Jewish university in Jerusalem, even as early as 1908 when he visited Erez Israel (cf. *Jewish Chronicle*, Feb. 28, 1908). He edited the **Jewish Quarterly Review*, from its establishment in 1888 down to 1908, in association with his friend, collaborator, and supporter Claude G. *Montefiore. Abrahams was an ardent champion of Britain, viewing it as more favorable to its Jews than any other European country.

[Cecil Roth]

ABRAHAMS, ISRAEL (1903–1973), South African rabbi and scholar. Born in Vilna and educated at Jews' College and London University, he was rabbi in London and Manchester before going to South Africa in 1937 as chief rabbi of the Cape Town Hebrew Congregation. In 1951 he became chief rabbi of the United Council of Hebrew Congregations of the Cape. From 1938 he held the chair of Hebrew at Cape Town University. He retired in 1967 and settled in Israel. An eloquent speaker, he held high office in all important communal institutions in Cape Town and was especially active in promoting the Zionist movement and Jewish education. He was a consulting editor to the *Encyclopaedia Judaica*. His major scholarly work was his translation into English of *Cassuto's Hebrew commentaries: *Documentary Hypothesis* (1961); *The Book of Genesis*, 2 pts: *From Adam to Noah* (1961) and *From Noah to Abraham* (1964); *Exodus* (1967); and *The Goddess Anath* (1970); he also translated tractate *Hagigah* for the *Soncino Talmud* (1938). His other writings include: a history of Cape Jewry, *The Birth of a Community* (1955); *Pathways in Judaism* (1968); and *Living Waters* (1968).

[Lewis Sowden]

ABRAHAMS, IVOR (1935–), British sculptor. Abrahams was born in Wigan, England, and studied in London. He was later apprenticed to a bronze foundry and worked as a display

artist before becoming a teacher of sculpture in 1960; between 1960 and 1970 he lectured at a number of British art schools. His sculpture was always informal, using unusual, non-sculptural materials. His first one-man exhibition was in 1962, but it was not until 1970 that he established his reputation when he held his first exhibition in New York. He subsequently exhibited his work regularly in America, London, and Europe. His three-dimensional prints, incorporating collage techniques, won him international fame. Abrahams is represented in the Victoria and Albert Museum, London, Bibliothèque Nationale, Paris, Boymans Museum, Rotterdam, and other public collections throughout the world. In 1991 he was elected to the Royal Academy.

[Charles Samuel Spencer]

ABRAHAMS, SIR LIONEL (1869–1919), English civil servant and Anglo-Jewish historian, nephew of Israel *Abrahams. A graduate of Balliol College, Oxford, in 1902 Abrahams became financial secretary for India, in which capacity he successfully reorganized the Indian currency. In 1912 he was appointed assistant undersecretary of state for India. As an Oxford student, he wrote *The Expulsion of the Jews from England in 1290* (1895). He contributed a number of important studies on the medieval period to the Transactions of the Jewish Historical Society of England. He was president of the society from 1916 to 1918. In 1912 he became involved in what became known as the "Indian Silver Case," in which accusations were made that a Jewish merchant bank in London had improperly suggested that an order for silver required by the Indian government be placed with its firm. As a result, antisemitic innuendos about Abrahams and others were made in sections of Britain's press, but those named were cleared of any wrongdoing by a House of Commons Select Committee.

BIBLIOGRAPHY: P.H. Emden, *Jews of Britain* (1943), 145–6; JHSET, index; *The Times* (Dec. 1, 1919); JC (Dec. 12, 1919). **ADD. BIBLIOGRAPHY:** ODNB online.

[Cecil Roth / William D. Rubinstein (2nd ed.)]

ABRAHAMS, NICOLAI CHRISTIAN LEVIN (1798–1870), Danish author and literary scholar. After graduating from the University of Copenhagen, Abrahams taught there from 1829 and became professor of French literature after his baptism in 1832. Abrahams, who helped to popularize French culture in Denmark, published a *Description des manuscrits français du Moyen-Age de la Bibliothèque Royale de Copenhague* (1844). His autobiography, *Meddelelser af mit liv* (1876), appeared posthumously.

ABRAHAM'S BOSOM, designation in the New Testament (Luke 16:22–31) of the abode of the blessed souls of the pious and poor in the other world (compare IV Macc. 13:17; Matt. 8:11, where all three patriarchs, Abraham, Isaac, and Jacob, are enumerated as those in whose company the pious souls dwell). The Hebrew expression *be-ḥeiko shel Avraham* ("in Abraham's

bosom”) is mentioned in aggadic literature (e.g., PR 43:18ob) dealing with the martyrdom of Miriam (*Hannah) and her seven sons. She urges her youngest child to die for the sanctification of God’s name, saying: “O my son, do you wish that all thy brethren sit in Abraham’s bosom, except you?” Abraham’s bosom is mentioned also in *Midrash ha-Gadol* to Genesis (ed. Margulies (1947), 206) and in the Talmud (Kid. 72b) where it probably refers to the covenant of Abraham (see also PÄRK (1868), 25b, S. Buber’s emendation). In Christian mythology, Abraham’s bosom stands also for the abode in the netherworld of the unbaptized children and for purgatory, from where, after punishment, Abraham conducts the purified souls into paradise. This notion is hinted at in the talmudic passage (Er. 19a) which describes Abraham as shielding from punishment in hell all those who have not effaced the sign of circumcision (compare also, Gen. R. 48:8). Whether Abraham’s bosom is the abode of bliss, or, on the contrary, a place in Gehenna, it expresses the popular Jewish belief about Abraham as the warden in paradise and protector of the meritorious souls in the other world.

ABRAHAMSEN, DAVID (1903–2002), U.S. criminologist and psychiatrist. Born in Trondheim, Norway, Abrahamsen worked in Oslo and London. In 1940 he moved to the United States, where from 1948 to 1952 he served as director of scientific research at Sing Sing Prison. He was research associate at Columbia University’s College of Physicians and Surgeons from 1944 to 1953 and founded the university’s Forum for the Study and Prevention of Crime. In 1966 he was appointed medical and psychiatric director of the Foundation for the Prevention of Addictive Diseases. Abrahamsen taught at Columbia University, Yale Law School, the New York School of Social Work, and the New School for Social Research, New York.

While he wrote several books on psychological themes – *Men Mind and Power* (1945); *The Road to Emotional Maturity* (1958); *The Emotional Care of Your Child* (1969) – Abrahamsen’s works are principally devoted to criminological subjects. They include *Crime and the Human Mind* (1944); *Study of 102 Sex Offenders at Sing Sing Prison* (1950); *Who Are the Guilty? – A Study of Education and Crime* (1952); *The Psychology of Crime* (1960); “Study of Lee Harvey Oswald: Psychological Capability of Murder,” in: *New York Academy of Medicine Bulletin*, 43 (1967), 861–88; *Our Violent Society* (1970); *The Murdering Mind* (1973); *The Mind of the Accused: A Psychiatrist in the Courtroom* (1983); *Confessions of Son of Sam* (1985); *Murder and Madness: The Secret Life of Jack the Ripper* (1992); and *Nixon vs. Nixon: An Emotional Tragedy* (1997). Abrahamsen’s interest in Jewish life is seen in *Jeger Jode* (“I Am a Jew,” 1935), a cultural and humanitarian document about the life of Jews and their contribution to culture.

In 1982 he donated a large collection of his papers to Columbia University’s Rare Book and Manuscript Library, dating

from 1902 to 1981. The papers relate primarily to the research and interviews he conducted while writing *Nixon vs. Nixon* and to his close relationship and correspondence with convicted multiple murderer David Berkowitz. There are more than 140 letters to Abrahamsen from Berkowitz, aka “Son of Sam,” who murdered a succession of young people in New York City in the mid-1970s. The papers also reflect Abrahamsen’s interest in other famous crimes, such as the Leopold/Loeb kidnapping and murder of Bobby Franks, and in politics (particularly Adlai Stevenson’s 1952 campaign).

[Zvi Hermon / Ruth Beloff (2nd ed.)]

ABRAHAM ZĒVI BEN ELEAZAR (1780–1828), rabbi and *posek* in Poland. In his youth he lived in Piotrkow near Lodz, where he studied under his grandfather, Solomon b. Jehiel Michel, and Moses, the *av bet din*. In 1800 he served as rabbi of Pilica, and later, before 1819, as *av bet din* of Piotrkow. In formulating his rulings Abraham Zevi utilized the *pilpul* method employed in the *Urim ve-Tummim* of Jonathan *Eybeschuetz, the *Noda bi-Yhudah* of Ezekiel *Landau, and the *Hafla’ah* of Phinehas *Horowitz. He gave his rabbinical works the general title *Efod Zahav*, but designated each by a special name. The only two that have been published are *Berit Avraham* (Dyhernfurth, 1819), responsa on sections of the Shulhan Arukh, and *Gufei Halakhot* (pt. 1, Lodz, 1911), novellae to the tractates *Shabbat*, *Pesaḥim*, and *Ketubbot*. Remaining in manuscript form are *Ma’alot Yuḥasin*, novellae to the *Even ha-Ezer*; *Halva’at Hen*, novellae on the *halakhot* concerning usury; pt. 2 of his *Gufei Halakhot* containing novellae on the rulings of the great *posekim*; and *Pa’amonei Zahav*, his sermons.

ABRAHÃO, COJE (16th century), agent and diplomat in the service of the Portuguese viceroys in *Goa, India, from 1575 to 1594; Abrahão’s full name and personal background are unknown. That he played a leading role in the affairs of Portuguese India is attested to by numerous letters preserved in the Portuguese historical archives in Goa. These letters praise him for his trustworthiness and reliability, and the continual reference to him as “Coje Abrahão Judeo” shows his Jewish identity. Abrahão was entrusted with important diplomatic missions to the rulers of the kingdom of Bijapur, and accompanied the ambassador of Shah Yusuf Ali Adil of Bijapur on a diplomatic mission to Portugal in 1575. As a reward for his services, King Sebastian of Portugal granted Abrahão a pension in 1576. In 1582, on behalf of Portugal, he was attestor to a peace treaty with the shah.

[Walter Joseph Fischel]

ABRAM, MORRIS BERTHOLD (1918–2000), U.S. attorney, civic leader, second president of Brandeis University. Abram was born in Fitzgerald, Ga. Following service as a major in Air

Force Intelligence during World War II, Abram was counsel in the U.S. prosecution staff at the Nuremberg Trials (1946), then assistant to the director for the Marshall Plan (1948). As counsel for the Anti-Defamation League in the South (from 1955), as well as member of several civic committees, Abram led a prolonged fight against the Georgia county unit election system, which culminated in a 1963 Supreme Court ruling known as the one-man one-vote principle. Abram was appointed the first general counsel of the Peace Corps by President Kennedy, later serving in several positions in the United Nations, to which he was appointed by Presidents Kennedy and Johnson. He was an appointee of three additional presidents – Jimmy *Carter, Ronald *Reagan, and George H.W. *Bush. He led U.S. delegations to numerous international meetings, including the United Nations Commission on Human Rights and the former Conference on Security and Cooperation in Europe, and was a former vice chair of the U.S. Commission on Civil Rights.

As president of the American Jewish Committee, 1963 to 1968, Abram led talks on Catholic-Jewish relations with Pope Paul. He was president of Brandeis University from 1968 to 1970. He served as chairman of the National Conference on Soviet Jewry (NCSJ) from 1983 until 1988, at the peak of the movement to free Soviet Jews. During that period, he also served for three years as chairman of the Conference of Presidents of Major American Jewish Organizations. Under President Bush, he served as U.S. Ambassador to the United Nations in Geneva and founded United Nations Watch following his term as ambassador. He was a president of the American Jewish Committee, chairman of the United Negro College Fund, and chairman of the board of Cardozo Law School.

For many years he was a senior partner at the law firm of Paul, Weiss, Rifkind, Wharton & Garrison. Abram published *The Day Is Short* in 1982, in which he reviewed his career and his battle with an acute form of leukemia.

[Burton Berinsky / Ruth Beloff (2nd ed.)]

ABRAMOVICH, ROMAN ARKADYEVICH (1966–), Russian billionaire of Jewish origin. Abramovich was born in Saratov of a non-Jewish mother who died soon after giving birth to him, and later defined himself as “Ukrainian.” His father, Arkady Nahimovich, who worked at the Siktivkar economic council (*sovnarkhoz*), died in an accident when he was four years old. Abramovich was then adopted by his uncle Abram and lived with the family in Moscow, where he finished his secondary schooling. According to Abramovich, he graduated later from the Gubkin Institute of Oil and Gas. After the fall of Communism, Abramovich became active in business, taking over control of the Sibneft (Siberian oil) company after his mentor Boris *Berezovsky, who brought him into Yeltsin’s inner circle, fled the country in the wake of a criminal investigation. Abramovich also owned 50% of Rusal (Russia’s biggest aluminum company) and 26% of Aeroflot. In December 1999 he was elected deputy of the State Duma from the Chukotsk

Autonomous Region. In December 2000 he was elected governor of the region.

In 2003 Abramovich bought London’s Chelsea soccer club. He also owned the Russian Avangard Omsk ice hockey team. In 2003 he was included in *Fortune* magazine’s list of the world’s richest men under 40, with his personal wealth estimated at \$8.3 billion. In the same year *Forbes* also included Abramovich in its list of billionaires, placing his wealth at \$5.7 billion.

[Naftali Prat (2nd ed.)]

ABRAMOVITSH, SOHEM YANKEV (Jacob, also Mendele Moykher Sforim; 1835 or 1836–1917), Hebrew and Yiddish writer, often called the “grandfather” of modern Judaic literature. Abramovitsh was born in Kapulia (Kopyl), near Minsk; he lived in Berdichev from 1858 to 1869 and subsequently in Zhitomir. In 1881 he was appointed principal of the *talmud torah* in Odessa, a position he held until 1916 – except for two years spent in Geneva, Switzerland, following his traumatic experience of the 1905 pogroms. Abramovitsh’s long life spanned several periods in the development of Jewish society in Eastern Europe: the *Haskalah and the period of reform under Czar *Alexander II, the aftermath of the 1881 pogroms, *Hibbat Zion, the Socialism of the *Bund, and Zionism.

Abramovitsh began his literary career as a Hebrew essayist and fiction writer but soon turned to Yiddish. With five short novels written between 1864 and 1878, he laid the foundation for modern Yiddish fiction. In 1886, he returned to Hebrew with a series of short stories that literary historians have often viewed as a seminal contribution to the revival of modern Hebrew literature. He also expanded his early Yiddish works and translated them into Hebrew. As an integral member of the Jewish intelligentsia in Odessa, Abramovitsh was in contact with the Yiddish writer *Sholem Aleichem, with the historian Simon *Dubnow, and with Hebrew writers such as H.N. *Bialik, Y.H. *Rawnitzki, and *Aḥad Ha-Am.

Readers and critics have often referred to Abramovitsh as “Mendele Moykher Sforim” (“Mendele the Book Peddler”), yet Dan Miron showed in *A Traveler Disguised* (1973; 1996) that this is misleading. First appearing in 1864 and evolving in Yiddish and Hebrew over the next half century, Mendele is a character or persona in Abramovitsh’s works. Hence it is inaccurate to use the designation as if it were simply the author’s pen name. Abramovitsh seems to have created the Mendele persona as a way of reaching a broad readership. Instead of speaking from above, as did many Hebrew *maskilim*, he uses the folksy Mendele as his mouthpiece. Sometimes the enlightened Abramovitsh employs irony at the expense of the more naïve Mendele. The Jubilee editions of his complete works, in both Hebrew (1909–12) and Yiddish (1911–13), try to circumvent this problem by having it both ways, using a title followed by a parenthesis: *Ale verk fun Mendele Moykher Sforim* (S.Y. Abramovitsh).

Abramovitsh was the son of Ḥayyim Moyshe Broyde, a prosperous and respected man who was one of the outstand-

ing talmudic scholars in the small town of Kapulia. Situated in the Minsk province of Czarist Russia (now Belarus), this *shtetl* was culturally associated with Jewish Lithuania (“Lita”). Hence Abramovitch was schooled in the prevailing Lithuanian rabbinic style, with emphasis on the Hebrew Bible, its Aramaic translation, and the Talmud. He received an unusually rigorous *heder* education from a talented *melammed* (teacher) named Yose Rubens; according to Abramovitch’s own account, during his years at *heder* he memorized most of the Hebrew Bible. Instructed by Rubens until the age of 11, Abramovitch was impressed by his artistic abilities as a wood carver. Following the death of his father in about 1849, Abramovitch studied at yeshivot in Timkovitz, Slutsk, and Vilna. After two years in Slutsk he returned to live with his mother, now remarried and living in the picturesque village of Mielnik, which was surrounded by a forest. His experiences there may be reflected in his story “*Dos Tosefos-Yontev Kelbl*” (“The Calf,” 1911), in which a yeshiva boy returns home and becomes engrossed by the world of nature. At about the age of 17, Abramovitch wrote his first Hebrew poetry, consisting of odes to nature in the neo-Biblical style known as *melizah*.

Abramovitch later traveled south with an aunt in an effort to find her husband, who had fled his creditors when his business failed. Their resourceful guide, Avreml Khromoi (Abraham the Lame), regaled them with stories about the better life that awaited them in Volhynia. Avreml did not travel by the shortest route but made as many stops as possible to collect charity. The difficult experiences during these circuitous travels became the impetus for Abramovitch’s greatest Yiddish novel, *Fishke der Krumer* (“Fishke the Lame,” 1869/1888). At the end of their journeys Abramovitch settled in Kamenets-Podolski, where he was briefly married to a mentally ill woman. There he also met the maskilic author Avraham-Ber Gottlober, probably his model for the impoverished writer Herr Gutmann in *Dos Kleyne Mentshele* (“The Little Man,” 1864). Although Gottlober was not impressed by the juvenile Hebrew verses that the young Abramovitch showed him, he recognized his talent. As a teacher at the government school for Jewish boys, Gottlober was able to direct Abramovitch’s studies and introduce him to the wider world of literature, mathematics, and science. With the assistance of Gottlober’s daughters, Abramovitch learned German and Russian, passed a teacher’s examination, and taught at the Kamenets-Podolski government school in 1856–58. During that time education became the subject of his first publication, “*Mikhtav al Devar ha-Hinukh*” (“A Letter on Education,” 1857), published with Gottlober’s help in the Hebrew journal *Ha-Maggid*.

Abramovitch married Pessie Levin in 1858 and moved with her to Berdichev, supported by his father-in-law, while he continued his autodidactic education and literary activities. Berdichev was heavily populated by ḥasidim, which led Abramovitch into conflict with a form of Jewish life that he had seldom encountered in the north, except during his studies in Timkovitz. His fiction, in which a town resembling Berdichev is called “Glupsk” (= a town of fools), expressed his

hostility toward the Jewish community leaders. In *Dos Vintshfingerl* (“The Wishing-Ring”), he mocked ḥasidic resistance to modernization: “The ḥasidim were not pleased, because Gutmann dressed like a German. And when the floor of the school was washed, they became furious. ‘What’s the meaning of this? To do such a thing in a school! What’s this, washing off the mud that our ancestors left behind?!’” (1865, p. 7).

In 1860 Abramovitch published his first book, a collection of Hebrew essays entitled *Mishpat Shalom* (“The Judgment of Peace,” alluding to the author’s name), which included a translated article on whether corporeal punishment of children is permissible. A cause of much subsequent debate was his lead essay, “*Kilkul ha-Minim*” (“The Confusion of Gender”), which critiqued a work by Eliezer Zweifel. He occupied himself with natural sciences and began to translate Harald Othmar Lenz’s *Gemeinnützige Naturgeschichte* (“Natural History for General Use,” 1835–39), which appeared in Hebrew as *Sefer Toledot ha-Teva* (“The Book of Natural History,” 3 vols., 1862–73). This project reflected his concern that Jews were not sufficiently educated in matters of science and nature, yet it achieved limited results because the audience for secular Hebrew writing was small. Abramovitch’s first Hebrew novel, *Limdu Heitev* (“Learn to Do Well”) was published in Warsaw in 1862. The Russian title page calls it “a novel in the pure Hebrew language,” which shows Abramovitch’s early adherence to the literary principles of the Berlin Enlightenment, including a strong preference for the supposedly “pure language” (*leshon zah*) of the biblical prophets. Because he emulated that allusive, ornamental style, his early Hebrew writings were derivative and aesthetically unremarkable. He revised his short novel and published it under the new title *Ha-Avot ve-ha-Banim* (“Fathers and Children,” 1868), alluding to the 1862 novel of the same title by Ivan Turgenev.

Prospects for advances in the Jews’ material conditions and educational privileges improved in the 1860s under Alexander II. At that time, Abramovitch followed the maskilic bent in the didactic goals of his fiction: according to his 1889 autobiographical account in Nahum *Sokolow’s *Sefer Zikaron*, “I said to myself, here I am observing the ways of our people and seeking to give them stories from a Jewish source in the Holy Tongue, yet most of them do not even know this language and speak Yiddish. What good does a writer do with all of his toil and ideas if he is not useful to his people? This question – for whom do I toil? – gave me no rest and brought me into great confusion.”

In November 1864, serialization of Abramovitch’s *Dos Kleyne Mentshele* (“The Little Man”), to which many scholars trace the beginning of modern Yiddish literature, began in *Kol Mevasser* (“A Herald Voice” – the Yiddish supplement to *Ha-Meliz*, edited by Alexander Tsederboym (*Zederbaum)). The book was reprinted in 1865 with the subtitle: *Oder a Lebensbashraybung fun Yitzhok Avrom Takif* (“Or, a Life-description by the Powerful Man Isaac Abraham”). While no author’s name appeared on the title page, Abramovitch hinted at his identity by attributing the book to “a man” (*ish*, Aleph-Yod-

Shin, Abramovitsh's initials in reverse). Such anonymity was a common stratagem among Yiddish authors, both because their political views often drew censure and because Yiddish writing was held in low esteem.

Abramovitsh raged against the complacent rich who, as he wrote in a letter to Lev Binshtok, "rest in the shadow of money." His own financial circumstances were especially difficult around 1866, when he published his second collection of Hebrew essays, *Ein Mishpat* ("Fountain of Judgment") and the second volume of *Sefer Toledot ha-Teva*, for which he drew terminology from talmudic sources and in this respect influenced modern Hebrew usage. Some critics believe that his descriptions of nature and animal behavior anticipate his later fiction.

At a time when modern Yiddish theater was still in its infancy, Abramovitsh wrote the play *Di Takse* ("The Tax," 1869; it bore the ironic subtitle: *Oder di Bande Shtot Baley Toyves*, "Or, the Gang of City Benefactors"). Written in order to advance his reformist goals, it is more successful as social criticism than as drama. He had encountered widespread corruption among the community leaders of Berdichev and depicted the wrongdoings of these false benefactors in a transparent satire. According to one account, the powerful men of Berdichev forced Abramovitsh to leave the town after his satiric portrayal was published. Abramovitsh then moved to Zhitomir, where he studied at the Rabbinical Institute. Since this school educated many young Jewish men seeking higher education, and not only would-be rabbis, it was not unusual that Abramovitsh ended his studies there without receiving a degree.

In the 1870s, Abramovitsh experimented with writing Yiddish verse, favoring outmoded tetrameter and pentameter couplets. His poetic efforts ranged from an allegorical poem about the Jewish people, "Yudl" (1875), to traditional Judaic literature. He wrote Yiddish translations of Sabbath songs called *Zmires Yisroel* ("Songs of Israel," 1875) and compiled nature hymns in a Yiddish adaptation of the ḥasidic *Perek Shirah* (1875). He planned to translate the prayer book and the Psalms into Yiddish, but this project remained unfinished and only fragments are extant. In contrast to the German *maskilim*, Abramovitsh (like Mendel Lefin) recognized the importance of reaching common Yiddish readers in their mother tongue while also combating the influence of the *Tsene-Rene* with its archaic language and heavy reliance on midrashic elaborations.

One of Abramovitsh's most widely read books was his allegorical novel, *Di Klyatshe; Oder Tsar Baley Khayim* ("The Nag; or, Cruelty to Animals," 1873). Its epigraph quotes from Song of Songs 1:9, which Abramovitsh expands in Yiddish: "To my mare among Pharaoh's chariots I compare you – People of Israel." During the period of reform between 1856 and 1881, the number of Jews at Russian high schools and universities increased from about 1% to over 10% of the total population of students. Yet Isrolik, a typical boy who has received a traditional Jewish education, runs into difficulties because of his unfamiliarity with subjects such as history and Slavic

folklore. As he becomes mentally imbalanced, Isrolik hallucinates about meeting a talking horse and trying to improve her lot. Her sufferings are "as old as the Jewish exile," because she represents the fate of the Jewish people.

Unlike most of Abramovitsh's fiction, which concentrates on Jewish life in the impoverished *shtetlekh* in the Pale of Settlement, *Di Klyatshe* presents a wider panorama of Czarist Russia, with special attention to relations among antisemites and Jews; hooligans who torment the nag obviously represent antisemites. There is even a critique of the well-intentioned *maskilim*, when Isrolik reads aloud his letter to a benevolent society – an oblique representation of the Society for the Spread of Enlightenment (OPE). The nag refers to the ornamental, pseudo-biblical Hebrew style when she responds bitterly: "*Melitza, melitza, melitza!*" She rightly doubts whether any practical results will ensue from Isrolik's highfalutin rhetoric. Yet *Di Klyatshe* was a bold political allegory: in one of his nightmarish fantasies, for instance, Ashmodai – the King of the Demons – seems to represent the Czar.

Kitser Masoes Binyomen Hashlishi ("The Brief Travels of Benjamin the Third," 1878) centers on a pair of hapless, would-be explorers, Benjamin and Senderl, who somewhat resemble Cervantes' Don Quixote and Sancho Panza. Instead of depicting a petty nobleman who has read too many chivalric romances and acts as if he inhabits one, Abramovitsh portrays Benjamin as a Jew who has read too many narratives about travel to the Holy Land. Abramovitsh attacks the impracticality and worldly ignorance of Benjamin and his sidekick Senderl, because they are stereotypical traditional Jews whose life experience consists almost exclusively of Torah study. Benjamin's provisions for travel consist of little more than his prayer book, prayer shawl, and *tefillin*; only Senderl has the sense to bring food. Their wives are market women who eke out a meager living and dominate their families. Toward the end of the book, Abramovitsh takes aim at the horrific phenomenon of *khappers* (press-gangs) who kidnap Jews for induction into the Czar's army; in this comic account, however, Benjamin and Senderl are discharged because they prove to be more trouble than they are worth.

A reprint of *Dos Kleyne Mentshele* (1879) brought to a close the most productive period of Abramovitsh's Yiddish writing. The comparatively optimistic period of reform begun in 1855 by Alexander II, the so-called "Liberator Czar," had ended abruptly with his assassination in 1881 – followed by anti-Jewish pogroms and a period of reaction during which the conditions for Yiddish publishing also changed. During the same period Abramovitsh experienced personal and family troubles. His daughter Rashel, a talented art student, died in St. Petersburg, while his son Meir (Mikhail), a Russian poet, was exiled for political activism and later converted to Christianity. Abramovitsh described his malaise in a letter to Lev Binshtok on January 16, 1880: "As soon as I take up the pen, I feel an overwhelming heaviness: my hands are bound as if by magical chains" (see *Dos Mendele Bukh*, 107). On June 5, 1884, he wrote to another friend that "the misfortunes of the recent

period have turned my heart into stone, so that my tongue has not allowed me to speak and my hands have not allowed me to write a word" (*ibid.*, 128). For several years he produced no major works in Yiddish. Subsequently, in 1886–1896, as part of the movement to revive Hebrew, he devoted much of his creative energy to writing Hebrew short fiction.

In 1888, Sholem Aleichem sought out Abramovitsh, hoping to include his writings in the anthology he was editing, *Di Folksbibliotek* ("The Jewish Popular Library"). Their correspondence quickly assumed an intimate tone, with Sholem Aleichem referring to Abramovitsh as "Grandfather," while Abramovitsh referred to Sholem Aleichem as "Grandson" – although their difference in age was only 23 years. At first Abramovitsh was evasive, complaining of insufficient time because of his work as principal of the Odessa Talmud Torah, but he did contribute the first two parts of the expanded and quite altered version of *Dos Vintshfingerl* ("The Wishing-Ring," 1888–89). This narrative of Hershele's impoverished childhood in Kabtsansk ("Beggarsville"), replete with irony and satire, still shows traces of nostalgia for *shtetl* life.

Although Abramovitsh had continued publishing sporadically in Hebrew throughout the 1870s, he devoted this decade mainly to writing in Yiddish. He returned to Hebrew with the story, "*Be-Seter Ra'am*" ("In the Secret Place of Thunder," 1886–87), his first Hebrew belletristic work since 1868. Hebrew became Abramovitsh's literary focus in the 1890s, when in addition to publishing Hebrew short fiction he began translating his Yiddish novels. One of his most successful Hebrew stories is "*Shem ve-Yefet ba-Aggalah*" ("Shem and Japheth on the Train," 1890), in which Mendele the Book Peddler abandons his horse and carriage and travels in a third-class train compartment. There he meets Moyshe the Tailor, a latter-day Moses who has no Torah to offer beyond stratagems for the survival of the oppressed.

Following a decade in which Abramovitsh printed his Hebrew short fiction, 1896–97 saw the publication of Hebrew versions of *Masa'ot Benyamin ha-Shlishi* ("Travels of Benjamin the Third") and *Be-Emek ha-Bakhah* ("In the Vale of Tears"). A few years later, H.N. Bialik translated the first eight chapters of *Fishke der Krumer* ("Fishke the Lame") as *Sefer ha-Kabezanim: Nun Kefufah* ("The Book of Beggars: A Crooked Letter Nun," 1901), but Abramovitsh was not satisfied. For the most part Abramovitsh translated or adapted his own works into Hebrew. In the late novel *Shloyme, Reb Khayims* ("Solomon, Ḥayyim's Son") – or, in Hebrew, *Ba-Yamim ha-Hem* ("In Those Days") – Abramovitsh is less satiric than in his early works.

Critical Assessment

Abramovitsh records the plight of Russian Jewry suffering tyranny and hate from without and exploitation by the Jewish upper classes from within. In some works Abramovitsh continues the Haskalah tradition of satirizing folk beliefs (e.g., in *Fishke der Krumer* and *Kitser Masoes Binyomin ha-Shlishi*). Elsewhere he evokes the intimate experiences of Jewish child-

hood, as in works such as the late version of *Dos Vintshfingerl* and the autobiographical novel *Shloyme, Reb Khayims*. Many of his characters are drawn from Jewish life in the towns and cities of Belorussia and Lithuania, where he spent his childhood, while other works portray characters from Volhynia and southern Russia, with the action taking place in Berdichev, Zhitomir, Odessa, and other towns in the Jewish Pale of Settlement. Following a Russian tradition, Abramovitsh uses fictitious place names that satirically describe the qualities of their inhabitants – such as "Glupsk," the town of fools modeled on Berdichev; "Tsviatshits," a town of hypocrisy; "Tuneyadevka," suggesting parasitism; and "Kabtsansk," or Paupersville. Although Abramovitsh was immersed in Judaic traditions, he also was influenced by European fiction, as reflected in his parody of *Don Quixote* (in *Kitser Masoes Binyomin ha-Shlishi*). His *Dos Kleyne Mentshele* ("The Little Man") and *Fishke der Krumer* ("Fishke the Lame") reflect the Russian satiric tradition of Gogol and Saltykov-Shchedrin as well as the picaresque novel of authors such as Henry Fielding. He adopted some typical patterns of the sentimental adventure story in *Fishke der Krumer*, in which surprising coincidences occur. Based on that novel, Chaver-Paver wrote a screenplay and Edgar Ulmer directed the powerful Yiddish film *Fishke der Krumer* (known in English as "The Light Ahead," 1939).

Although Abramovitsh began writing in Yiddish for the practical purpose of reaching a larger reading public, he eventually came to regard his work in Yiddish to be of intrinsic artistic value in its own right. Abramovitsh's style is an effective instrument for satire and irony, especially when it is deliberately incongruous: phrases originally expressing the sacred are applied to the profane, and the reverse. In a 1907 letter to Y.H. Rawnitzki, for example, Abramovitsh alluded to the Creation story when he recalled his original goal: "Let us create a Hebrew style that will be lively, speaking clearly and precisely, the way people do in our time and place, and let its soul be Jewish." In many of the prefaces to his novels, Mendele Moykher Sforim uses mock prayers that begin, "Praised be the Creator..." and then turn into attacks on corruption. Abramovitsh's traditional narrators – such as Mendele Moykher Sforim, Isaac Abraham Takif, or Alter Yaknoz – provide Abramovitsh with many opportunities for ironic play and enable him to achieve artistic distance from his story.

Abramovitsh's Hebrew style went through a number of stages. In the 1860s he was still under the influence of Abraham *Mapu's neo-biblical rhetoric, particularly in his early Hebrew stories. Abramovitsh carried on the tradition of expanding the Hebrew language, as introduced by Haskalah writers such as Isaac *Satanow, Menahem Mendel (Lefin) Levin, and Joseph *Perl, whose style absorbed elements of Mishnaic Hebrew, medieval philosophical literature, and ḥasidic literature influenced by spoken Yiddish. Abramovitsh's process of creating a synthetic Hebrew style composed of many historical layers reached its peak after 1886. On the occasion of Abramovitsh's 75th birthday, in 1910–11, H.N. Bialik asserted that Abramovitsh was the "creator of the *nusah*," which he

described as a new synthesis drawing from many historical layers of Hebrew. According to Bialik, Abramovitsh's *nusah* had already become the dominant style in Hebrew literature. Many 20th century critics accepted Bialik's view, although some writers such as Y.H. *Brenner countered with a kind of anti-*nusah*. In any event, Abramovitsh contributed to greater fluidity in Hebrew style by moving beyond the more rigid biblical *melizah* of his predecessors.

Abramovitsh wrote in both Yiddish and Hebrew throughout his career, which led to a productive interaction between his writings in these languages. Simon Dubnow made an important observation on Abramovitsh's bilingual creativity: when he "had the Yiddish original of the first parts of *Dos Vintshfingerl* in front of him, he made the Hebrew translation – or more precisely, the reworking – masterfully and without any difficulties. When it came to writing more without the Yiddish original, however, he sensed that it would not go smoothly. One cannot create content and language at the same time, but only one after the other; one must create the content first, in the language of the life that is portrayed in the artwork. On this foundation, then, he could build the style of the revived Hebrew language (*Fun "Zhargon" tsu Yidish* ("From 'Jargon' to Yiddish"), 1929, p. 46). In his striving for artistic perfection, Abramovitsh continually reworked his novels and stories, enlarging and polishing them. The later versions of his works, and particularly the Jubilee Edition, moderated his satiric stance; he also diminished the pro-Enlightenment propaganda that was present in early works such as *Dos Vinshfingerl*. During the process of bilingual recreation, in later adaptations of his works, Abramovitsh introduced important variations in content and style. He did not merely translate his works from Yiddish into Hebrew but rather reinvented them.

Abramovitsh is rightly remembered for his descriptions of nature, his trenchant satire, and his sympathetic portrayals of the poor. The lack of natural descriptions in Judaic literature prior to Abramovitsh is legendary. Abramovitsh's narrator Mendele, however, pays great attention to the natural world. Satire had been a common literary device among the *maskilim* writing in German and Hebrew, and Abramovitsh became the most powerful satiric author in Yiddish letters. Because his basic ideology was that of the Jewish Enlightenment, Abramovitsh continued writing in a satiric vein even after the political setbacks of 1881. Later in life, in part because of his position at the *talmud torah* in Odessa, Abramovitsh tempered his critiques. Beyond his satiric impulses, Abramovitsh shows ample sympathy toward the underclass and unusual sensitivity to the plight of poor Jewish boys.

Abramovitsh's Yiddish and Hebrew writings attracted attention from the start, but critical interest in them grew especially in the 1880s, after he had published his major Yiddish works. This interest increased early in the 20th century as Abramovitsh's Hebrew fiction won admiration, on the one hand, and drew reserved and even negative reaction on the other. From an ideological point of view, critics have been interested in his attitude toward the Hibbat Zion movement

and his stand on the social problems of the oppressed multitudes in Russia. Readers have sometimes seen Abramovitsh as a preacher, loyal to his people and calling for a radical change in Diaspora life. Other critics such as David Frishman stressed the documentary character of Abramovitsh's descriptions of the *shtetl*, which might someday serve as a historical testimony to the Jewish way of life in the 19th century. Some other critics have thought that his harsh portrayals of *shtetl* life give a distorted image of Jewish existence there. While critics have admired his descriptions of nature and his epic achievement in recreating Jewish *shtetl* types, they have occasionally argued that – because he uses exaggeration and grotesque caricature – Abramovitsh inadequately represents the lives of individuals.

A unique source of information about Abramovitsh's formative years is an essay in the Russian-Jewish journal *Voskhod* ("Sunrise," 1884), by his childhood friend Yehuda-Leyb (Lev) Binshtok. Also essential are Abramovitsh's essay "*Reshimot le-Toledotai*" ("My Life Story," in Nahum Sokolov's *Sefer Zikkaron*, 1889) and his many letters contained in *Dos Mendele Bukh* ("The Mendele Book," ed. Nakhman Mayzel, 1959). A fictionalized account of Abramovitsh's childhood may be found in his autobiographical novel *Shloyme Reb Khayims*, which appeared serially in Yiddish starting in 1899 (printed in book form, 1911); in Hebrew, the autobiographical novel appeared as *Ba-Yamim ha-Hem* ("In Those Days," starting with the *Petikhtah*, 1894; printed in book form, 1911).

On the occasion of Abramovitsh's 75th birthday and in celebration of his wide popularity based on 50 years of writing, the Jubilee editions of his works were published in 1909–11 (Hebrew, in three volumes) and in 1911–13 (Yiddish, in 16 volumes). Some important studies of Abramovitsh are by Shmuel Niger (1936), Meir Viner (1946), Gershon Shaked (1965), and Dan Miron (1973). In English, Ken Frieden (1995) gives an overview of his life and work and interprets his major fiction in relation to the other classic Yiddish writers – Sholem Aleichem and I.L. Peretz. In a new vein, Naomi Seidman (1997) discusses gender issues in Abramovitsh's writing.

[Ken Frieden (2nd ed.)]

ABRAMOVITZ, MAX (1908–2004), U.S. architect, born in Chicago. From 1947 to 1952 Abramovitz was deputy director of the Planning Office of the United Nations. He was partner in the firm of Harrison & Abramovitz, which built the United Nations Secretariat, New York (1950). The design incorporated the ideas of an international panel of architects that included Le Corbusier and Oscar Niemeyer. This construction, the east and west sides of which were faced almost entirely with glass, proved a prototype of later buildings. His firm specialized in office buildings such as the Alcoa Building, Pittsburgh (1953), and the Socony Mobil Building, New York (1956), in which story-high metal units were used for the curtain walls. He also worked on projects of Jewish interest. These include Temple Beth-Zion, Buffalo, N.Y., and the Hillel Foundations on the campuses of the University of Illinois (1951) and of Northwestern University (1952). His three chapels (Protestant, Catholic, Jewish) at Brandeis University (1954) expressed the harmony and equality of the three faiths as represented on the campus, while at the same time respecting their differences. The chapels were similar structures placed around a pool. In 1963 Abramovitz built the new Philharmonic Hall, New York. The facade features two superimposed rows of concrete shafts softened with flattened vaults. It has been regarded as an example of American “neoclassicism.” In 1973 Philharmonic Hall was renamed Avery Fisher Hall. Located at the northern end of the Lincoln Center Plaza, the concert hall is home to the New York Philharmonic Orchestra and can seat an audience of more than 2,700. The Plaza, built in 1964–65 by Harrison & Abramovitz, was rebuilt in 1984–85 by Lew Davis and renamed Paul Milstein Plaza in 1997. Abramovitz’s auditorium of the University of Illinois at Urbana (1964) is a vast saucer dome surrounded by a circulation gallery that can accommodate more than 18,000 spectators.

The Empire State Plaza in Albany, N.Y., considered one of the most ambitious urban renewal projects in modern U.S. history, was designed by Harrison & Abramovitz and built between 1965 and 1979. The government complex consists of ten buildings set on a six-story platform, which forms the plaza.

ABRAMOVITZ, MOSES (1912–2000), U.S. economist. Born in New York City, he was an instructor at Harvard (1936–38) and from 1938 to 1940 a member of the staff of the National Bureau of Economic Research. In 1940 he began teaching at Columbia but interrupted his work during World War II to serve as the principal economist of the War Production Board and the Office of Strategic Services. He spent the final year of the war as a lieutenant in the U.S. Army, and with the close of the conflict was appointed economic adviser to the U.S. representative on the Allied Commission on Reparations. In 1946 he resumed his teaching at Columbia but left in 1948 for Stanford University. He taught at Stanford for almost 30 years, taking leave only during 1962–63 to work as economic adviser to the secretary-general of the Organization for Economic

Cooperation and Development in Paris. He served as chair from 1963 to 1965 and from 1971 to 1974. During his tenure at Stanford and after his retirement, he gained international admiration and renown for his fundamental insights and pioneering contributions to the study of long-term economic growth. His main fields of interest were economic history and development and business cycles.

Abramovitz served as president of the American Economic Association (1979–80), the Western Economic Association (1988–89), and the Economic History Association (1992–93). His publications include *An Approach to a Price Theory for a Changing Economy* (1939); *Inventories and Business Cycles* (1950); with Vera Eliasberg, *The Growth of Public Employment in Great Britain* (1957); *Evidences of Long Swings in Aggregate Construction since the Civil War* (1964); and *Thinking About Growth and Other Essays* (1989). Abramovitz’s article “Catching Up, Forging Ahead, and Falling Behind” (1986) is one of the most frequently cited papers ever published by the *Journal of Economic History*.

[Joachim O. Ronall / Ruth Beloff (2nd ed.)]

ABRAMOWICZ, DINA (1909–2000), librarian and specialist on Yiddish studies and on Jewish history and culture in Eastern Europe. Born in Vilna, she was raised in a Russian-speaking home with strong family ties to the Haskalah, the Yiddish-speaking intelligentsia, and the Bund. Abramowicz was educated in Yiddish and Polish schools, including a Polish gymnasium, and she received an M.A. in philosophy and Polish literature from Stefan Batory University in Vilna (1936). From 1939 to 1941 she was assistant to the head librarian of the Jewish Central Children’s Library of Vilna, and during the Nazi occupation she worked in the Vilna Ghetto Library. Most of the library’s books had previously belonged to the Hevrah Mefitse Haskalah, in whose former building it was housed. Abramowicz escaped the ghetto before its liquidation and from 1943 until liberation in 1944 she served in a Jewish partisan unit. Abramowicz immigrated to the United States in 1946, where she was reunited with her father, who had been there since 1939. Her mother perished in Treblinka in 1943, and her younger sister survived the war in France. In America, Abramowicz resumed her career as a librarian at the *YIVO Institute for Jewish Research, where she served as assistant librarian (1947–62), head librarian (1962–87), and senior reference librarian (1987–2000). Under Abramowicz’s leadership the YIVO Library grew into one of the largest and most important repositories of printed Judaica, especially in her areas of specialization: Yiddish language and literature (including children’s literature), Jewish history and culture in Eastern Europe, and the Holocaust. Abramowicz was assiduous in her efforts to acquire new and unusual publications for the library. She supervised the absorption of much of the pre-war Vilna YIVO library after it was recovered in Europe and brought to New York. In addition, she published book reviews, topical articles, annual lists of new Yiddish books, and bibli-

ographies of translations from Yiddish into English, and she co-edited a collection of essays on 19th- and early 20th-century Lithuanian Jewry, *Profiles of a Lost World: Memoirs of East European Jewish Life before World War II* (1999) with her father Hirsz Abramowicz. Abramowicz's contributions as reference librarian and cultural gatekeeper were particularly noteworthy, and she received awards from several national library associations and Jewish organizations. Over the years she provided in-depth consultations to thousands of researchers, including novelists, scholars, filmmakers, journalists, and genealogists. Through her personal experiences, professional training, intellectual engagement, and longevity, Abramowicz came to personify the legacy of Eastern European Jewish civilization. She died in New York City.

Abramowicz, "The World of My Parents: Reminiscences," in: *YIVO Annual*, 23 (1996), 105–57; idem, *Guardians of a Tragic Heritage: Reminiscences and Observations of an Eyewitness* (1998); J. Sharlet, "Keeper of a Civilization," in: *The Book Peddler / Der Pakn-treger*, 21 (1996), 9–21.

[Zachary M. Baker (2nd ed.)]

ABRAMOWITZ, BINA (Fuchs; 1865–1953), Yiddish actress. At the age of 14, Bina Fuchs joined the chorus of Mogulesko's company in Odessa and later acted with Naphtali Goldfaden's troupe, being typecast in "mother" roles. After her marriage to Max Abramowitz, the couple toured Russia giving concerts, and in 1886 accompanied Mogulesko to the U.S. In New York she played with various Yiddish companies, including Maurice Schwartz's at the Jewish Art Theater. She created many roles in Jacob Gordin's plays. Abramowitz also appeared in films made in the U.S. They include the silent movie *Broken Hearts* (1926), directed by Maurice Schwartz, and the Yiddish-language films *The Unfortunate Bride* (1932) and *Yiskor* (1933).

[Ruth Beloff (2nd ed.)]

ABRAMOWITZ, DOV BAER (1860–1926), U.S. rabbi, religious Zionist leader, and founding member of the Union of Orthodox Rabbis of America. Abramowitz was born in Lithuania but made *aliyah* together with his parents as a young boy. He was educated at the Ez Hāyyim yeshivah in Jerusalem and appointed as a district rabbi in the city after receiving ordination in 1885. Abramowitz left Israel for America in 1894, moving first to Philadelphia, and later to New York City, where he served as the rabbi of Congregation Mishkan Israel. He quickly became a prominent figure in the Orthodox community, admired for both his scholarship and his leadership abilities. While in New York, he published a text on the Jewish marriage code, a collection of sermons, and a multi-volume study of Jewish law as well as editing a short-lived scholarly journal. He also joined with Moses Matlin and Judah Bernstein to push for the establishment of a seminary to train English-speaking rabbis to serve American pulpits. The Rabbi Isaac Elchanan Yeshiva, the product of their combined labors, was founded in 1897. Five years later, he joined with a group of

other immigrant rabbis who had received their ordination at yeshivot in Europe and Palestine to form the Union of Orthodox Rabbis of America (Agudat ha-Rabbonim). Abramowitz moved to St. Louis, Missouri, in 1906 after accepting an offer to become head of the city's *bet din*. This position provided Abramowitz with the status and time to pursue a variety of initiatives close to his heart. A passionate proponent of religious Zionism, Abramowitz campaigned on behalf of the Mizrachi movement, starting its first American office in 1910 and encouraging its expansion. Abramowitz was appointed as the president of the American Mizrachi at its founding in 1914. During World War I his focus shifted to easing the plight of the embattled Jewish communities of Eastern Europe. Abramowitz collected money for the Central Relief Committee, the organization established to rally the often fractious American Jewish community on behalf of their beleaguered brethren caught between opposing armies on the Eastern Front. Following the war, Abramowitz returned to his Zionist activities, founding an organization to support emissaries who visited America to raise funds for Palestine. After over 25 years in America, Abramowitz returned to settle in Palestine in 1921. Among his writings are *Dat Yisrael* (1897–1905), *Ketav ha-Dat* (1900), and *Kuntres Sefer Ketubbah* (1900).

BIBLIOGRAPHY: M. Sherman, *Orthodox Judaism in America: A Biographical Dictionary and Sourcebook* (1996); *Universal Jewish Encyclopedia* (1948).

[Adam Mendelsohn (2nd ed.)]

ABRAMOWITZ, EMIL (1864–1922), physician, one of the first Social Democrats in Russia. Abramowitz was born in Grodno and studied in France. He was active in the movement in Minsk and Kiev in the 1880s. His wide education, personal warmth, and persuasiveness as an exponent of socialism enabled him to influence numerous workers. The program he drew up for workers' circles was followed for a long time in the Jewish labor movement. Abramowitz was imprisoned for his political activities and spent many years in exile in Siberia, where he gained a reputation for his cultural activities and dedication to the medical profession. During World War I he served as an army doctor; in 1919 he was again imprisoned, as a Menshevik. The letters he wrote between 1914 and 1917 reveal concern over the fate of Russian Jewry and pessimism as to its future.

[Moshe Mishkinsky]

ABRAMOWITZ, GRIGORI (pseudonyms: **Zevi Abrahami**, **W. Farbman**, and **Michael Farbman**; 1880?–1933), Zionist socialist, publisher, and journalist. Born in Odessa, Russia, Abramowitz studied in Munich and Zurich where he became an active Zionist. At first sharing the ideology of the *Democratic Fraction, he later joined the Zionist socialist group

"Herut" in Zurich. As a supporter of the project for Jewish colonization in *Uganda, Abramowitz wrote a series of articles on "Zionism and the Uganda question" in the Zionist organ *Yevreyskaya* (Zhizn, 1905). For the *Zionist Socialist Workers Party he wrote on Jewish emigration and the economy. After withdrawing from public activities, Abramowitz founded a book-publishing firm. He lived in England from 1915 and while there contributed to English and American journals as an expert on Soviet affairs. His books include *After Lenin* (1924) and *Five-Year Plan* (1931). He founded the *European Year Book* in 1926.

BIBLIOGRAPHY: JC (June 2, 1933).

[Moshe Mishkinsky]

ABRAMOWITZ, HERMAN (1880–1947), Canadian rabbi. Born in Lithuania, Abramowitz moved to New York City with his family in 1890. He received a B.A. from the City College of New York (CCNY) in 1900 and was ordained at the *Jewish Theological Seminary (JTS) two years later. He was appointed rabbi at Montreal's Shaar Hashomayim synagogue in 1902, where he served until his death 44 years later. In 1907 he was also the first student to earn a D.H.L. at JTS.

Although Abramowitz initially felt some discomfort about being outside the United States (and later reminisced that his departure from New York for Montreal "was like pioneering on distant foreign fields") he grew to embrace his congregation and Canadian Jewry. He was regarded an effective, dignified, and caring spiritual leader. Many of his sermons were reprinted in the English-language Canadian Jewish press. He encouraged the congregational Sunday school and lay involvement in the synagogue. Abramowitz was also involved in Jewish communal life outside the synagogue. In his first decade in Montreal, he visited western farm colonies in Quebec and western Canada as a representative of the *Jewish Colonization Association. He was instrumental in raising funds for TB patients at Montreal's Mount Sinai Hospital, and in 1913 he was an expert witness on the Talmud in a law suit against the Quebec notary and journalist Plamondon, who delivered a speech (subsequently printed) accusing Jews of the *blood libel.

With the outbreak of WWI, Abramowitz served as chaplain to the Jewish soldiers in Canada. He held the rank of captain. In the interwar period, he was on the board of the Federation of Jewish Philanthropies of Montreal, the Montreal Talmud Torah, and the Montreal General Hospital. During WWII, although suffering from failing health, he chaired the Religious Welfare Committee of Canadian Jewish Congress. Abramowitz also left his mark on Conservative Judaism. In 1926 he was elected president of the *United Synagogue of America, the first person from outside the United States.

During Abramowitz's tenure, Shaar Hashomayim became the congregation of Montreal's "uptown" elite. His congregants included the wealthiest members of the community, including factory owners at odds with their Jewish workers.

This may have led to suspicion of Abramowitz by the Jewish masses. Over time, however, he seems to have earned the respect of many of the "downtown" Jews and the Yiddish journalist B.G. *Sack wrote a heartfelt obituary in the Yiddish daily, the *Kanader Adler*.

[Richard Menkis (2nd ed.)]

ABRAMOWITZ (Rein), RAPHAEL (1880–1963), socialist leader and writer. He was born in Dvinsk, Latvia, and from 1899 took part in the activities of the illegal student movement in Riga, where he joined the *Bund in 1901. An outstanding speaker, prolific writer, and energetic organizer, he was speedily recognized as one of the chief spokesmen of the second generation of Bund leaders. In 1903–04, he was active in the "colonies" of the Russian students in Liège and Zurich. In 1905 he was elected a member of the central committee of the Bund and in 1906 became a member of the central committee of the Russian Social Democratic Workers' Party. During the Russian Revolution of 1905, Abramowitz was the Bund candidate for the second Russian *Duma. He was arrested several times for his socialist activities and exiled to Siberia in 1910 but in 1911 succeeded in escaping abroad. Abramowitz returned to Russia in 1917, and played a leading role as a Menshevik representative, notably in the All-Russian Central Executive Committee of the Soviet. After the October Revolution, he and Julius *Martov were included in the Menshevik faction which for a while believed that gradual democratization of the Bolshevik regime was possible. He opposed a contemplated merger of the Bund with the Communist Party and was among the founders of a separate "Social-Democratic Bund" (April 1920). At the end of 1920 Abramowitz went to Berlin, where the following year he and Martov founded the Menshevik organ *Sotsialisticheskiy Vestnik*, which he continued to edit until shortly before his death. Between 1923 and 1929 he was a leading member of the executive of the Socialist International. Abramowitz moved to Paris in 1939 and in 1940 succeeded in reaching New York.

Abramowitz was a contributor to the Yiddish Socialist *Jewish Daily Forward* and the monthly *Zukunft*, and a founder and editor of the Yiddish *Algemayne Entsiklopedye* (1934–50), and of *The Jewish People, Past and Present* (1946–55). He edited the laborite *Modern Review* (New York, 1947–50). His books include *Lerbukh tsu der Geshikhte fun Yisroel* (in collaboration with A. Menes, 1923); *Der Teror gegen di Sotsialisten in Rusland un in Gruzye* (in collaboration with Tsereteli and Sukhomolin, Yiddish, 1925; translated into French, German, and Dutch); two volumes of memoirs, *In Tsvay Revolutsyes* (1944) and *The Soviet Revolution, 1917–1939* (1962).

BIBLIOGRAPHY: LNYL, 1 (1956), 12–16; *Sotsialisticheskiy Vestnik*, 43 (1963), nos. 3–4, 26–28.

[Leon Shapiro]

ABRAMS, "CAL" (Calvin Ross; 1924–1997), U.S. baseball player, lifetime .269 hitter over eight seasons, with 433 hits,

32 home runs, 257 runs, and 138 RBIs. Born in Philadelphia to Russian immigrant parents, he moved with his family to Brooklyn when he was a child. Having grown up in Brooklyn in the shadow of Ebbets Field, Abrams fulfilled a life-long dream when he signed with the Brooklyn Dodgers after graduating from James Madison High School. But after two weeks in the minor leagues he was drafted into the army, where he served four years. Abrams spent three years in the minor leagues, winning the Southern Association championship with Mobile in 1947 while hitting .336. Abrams, who batted and threw left-handed, played for the Brooklyn Dodgers (1949–52), Cincinnati Reds (1952), Pittsburgh Pirates (1953–54), Baltimore Orioles (1954–55), and Chicago White Sox (1955), and had a perfect fielding percentage in three different seasons, 1950, 1952, and 1956. Abrams is best remembered for one of the most famous plays in Dodger franchise history. In the final game of the 1950 season, with the Dodgers one game behind the Philadelphia Phillies in the pennant race, Abrams tried to score from second with two out in the bottom of the ninth of a 1–1 game on a hit by Duke Snider, but Abrams, who had been waved home by third base coach Milt Stock, was thrown out by the Phillies' Richie Ashburn. Had Cal scored, the Dodgers would have won the game and forced a playoff with the Phillies for the pennant. Dick Sisler hit a three-run home run in the top of the tenth to win the game – and the pennant – for Philadelphia. It was the closest Abrams ever got to the post-season. Dodgers fans vilified Abrams for years but he was defended by both Ashburn and Phillies pitcher Robin Roberts for the play, who agreed with many others who said Abrams should not have been sent home by Stock.

[Elli Wohlgernter (2nd ed.)]

ABRAMS, CHARLES (1901–1970), U.S. housing and urban planning expert, lawyer, and author. Abrams, who was born in Vilna, was taken to the U.S. in 1904. Admitted to the New York bar in 1923, Abrams became involved in housing and urban development both as a property owner and lawyer during the 1920s and 1930s when he campaigned for the preservation of Greenwich Village's historic streets and buildings. He laid the groundwork for U.S. public housing laws and, in the course of his career, held housing posts on the city, state, national, and international levels. These included counsel to the New York City Housing Authority (1934–37), and leader of, and adviser to, several UN housing missions, mostly to underdeveloped countries. Abrams was a state vice chairman of the New York State Liberal Party in the 1940s. From 1955 to 1959 Abrams was chairman of the New York State Commission Against Discrimination and a member of Governor Harriman's cabinet. In 1965 he chaired the committee whose recommendations led to the creation of the New York City Housing and Development Administration.

Abrams lectured in housing and economics at the New School for Social Research (1936–60), and chaired both Columbia University's city planning department (1965) and its division of urban planning (1965–68).

As housing columnist for the *New York Post* (1947–49),

Abrams vigorously exposed real estate abuses and inadequacies in city, state, and federal housing policies. His books include: *Revolution in Land* (1937); *Future of Housing* (1946); *Forbidden Neighbors* (1955); and *Man's Struggle for Shelter* (1964).

ABRAMS, ELLIOTT (1948–), U.S. neoconservative political figure. After graduating from Harvard Law School in 1973, Abrams worked in corporate law but quickly decided to pursue a career in politics and public service instead. Abrams volunteered in Senator Henry "Scoop" Jackson's 1972 bid for the Democratic Party's presidential nomination, and in 1975, when Abrams was looking to get into politics, Jackson offered him a campaign staff position.

After Jackson lost the presidential nomination to Jimmy Carter, Abrams remained in Washington, D.C., where he became chief legal counsel to newly elected Senator Daniel P. Moynihan (Dem., N.Y.), another outspoken advocate of U.S. interventionism, and eventually became Moynihan's chief of staff.

During these years, the Democratic Party, under the auspices of President Carter, softened its stance on the Soviet Union. Carter was accused by hawks of "giving up too much" in arms control negotiations with the Soviet Union. A minor *coup d'état* ensued among several Jewish Democrats who had worked for Senator Jackson: Elliott *Abrams, Richard *Perle, Doug Feith, and Paul Wolfowitz switched to the Republican Party, supported Ronald Reagan in 1980, and began to espouse a political-intellectual ideology known as neoconservatism.

Abrams was assistant undersecretary of inter-American affairs at the time of the Contras affair involving the illicit sale of weapons to Iran and the channeling of the receipts to the Contras. When he was called to testify before Congress, he claimed to have had no knowledge of any illegal activities. A later Independent Counsel investigation alleged that he had lied to Congress. He pleaded guilty to two counts of withholding information from Congress. On November 15, 1991, the presiding judge, Aubrey E. Robinson, sentenced Abrams to two years probation and 100 hours of community service. On December 24, 1992, outgoing President George H.W. Bush granted Abrams a full pardon amid much controversy.

From 1989 to 2002, Abrams wrote and worked for a number of research and public policy organizations. He was a senior fellow at the Hudson Institute, a member of the Council on Foreign Relations, and a member of the National Advisory Council of the American Jewish Committee. He also served as president of the Ethics and Public Policy Center. In 2002, Abrams returned to public life. The younger President George W. Bush appointed Abrams to the post of senior director of the National Security Council, with responsibilities for the Middle East, a position that did not require the Senate confirmation that he was unlikely to get.

Abrams was also the author of three books: *Undue Process* (1993), a scathing critique of the Office of Independent Counsel; *Security and Sacrifice* (1995), which urges an ag-

gressive U.S. foreign policy; and *Faith or Fear: How Jews Can Survive in Christian America* (1997), which argues that American Jewry would fare far better if it adopted conservative values and alliances, particularly with the Christian right. It was written with a grant from a prominent Conservative Foundation.

[Yehuda Martin Hausman (2nd ed.)]

ABRAMS, FLOYD M. (1936–), U.S. lawyer. Abrams, who was born in New York, graduated from Cornell University and Yale Law School and achieved fame as the nation's most prominent defender of the rights of the press under the First Amendment, arguing many important cases before the United States Supreme Court. At the law firm of Cahill, Gordon & Reindel, he argued more First Amendment and media cases before the Supreme Court than any lawyer in United States history. Perhaps his most important case involved the *New York Times*, which acquired a secret history of the United States policy in Vietnam from the administrations of Harry S. Truman through Lyndon B. Johnson in 1967, and begin printing it on June 13, 1971 (the war in Vietnam was still going on at the time). Abrams was co-counsel for the *Times* as the administration of Richard M. Nixon sought to enjoin the *Times* from printing the archive on grounds of national security. In a lower court decision, the government was able to bar the paper from printing the stories. The *Times* agreed to suspend publication while it awaited a decision in the Supreme Court. It was the first time in American history that the government exercised a prior restraint on the press. But the *Times* eventually prevailed. The case reached the Supreme Court, which decided by a 6–3 vote that the government's case against releasing the material was not compelling and allowed the series to be printed. Over the years Abrams represented virtually every major media organization in First Amendment-related cases: CNN, ABC, NBC, CBS, *Time*, *Business Week*, *The Nation*, and *Reader's Digest*, among others. Abrams was also counsel to the Brooklyn Museum in its legal battle with Mayor Rudolph Giuliani, who sought to close an art exhibition he considered blasphemous and in poor taste. In addition to his legal representation, Abrams was chairman of several American Bar Association committees on freedom of speech and of the press. He served as a visiting lecturer at Yale Law School and William J. Brennan Jr. Visiting Professor of First Amendment Law at the Columbia University Graduate School of Journalism.

[Stewart Kampel (2nd ed.)]

ABRAMS, MEYER H. (1912–), U.S. literary critic and scholar. Born in Long Branch, New Jersey, Abrams was educated at Harvard University, where he earned his bachelor's and master's degrees and, in 1940, his doctorate. He also studied at Cambridge University in 1934 and 1935 with I.A. Richards, author of *Coleridge on Imagination* (1934). Regarded as one of the most influential critics of Romantic literature, Abrams first established his reputation with his 1953 work *The Mirror and the Lamp: Romantic Theory and the Critical Tra-*

dition. Here Abrams defines Romanticism in terms of its “expressive orientation.” He characterizes 18th-century literature as a mirror, or “reflector,” which seeks to faithfully reflect the exterior world; 19th-century literature, on the other hand, is a lamp, or “projector,” which seeks to illuminate and express the inner life of the artist. With this metaphor, Abrams is considered to have created a significant definition of English Romanticism, one that profoundly affected subsequent studies.

In his later work, *Natural Supernaturalism: Tradition and Revolution in Romantic Literature* (1971), Abrams links English and German Romanticism to a Judeo-Christian conception of man's fall, redemption, and return to paradise, and he uses Wordsworth's “The Recluse” as the exemplar of his theory. Critical reception to *Natural Supernaturalism* was mixed, with Deconstructionists and New Historicists challenging its authority. Abrams's 1989 work, *Doing Things with Texts: Essays in Criticism and Critical Theory*, which includes previously published essays, addresses these critiques and further elaborates his literary theory.

During his long career at Cornell University, beginning in 1938, Meyer Abrams established a reputation as an esteemed Jewish scholar in a field previously dominated by non-Jewish academics. Professor emeritus at Cornell from 1983, Abrams is the recipient of numerous honors and awards, including a Ford Foundation fellowship in 1953, Guggenheim fellowships in 1958 and 1960, the James Russell Lowell Prize from the Modern Language Association of America in 1972 for *Natural Supernaturalism*, and the Award for Literature from the American Academy and Institute of Arts and Letters in 1990. He served as general editor of *The Norton Anthology of English Literature* (1962 and subsequent editions; founding editor emeritus of the 2005 edition) and was named a fellow of the American Academy of Arts and Sciences and the American Philosophical Society.

[Dorothy Bauhoff (2nd ed.)]

ABRAMS, ROBERT (1938–), U.S. politician, attorney general of New York. Abrams received his B.A. from Columbia College in 1960 and graduated from New York University School of Law in 1963. In 1965, he was elected at the age of 27 to the first of three terms in the New York State Assembly. In 1978, he ran a successful campaign for attorney general of New York State, becoming the first Democrat to hold the position in 40 years. As attorney general, he commanded one of the largest law offices in the nation, overseeing 1,200 employees, including 475 attorneys in 14 different locations throughout the State of New York. Abrams remained attorney general for 15 years. He is credited with altering New York's abortion law, prosecuting organized crime figures, implementing environmental protection laws, and protecting victims' rights (particularly abused children).

A leader among U.S. attorney generals, Abrams served as president of the National Association of Attorney Generals. His colleagues also awarded him the Wyman Award as an outstanding attorney general. In 1992, Abrams ran against in-

cumbent Senator Alphonse D'amato, losing by 1.2 percentage points. Married to an observant Jewish woman, he would not campaign or work on Friday evening or Sabbath morning, and considered it a professional requirement to be more lax Saturday afternoon. Subsequently he worked as an attorney for the law firm Strook & Strook & Lavan LLP in New York.

[Yehuda Martin Hausman (2nd ed.)]

ABRAMSKY, YEHEZKEL (1886–1976), talmudic scholar. Abramsky was born in Lithuania. He studied at the yeshivot of Telz, Mir, and Slobodka as well as under Ḥayyim *Soloveichik of Brisk. He achieved a reputation as a profound talmudic scholar and active communal worker. During World War I and the Russian Revolution he wandered in Russia and applied himself to learning, lecturing, and strengthening religious life. He was appointed rabbi of Slutsk and Smolensk. In 1928 Abramsky and S.J. Zevin published *Yagdil Torah*, a periodical dedicated to strengthening Torah study in the unfavorable conditions of the Soviet Union. It was probably the last Jewish religious periodical published in the Soviet Union for nearly 60 years. In 1930 he was arrested as a “counter-revolutionary.” Abramsky was sentenced to hard labor in Siberia, but, after two years, his wife and friends succeeded in obtaining his release. He went to London, where he was appointed rabbi of the Machzike Hadath congregation, and subsequently became *dayyan* of the London *bet din*. He became a British subject in 1937. In London, his strong personality was largely responsible for the influence of traditional Orthodoxy in the official community. He was appointed a member of the Moezet Gedolei ha-Torah of *Agudat Israel. In 1951 he retired and took up residence in Jerusalem, where he became a significant figure in the yeshivah world. Abramsky wrote *Divrei Mamonot* (1939) and *Erez Yisrael* (1945), but his scholarly fame rests on his *Ḥazon Yehezkel*, a 24-volume commentary on the Tosefta, with his novellae (first volume, 1925). In 1955 he was awarded the Israel Prize. Several of his responsa were published in London (1937). In Israel he was recognized as a rabbi of great stature, and his funeral in Jerusalem was attended by an estimated 40,000 mourners.

ABRAMSON, 18th–19th century family of German medalists and engravers.

JACOB ABRAHAM (1723–1800), born in Poland, worked in the mints of Berlin, Stettin, Koenigsberg, and Dresden. In 1752, Frederick II of Prussia appointed him medalist at the Berlin mint. Abraham struck 33 commemorative medals, among them one in memory of Moses *Mendelssohn. His son, ABRAHAM (1754–1811), studied with his father and with Tassaert at the Berlin Kunstakademie. Working at first with his father but after 1784 on his own, he produced a series of medals depicting German scholars. The first medal, of Moses Mendelssohn, which he did with his father, was followed by

many others including Lessing and Kant. He worked as his father's assistant from 1771, but was appointed royal medalist in 1782 and in this function cut mainly mint dies and worked at portrait medals in wax; after 1786 he exhibited them at the Kunstakademie. Aided by a government grant, he made a tour of Vienna, Venice, and Rome from 1788 to 1792. Beside his work for the mint Abraham received government commissions for commemorative medals and wax portraits. He also executed work for Russia and several German states, among them a medal to celebrate Jewish emancipation in Westphalia in 1808. Abraham also did private work, such as medals of Markus *Herz (1803), and Daniel *Itzig (1793). His signature was Abr, A/S, N, or sometimes just A. Of his lapidary work only a carnelian with the portrait of Frederick William II is known. In 1792 Abramson was member of the Berlin Akademie der Kuenste and of other similar bodies.

His brother, MICHAEL JACOB (1750–1825), was also an engraver. He exhibited after 1787 at the Berlin Kunstakademie but apparently later emigrated to Scandinavia. His works include a copper-plate engraving of Zevi Hirsch *Levin, chief rabbi of Berlin (1798). It is suspected but unconfirmed that he was baptized. HIRSCH (d. 1800), another son of Jacob, also worked as an engraver at the Berlin mint.

ABRAMSON, JERRY EDWIN (1946–), U.S. politician. Born in Louisville, Kentucky, Abramson graduated from Indiana University (1968). After having served in the U.S. Army between 1969 and 1971, for which he received a medal for meritorious service, he returned to law school and was graduated from Georgetown School of Law in 1973. He then entered private practice with Greenbaum, Doll, and McDonald, where he became a partner and immediately became active in Democratic politics, first as a member of the Board of Alderman and later as general counsel to Kentucky Governor John Y. Brown. He was elected mayor of Louisville in 1986, a position he held for 12 years. A national leader, he was president of the U.S. Conference of Mayors in 1993–94 and vice chair of the Democratic Platform Committee when his fellow southerner Bill Clinton ran for president in 1992. He chaired the Clinton reelection efforts for Kentucky. After being barred for reelection by term limits, Abramson became mayor once again after the government of Louisville had been regionalized, serving from 2003 as Louisville metro mayor.

[Michael Berenbaum (2nd ed.)]

ABRAMSON, JESSE (1904–1979), U.S. sportswriter. Known as the leading track and field writer in the U.S., Abramson was the first person from the media to be elected to the National Track & Field Hall of Fame, in 1981. He witnessed every Olympics from 1928 until 1976, as a reporter for the *New*

York Herald Tribune, for the *International Herald-Tribune* in 1972, and as foreign press liaison at the 1968 and 1976 Games. His obituary in the *New York Times* noted: "Colleagues called him 'The Brain,' in recognition of his profound knowledge of track and his phenomenal memory for detail." Abramson was honored with the Grantland Rice Award of the Sportsmen Brotherhood, the James J. Walker Award for service to boxing, and the career achievement award from the New York Track Writers Association. He was a founder and long-time president of the N.Y. Track Writers Association, which presents the annual Jesse Abramson Award to the outstanding athlete of the year. Abramson also reported on football and boxing, serving as president of the New York Football Writers Association, and was awarded the Boxing Writers' Association of America Nat Fleischer Memorial Award for Excellence in Boxing Journalism in 1976.

[Elli Wohlgelernter (2nd ed.)]

ABRAMSON, SHRAGA (1915–1996), rabbinic scholar. Born in Ciechanowicz, in the district of Bialystok, Poland, he received rabbinic ordination in 1936, in which year he immigrated to Erez Israel where he continued his education in various yeshivot and at the Hebrew University. He served on the faculty of the Jewish Theological Seminary in New York from 1952 until 1958, the final year as associate professor. From 1958 he was professor of Talmud, Geonica, and *rishonim* at the Hebrew University in Jerusalem. His scholarly contributions are to be found in the areas of Talmud, Geonica, rabbinic Hebrew, biblical exegesis and interpretation in the Middle Ages, medieval Hebrew poetry and literature, and medieval Hebrew philology. They are noteworthy for their erudition in talmudic and rabbinic literature and their disciplined scientific research methods. His main field, however, is Geonica to which he has made important contributions. He was awarded the Israel Prize for Jewish studies in 1974.

His most important published work was *R. Nissim Ga'on* (Heb., 1965). Among his earlier works are critical editions of R. Samuel ha-Nagid, *Ben Mishlei* (1948) and *Ben Kohelet* (1953). His other published works include *Massekhet Avodah Zarah* (1957), a publication of a manuscript of the tractate *Avodah Zarah* of the Babylonian Talmud; *Massekhet Bava Batra* (1958), a Hebrew translation of the tractate *Bava Batra* of the Babylonian Talmud; *Ba-Merkazim u-va-Tefuzot bi-Tekufat ha-Ge'onim* (1965), on the geonic period; *Bi-Leshon Kodemim* (1965), a study in medieval Hebrew poetry; and *Sheloshah Sefarim shel R. Yehudah ibn Bala'am*.

[Israel Francus]

ABRASS, OSIAS (Joshua; 1829–1883), Russian *hazzan* and synagogue composer. He was born in Berdichev and became known as "Pitshe Odesser" ("The Mite from Odessa") when as a boy he gained fame for his soprano solos in the choir of his teacher, Bezalel Shulsinger in Odessa. Abrass also studied with *Sulzer in Vienna. He was *hazzan* and choir leader

in Tarnopol in 1840 and in Lvov in 1842. In 1858 he became chief *hazzan* in the Odessa synagogue, the largest in Russia. Abrass' phenomenal vocal performance as well as his contributions to synagogal choir music enhanced the fame of this synagogue and set new standards in Eastern European liturgical singing. His sole printed work was *Simrat-Joh; Gottesdienstliche Gesaenge der Israeliten* (1874) for cantor and choir. His virtuosity in coloratura was compared with that of Adelina Patti, the great soprano, as exemplified by his "Simrat-Joh" No. 27, or the following "ornamental extension" of the note E-flat (*ibid.* No. 32):

Abrass' 39 published compositions may be judged best as a further attempt to connect the traditional *meshorerim* style with Western choral music. He uses chordal harmony, effects learned from Rossini (No. 10), and even fugato technique (No. 18) only to embellish a basically monodic melody. See also G. Ephros, *Cantorial Anthology*, 1 (1919), no. 51.

ABRAVANEL, MAURICE (de) (1903–1993), conductor. Born in Salonika, Abravanel studied at Lausanne University, and in Zurich and Berlin. He began his career in 1924 as conductor at the Zwickau Municipal Theater. Before leaving Germany in 1933, he had already conducted at the Berlin Opera, and subsequently he conducted ballet performances in Paris, London, and at the Rome Opera. He toured Australia with the British National Opera Company before moving to the United States in 1936, where he conducted at the Metropolitan (1936) and in Chicago (1940–41). In 1946, he conducted musicals such as *Weill's *Lady in the Dark* for a season on Broadway. In 1947, he became conductor of the Utah State Symphony Orchestra at Salt Lake City, which he made into one of the most adventurous and remarkable musical bodies in the United States based in a small city. Abravanel was also a professor at the University of Utah.

[Max Loppert (2nd ed.)]

ABRECH (or **Abrek**; Heb. אַבְרֵךְ, *avrekḥ*), probably a command or a title. After deputizing Joseph, Pharaoh "had him ride in the chariot of his second-in-command, and they cried before him, 'Abrek!'" (Gen. 41:43; cf. the Persian ceremony in Esth. 6:11). The exact meaning of the word is uncertain. One view equates the word with Egyptian *'ib-r.k*, "attention!" or

“have a care.” A difficulty according to this view is that the singular suffix *k* appears where one would expect the plural suffix *tn*. Another view (reminiscent of the ancient Jewish derivation from *brk* (“kneel”)) notes that *brk* (borrowed from Semitic) means “render homage” in Egyptian and that the initial *alef* of *Abrek* may possibly be equated with the Egyptian imperative prefix ³; proponents of this interpretation therefore translate “kneel!” or “render homage!” This command is similar to the later Egyptian command of homage “to the ground! to the ground!” Both kneeling and complete prostration as acts of homage are represented in Egyptian art. Others take the word as a title, citing the Akkadian *abaraku*, “chief steward of a private or royal household” (I.J. Gelb et al., *The Chicago Assyrian Dictionary*, vol. 1, pt. 1, pp. 32–5); note Gen. 41:40a: “You shall be in charge of my house...” None of these views is free of difficulty, and the question remains open.

ABSABAN, SOLOMON (d. 1592), scholar of Safed and disciple of Isaac *Luria. Solomon was a friend and contemporary of Moses *Alshekh and studied under Joseph *Caro. It is probable that, like Alshekh, he was among those ordained by Caro. From 1562 his signature appeared on letters and decisions together with those of Joseph Caro and Moses di *Trani. In 1571 he joined them in excommunicating the physician Daoud, an opponent of Joseph *Nasi. In a manuscript responsum (Oxford, 832, n. 23) his signature appears at the head of the list of leading rabbis of Safed. Absaban taught in the talmudic academies of Safed, where Jacob *Abulafia was among his students. In 1582 he served as *av bet din* of Safed. Absaban associated with the mystics there, and was a friend of Eleazar b. Moses *Azikri, who referred to him as distinguished in wisdom, piety, and holiness. Ultimately he settled in Damascus where he presided over the yeshivah until his death.

ABSALOM (Heb. אֲבִישׁוֹם, אֲבִשָׁלֹם, אֲבִשָׁלוֹם), third son of *David, born during his reign in Hebron, probably about 1007/06 B.C.E.

In the Bible

Absalom was the son of Maacah, the daughter of King Talmai of Geshur. When his half brother Amnon dishonored his full sister Tamar (11 Sam. 13:1–20), he considered himself the avenger of her honor and ordered Amnon killed at a shearing feast on his estate, to which he had invited all the king's sons (*ibid.* 13:23–29). Fearing David's wrath, he took refuge at the court of his grandfather, probably a vassal-king of David by that time (c. 987 B.C.E.). Meanwhile, *Joab took up his cause with the king and obtained David's permission for Absalom to return to Jerusalem without fear of punishment; later a

full reconciliation was effected between the two (*ibid.* 14:33; c. 983 B.C.E.).

Probably David's second son, Chileab (11 Sam. 3:3) or Daniel (1 Chron. 3:1), either died young or was mentally or physically handicapped, because it was Absalom, the next oldest son of David, who was the most obvious candidate for the succession. He was a handsome man of prepossessing appearance, a glib tongue, and winning manners (11 Sam. 14:25; 15:2–6), and seems to have gained a great deal of popularity among the common people as well. Though strong headed and willful, he knew how to bide his time in order to achieve his desires (cf. *ibid.* 13:20) and how to work for that end (cf. *ibid.* 14:28–30).

Considering these qualities, it is difficult to understand what induced him to plot a revolt against his father (c. 979 B.C.E.); but since there was no strict law that David's successor must be his oldest living son, perhaps Absalom was worried by the influence of David's favorite wife Bath-Sheba and the possibility that David might, as he eventually did, proclaim his oldest son by her his successor.

Be that as it may, the plot was carefully planned at Hebron (cf. 11 Sam. 15:7). The revolt seems to have enjoyed wide support in Judah, which was perhaps offended by the old king's refusal to show any palpable preference for his own tribesmen, as well as among other Israelite tribes, who were dissatisfied with the gradual bureaucratization of the kingdom and the curtailment of tribal rights.

David retreated with his immediate entourage – bodyguards (the *gibborim*), foreign mercenaries (the Cherethites and Pelethites), 600 Gittites, and some of the people who remained loyal to him – to Transjordan. At the same time, he took care to leave a “fifth columnist” in Jerusalem in the person of *Hushai the Archite, and with him two intelligence messengers, *Ahimaaz and Jonathan, the sons of the two high priests. Hushai succeeded in persuading Absalom to reject his adviser *Ahithophel's sensible proposal to pursue the old king and defeat him before he could find further support. In the subsequent battle in Transjordan (in the forest of Ephraim) Absalom's tribal levees proved no match for David's veteran mercenaries under Ittai the Gittite, who was supported by the loyal Israelites under Joab and Abishai. Absalom was caught by his head in a thick tree and killed on Joab's orders, which contravened the express command of David to spare his life (11 Sam. 18:9). The king's mourning for his son almost cost him the support of his loyal troops (*ibid.* 19:1–9).

Absalom had no son, which prompted him to erect a memorial monument for himself (*ibid.* 18:18; cf. however *ibid.* 14:27); he apparently had a daughter, Maacah, who was named for his mother and who later married her cousin *Rehoboam and became the latter's favorite queen and mother of the heir-apparent *Abijam.

[*Encyclopaedia Hebraica*]

In the Aggadah

Although the Bible stated that it was by his head and not specifically by his hair that Absalom was caught, the rabbis assume that it was by his hair and make of his death a homily on false ambition, unfilial conduct, and poetic justice. Of the perfect physical qualities ascribed to Adam, Absalom is regarded as having inherited his hair (*Pirkei Rabbenu ha-Kadosh*, in L. Gruenhut, *Likkutim*, 3 (1899), 72). It grew so luxuriantly that although he had taken the Nazirite vow prohibiting the cutting of the hair, he was permitted to trim it from time to time (Nazir 5a). It was his hair, in which he gloried, which brought about his death (Sotah 1:8). He was caught “in the heart of a tree” (11 Sam. 18:14). “But did one ever hear of a tree having a heart. This turn of phrase teaches that when a man becomes so heartless as to make war on his own father, nature takes on a heart to avenge the deed” (Mekh. Shirata 6). So unforgivable was his conduct that he is enumerated among those who have no share in the world to come (Sanh. 103b). In *Exodus Rabbah* 1:1 he is cited as one of the exemplars of “spare the rod and spoil the child.” His abode is in hell where he is in charge of ten heathen nations (A. Jellinek, *Beit ha-Midrash*, 2 (1938), 50) but David’s lament saved him from the extreme penalties of hell (Sot. 10b).

[Louis Isaac Rabinowitz]

In Folklore

In Jewish folk sayings and in Palestinian legends clustered around the Pillar of Absalom (Yad Avshalom) in the Kidron Valley of Jerusalem, rebellious Absalom serves as an example of punishments inflicted upon sons transgressing the Fifth Commandment. According to the report from Jerusalem (1666) of a French Christian pilgrim (Bernardin Surinus), the inhabitants of Jerusalem used to bring their children to the tomb of Absalom to shout and throw stones at it, stressing the end of wicked children who did not revere their parents.

[Dov Noy]

In the Arts

In Western literature Absalom has been regarded as a symbol of manly beauty. The subject inspired a medieval mystery play and several Elizabethan dramas. George Peele’s *The Love of King David and Fair Bethsabe* (1599) deals at length with Absalom’s rebellion, which is blamed on David’s illicit love affair with Bath-Sheba, and in tune with the bloodthirsty taste of the era shows the unfortunate prince, suspended by his hair from a tree, being done to death by Joab. John Dryden’s *Absalom and Achithophel* (1681), a political satire in verse, presents Charles II as David, Charles’ illegitimate son the Duke of Monmouth as Absalom, and Lord Shaftesbury as the false counselor Ahithophel. Some 20th-century works based on this theme are *Absalom* (1920), a translation of a Japanese play by Torahiko Kōri; Howard Spring’s novel *O Absalom* (1938; later reissued in the U.S.A. as *My Son, My Son*); and William Faulkner’s novel *Absalom, Absalom* (1936).

Some artists in the late Middle Ages interpreted Absalom’s death as a prefiguration of the Crucifixion. Parts of the story occasionally appear in illuminated manuscripts, such as the Winchester Bible, a French *Bible moralisée* (1250) now in Toledo, and the 14th-century Anglo-Norman Queen Mary’s Psalter (British Museum), which illustrates most of the biblical narrative. Absalom’s end also appears in an Italian 15th-century pavement mosaic in Siena Cathedral. *The Reconciliation of David and Absalom* (1642) was painted by *Rembrandt. The Pillar of Absalom (Yad Avshalom), which stands on the traditional site of Absalom’s burial place, is one of several sepulchral monuments in the Kidron Valley, Jerusalem, that date from the Second Temple and Roman periods. The monument is executed in the late Hellenistic style, however, and its link with Absalom does not predate the 16th century.

David’s lament for Absalom has inspired a number of composers, notably Heinrich Schuetz, whose motet for bass solo and trombone quartet *Fili mi Absalon* (in *Symphoniae Sacrae* vol. 1 (1629), no. 13) is a masterly work. No less poignant is *Lugebat David Absalon: Absalon fili mi*, a four-voice motet by Josquin des Prés, written a century earlier. In the 16th century Jacob Hand (Gallus) arranged a notable setting of the lament. A number of oratorios, mainly of the 18th century, describe Absalom’s rebellion and death. A recent composition is *David Weeps for Absalom* (1947), a work for voice and piano by David *Diamond. The Judeo-Spanish song “Triste estaba el Rey David” (arranged for choir by Joaquín Rodrigo, 1950), tells the story of Absalom’s rebellion in romantic form.

ABSALOM (1) Judah Maccabaeus’ ambassador in 164 B.C.E. (11 Macc. 11:17). (2) The father of Mattathias and Jonathan, who both held high commands during the Maccabean wars (1 Macc. 11:70 and 13:11; Jos., *Ant.*, 13:161, 202). (3) The younger son of John Hyrcanus I. Upon the death of his father, Absalom was imprisoned by his brother Aristobulus I and released when Alexander Yannai ascended the throne. He played a prominent part in the defense of Jerusalem against Pompey, but was captured by him (Jos., *Ant.*, 14:71; cf. Wars, 1:154). (4) Jewish partisan leader at the beginning of the Roman War. He was associated with the Sicarii leader *Menahem b. Judah, and called by Josephus “his most eminent supporter in his tyranny.” When *Eleazar son of Ananias, the captain of the

Temple, turned against Menahem and assassinated him, Absalom shared his fate (Jos., Wars, 2:448). Because of his views regarding the Zealots and Qumran, Cecil Roth identified him with the Absalom mentioned in the *Pesher* ("Commentary") on Habakkuk found at Qumran (1 QpHab), but few scholars would accept this. (5) The name Absalom appears on an ossuary from Givat ha-Mivtar and in a tomb inscription from Silwan, both dated to before 70 C.E. The name "abshi," perhaps an abbreviation of Absalom, appears in a deed on papyrus of 131 C.E. from Wadi Muraba'at. (6) A Late Hellenistic tomb monument named after Absalom, David's rebellious son (II Sam. 3:3), is situated in the Kidron Valley, west of the Temple Mount, in Jerusalem. The style of the tomb, which shows Orientalizing architectural influences, suggests a first century B.C.E. date for the time it was hewn. Recent work on this monument by J. Zias and E. Puech has brought to light a Byzantine inscription in Greek next to the entrance to the tomb which refers not to Absalom but to the father of John the Baptist. It reads: "This is the tomb of Zachariah, martyr, very pious priest, father of John."

[Abraham Schalit and Cecil Roth / Shimon Gibson (2nd ed.)]

ABSALOM, MONUMENT OF. Situated in the Kidron Valley, close to the Temple Mount in Jerusalem, are a number of monumental rock-hewn tombs of which one has been attributed by tradition to Absalom in reference to II Samuel 18:18, where it is stated that Absalom set up for himself a "pillar" in the King's Valley. In Arabic it is known as "Tantour Firaoun" (pharaoh's crown). This monument is a prominent feature in the topography of Jerusalem and was frequently commented upon by travelers and pilgrims since medieval times. The monument is freestanding and the lower part was rock-cut, whereas the upper part – hat-like in appearance – was built out of finely carved ashlars in a local architectural style utilizing Hellenistic features. The monument has been studied by many scholars since the 19th century: C. Clermont-Ganneau dug there, H. Vincent made a detailed study, and a substantial study of this and the other funerary monuments in the Kidron Valley was made by N. Avigad in the 1950s. Excavations around the foot of the monument were made by E. Oren in the 1970s, but the results remain unpublished. Probably the best short descriptions appear in guidebooks published by K. Prag and J. Murphy-O'Connor. Access to the entrance to the inner tomb chamber is from the south. The entrance led to a rock-hewn chamber which was originally square with a bench within an *arcosolium* on the west side, with a ceiling with a sunken panel decorated with a central wreath and four circles in relief, and with a fine carved cornice along the junction between ceiling and walls. The style of the monument suggests a date late in the Early Roman period, i.e., the first century C.E., contrary to some scholars who have suggested a date in

the first century B.C.E. The internal chamber underwent major changes in the Byzantine period, 4th–6th centuries C.E., and it was probably converted into a reclusive cell for a Byzantine monk. Above the entrance to the tomb are faint Greek inscriptions which were first recorded by J. Zias in 2000. According to Emile Puech, one of these inscriptions is of Byzantine age and mentions Zacharias, father of John the Baptist: "This is the tomb of Zachariah, martyr, very pious priest, father of John." The adjacent complex of tomb chambers associated with the monument contained a chapel and was held to mark the graves of St. Zacharias, St. Simeon, and St. James (the first bishop of Jerusalem) in the 12th century. Traces of medieval wall paintings are visible on some of the chamber walls. Within the interior chamber of the monument itself is a late medieval three-line Hebrew inscription ("Shamsi ben ... [unclear]" – incorrectly read by Dalman in 1914) which was probably incised by a Jewish traveler to Jerusalem. In the 19th century a bridge for a road crossing over the Kidron Valley existed in front of the funerary monument and is evident in old photographs (e.g., F. Bedford, 1862).

[Shimon Gibson (2nd ed.)]

ABSALON (1964–1993), Israeli sculptor. Absalon was born in Ashdod as Meir Eshel and adopted the name Absalon when he arrived in Paris in the late 1980s. He won his reputation as an artist from the 1:1 scale architectural models that he constructed of idealized living units. These wooden models, painted white, demonstrate an obsession with order, arrangement, and containment, and have associations both of protective shelters and monastic cells. His sculptures are reminiscent of the works of the Russian constructivists, the Dutch De Stijl, and Le Corbusier. His last exhibition was of *Six Cellules* in Paris in 1993. Absalon died of AIDS at the age of 28.

[Shaked Gilboa (2nd ed.)]

ABSE, DANNIE (1923–), English poet. Abse was born in Cardiff. After four years in the Royal Air Force in World War II he qualified as a doctor. From 1947 to 1954 he edited and published the magazine *Poetry and Poverty*. Although his work included fiction and drama, he was primarily a poet. Abse has thought deeply about the Holocaust, and his challenge to God to explain Himself to man (in "The Abandoned") is in the Hebraic tradition. His verse collections include *After Every Green Thing* (1949); *Walking Under Water* (1952); *Tenants of the House* (1957); *Poems. Golders Green* (1962); *Selected Poems* (1963); and *Small Desperation* (1968). He wrote two novels, *Ash on a Young Man's Sleeve* (1954) and *Some Corner of an English Field* (1956); and two dramas, *Fire in Heaven* (1956) and *Three Questor Plays* (1967). Abse's *White Coat; Purple Coat: Col-*

lected Poems 1948–1988 appeared in 1991. He has also written two volumes of autobiography, published in 1974 and 2001. His brother LEO ABSE (1917–) was a Labour member of the British Parliament for a Welsh seat from 1958 until 1997. He introduced bills liberalizing legislation governing homosexuality (1967) and divorce (1968). A solicitor, Leo Abse wrote “psychobiographies” of British politicians Margaret Thatcher and Tony Blair.

[Jon Silkin / William D. Rubinstein (2nd ed.)]

ABT, ISAAC ARTHUR (1867–1955), U.S. pediatrician. Abt, who was born in Wilmington, Illinois, served as professor of pediatrics at Northwestern University (1897–1902), Rush Medical College (1902–08), and again at Northwestern from 1908. He was the first president of the American Academy of Pediatrics (1931). Abt wrote prolifically on clinical, social, and experimental subjects in the field of pediatrics and wrote an encyclopedic eight-volume work *Pediatrics* (1923–36). The section dealing with nutritional disturbances in infancy is of particular significance. He was the first American pediatrician to use protein milk in the treatment of diarrhea in infants. His work *The Baby’s Food* was published in 1917.

[Suessmann Muntner]

ABTERODE (Abedroth, Aptrod), DAVID BEN MOSES ELIAKIM (d. 1728), rabbinic author. Apparently he was born at Abterode near Frankfurt where he served as *dayyan*. He wrote a commentary on *Sefer Ḥasidim* and glosses on liturgical poems. All his manuscripts were destroyed in the great fire of Frankfurt in 1711. His son Solomon (Zalman) rewrote from memory the commentary on *Sefer Ḥasidim* and published it together with the text (1724); other editions contain an abridged version of the commentary only. Jacob Emden criticized the commentary (*She’elot Ya’vez*, 1:160), which Joseph David *Sinzheim, the author’s great-grandson, defended in his book *Yad David* (1799), 28d (on Shab. 81a).

BIBLIOGRAPHY: Michael, Or, no. 768; M. Horowitz, *Frankfurter Rabbinen*, 2 (1883), 73; idem, *Avnei Zikkaron* (1901), 202–3, no. 1938; J. Freimann, in: J. Wistinetzki (ed.), *Sefer Ḥasidim* (1924), 9; R. Margalio (ed.), *Sefer Ḥasidim* (1957), 7 (introd.).

[Yehoshua Horowitz]

ABTSHUK, AVRAHAM (Avrom; 1897–1937), Soviet Yiddish writer and critic. Born in Lutsk, Volhynia, he lived in Kiev after 1921. In the late 1920s and 1930s he was associated with the Jewish Research Institute of the Ukrainian Academy of Science in Kiev. In 1926 he began contributing short stories to the Kharkov-based literary journal *Di Royte Velt* and is best known for *Hershl Shamay* (1929; part 2, 1934), an occasionally humorous narrative which deals with the industrialization of Jewish workers under the Soviets. Abtshuk’s *Etyudn un Ma-*

teryaln tsu der Geshikhte fun der Yidisher Literatur-Bavegung in F.S.R.R. (“Studies and Materials for the History of the Yiddish Literature Movement in Soviet Russia,” 1934) is important both as a document and as a source of documents; it contains minutes, letters, and resolutions of Yiddish literary groups in Kiev, Moscow, Kharkov, and Minsk. Abtshuk was associate editor of the proletarian writers’ periodical *Prolit* (1928–32) and its successor *Farmest* (1933–37). Accused of Trotskyist tendencies and Jewish nationalism, allegedly evident in *Hershl Shamay*, he perished during the Stalinist “purges.”

[Leonard Prager / Gennady Estraikh (2nd ed.)]

ABU, Arabic word meaning “father of” used in personal names. Jews living in Islamic countries followed the Arab custom, and addressed one another by their *kunya* (Arabic, “nickname”). Originally, the *kunya* contained the word *abu*, and the name of a son of the person concerned, normally that of the eldest, e.g., a man whose son’s name was Zayd, was called Abu Zayd. If there was no son in the family, this could not apply but, nonetheless, imaginary *kunyas* developed, and these predominated among Jews. Thus, persons called Abraham were often addressed as *Abu Ishāq* (“Father of Isaac”) or Jacob was known as *Abu Yūsuf* (Joseph) instead of Jacob. The reverse procedure was even more common. Since it was customary to call a child after his grandfather, the *kunya* often contained the names of the father of the biblical or other historical personality after whom the man was named. As the father of Moses was Amram (Arabic *‘Imrān*), as *Abu ‘Imrān*. The word *abu* also denotes “possessor,” especially of a certain quality. Well-known examples of this use are *Abu-al-‘Āfiya* (“possessor of health”) from which the family name *Abulafia is derived. The honorifics preferred by Jews were generally those expressive of abstract notions, both in the singular and plural, e.g., *Abu al-Sā’d* (“happiness”) and *Abu al-Barakāt* (“blessings”). This might be compared to the Hebrew equivalents *Avi-Musar* (father of ethics, moral, moralist) and *Aḥi-Musar* (brother of ethics) used in Hebrew poetry. Sometimes two *kunyas* were given, one at birth and another added on some special occasion, such as recovery from a dangerous illness. Biblical and talmudic names were connected with *kunyas* believed to be of the same or similar meaning.

ABU AL-FAḌL HASDAY (late tenth century), Spanish scholar. According to the 13th-century Arab biographer Ibn Abī Uṣaybī‘a, Abu al-Faḍl, who lived in Saragossa, was a member of a distinguished Andalusian Jewish family of priestly descent. He was competent in medicine, philosophy, arithmetic, and music. He had a good knowledge of both Arabic and Hebrew. Moses ibn Ezra refers to Abu al-Faḍl as one who “acquired knowledge in all branches of science, was accom-

plished in philosophy, and well versed in Hebrew and Arabic poetry and prose.”

[Amnon Shiloah]

ABU AL-FARAJ HARUN IBN AL-FARAJ (Heb. **Aaron b. Jeshu‘a**; Jerusalem, first half of 11th century), Karaite grammarian, lexicographer and exegete. Abu al-Faraj accepted the Greek theory (which reached him through Arabic channels) that language is an artificial product of human convention and is governed by the laws of logic. His method and terminology draw heavily on Arab linguists. He held that all forms of the Hebrew verb are based on the infinitive, and made a detailed study of the participle. He also pioneered the investigation of biblical Aramaic grammar in its relationship to Hebrew, as well as comparative treatment of Hebrew, Aramaic, and Arabic. He followed strictly the principle of bi-literal roots. The works of Abu al-Faraj became well known among Rabbanite scholars of Spain, who refer to him at times simply as “the Jerusalemite Grammarian.” All his writings are in Judeo-Arabic. They include *Al-Kitāb al-Mushtamil*, on the roots and formations of the Hebrew language (mss. in St. Petersburg; among them the copy made in 1112 for the *gaon* Elijah b. Abiathar) of which chapter 8 treats Aramaic grammar; *Al-Kitāb al-Kāfi*, a digest of the former, published by G. Khan, M. Angeles Gallego, and J. Olszowy-Schlanger as *The Karaite tradition of Hebrew Grammatical Thought in Its Classical Form: A Critical Edition and English Translation of al-Kitāb al-kāfi fī al-luġa al-‘Ibrāniyya* by Abu al-Faraj Hārūn ibn al-Faraj, Leiden 2003; *Sharḥ al-Alfāz*, an Arabic translation of selected verses or clauses in the Bible, with explanatory notes, arranged in the order of the Bible; and a commentary on the Pentateuch in Arabic, said to be an abridgement (*talkhīṣ*) of that of *Joseph b. Noah, who was his teacher. Even though an abridgement, it is quite extensive; most of it survived in several fragmentary mss. in St. Petersburg. Another important contribution was his work on the phonetics of biblical Hebrew according to the Tiberian tradition and the rules of cantillation of the biblical text, entitled *Hidāyat al-Qāri* (“The Guide of the Reader”). Until quite recently it was ascribed to various other authors. The importance of the work lies in its uniqueness as a source for the living tradition in 11th-century Erez Israel. The work was written in a long and short version. Of the former only short fragments have survived, while most of the latter was published in a critical annotated edition by I. Eldar (Jerusalem 1994). Various Hebrew and Judeo-Arabic adaptations had been circulating in the Middle Ages in Europe and the Near East, one of them a paraphrase by the Byzantine Karaite Joseph ha-Qustandini (11th century?), entitled *Adat Devorim*.

[Samuel Miklos Stern / Haggai Ben-Shammai (2nd ed.)]

ABU AL-FAT (Samaritan **Abi-Afeta Ban Ab-Hisdah**; 14th century), author of a Samaritan chronicle in Arabic, *Kitāb al-Tarikh* (“Annals”). Born in Damascus of the Danati family, which was renowned for its scholars and scribes, Abu al-Fat went on a pilgrimage to Nablus in 1352. He was invited by the high priest Phinehas b. Joseph to write the history of his people from the creation of the world to his own time. Only in 1355, on a second visit to Nablus, was he able to start this undertaking. He brought with him three fragmentary chronicles in Hebrew and a *Silsila* (chain), i.e., a genealogical list of the Samaritan high priests beginning with *Aaron (Moses’ brother) that came from the home of the high priest in Damascus; this was presumably the *Tolidah* (see *Samaritans, Language and Literature). The high priest in Nablus put at his disposal a number of chronicles in Hebrew and Arabic, among which was the still extant Samaritan *Book of Joshu* in Arabic. Another work in the otherwise unknown chronicle of Zadakah was rejected by Abu al-Fat as unreliable.

The 14th century was a time of revival for the Samaritan community in Nablus, and Abu al-Fat sought to make use of the scanty and dispersed source material still existing in his time before it might be lost. Like all medieval chronicles, his work contains much legendary material. The dating is not always accurate. Abu al-Fat wrote in Middle Arabic, and his language is colored by many Hebraisms, showing his dependence on the Pentateuch and in some places on other Hebrew scriptures. The occasional use of elegant Arabic rhetorical figures reveals that he was also versed in Arabic literature. Abu al-Fat’s *Annals* end at the time of Muhammad, but, in accordance with Samaritan practice, various manuscripts were extended by later scribes. R. Payne-Smith began to edit the Arabic text together with a literal English translation (in M. Heidenheim’s *Deutsche Vierteljahrschrift fuer englisch-theologische Forschung und Kritik* (1863), 303–35, 431–59), but discontinued his work with the appearance of E. Vilmar’s scholarly edition *Abulfathi Annales Samaritani* (Gotha, 1865). Vilmar added a detailed introduction and short notes in Latin.

[Ayala Loewenstamm]

ABU AL-ḤASAN OF TYRE (Samaritan **Ab-Ḥisda Azzuri**; c. 11th century), Samaritan halakhist, exegete, and liturgical writer of priestly origin. His surname *Azzuri* may designate his origin from either the Syrian town *Zor* (Tyre) or the village *Zorta* near Nablus. The first translation of the Samaritan Pentateuch into Arabic is ascribed to him; it was revised two centuries later by Abu Sa'īd (see *Samaritans, Language and Literature). His chief work, written in Arabic and called *Kitāb al-Ṭabbākh* ("Book of the Cook" or "Book of the Druggist," and called by the Samaritans themselves "Book of the Meat") is a compendium of oral law dealing with many aspects of Samaritan practice and belief. It includes many polemical passages against the Jews – *Rabbanites and Karaites alike – and against some Christian and Muslim tenets. His halakhic decisions are still valid in the Samaritan community.

Three of Abu al-Ḥasan's exegetical treatises in Arabic are extant: *Sharḥ Aṣrat Addēbārem*, a commentary on the Ten Commandments (John Rylands Library, Manchester, Gaster Collection, Ms. 1929); a commentary on "*Ḥā'azinu*" (Deut. 32), known also as *al-Khuṭba al-Jāmi'a* ("The General Sermon," *ibid.*, Gaster Collection, Ms. 1813); and *Kitāb al-Ma'ād* ("Book of Resurrection"; Bodelean Library, Oxford, Ms. Hunt. 350). In the last he adduces proofs from the Pentateuch for the Samaritan belief in the day of vengeance and recompense (Deut. 32:35) and for the rising of the dead from the dust of their graves. Verses from "*Ḥā'azinu*" form an important part of these proofs. As the above manuscripts are included in some copies of *Kitāb al-Ṭabbākh*, as parts of the entire compendium, it remains questionable whether they originally belonged to the compendium and later became independent works under the influence of copyists and scribes, or vice versa. Abu al-Ḥasan also became known as a liturgical writer. His hymns are composed in Hebrew and in 11th-century Aramaic.

Halkin, in: *Leshonenu*, 32 (1968), 208–46.

[Ayala Loewenstamm]

ABU AL-MUNAJJĀ SOLOMON BEN SHAYA (12th century), government official in Egypt. His Hebrew name was Solomon b. Shaya and he was also known as *Sanī' al Dawla* ("The Noble [exalted] of the State"). Abu al-Munajjā was responsible for the administration of several districts in eastern Egypt and became famous for digging an irrigation canal (1113–18) which greatly benefited agriculture. The vizier al-Aḫḫāl, the regent, was jealous of him because the canal was called *Baḥr Abu al-Munajjā* (the canal of Abu al-Munajjā) and the regent wanted it to bear his name. The enemies of the Jews defamed him with the result that he was exiled to Alexandria and imprisoned without a trial. After several years he freed

himself by a ruse. Among the *genizah* fragments were found poems in his honor which recount the story of his case until he was finally reinstated. He is described as a benefactor of the Jews. According to Arab authors, Abu al-Munajjā was the ancestor of a family of physicians, Banu al-Safir, mostly converts to Islam who served as the court physicians of the Egyptian rulers.

[Eliyahu Ashtor]

ABU AWEIGILA (Ar. **Abu 'Aweiqila**), strategic position in eastern Sinai, about 19 road mi. (30 road km.) W. of *Nizānah. Situated near the course of Wadi el-Arish, at a road fork connected with el-Arish in the northwest and with Ismailiya in the west, it was a battlefield in the 1948, 1956, and 1967 wars. In one of the last battles of the War of Independence Israeli forces drove the Egyptians from 'Aslūj (near *Revivim) through Nizāna to Abu Aweigila, and from there moved on in the direction of el-Arish. During the Sinai Campaign the capture of the stronghold ultimately decided the outcome of the war. Before the Six-Day War (June 1967) the Egyptians extended their fortifications for many kilometers to all sides of Abu Aweigila and stationed a division in the area. The capture of the position enabled the Israeli Army to break through to the entire Sinai Peninsula.

[Efraim Orni]

ABUDARHAM (Heb. אבדורחם; also **Abudarhan**, **Abudarhen**, **Abudaram**, **Abudaran**; Ar. "father of coins" meaning "the rich man"), Spanish family. DAVID BEN SOLOMON ABUDARHAM constructed in the 13th century the synagogue of Almaliquin in Toledo, apparently identical with the Abudarham synagogue destroyed in the riots of 1391. He was probably the grandfather of the liturgical scholar David b. Joseph *Abudarham. Another DAVID ABUDARHAM in the same period was a tax farmer in Toledo: when tax assessment was assigned to the Jewish communities of Castile in 1290, it was decided that in case of dispute David was to render final decision. After the expulsion from Spain in 1492 the family was scattered throughout Italy and North Africa. MOSES and ISAAC ABUDARHAM gave hospitality to David *Reuveni in Rome in 1524. JUDAH ABUDARHAM, a fugitive from the Inquisition, became purveyor to the Portuguese in Agadir. After 1541 the family settled in Tetuan where it long provided the community with spiritual and political leaders. Another JUDAH ABUDARHAM was among the founders of the Gibraltar community; one of the Gibraltar synagogues, founded in 1820, still bears the family name. A third JUDAH ABUDARHAM represented France in Tetuan for 30 years.

[Zvi Avneri and David Corcos]

ABUDARHAM, DAVID BEN JOSEPH (14th century), liturgical commentator in Spain, author of *Sefer Abudarham*, written in 1340 in Seville. Abudarham came from a distinguished family, and apparently an earlier namesake was a communal leader in Toledo. Abudarham was moved to write his book, like *Asher b. Saul of Lunel before him, because “the customs connected with prayer have become varied from one country to another, and most of the people do not understand the words of the prayers, nor do they know the correct ritual procedures and the reasons for them.” The book is based on the Talmud and the decisions of the *geonim*, and on the early and later commentators. It abounds in source material of Spanish, Provençal, French, and Ashkenazi origins, not all of which has otherwise survived. Abudarham made extensive use of the prayer book of Saadia Gaon, and it seems he was the last to see and use an original of this book. He also utilized the *Manhig* of *Abraham b. Nathan ha-Yarḥi of Lunel and the *Minhagot* of Asher b. Saul, the legal dicta of *Asher b. Jehiel, and the *Turim*. Some scholars think he was a disciple of *Jacob b. Asher, author of the *Turim*. Abudarham commented upon the prayers in great detail and traced the variations in custom in different countries. He included a commentary on the Passover *Haggadah*, rules of intercalation, the order of weekly pentateuchal readings and *haftarot* for the entire year, and calendrical and astronomical tables. Abudarham appended to his book rules governing benedictions, dividing them into nine sections, along with their interpretation and explanation. His book was first published in Lisbon in 1490 and has since been republished frequently. H.J. Ehrenreich began an edition of it in Klausenberg in 1927, based upon a different manuscript together with an extensive commentary, but did not complete it. An edition, known as *Abudarham ha-Shalem* with variant readings, according to the same manuscript, introduction, and supercommentary, by S.A. Wertheimer, was published in Jerusalem (1959, 1963) by his grandson. However, a comprehensive critical edition of this book is still lacking. Abudarham also wrote a commentary on liturgy for the Day of Atonement ascribed to *Yose b. Yose, as well as on other liturgical poems (published under the title of *Tashlum Abudarham*).

BIBLIOGRAPHY: Michael, Or, no. 729; A.L. Prinz (ed.), *Tashlum Abudarham* (1900), introd.; H. Tchernowitz, *Toledot ha-Posekim*, 2 (1947), 247–50; A.J. Wertheimer (ed.), *Abudarham ha-Shalem* (1963²), introd., 393–6.

[Zvi Avneri]

ABU GHOSH, Israeli Arab village in the Judean Hills 8 mi. (13 km.) W. of Jerusalem. Its area consists of 1 sq. mi. (2.5 sq. km.). In 1968 Abu Ghosh had a population of 1,710, 98% of them Muslims, and the rest Christians. In 2003

the population was 5,200. In 1992 the village received municipal council status. The village's agricultural economy was based on grain and vegetables, vines, olives, and deciduous fruit. Income levels were about half the national average in 2004.

Biblical *Kiriath-Jearim lies within its boundaries. Its name from the Arab conquest (seventh century) was Qaryat al-‘Inab (“Borough of the Grapevine”). The name Abu Ghosh stems from a high-handed 17th-century sheikh of Circassian origin, who controlled the region and whose heirs imposed a toll on every traveler to and from Jerusalem, until an end was put to the extortions at the time of the Egyptian governor Ibrahim Pasha, around 1835. After the establishment of the nearby kibbutzim *Kiryat Anavim (1920) and *Ma‘aleh ha-Ḥamishah (1938), relations between the villagers and Jews were friendly and remained so in the Israeli War of Independence. Some of the villagers cooperated with the *Haganah and with *Loḥamei Ḥerut Israel. Abu Ghosh has a Catholic monastery and a convent. The village includes a well-preserved crusader church built at the spot around 1142 because the site was then held to be *Emmaus of the New Testament. The church was partially destroyed in 1187 and rebuilt by the French government in 1899. It is under the guardianship of the Lazarist Fathers. A stone inserted in its wall bears the imprint of the Roman Tenth Legion (*Fretensis*), apparently stationed here in the first century C.E. The Josephine Convent of the Ark, built in 1924, stands supposedly on the site of the house of *Abinadab (11 Sam. 6). From 1957, an annual music festival was held in the village. Nearby is Aqua Bella (Heb. Ein Ḥemed), a partially destroyed 12th-century crusader monastery, which has been made into a national park.

[Abraham J. Brawer / Shaked Gilboa (2nd ed.)]

ABU ‘IMRĀN AL-TIFLĪSĪ (*Abu ‘Imram Mūsā al-Zafārānī*), founder of a Jewish religious sect in the ninth century. He emigrated from Iraq to *Tiflis, in Georgia, hence the designation al-Tiflīsī. Information about him is to be found in the writings of his Karaite opponents, among them, al-Kirkisānī. Al-Tiflīsī developed his own *halakhah*. While agreeing with accepted Karaite views, such as the Karaite dating of the Feast of Weeks and the prohibitions of the marriage of first cousins and eating the tail fat of sheep, he devised his own method of determining the occurrence of *Rosh Ḥodesh* (“New Moon”). According to *Japheth b. Ali ha-Levi, a tenth-century Karaite, al-Tiflīsī rejected the doctrine of resurrection. This, however, is doubtful, for his other opponents would have attacked al-Tiflīsī for such a deviation. The sect of Tiflisites survived several generations after the death of its founder, as evidenced by Judah Hadassi's 12th-century *Eshkol ha-Kofer*.

BIBLIOGRAPHY: Nemoj, in: HUCA, 7 (1930), 389; S. Pinsker, *Likkutei Kadmoniyot*, 1 (1860), 26; Z. Ankori, *Karaites in Byzantium* (1959), 369–71.

[Eliyahu Ashtor]

ABU ʿĪSĀ, ISAAC BEN JACOB AL-IṢFAHĪNĪ, founder of a Jewish sect in Persia, the first to be formed after the destruction of the Second Temple. Abu ʿĪsā was also called Obadiah, evidently an honorific bestowed on him by his admirers. According to the Karaite scholar al-Kirkisānī, Abu ʿĪsā lived during the reign of Caliph ʿAbd al-Malik ibn ʿMarwān (685–705); the Arabic historian Shahrastānī places him during the reigns of the Umayyad caliph Marwān ibn Muhammad (744–50) and al-Mansur (754–75). The latter period seems correct because the religious and political ferment in the Islamic world during the eighth century forms the suitable background for the establishment of the sect. Abu ʿĪsā proclaimed himself a prophet and herald of the Messiah. He led a revolt against the Muslims, and many Persian Jews rallied behind him. After several years the rebellion was suppressed. His army was defeated by the Muslims near the ancient city of Rhagae (present-day Rai) southeast of Teheran, and Abu ʿĪsā himself was killed. His followers did not believe that he was dead but rather that he had entered a cave and disappeared. According to another tradition, he placed his followers in a circle which he drew with a myrtle branch and they remained beyond reach of the enemy. Only Abu ʿĪsā rode out of the area and dealt the Muslims a mighty blow single-handedly. He afterward went to the “Sons of Moses” beyond the desert to prophesy to them. The sect which Abu ʿĪsā founded, known as the Isunians or Isfahanians, still existed in the time of al-Kirkisānī (c. 930), who found about 20 adherents in Damascus. The movement launched by his disciple ʿYudghan and the early activities of ʿAnan b. David reflect the influence of Abu ʿĪsā’s teachings. His followers maintained that Abu ʿĪsā had been an illiterate tailor who wrote his books through prophetic inspiration. He taught that five prophets, among them Jesus and Muhammad, preceded the coming of the Messiah and that he himself was the final harbinger. Basing himself on Psalm 119:164 (“Seven times daily do I praise Thee”), he ordained seven daily prayers for his followers, but did not reject recitation of the ʿShema and the *Amidah* or observance of the holy days as practiced by ʿRabbanites. The latter regarded the Isunians as legitimate Jews in all respects. That the Isunians tended to be stringent is evidenced in their prohibition of meat and wine and their ban on divorce.

[Zvi Avneri]

ABUKARA, ABRAHAM BEN MOSES (d. 1879), Tunisian rabbi. Abukara was probably the grandson of Abraham Abukara (d. 1817), one of the scholars of Tunis, who in 1803 signed a regulation introducing uniformity in various religious practices. A profound scholar, Abraham wrote a commentary and novellae on the Shulḥan Arukh, *Yoreh Deʿah*, in four parts. The first part, *Beit ha-Safek* (on the laws in case of “doubt”), was published by his relative Jacob b. Elijah Abukara, who added

an introduction under the title *Ben Avraham* (Leghorn, 1882). The other parts were lost. Jacob also published the *Issur ve-Hetter* of ʿJeroham b. Meshullam from a manuscript in the collection of Abraham, together with *Ben Avraham*.

ABULAFIA (Heb. אַבּוּלָאֲפִיָּה; Arabic for “father of health”; also *Abulaffia*, *Abulefia*, *Abualefia*, *Abu Alafia*, etc.), widespread and influential family, members of which were rabbis, poets, statesmen, and communal leaders in Spain. After the expulsion of the Jews from Spain the name became common in some Oriental countries. A distinguished rabbinical family was established in Palestine and Syria after Ḥayyim ben Moses (?) Abulafia moved from Smyrna to Tiberias. The most important Spanish branch, centered in Toledo from the 12th century, were levites and generally called Levi (Arabic Al-lavi) Abulafia, etc. The epitaphs of many members of the family, sometimes obsequiously phrased, are preserved; they included (beside those subsequently mentioned in individual articles) the physician Moses ben Meir (1255); Joseph ben Meir, rabbi in Seville, perhaps his grandson (1341); the communal leaders and royal officials Meir ben Joseph, Samuel, and Meir ben Solomon (victims of the Black Death, 1349–50); and Samuel ben Meir (1380). Samuel Abolafia of Almeria was in charge of the commissariat for the Catholic monarchs during the campaign against Granada in 1484. The New Christian magistrate Juan Fernandez Abolafia participated in the plot against the ʿInquisition in Seville and was a victim of the first ʿauto-da-fé there in 1481. Joseph David Abulafia (I) (d. 1823), was *av bet din* in Tiberias before 1798 and later rabbi in Damascus. He signed letters of introduction for the emissaries of Tiberias as did his grandson Joseph David Abulafia (II) (d. 1898), who was also rabbi in Tiberias. Moses and Jacob Abulafia were among the Jews arrested in Damascus in 1840 in connection with the ʿDamascus blood libel: the former, designated as a rabbi, informed against his coreligionists. Isaac Abulafia was rabbi in Damascus (1876–88). In Italy in modern times the name was rendered as Bolaffio, Bolaffi, etc. It is said that the first Jew to settle in Spain in the modern period was an Abulafia from Tunis.

[Cecil Roth]

ABULAFIA, ABRAHAM BEN SAMUEL (1240–after 1291), founder of the prophetic Kabbalah. Born in Saragossa, Spain, Abulafia moved to Tudela in his childhood and studied with his father until the latter’s death in 1258. In 1260 he left Spain for the Land of Israel in search for the legendary ʿSambatyon river. However, the war between the Mongols and Mamluks

in 1260 caused his return to Europe, via Greece. He studied in the early 1260s in Capua with R. Hillel of Verona, concentrating basically the *Guide of the Perplexed*, and then returned to Spain. In 1270 he began to study a particular kind of Kabbalah in Barcelona, whose most important representative was Barukh Togarmi, and received a revelation with messianic overtones. He soon left for Castile, where he disseminated his prophetic Kabbalah among figures like R. *Moses of Burgos and R. Joseph *Gikatilla. Some time around 1275 he taught the *Guide of the Perplexed* and his Kabbalah in a few cities in Greece and in 1279 he made his way through Trani to Capua, where he taught four young students. In the summer of 1280 he arrived in Rome and attempted to see the Pope Nicholas III in order to discuss his vision of Judaism as a mystical religion. This meeting was part of a messianic scheme. However, the pope died suddenly and Abulafia was imprisoned for some weeks and then left for Messina, Sicily. There he was active for a decade (1281–91) and had several students as well as some in Palermo. Around 1285 a polemic commenced between him and R. Solomon ben Abraham ibn *Adret of Barcelona concerning Abulafia's claims that he was a prophet and messiah. This controversy was one of the principal reasons for the exclusion of Abulafia's Kabbalah from the Spanish schools.

Abulafia's literary activity spans the years 1271–91 and consists of several dozen books, treatises on grammar, and poems. He wrote many commentaries: three on the *Guide of the Perplexed* – *Sefer ha-Ge'ulah* (1273), *Sefer Hayyei ha-Nefesh*, and *Sefer Sitrei Torah* (1280); on *Sefer Yezirah*: – *Ozar Eden Ganuz*, (1285/6), *Gan Na'ul*, and a third untitled; and a commentary on the Pentateuch – *Sefer-Mafteḥ Ot ha-Torah* (1289). More influential are his handbooks, teaching how to achieve the prophetic experience: *Hayyei ha-Olam ha-Ba* (1280), *Or ha-Sekhel*, *Sefer ha-Ḥeshek*, and *Imrei Shefer* (1291). Of special importance for understanding his messianology are his “prophetic books” written between 1279 (Patras) and 1288 (Messina), where revelations including apocalyptic imagery and scenes are interpreted as pointing to spiritual processes of inner redemption. The spiritualized understanding of the concepts of messianism and redemption as an intellectual development represents a major contribution of the messianic ideas in Judaism. As part of his messianic propensity, Abulafia became an intense disseminator of his Kabbalah, orally and in written form, trying to convince both Jews and Christians.

In his first treatises, *Get ha-Shemot* and *Mafte'ah ha-Re'ayon*, Abulafia describes a linguistic type of Kabbalah similar to the early writings of R. Joseph Gikatilla. In his later writings, the founder of prophetic Kabbalah produces a synthesis between Maimonides' Neoaristotelian understanding of prophecy as the result of the transformation of the intellectual influx into a linguistic message and techniques to reach such experiences by means of combinations of letters and their pronunciation, breathing exercises, contemplation of parts of the body, movements of the head and hands, and concentration exercises. Some of the elements of those techniques stem from commentaries on *Sefer Yezirah* of Ashke-

nazi origin, while others reflect influences of Yoga, Sufism, and hesychasm. He called his Kabbalah “the Kabbalah of names,” that is, of divine names, being a way to reach what he called the prophetic experience, or “prophetic Kabbalah,” as the ultimate aims of his way: unitive and revelatory experiences. In his writings expressions of what is known as the *unio mystica* of the human and the supernal intellects may be discerned. Much less concerned with the theosophy of his contemporary kabbalists, who were interested in theories of ten hypostatic *sefirot*, some of which he described as worse than the Christian belief in the trinity, Abulafia depicted the supernal realm, especially the cosmic Agent Intellect, in linguistic terms, as speech and letters.

In his later books, Abulafia repeatedly elaborated upon a system of seven paths of interpretation, which he used sometimes in his commentary on the Pentateuch, which starts with the plain sense, includes also allegorical interpretation, and culminates in interpretations of the discrete letters, the latter conceived of as the path to prophecy. Abulafia developed a sophisticated theory of language, which assumes that Hebrew represents not so much the language as written or spoken as the principles of all languages, namely the ideal sounds and the combinations between them. Thus, Hebrew as an ideal language encompasses all the other languages. This theory of language might have influenced *Dante Alighieri. In his writings Abulafia uses Greek, Latin, Italian, Arabic, Tatar, and Basconian words for purpose of gematria.

Abulafia's Kabbalah inspired a series of writings which can be described as part of his prophetic Kabbalah, namely, as striving to attain extreme forms of mystical experiences. The most important among them are the anonymous *Sefer ha-Zeruf* (translated into Latin for *Pico), *Sefer Ner Elohim*, and *Sefer Sha'arei Zedek* by R. Nathan ben Saadiah Harar, who influenced the Kabbalah of R. *Isaac of Acre. The impact of Abulafia is evident in an anonymous epistle attributed to Maimonides; R. Reuven Zarfati, a kabbalist active in 14th century Italy; Abraham *Shalom, Johanan *Alemanno, Judah *Albotini, and Joseph ibn Zagyah; Moses *Cordovero and Hayyim *Vital's influential *Sha'arei Kedushah*; *Shabbetai Zevi, Joseph *Hamiz, Phinehas Elijah Horowitz, and *Menaḥem Mendel of Shklov.

Extant in many manuscripts, Abulafia's writings were not printed by kabbalists, most of whom banned his brand of Kabbalah, and only by chance introduced in their writings a few short and anonymous fragments. Scholarship started with an analysis of his manuscript writings by M.H. Landauer, who attributed the book of the *Zohar* to him. A. Jellinek refuted this attribution and compiled the first comprehensive list of Abulafia's writings, publishing three of Abulafia's shorter treatises (two epistles, printed in 1853/4, and *Sefer ha-Ot* in 1887), while Amnon Gross, published 13 volumes, which include most of Abulafia's book and those of his students' books (Jerusalem, 1999–2004). Major contributions to the analysis of Abulafia's thought and that of his school have been made by Gershom Scholem and Chaim Wirszubski. Some of Abulafia's treatises

were translated into Latin and Italian in the circle of Pico della Mirandola, mostly by Flavius Mithridates, and Pico's vision of Kabbalah was significantly influenced by his views. This is the case also with Francesco Giogio Veneto's *De Harmonia Mundi*. Abulafia's life inspired a series of literary works such poems by Ivan Goll, Moses Feinstein, and Nathaniel Tarn; Umberto Eco's novel *Foucault's Pendulum*; and a George-Elie Bereby's play; in art, Abraham Pincas's paintings and Bruriah Finkel's sculptures; and several musical pieces.

[Moshe Idel (2nd ed.)]

ABULAFIA (Bolaffi), EZEKIEL (Hezekiah) DAVID BEN MORDECAI (18th century), Italian scholar and poet. His family originated in Aquileia, but he himself lived first in Leghorn and then in Trieste, where he married the daughter of R. Isaac Formigini. He began to write at the age of 13, but his early compositions (including an elegy on the victims of the disaster in the Mantua ghetto in 1776) were lost. His only published work was *Ben Zekunim* (1793). The first part, entitled *Yesod Olam*, is an introduction to the Talmud for young people, based on the *Halikhot Olam* of *Jeshua b. Joseph ha-Levi. The final section quotes commendatory statements on the Talmud by gentile scholars such as *Galatinus and *Basnage. The second part, *Mizmor le-David*, contains miscellaneous poems and elegies, revealing a fair knowledge of classical mythology and literature, and closes with patriotic poems, e.g., on the educational reforms of Emperor Joseph II. The preface embodies a vigorous vindication of the Hebrew language. An early work on Psalms, *Shiggayon le-David*, has been lost.

[Cecil Roth]

ABULAFIA, ḤAYYIM BEN DAVID (c. 1700–1775), rabbi and codifier. Abulafia, a grandson of Ḥayyim ben Jacob Abulafia, was born either in Jerusalem or in Smyrna. He studied under Isaac *Rappaport, author of *Battei Kehunnah*. About 1740 he was appointed rabbi of Larissa (Greece). Among his many pupils was Joseph Naḥmoli, author of *Ashdot ha-Pisgah*. In 1755, as a result of tribulations suffered by the community, he left for Salonika, where he apparently remained, acting as *av bet din*, until 1761. In that year the Sephardi rabbi of Amster-

dam, Isaac ibn Dana de Brito, died and Abulafia was invited to succeed him. But Jacob Saul, the rabbi of Smyrna, died at the same time and, when Abulafia was invited to fill his position, he accepted the invitation. Many of Abulafia's halakhic decisions are found in the works of Turkish scholars, who often sought his approbation for their works. Most of his own works were destroyed in the great fire of Smyrna of 1772 – including the major part of a large work on the *Sefer Mitzvot Gadol* of Moses of Coucy. Part of it was published posthumously together with his responsa *Nishmat Ḥayyim* (Salonika, 1806). Parts of his works were printed with the above-mentioned *Ashdot ha-Pisgah* (1790). Ḥayyim *Modai, his successor in the Smyrna rabbinate, was his pupil.

ABULAFIA, ḤAYYIM BEN JACOB (I) (1580–1668), Palestinian talmudist, known as the First. After studying in Safed, Abulafia was ordained by his father in about 1618. In 1628 Abulafia settled in Jerusalem and later moved to Hebron, where despite his advanced age he directed the yeshivah. He was one of the leading rabbis of his era. In 1651–52 Abulafia was a central figure in the controversy over the election of a new rabbi of the Hebron community and went to Cairo to enlist the support of the influential Raphael Joseph, head of Egyptian Jewry, and arrange a compromise. When Nathan of Gaza began his propaganda in support of Shabbetai Zevi, Abulafia adopted a negative attitude similar to that of his father toward the visions of Ḥayyim *Vital. Although he was skeptical, he wished to avoid open conflict, and did not threaten excommunication as did his father in the case of the latter. In 1666 he was one of the delegation of four who went to Gaza on behalf of the Constantinople community to investigate the authenticity of Nathan's prophecies, and about this time he returned to live in Jerusalem. His grandson was Ḥayyim ben Jacob *Abulafia (II), who renewed Jewish settlement in Tiberias in 1740.

BIBLIOGRAPHY: M. Benayahu, *Rabbi Ḥayyim Yosef David Azulai* (1959), 293–302; Ben-Zvi, Eretz; Scholem, *Shabbetai Zevi*, 221, 228, 511. **ADD. BIBLIOGRAPHY:** M.D. Gaon, *Yehudei ha-Mizrah be-Eretz Yisrael*, 2 (1938), 7.

ABULAFIA, ḤAYYIM BEN JACOB (II) (c. 1660–1744), rabbi, known as the Second. He is grandson of Ḥayyim ben Jacob *Abulafia the First. About 1666 the Abulafia family moved from Hebron to Jerusalem, where Ḥayyim studied with Moses Galante and others. In 1699 he went on a mission to Salonika, and in 1712 he served as rabbi in Smyrna and in 1718 in Safed where he remained until 1721, when he was reappointed rabbi of Smyrna, living there for almost 20 years.

Abulafia believed in the imminence of the messianic era and considered the restoration of *Tiberias, which had been in ruins for almost 70 years, a necessary prerequisite to it. Sheikh Dahir al-'Amr, the ruler of Galilee, invited him to "come up and take possession of the land." In 1740 he moved from Smyrna to Tiberias. Despite his advanced age, Abulafia began rebuilding

the city, and he sent his sons and sons-in-law abroad to enlist aid for the restoration. According to diverse legends, he planted gardens, vineyards, and fields, and built a glorious synagogue and *bet midrash*, a bathhouse, a press for sesame oil, stores for market day, established the Rabbi Meir Baal Hanes Fund, and sent his two sons on missions abroad to collect money; he also built houses and courtyards for his fellow Jews.

In 1742–43 war broke out between Suleiman, pasha of Damascus, and Dahir. Abulafia encouraged the Jews to remain in Tiberias and gave full support to the sheikh. In the two campaigns, which ensued – the first of which ended on the 4th of Kislev 1743 and the second ending with the death of Suleiman on the 5th of Elul – the sheikh was victorious. Abulafia declared these two dates as holidays, which the Jews of Tiberias continued to observe annually. He died in Tiberias on the 16th of Nisan 5504.

Abulafia was a prolific author, but only those of his works which he published while in Smyrna have appeared in print: (1) *Yashresh Yaakov* (1729), on the *Ein Yaakov*; (2) *Mikraei Kodesh* (1729), on the laws of Passover, on Esther, homilies, and novellae on the Talmud and Maimonides; (3) *Ez ha-Hayyim* (1729), on the weekly portions; (4) *Yosef Lekah*, pt. one on Genesis and Exodus; pt. two on Leviticus (1730); pt. three on Numbers and Deuteronomy (1732); (5) *Shevut Yaakov* (1734), on the *Ein Yaakov*; (6) *Hanan Elohim* (1737), on the Pentateuch, appended to *Hayyim va-Hesed*, by his grandfather, Isaac Nissim b. Gamil.

ABULAFIA, HAYYIM NISSIM BEN ISAAC (1775–1861), rabbi and communal worker, known also, from the initial letters of his name, as “Hana.” Born in Tiberias, he succeeded his father as the head of the Jews of Tiberias. He was for a short time rabbi of Damascus. After the defeat of the Egyptian commander *Ibrahim Pasha by the Turks (1840), when some of the Arab sheikhs began to seize control of the villages and towns abandoned by the Egyptians and oppressed and maltreated their Jewish inhabitants, Abulafia asked the commander of the Turkish forces in Sidon (Saida) and Tripoli to take action to stop these acts. The latter immediately had instructions dispatched to the governor of Safed forbidding persecution of the Jews. Toward the end of his life Abulafia moved to Jerusalem and, in 1854, he was elected *rishon le-Zion* succeeding Isaac *Covo. In Jerusalem he supported Ludwig August *Frankl in the founding of the Laemel school. His writings have remained in manuscript, except for individual responsa published in the works of his contemporaries.

[Abraham David]

ABULAFIA, ISAAC (d. 1764), talmudist and emissary for Erez Israel. Abulafia was the son of Hayyim ben Moses (?) Abulafia. He immigrated with his father to Tiberias in 1740. Active in the rebuilding of Tiberias, he went in 1743 as an emissary for this purpose to Damascus and probably to other places as well. He was appointed by his father to succeed him as rabbi and as leader of the community of Tiberias, and held these offices for 20 years. In 1764 he was appointed by the leaders of the Jerusalem community as a member of a delegation that went to Constantinople to have Raḥamim ha-Kohen removed from office as representative of “Pekidei Erez Israel be-Kushta” (“The Representatives of the Land of Israel in Constantinople”). On hearing that Raḥamim had already been officially appointed, some of the delegates thought it useless to proceed with the journey. Isaac, however, went to Constantinople and argued the case before Jacob Zonana, head of the “Pekidei Erez Israel,” but Zonana justified the appointment. Isaac was the author of *Pahad Yizhak* (Moscow Ms. Guenzburg, 29), a comprehensive commentary on the *Sefer Yere'im* of *Eliezer b. Samuel of Metz. One of his responsa was published in the *Nehpeh be-Khesef* (1768) of Jonah Navon (pt. 1, *HM*, 81a).

BIBLIOGRAPHY: M. Benayahu, *Rabbi H.Y.D. Azulai* (Heb., 1959), 389–90.

ABULAFIA, ISAAC BEN MOSES (1824–1910), rabbi and halakhist. Abulafia, who was born in Tiberias, was rabbi of Damascus from c. 1877. His authoritarian attitude and his habit of making independent halakhic decisions roused the opposition of the other rabbis and of the communal leaders of Damascus, who united in an attempt to remove him from his position. In 1896 they turned to Moses ha-Levi, the *hakham bashi*, in Constantinople, who acceded to their request by appointing Solomon Eliezer Alfandari rabbi of Damascus. The two rabbis did not at first cooperate with each other. Later, however, Alfandari brought Abulafia into the sphere of his activities. Toward the end of his life Abulafia acted as rabbi in Tyre. From there he moved to Jerusalem, and finally to Tiberias, where he died. An outstanding halakhic scholar, his responsa *Penei Yizhak* were published in six volumes (1871–1906). Some scholars, especially Shalom Hai Gagin of Jerusalem, were critical of the first volume, and Abulafia wrote *Lev Nishbar* (1878) in reply to his critics.

BIBLIOGRAPHY: Ben-Zvi, in: *Ozar Yehudei Sefarad*, 6 (1963), 7–16.

ABULAFIA, JACOB BEN SOLOMON (1550?–1622?), Damascus rabbi. Abulafia, the grandson of Jacob b. Moses *Berab, studied under Solomon *Absaban and under Moses Besodo – apparently in Damascus – together with Yom Tov *Zahalon. There is evidence that he may have been friendly with Isaac *Luria. It is known that he was in Safed in 1589. In 1593 he was serving as rabbi of the Spanish congregation in Damascus. About 1599 he received ordination (*semikhah*) – together with seven other great scholars of Safed – from Jacob (II) *Berab; Abulafia was definitely in Safed in the summer of 1599. He

again visited there in the summer of 1609, returning to Damascus that same year. He ordained his closest pupil Josiah *Pinto about 1617, apparently in Safed. His relationship with Hayyim *Vital was extremely strained. Abulafia had no faith in Vital's visions, and mocked his approach to Kabbalah. The tension between them reached its peak in 1609. Abulafia was primarily a halakhist, but he also wrote expository homilies on the Pentateuch. Some of his responsa and novellae on the Pentateuch appear in the works of his contemporaries. H.Y.D. *Azulai saw a large manuscript volume of his responsa.

ABULAFIA, MEIR (1170?–1244), talmudic commentator, thinker, and poet; the most renowned Spanish rabbi of the first half of the 13th century. His only son Judah died in 1226, but his grandchildren and great-grandchildren through his daughters lived in Toledo about a century after his death. Meir himself and his family carried the title *nasi*, and the whole family was connected by marriage with the foremost families of Toledo. In his youth, Abulafia went from Burgos to Toledo where he spent the rest of his life. It seems that as early as 1204 he was a member of the Toledo *bet din*, together with Meir ibn Migash and *Abraham b. Nathan ha-Yarhi. He played an important part in the organization of the communities in Spain, especially that of Toledo, where he instituted many religious regulations.

Abulafia's literary activity spans four general areas: *halakhah*, masorah, the controversy over Maimonides' opinion on the subject of resurrection, and Hebrew poetry. His greatest though least known work is his extensive commentary, which covered about half the Talmud. This commentary, unique both in quantity and in quality, may be considered the summation and the conclusion of the talmudic school of the Spanish rabbis, and Abulafia its last representative (his younger contemporary and countryman *Nahmanides brought an end to the local traditional method by his introduction of the tosafists' method of study from Germany and France). In his book, originally named *Sefer Peratei Peratin* ("Book of Minute Details"), Abulafia goes into the smallest details of each subject, attempting to extract from his explanations the maximum of practical rules. Its rapid disappearance may be attributed to its relative verbosity, as well as to the preference shown for the books of Nahmanides. The work is written entirely in Aramaic, in the style of the *geonim* and Isaac *Alfasi, and all decisions are presented with confidence. Abulafia never mentions his teachers and rarely his predecessors by name, but he does draw upon and even quote (though anonymously) the early Spanish rabbis. Most of Abulafia's specific references are to the *geonim*, especially to *Hai and *Sherira, and he refers as well to Alfasi, *Hananel, Joseph *Ibn Migash, *Rashi, *Maimonides, and Jacob *Tam. His knowledge of the teachings of the French and German talmudists is evidently limited.

His work presents many old Spanish versions of the Talmud which are of special importance. Only two parts have hitherto been published (under the name *Yad Ramah*) – those dealing with the tractates *Bava Batra* and *Sanhedrin* (Salonika, 1790–98). However, manuscripts of his commentaries to many other tractates (none of which is extant) were known to the rabbis in earlier generations. Thus a great part of his commentary on the tractate *Horayot* is included in *Azulai's *Sha'ar Yosef* on the tractate *Avot*, in Samuel Uceda's *Midrash Shemu'el* (1579), and on the tractates of *Nezikin*, in Bezalel *Ashkenazi's *Shitah Mekubbezet*. He is quoted a great deal anonymously in Menahem ha-Meiri's commentaries on the Talmud.

Even from his own time, the study of Abulafia's work was limited because of the penetration into Spain of the tosafists' method of learning. Surprisingly, however, *Asher b. Jehiel of Toledo, a scholar of German origin, considered Abulafia the decisive local authority and he, his pupils (among them Jehoram and Abraham ibn Ismael), and his sons, especially *Jacob b. Asher, author of the *Turim*, studied his teachings, a great part of the *Turim* being based upon them. There were two editions of Abulafia's work, one longer than the other. The shorter edition came first, and not the reverse, as is generally held. Examples of both editions are extant. The existing commentary to *Bava Batra* is from the longer edition and that to *Sanhedrin* from the shorter one. In the longer edition Abulafia first explains all the Mishnayot, and only then the talmudic discussion. Of the hundreds of responsa which Abulafia wrote, only an incomplete collection of about 70 paragraphs is available. They are included in the *Or Zaddikim* (Salonika, 1799). Many of his responsa are scattered in the literature of the *rishonim* and others were inserted in the *Turim*. Other collections of responsa attributed to him in the rabbinical literature are not his.

His work *Masoret Seyag la-Torah* (Florence, 1750) dealt with research, based on old manuscripts, into the traditional text of the Scriptures, and, for a long time, influenced laws governing the writing of scrolls of the Torah. Menahem ha-

Meiri's *Kiryat Sefer* on the same subject is based on Abulafia's version. For many generations there existed in Spain scrolls of the Torah which were allegedly copied from the one Abulafia wrote for his own use. Abulafia wrote a scroll of the *Sefer Torah* as a master copy (mastercodex) and it achieved great fame both in Germany and in the countries of North Africa. "A great and outstanding rabbi, distinguished in wisdom," R. Samuel ben Jacob came especially from Germany to Toledo in order to make a copy of this scroll in 1250 and another copy was made in 1273 in Burgos by R. Isaac ben Solomon of Morocco. Additional copies were made in Spain and Provence from the earlier copies until 1410. The *Masoret Seyag la-Torah* also attained a remarkable popularity and Abraham ibn Ḥassan, one of the exiles of Spain, related that R. Isaac de Leon, who was one of the outstanding *posekim* in the generation before the Expulsion, issued instructions that all scrolls of the Torah in Spain were to be corrected according to the rules laid down in the *Masoret*.

The great importance of this work was equally recognized in later generations, and such distinguished scholars as Menahem ben Judah de *Lonzano in his *Or Torah*, Jedidiah Solomon *Norzi in his *Minhat Shai*, and Solomon ben Joseph *Ganzfried in his *Keset Ha-Sofer* laid down that the defective and *plene* spellings in a *Sefer Torah* were to be in accordance with this copy of Abulafia.

Nevertheless the extant copy, the first work of Abulafia to be published (Florence, 1750), is faulty and incomplete and also includes later additions. For instance, the *Likkutei ha-Masoret* and the *Tikkunei Soferim* as well as the list of *Petuhot* and *Setumot* in the Torah, which are printed at the end of the volume, are not by Abulafia. They represent Ashkenazi traditions which were compiled according to the *Tikkun Sefer Torah* of Yom Tov Lipmann *Muelhausen which was recently discovered in manuscript and subsequently published. These traditions were added to the *Masoret* during the 16th century. On the other hand, the original book included references to the Talmud and halakhic discussions which were omitted from many of the manuscripts, and from the published edition. These changes explain the numerous discrepancies between the existing *Masoret* and the masoretic views of Abulafia as reflected in the *Kiryat Sefer* of Ha-Meiri, which are based on Abulafia's master copy. Abulafia also took special pains to explain the correct way of writing the scriptural portion of *Ha'azinu*, as set forth in an authenticated manuscript of Maimonides' *Yad ha-Ḥazakah*, which he received from Samuel ibn *Tibbon. His comments in this regard are important for establishing the authenticity of the manuscript copy of the Bible known as the Aleppo Codex.

Abulafia is best known for his controversy with Maimonides over the doctrine of resurrection. Maimonides' views on this subject seemed heretical to him. Abulafia, in spite of his youth, publicly denounced them, and was the first in Europe to do so during Maimonides' lifetime. His accusations were mainly in the form of letters to the rabbis of southern France, especially the "sages of Lunel," who

held Maimonides in great esteem and strongly defended his views. The whole correspondence, which also included an exchange of letters with the rabbis of northern France, did not bring the hoped for result and was a great disappointment to Abulafia. Thirty years later, when the controversy was renewed, he was asked by Nahmanides to take part in it again, but remembering his earlier failure, he refused. Much of the correspondence, edited by Abulafia, was published as *Kitāb al-Rasā'il* (Paris, 1871). Abulafia's conception of resurrection, far from being an abstract philosophy, is based upon the traditional belief, according to which the words of the rabbis on the subject are taken in their literal sense. Notwithstanding this (and contrary to Graetz's opinion), Abulafia possessed a wide knowledge of the Hebrew and Arabic philosophy of his time. In his work are mentioned the *ḥakhmei ha-tushiyah* ("philosophers") and their opinions concerning the creation of man, the nature of the "heavenly host" (angels), and the like (see his instructive words on Sanh. 38b concerning "Adam was a heretic"). Those of his pupils who are known by name are principally philosophers and translators of works on astronomy and natural sciences from Arabic into Hebrew. Among them are Isaac Israeli (II), author of *Yesod Olam*, and Judah b. Solomon, author of *Midrashei ha-Ḥokhmah* (Ms.). In his correspondence with the rabbis of Provence, Abulafia objected to many of the decisions rendered by Maimonides in his *Yad ha-Ḥazakah*. Some of his *hassagot* ("criticisms"), like those of Abraham b. David, were printed at the side of Maimonides' text. A collection of these, on the tractate *Sanhedrin*, was published by Y. Ha-Levy Lipshitz in *Sanhedrei Gedolah* (1968), but there are many errors in his introduction. Although Abulafia opposed many of Maimonides' opinions and beliefs and resented the exaggerated respect which the rabbis of Provence accorded him, he held Maimonides in great esteem. In his work on *Sanhedrin*, which (in chapter *Ḥelek*) contains quotations from *Kitāb al-Rasā'il*, Maimonides is one of the few rabbis mentioned by name. After Maimonides' death Abulafia wrote a long elegy on him (published together with his *piyyutim*). A collection of Abulafia's letters (and a small number of his poems), published by Brody in 1936, reveals Abulafia to have been acquainted with the poetry of earlier Spanish Jews and to have been influenced by Moses Ibn Ezra in his meter, rhyme, and construction.

[Israel Moses Ta-Shma]

ABULAFIA, SAMUEL BEN MEIR HA-LEVI (c. 1320–1361), Spanish financier, communal leader, and philanthropist. Abulafia's generosity provided a number of Jewish communities in Castile with synagogues, including the magnificent one still standing in Toledo (later the Church of El Tránsito) with florid Hebrew inscriptions in his honor. The synagogue was built by his order in 1357. This splendid synagogue was the best illustration of the status of Castilian Jewry in general, and of his prestigious position in particular. He was versatile in the Torah and was known as an observant Jew. At first steward of the estates of the king's tutor Don Juan Alfonso de Albuquerque, Abulafia later became treasurer and adviser of Pedro the Cruel of Castile. Many royal documents are signed by him in Hebrew with his seal, containing a castle, the emblem of Castile. During the revolt of the *grandees* in 1354 he was one of Pedro's principal supporters. Abulafia did much to reinforce the power of the monarchy in its struggle against the nobility by improving the financial state of the kingdom. He ordered an inquiry into the activities of the tax farmers and appointed in their place reliable persons, who were often his own relatives or other Jews; in addition he confiscated the property of the rebel nobles and amassed considerable wealth in two of the royal fortresses. He also served as a diplomat, being sent in 1358 to Portugal to negotiate a political agreement between the two kingdoms. In 1360 Pedro suddenly ordered Abulafia's arrest, whereupon he was brought to Seville and there tortured to death. His enormous fortune was confiscated, as well as that of his relatives. Samuel's imposing residence in Toledo, which still stands, is today the El Greco museum.

ABULAFIA, SAMUEL HA-LEVI (13th century), scientist and engineer employed by King Alfonso X of Castile (1252–84). Abulafia constructed a water clock for Alfonso and translated for him from the Arabic a manual on the manufacture and uses of the candle clock, *Fábrica y usos del Relox de la Candela*. He also perfected hoisting devices and wrote a treatise about them, still extant in manuscript.

[Zvi Avneri]

ABULAFIA, TODROS BEN JOSEPH HA-LEVI (c. 1220–1298), Spanish rabbi and kabbalist. Rabbi Todros ben Joseph ha-Levi was born in Burgos, Spain, and died in Toledo. The Abulafia family was famous and respected in Spain. His uncle, Rabbi Meir ha-Levi *Abulafia, was the "exilarch" of Spanish Jewry and widely known for his war against the Rambam

(*Maimonides) and his writings. Todros, who lived during the reign of Fernando III and Alphonso X, owed his great prominence to his wisdom and wealth, and like his uncle became the head of Castilian Jewry.

The sources portray Todros, on the one hand, as a public figure and a national-religious leader, a person of wide horizons, well versed in halakhic and midrashic literature and an occasional poet. On the other hand, he is also seen as an experienced courtier who found his way to the hearts of the king and queen. He is thought to be one of the first kabbalists in Spain, and one can learn from his writings how the basic concepts of the Kabbalah were formed. Above all, he was a model to his generation of modesty and purity. His life symbolized the absolute negation of his generation's penchant for the ways of the knight and the promiscuity of the king's court.

He spent his youth in Burgos. There he became friendly with Rabbi Moses ben Simeon, who was the disciple of the brother rabbis Jacob and Isaac of Soraya, and it would seem that Todros heard from his friend some of what Rabbi Moses had learned from Kabbalah teachers.

During his days in Toledo, Todros rose to a lofty position. King Alfonso X welcomed him to his court and made him one of his retinue on his voyage to France in 1275. Todros stayed with the queen in Perpignan, where he met the poet Abraham Badrashi (Bedersi). The meeting produced an exchange of rhymed letters and messages. (Some of the poems were published in the book *Segulot Melakhim*, Amsterdam, 1768; others are in manuscript form, British Museum ADD 27,168 930; Vienna manuscript 111).

In Toledo, Todros began his period of creativity. He wrote on halakhic and moral issues related to life and the affairs of his day. He did his utmost to free Jews who had been arrested on the king's orders (1281). At the same time he reacted furiously to serious violations of religious commandments and morality in Jewish society, threatening with imprisonment and excommunication those who would break the laws. (His sermon on changing evil ways is incorporated in his book *Zikkaron Li-Yehudah*, 1846). Apart from his public activity, the kabbalistic writings of Todros reveal him as a mystic, a kabbalist who preserves traditions and ideas and attempts, by fusing the various schools of Kabbalah (Gerona Kabbalah and Castilian Kabbalah), to bridge the gaps between the kabbalists of his day. His first book, *Sha'ar ha-Razim* (edition of M. Kushnir Oron, Jerusalem, 1989) is a kabbalistic interpretation of verse 19 of Psalms. In this book one perceives the hesitancy of the author, who is afraid of divulging secrets. The book was written as a letter replying to his friend Rabbi Moses of Burgos. In fact, the book may be viewed as an interpretative work, a kind of summing-up of the various traditions in Kabbalah as known by Todros, who attempts to fuse them through his interpretation.

His second book, *Ozar ha-Kavod* (Warsaw, 1879), written late in his life, is an interpretation of talmudic legends. As in *Sha'ar ha-Razim*, in this book too the author's personality shines through. He gathers together different traditions and

fuses them through the style of his writing, fusing mainly the writings of the Ḥasidei Ashkenaz, the letters of the *Hug ha-Iyyun*, and the Ismaili-Gnostic tradition with the traditions of the Gerona and the Castilian kabbalists. In both books one finds echoes of the concepts, themes, and ideas of the secret teachings that a generation later became the foundations of Kabbalah. Todros is thus important as a preserver of traditions who passed them on to the next generation. Thanks to his writings, it is often possible to understand the secrets hinted at in the writings of his teachers, the Castilian kabbalists, as well the mystical tradition in Spain and its crystallization during its early generations. (In addition to these two books, he may have written an interpretation of Chapter 1 of Ezekiel, which is mentioned in the writings of kabbalists but has not been found.)

Todros belongs to that circle of kabbalists called by Gershon *Scholem “the Gnostic kabbalists.” Rabbi Todros emphasizes in his writings the uniqueness of that circle and its method in the wide frame of Kabbalah and kabbalists of his day.

Todros was considered a uniquely exemplary figure, who may have served, as Y. Libbes believes (*Keizad Niṭṭhaber Sefer ha-Zohar*), as a model for the depiction of Rabbi *Simeon Bar Yokhai in *Sefer ha-Zohar*. References to him may be found in the poems of Todros ben Judah (the kabbalist’s nephew) and in the writings of Isaac ben Latif, Abraham Badrashi, and Isaac Albalag (in his book *Tikkun ha-De’ot*, p. 101).

His son Joseph was a friend of the kabbalist *Moses de Leon, who was thought to be the author of *Sefer ha-Zohar*, an attribution rejected by present-day scholars, who see him as just one its authors. Joseph received from de Leon copies of parts of *Sefer ha-Zohar*.

[Michal Oron (2nd ed.)]

ABULAFIA, TODROS BEN JUDAH HA-LEVI (1247–after 1298), Hebrew poet. He was born in Toledo and spent most of his life there. Todros was a member of a well-known family of the city, although his kinships with other Abulafias, such as Meir *Abulafia, or with “the Rav,” Todros ben Joseph *Abulafia, are not completely clear. The branch of his own family was probably not very rich, and he had to search for a job serving the richest members of the Jewish community. He accompanied Don Isaac b. Don Solomon Zadok (Don Çaq de la Maleha; see *Ibn Zadok) on his travels, collecting taxes. He shared in his diversions and, apparently through his influence, was brought in touch with the royal court. In his presentation before the royal court, he offered to King Alfonso the Wise a goblet with an engraved Hebrew poem.

In his youth Abulafia composed numerous poems in honor of Jewish notables close to the court of Alfonso x of Castile and later Sancho IV, Solomon Ibn Zadok and his son Isaac, the rabbi Todros ben Joseph Abulafia and his son Joseph, etc., and even to persons of the royal family. He divided his time between poetry and finance and succeeded at both.

In common with others of his class at that period, his morals were lax and he had many liaisons with non-Jewish women. He was among the Jews of Castile arrested by royal order in January 1281, in connection with the revolts of Don Sancho, the son of the King, which had as a consequence the sentence of death for Don Çaq de la Maleha. In prison he wrote many poems which seem to indicate a change in outlook, although none of them expresses contrition for his past behavior. After the release of the prisoners, with the impact of their misfortune still fresh in their minds, the rabbi Todros ben Joseph Abulafia called upon his kinsmen to repent and demanded that all those who continued to consort with Muslim or Christian women be excommunicated. The poet himself, however, did not alter his own conduct nor did he see in it any contradiction of his religious views.

After great effort Abulafia succeeded in regaining his status at court; in 1289 he is mentioned among the men of affairs in the service of Sancho IV, and some years later headed a group of Jewish financiers who received important monopolies. The last certain date mentioned in his poems is 1298.

Abulafia was a prolific writer. His *Gan ha-Meshalim ve-ha-Ḥidot* (“Garden of Apologues and Saws,” the *diwan* collected by himself, adding Arabic headings) contains more than 1,000 poems; it was published by M. Gaster in 1926 (as a facsimile of the manuscript), and in three volumes by D. Yellin (1934–37): an extensive selection appears in Schirmann’s anthology *Ha-Shirah ha-Ivrit bi-Sefarad u-vi-Provence*, 2 (1956), 413–48, 694. There are very different opinions on his virtues as a poet and on the value of his literary production. Although the themes, technique, and genres of his poems continue the classical traditions of Andalusian Hebrew literature, he lived in a post-classical period with clear signs of mannerism and a tendency to virtuosity. His poetry can be called epigonal in its search for surprising elements, plays on words, trivia, vulgar language, etc. For some scholars, most of Abulafia’s poems seem repetitive and superficial, although they are valuable for the historical material they contain and for the interesting relation to the general literature of the times that is revealed, for example, polemical verses, poems on spiritual love, etc. Without denying the interest of these poems as historical documents, many with an autobiographical character, they also show clear signs of the high literary qualities of their author. In some poems he appears wholly familiar with Andalusian conventions, trying to overcome them in a very sophisticated way. Writing in a different environment, and in accordance with the sociological and cultural changes of the Jewish communities in Castile, Todros imitated the Andalusian models, genres, motifs, and conventions, adapting them to the new tendencies of the time not only in Hebrew but also in Romance literature. Renouncing Hebrew-Arabic formalism, and being in contact with the life of the Castilian Court and its literary preferences, Abulafia followed the realistic tendencies of his time.

It is true that some of his poems may be seen as a low variety of literary texts in comparison with high literary compositions. Few of the Judeo-Spanish poets wrote about themselves as candidly as Abulafia, even on matters which were likely to arouse the resentment of his readers. The poet was able to deride even the physical defects of his opponents using an equivocal language. Following Romance patterns, like that of the *tenzones*, Todros discusses with other poets, like Pinhas, in a tone varying between the festive and the serious, which of them is better qualified to write poetry. It is a display of skill in the use of language and verse, trying to show subtleness in praising the speaker's own poetry and ridiculing the adversary with the kind of invectives that sometimes clearly enter the realm of obscenity. The tone is not of bitterness nor has it any tragic greatness; the poets are just mocking each other and trying to overcome the adversary with a sophisticated play on words. On other occasions, he maintained literary correspondence at a higher level with other poets of his time. Todros dedicated long series of poems to notable Jewish courtiers of his time, like "the Rav," or Solomon Ibn Zadok; the series are divided into sections, on different Andalusian topics, preceded by Arabic and Hebrew introductions, showing the ability of the poet to adapt the classical genres to the praise of the distinguished courtiers.

His "girdle" poems (47 *muwashshahāt*) are very interesting, particularly due to the *kharajāt* preserved in them, in old Spanish, Hebrew, and Arabic.

ABULKER (Aboulker = Abu I-Khayr), Algerian family, whose members attained rabbinical and communal distinction. ISSAC BEN SAMUEL (I) (late 15th–early 16th centuries), scholar, astronomer, and translator. Expelled from Spain in 1492, Abulker settled in Padua, Italy, where in 1496 he completed his Hebrew commentary on the "Extracts of the Almagest" of al-Farghani. According to some modern authors this commentary is actually only a copy of the work of an earlier Jewish astronomer, Moses Ḥandali. Some time later Abulker translated from Latin into Hebrew under the title of *Sefer ha-Moladot* the *Liber de Nativitatibus*, originally written in Arabic by al-Ḥasibi (on the appearance of the new moon). He also translated into Hebrew the *Liber Completus*, a Latin translation (Venice, 1485) by Petrus of Reggio of *Ahkām al-*

Nujum by the famous 12th-century Tunisian astronomer Ali ibn Abi al-Rijal (Abenragel). When ISAAC BEN SAMUEL ABULKER (II), the rabbi of Algiers, denounced the abuses of Joseph Bacri, the latter depicted Abulker as a troublemaker and the bey had Abulker and six other Jewish notables beheaded in 1815. His son SAMUEL and his grandson ISAAC (III) were leaders of Algerian Jewry in the 19th century. The son of the latter, HENRI-SAMUEL (1876–1957), professor of medicine and head of Algerian Jewry, formed and presided over the Algerian Zionist Federation and worked vigorously for organizations which fought antisemitism. As head of the wartime Resistance, he secretly collaborated with the Allies to assist the American landing in Algiers on Nov. 7–8, 1942. His son JOSÉ (b. 1920), a professor of neurosurgery in Paris, was the leader of the Resistance forces which occupied Algiers, thus facilitating the landing.

[David Corcos]

ABULRABI (Abu al Rabi), AARON (also called **Aldabi** or **Alrabi**; first half of the 15th century), Sicilian-born biblical exegete, theologian, and polemicist. Born in Catania in Aragonese Sicily, Abulrabi became an itinerant scholar whose travels took him to Italy, Turkey, Alexandria, Damascus, Jerusalem, and Kaffa on the Black Sea. Along the way he engaged in intra- and interreligious discussion and dispute. He describes an exchange with an unnamed pope and his cardinals in Rome in which he refuted the Christian curialists' suggestion that the tabernacle cherubs reflected "the craft of talismans," thereby breaching biblical prohibitions on "other gods" and the manufacture of "graven images." He also reports debates with a Karaite scholar in Jerusalem and various Christian interlocutors.

The only witness to Abulrabi's life and thought is a tome that combines Torah commentary with supercommentary on Rashi's *Commentary on the Torah*. The work postdates 1446 in the version that has come down. At its outset, Abulrabi states that he will focus on Rashi's words inasmuch as they were "mostly hewn from the eminent [rabbinic] oaks of old." At times, Abulrabi issues sharp criticisms of Midrashim in a forthright manner almost without precedent in Rabbanite literature. Abulrabi's work was printed together with the supercommentaries on Rashi of Samuel Almosnino, Jacob Canizal, and Moses *Albelda under the title *Perushim le-Rashi* (Constantinople, 1525). In his commentary, Abulrabi mentions that he wrote the following other works: *Sefer ha-Meyasher*, on Hebrew grammar; *Sefer Matteh Aharon*, a polemical work; and three apparently theological studies: *Nezer ha-Kodesh*; *Sefer ha-Nefesh*; and *Sefer Peraḥ ha-Elohut*. In the course of his commentary, he quotes philosophic and kabbalistic sources, though rarely by name. He also quotes his father, learned brothers Shalom, Baruch, Moses, Jacob, and his father-in-law Moses *Gabbai, who, like Abulrabi,

composed a supercommentary on Rashi's *Commentary on the Torah*.

[Judah M. Rosenthal / Eric Lawee (2nd ed.)]

ABUN (also **Abuna, Bun**), a variation of the Aramaic name “Abba,” common in Palestine, France, and Spain. Several scholars and poets by this name were known in the Middle Ages, but there is little information available about them. (1) The father of a Palestinian liturgical poet, Eleazar, whose style and method are similar to those of Kallir, was called both Abun and Bun. (2) The grandfather of the Franco-German liturgical poet Simeon b. Isaac bore the name Abun, also Abuna. A native of Le Mans, France (it is conceivable that (Le) Mans is in fact a corruption of Mainz), who lived at the end of the ninth century, he may be the one to whom Solomon *Luria refers in his responsum 29 (Lublin, 1575): “R. Abun who excels in Torah, wisdom, wealth, and in all the innermost secrets, expounding every letter in 49 different ways.” Some scholars identify him with Abun, a physician who was head of a school for medicine in Narbonne, some of whose disciples taught medicine in Montpellier. (3) A Spanish poet by the name Abun b. Sharada lived around the 11th century, first in Lucena and then in Seville. His poems were praised by his contemporaries as well as by later writers. Solomon ibn *Gabirol mentions him in his poems alongside *Menahem b. Saruk, *Dunash b. Labrat, and *Samuel ha-Nagid (*Shirei Shelomo ibn Gabirol*, ed. by H.N. Bialik and Y.H. Ravnitzky, 1 (1928²), 65, no. 28). He is also mentioned in Moses *Ibn Ezra's *Shirat Yisrael* (ed. by B. Halper (1924), 69) and in Judah *Al-Ḥarizi's *Tahkemoni* (ed. by A. Kaminka (1899), 40). From Moses Ibn Ezra it can be gathered that the poems of Abun were no longer current in his day and it seems evident that even he did not see them. (4) A Spanish scholar and philanthropist of the 12th century, to whom Moses Ibn Ezra addressed many poems and about whom he composed several lamentations on his death, calling him “*Rabbana Abun*,” “*Ha-Gevir*” (“the Magnate”), and “Abun, the words of whose mouth were like a watercourse in a dry land.” (5) A Spanish liturgical poet known from five poems written in the spirit and style of early *paytanim* of Spain. He may be the Abun b. R. Saul also known as “the pious R. Abun of Majorca.”

[Abraham Meir Habermann]

ABU SA'D AL-TUSTARĪ (d. 1048), Egyptian financier and courtier. Muslim sources refer to him as Abū Sa'd b. Sahl al-Tustari (i.e., from Tustar (Shustar) in southwestern Persia). In Jewish sources he appears as Abraham b. Yashar. Abū Sa'd

was primarily a dealer in precious objects and jewels, while his brother Abū Naṣr Fadl (*Ḥesed* in Hebrew) was a banker. Abū Sa'd sold to the Caliph al-Zāhir (1021–36) a female black slave, who gave birth to the later Caliph al-Mustanṣir. When at the age of seven the boy succeeded his father, his mother exercised great influence in the affairs of state, and Abū Sa'd was one of her advisers. He utilized his position at court to help the Jews of Egypt and Syria, then under the rule of the Fatimid caliphs. Rabbanites as well as Karaites turned to him for help. Hence, scholars disputed to which community he belonged. Abū Sa'd was murdered in 1048 by hired assassins of Ṣadaka b. Yūsuf al-Falāḥī, a Jewish convert to Islam, who had been appointed vizier on Abū Sa'd's recommendations. Abū Sa'd's brother Abū Naṣr, court financier and community representative, was also assassinated.

[Eliyahu Ashtor]

ABYAḌ, YIḤYA BEN SHALOM (1873–1935), student friend of R. Yiḥya *Kāfaḥ; among the heads of the Dor De'ah (“generation of wisdom”) movement in Yemen. Abyaḍ was renowned as a biblical scholar and as an expert in astronomy and natural medicine. His medical treatment acquired popular acclaim and many sick people, both Jews and Muslims, came to him for help, and he was noted for treating people free of charge. Abyaḍ was head of the Maswari synagogue in Sa'na and taught Torah to the Jewish public; nonetheless, he earned his livelihood as a silver- and goldsmith. His ornaments were distinguished by their artistic delicacy. After the death of the chief rabbi, Yiḥya Isaac, in 1932, the community heads appointed him successor. However dissident groups and violent factions prevailed, and the rabbi's health was soon undermined.

[Yehuda Ratzaby]

ABZARDIEL (Abazardiel, Abenzardel, Azardel), MOSES (d. c. 1354), secretary to King Alfonso XI of Castile. A learned rabbinical scholar, Moses served for some time as *dayyan* in *Toledo. His signature appears in Latin characters in royal documents dealing with finance and taxes between 1331 and 1339. Its absence from later royal records may be related to the anti-Jewish reaction in Castile. Presumably he is the “R. Moses, the chief scribe of the king” mentioned by Ibn Verga in his *Shevet Yehudah* (ed. by Shochat (1947), 53 ff.). He is probably identical with the Moses b. Joseph Abi Zardil commemorated on an elaborate tombstone in Toledo.

ABZUG, BELLA SAVITZKY (1920–1998), U.S. social activist, politician, and advocate for women's rights. Abzug was

born in the Bronx, New York, to a religious, immigrant family. Her father, Emanuel Savitzky, a butcher, then salesman, died when Bella was 13, and her mother, Esther, became the family breadwinner. Abzug attended Walton High, an all-girls public school. Active as a teenager in the Labor Zionist group Ha-Shomer ha-Za'ir, she studied Hebrew at the Florence Marshall Hebrew High, continuing her studies at the Jewish Theological Seminary. She taught Hebrew and Jewish history at a Bronx Jewish Center. In 1938, Abzug enrolled in Hunter College, where she led demonstrations against fascism. Graduating in 1942, she worked for a defense contractor, then entered Columbia University Law School on scholarship. One of only a few women in her class, she became an editor of the *Columbia Law Review*. Midway through law school, she married Martin Abzug; the couple had two daughters. Following graduation, Abzug opened her own law firm, specializing in labor union and civil liberties work.

In 1961, Abzug helped found Women's Strike for Peace and served as its national legislative and political director. An early opponent of the Vietnam War, she founded the Coalition for a Democratic Alternative and helped to organize the Dump-Johnson campaign. She won election to Congress from Manhattan's 19th Congressional District in 1970, becoming one of 12 women in the House, the first elected on a woman's rights/peace platform. In 1971, she co-founded the National Women's Political Caucus. Returned to the House twice more, Abzug's major legislation included the Equal Credit Act, Social Security for homemakers, family planning, abortion rights, Title IX regulations, the Freedom of Information Act, the Right to Privacy Act, the "Government in the Sunshine" Law, and the Water Pollution Act. The first to call for President Nixon's impeachment during the Watergate scandal, she conducted inquiries into covert and illegal activities of the CIA and FBI. Abzug also sponsored pioneering legislation to permit the free emigration of Soviet Jewry, and was a leading supporter of economic and military aid to Israel. In 1975, she led the fight to condemn the UN General Assembly's resolution equating Zionism with racism, and played a leading role in condemning anti-Zionist and anti-Jewish attacks at international feminist conferences in Mexico and Copenhagen.

In 1976, Abzug left the House to run for the Senate from New York but lost to Daniel Patrick Moynihan in a four-way race. In 1977, she presided over the first National Women's Conference in Houston. With colleagues in 1980, she established WOMEN USA; a decade later she co-founded and co-chaired the Women's Economic Development Organization (WEDO), an international advocacy group supporting women's empowerment, economic development, and environmental security. Her books included *Bella Abzug's Guide to Political Power for Women* (1984), written with Mim Kelber.

[Joyce Antler (2nd ed.)]

ACACIA (Heb. אַקָּצִיָּה, *shittah*), a tree of Israel considered to be identical to the *shittah* tree. In the past it was extensively used for construction. Today it is planted to beautify the arid regions of Israel. Acacia-wood is mentioned repeatedly (Ex. 25–27) as the sole wood used in the construction of the Tabernacle. The word also appears as several biblical place names: Shittim near Gilgal (Num. 25:1; etc.); "And all the brooks of Judah ... shall water the valley of Shittim" (Joel 4:18); and Beth-Shittah near Beisan (Judg. 7:22). According to Isaiah, acacia trees would line the path of the returning exiles, and would make the wasteland bloom at the time of redemption (Isa. 4:19). There is almost universal agreement that the *shittah* is to be identified with the acacia. Several species of the tree grow in Israel, mostly in the wadis of the Judean desert and in the southern Negev. It is thorny and has leaves compounded of small leaflets. The yellow flowers are small and grow in globular clusters. It is not tall; its trunk is thin and generally bent sideways. It is therefore somewhat difficult to identify this tree with the *shittah* from which the Tabernacle boards "a cubit and a half the breadth of each" (Ex. 26:16) were cut. Noting this difficulty, the Midrash already asked the question: Where in the desert were our forefathers able to find acacia-wood? One solution suggests that the trees were brought from Migdal Zevo'aya in the Jordan Valley near the mouth of the Yarmuk and that a small forest existed there (Gen. R. 94:4). Regarded as holy, its trees were not cut down by the local inhabitants. At present, a small grove of *Acacia albida*, tall trees with thick trunks, which, in contrast to the other species in Israel, grows only in non-desert regions, stands there. This species must have been the "acacia-wood standing up," i.e., with an erect trunk, which provided the wood for the Tabernacle and its accessories. This tropical tree, too, would transform the desert, according to Isaiah, in contrast to the other varieties of acacia which had always grown in the dry regions. This wood is very hard, but light. It does not absorb moisture and so its volume remains constant. It is, therefore, most suitable for construction and was used in shipbuilding.

ACADEMIES IN BABYLONIA AND EREZ ISRAEL.

Designations

The talmudic term for an academy, *yeshivah* (lit., "sitting"), derives from the fixed order of seating assigned to the sages and their pupils who regularly participated in the activities of the academy. Occasionally the term meant not an academy but the private activity of studying the Torah (Nid. 70b). There are several synonyms for *yeshivah*, such as *bet ha-midrash* (lit., "the house of study"), *bet din* (lit. "the house of law"), *bet din gadol* (lit. "the great house of law"), and *metivta* (or *motva*) *rabba* (lit. "the great session"; Bek. 5b). In Babylonia the expression *metivta*, the literal Aramaic rendering of *yeshivah*, was used.

As for *bet va'ad* (lit. "meeting place"), this refers specifically to the yeshivah (*bet din*) of the *nasi* in Erez Israel.

History of the Academy in the Second Temple Period

According to the *aggadah*, the biblical patriarchs and their sons studied in a yeshivah. There was one in existence, too, during the Egyptian bondage, as also during the forty years of wandering in the wilderness (Yoma 28b; et al.). But the first reference to "yeshivah" as a place of study occurs apparently in the appendix to Ecclesiasticus 51:29: "Let my soul rejoice in my sitting (yeshivah), and be ye not ashamed with my song." The expression "in my sitting," in parallelism with "my song," would seem to point to the ethical and wise maxims which Ben Sira taught in his school, and not to halakhic subjects. But since Ben Sira declares in the same chapter (verse 23), "Turn unto me, ye unlearned, and dwell in my house of learning" (*bet ha-midrash*), it is very probable that yeshivah and *bet ha-midrash* are synonyms for a school. More than a century later, Hillel the Elder said: "The more Torah, the more life; the more yeshivah, the more wisdom" (Avot 2, 7). There is no detailed information extant on the academies of Hillel and Shammai, nor on the arrangements relating to the discussions and studies prevailing in them. There is, however, information on the discussions of these two sages and their pupils on halakhic subjects. For example, "When grapes are being vintaged for the vat (i.e., for making wine), Shammai holds that they are susceptible of becoming unclean, while Hillel maintains that they are not.... A sword was planted in the *bet ha-midrash* and it was proclaimed: 'He who would enter, let him enter, but he who would depart, let him not depart' (so as to be present when a vote was taken). And on that day Hillel sat in submission before Shammai, like one of the pupils" (Shab. 17a). There were extremely bitter controversies on *halakhah* between the pupils of Hillel and those of Shammai which, on one occasion, ended in bloodshed (TJ, Shab. 1:7, 3c). There were halakhic discussions in the *bet ha-midrash* that continued inconclusively for years (Er. 13b). On one occasion the *halakhah* was decided in accordance with Hillel's view, outside the academy, in the courtyard of the Temple Mount (Tosef., Hag. 2:11; TJ, Bezah 2:4, 61c). Generally, however, the *halakhah* was decided within the academy, after thorough consideration and discussion, by finally "taking a vote and deciding" according to the opinion of the majority.

The *tannaim* regarded the Great Sanhedrin, which had its seat in the Chamber of Hewn Stone, as a yeshivah (Mid. 5:4; Sanh. 32b) "from which Torah goes forth to all Israel" (Sif. Deut. 152). R. Ishmael relates "when a man brings the tithe of the poor to the Temple, he enters the Chamber of Hewn Stone and sees the sages and their pupils sitting and engaging in the study of the Torah, whereupon his heart prompts him to study the Torah" (Mid. Tan. to 14:22). In a like manner, Yose b. Halaftha (of Sepphoris, who flourished in the middle of the second century C.E.) described the functions, procedures, and religious authority of this central institution: "... The *bet din* in the Chamber of Hewn Stone, though comprised of 71 mem-

bers, may function with as few as 23. If one must go out, and sees that there are not 23, he remains. There they sit from the time of the daily burnt-offering of the morning until the time of the daily burnt-offering of the afternoon. On Sabbaths and festivals they enter the *bet ha-midrash* on the Temple Mount only. If a question was asked, and they had heard (the answer), they gave it; if not, they took a vote. If the majority held it to be levitically unclean, they declared it unclean; if the majority held it to be levitically clean, they declared it clean. From there the *halakhah* goes forth and spreads in Israel.... And from there they send and examine whoever is a sage and humble, pious, of unblemished reputation, and one in whom the spirit of his fellow-men takes delight, and make him a **dayyan* in his town. After he has been made a *dayyan* in his town, they promote him and give him a seat in the *Hel* ("a place within the Temple area"), and from there they promote him and give him a seat in the Chamber of Hewn Stone. And there they sit and examine the pedigree of the priesthood and the pedigree of the levites" (Tosef., Sanh. 7:1). Although the participation of pupils in the debates was a characteristic feature of the academies, when it came to arriving at a decision, only their teachers, and not they, voted (*ibid.*, 7:2).

The question has been raised as to whether an institution similar to the academy of the Pharisaic sages existed among other sects. C. Rabin (*Qumran Studies* (1957), 103ff.) regards the term *moshav* ("session") or *moshav ha-rabbim* ("the public session") in the Dead Sea Scrolls as referring to an academic-judicial institution, analogous to the academy mentioned in rabbinic literature, which met from time to time.

The Pupils at the Academies in the Second Temple Period

In rabbinic literature, information about the pupils who studied in the academies is extremely sparse. One *aggadah* relates of Hillel in his student days that "once, when he found nothing from which he could earn some money, the guard of the *bet ha-midrash* (who usually received half of what Hillel earned) would not allow him to enter. He climbed up and sat upon the skylight to hear the words of God from Shemaiah and Avtalyon" (Yoma 35b). It is further related that "Shammai and Hillel did not teach the Torah for remuneration" (Mid. Ps. to 15:6). In the appendix to Ecclesiasticus 51:23–25 it is stated: "Turn unto me, ye unlearned, and dwell in my house of learning.... Buy wisdom for yourselves without money." Hillel, of whom it is said that "he drew his fellow-men near to the Torah" (Avot 1:12), had 80 pupils and "the least among all of them was Johanan b. Zakkai" (BB 134a). On the subject of accepting pupils there was a divergence of opinion between Hillel and Shammai: "Bet Shammai maintain that one should only teach a person who is wise and humble, of a good pedigree, and rich (some read "worthy"), and Bet Hillel declare that one should teach every person, for there were many sinners in Israel who were attracted by the study of the Torah and from whom there came forth righteous, pious, and worthy men" (ARN¹ 3, 14).

There is no information extant on academies for the study of the Torah outside of Jerusalem, except for an account of Johanan b. Zakkai, who spent some time in Galilee, where scarcely any pupils or householders sought instruction from him (TJ, Shab. 16:8, 15d). One who wished to study had to leave his home and go to Jerusalem, and this naturally imposed a burden on the poor, who for years had to live away from their homes in order to spend the major part of the day in the company of their teachers, listening to their halakhic discussions, to their decisions, and to what took place in the academy, this being the accepted manner of the study of the Torah, known as “attendance on scholars.” It is recorded of Eliezer b. Hyrcanus, that he left his father’s home, went to Jerusalem, where he studied under Johanan b. Zakkai, and suffered from hunger, as he received no support from his father (ARN¹ 6; ARN² 13, 30–1). Pupils also went from abroad to study the Torah in Jerusalem. They included Nehemiah of Bet Deli, who went from Babylonia and studied under Gamaliel the Elder (Yev. 16:7), and Saul of Tarsus, i.e., Paul, who went from Cilicia in Asia Minor (Acts 22:3). There were no written halakhic works available, for in general the principle was observed that “words which are transmitted orally are not permitted to be recited from writing” (Git. 60b).

From the Destruction of the Second Temple to the Close of the Mishnah

After the destruction of the Second Temple, several academies were established simultaneously. This is attested by a *baraita* (Sanh. 32b) which enumerates the academies and their heads, as follows: Johanan b. Zakkai at Beror Hayil, Gamaliel at Jabneh, Eliezer at Lydda, and Joshua at Peki’in. In the next generation there were Akiva at Bene-Berak, and Hanina b. Teradyon at Siknin, and these were followed by Yose at Sephoris, Mattiah b. Heresh in Rome, Judah b. Bathyra at Nisibis (in Mesopotamia), and Hananiah, the nephew of R. Joshua b. Hananiah, in Babylonia. The list, though incomplete, testifies to the founding of academies both in and outside Erez Israel during the second century C.E. (See Map: Main Academies.) It concludes with a reference to the academy at Bet She’arim, headed by Judah ha-Nasi, which, because of the unique nature of his position and of the religious authority with which he was invested, was apparently the only one in his day, although after his death, academies were again established simultaneously at Tiberias, Caesarea, and Lydda.

The Function and Authority of the Academies

On the assembly of the sages at Jabneh after the destruction of the Second Temple there is the following statement: “When the sages assembled at the academy of Johanan b. Zakkai at Jabneh, they said: ‘A time will come when a man will seek one of the laws of the Torah and not find it, one of the rabbinic laws and not find it.’... They said: ‘Let us begin from Hillel and Shammai ...’” (Tosef., Eduy. 1:). Hence, the sages began to receive “testimonies” from those who had survived the war against the Romans. They scrutinized these, arrived

at a decision, and laid down the *halakhah*. At that time the arrangement of halakhic collections according to subject matter received renewed and fruitful impetus. The center of religious authority was the Great Academy, in whose activities the **nasi* took part and over which he presided when not engaged in public affairs. In this *bet din* the new moon was proclaimed, as was the intercalation of the year (RH 2:8–9; Eduy. 7:7), the fixing of a uniform **calendar* for Erez Israel and the Diaspora contributing greatly to the preservation of national unity. Here, too, matters relating to the liturgy (Ber. 28b), and religious questions which were of public concern and on which no general agreement had hitherto been reached, were finally decided. In this central institution, 71 sages sat (Sanh. 1:6) when it was necessary to decide on basic halakhic matters affecting the people of Erez Israel as a whole – matters such as the levitical uncleanness of hands through touching sacred scrolls, etc. (Yad. 3:5; 4:2). The following description of the proceedings of the Sanhedrin may well have applied to the central academy at Jabneh: “The Sanhedrin sat in a semi-circle so that its members might see one another, and two judges’ scribes stood before them, one on the right and one on the left, and wrote down the arguments of those in favor of acquittal and of those in favor of conviction.... In front of them sat three rows of scholars, each of whom knew his proper place. If they needed to ordain another judge, they ordained one from the first row, whereupon one from the second row moved up to the first, and one from the third row to the second. A member of the public was chosen and given a seat in the third row. He did not occupy the seat of the first scholar but one suitable for him” (Sanh. 4:3–4). The discussions in the Sanhedrin were thus conducted in public in the presence of pupils and of members of the community. In this way the pupils had learned the Torah in the days of the Second Temple. Both in Erez Israel and in Babylonia, a *bet din* was always an integral part of an academy. The order of discussion was as follows: If several matters of law came up, only one would be dealt with on one day (Tosef., Sanh. 7:2). “No vote is taken on two matters simultaneously, but votes are taken separately and questions put separately” (Tosef., Neg. 1:11). At the end of the discussions a vote was taken, where necessary, such as in cases where “one prohibits and one permits, one declares levitically unclean and one clean, and all say: We have not heard a tradition concerning this – in such instances a vote is taken” (Tosef., Sanh. 7:2). The Tosefta also describes procedural details and ceremonial arrangements customary in the academies in Erez Israel in tannaitic times.

Information on the academies in Erez Israel and Babylonia in the Days of the Amoraim is more detailed than on the preceding period. Generally, the *amoraim* adopted the arrangements and methods of instruction of their academies from the *tannaim*.

The Rosh Yeshivah and his Assistants

The *rosh yeshivah* – the head of the academy – would “sit and expound” and convey his remarks to the *meturgeman* (“inter-

Map showing the main academies in Babylonia and Erez Israel.

preter”; Ber. 27b), also called an **amora*. Where the audience was large, the *rosh yeshivah* would be assisted by numerous *amoraim* (Ket. 106a). Since all the pupils did not immediately grasp what was said, the outstanding pupils would repeat and explain the lesson (BK 117a, and Rashi, *ibid.*; Ta’an. 8a, Rashi). After they understood it, the pupils would repeat the lesson orally (Er. 54b). It is possible that the sages permanently attached to an academy prepared the pupils for the *rosh yeshivah*’s forthcoming lecture by teaching them the Mishnayot (see Meg. 28b; cf. Hor. 12a: Mesharsheya’s statement). The *rosh yeshivah* gave his lectures, at least in the large academies, in the morning and in the evening (Shab. 136b), the pupils spending the rest of the day in reviewing the lecture and perhaps also in preparing for the next one. These outstanding pupils were called *reishai kallah* (“the leaders of the rows”), possibly because of the permanent seating arrangements at the academy. Mention is made of seven rows of pupils, graded according to their knowledge, the first row being occupied by the outstanding pupils (BK 117a) and so on. There is also a reference to 24 rows of pupils (Meg. 28b), the youngest pupils occupying seats behind the fixed rows (Ḥul. 137b).

The *rosh yeshivah* was also assisted by a *tanna*, distinguished by his exceptional knowledge of the “Mishnah of the *Tannaim*” and of the Oral Law in general, which he memorized by constant repetition, the Oral Law generally not having been written down (Git. 60b). The services of the *tanna* were often required in the academy for the quoting of tan-

naitic statements, his remarks being cited in the Babylonian Talmud, usually after the introductory formula: “A *tanna* taught before rabbi so-and-so.” In general the *tanna*’s knowledge was mechanical and not rooted in an especially profound understanding of the material; in consequence the sages, especially in Babylonia (Meg. 28b), did not have a particularly high opinion of them.

The Election of a Rosh Yeshivah

A *rosh yeshivah* was generally appointed by the sages of the academy both in Erez Israel (Sot. 40a) and in Babylonia (Ber. 64a). Sometimes several candidates would compete for the position, the ability to make an irrefutable statement serving as the criterion for election (Hor. 14a).

The Academies in Babylonia in the Days of the Amoraim

The beginnings of the central academies in Babylonia are associated with Rav at **Sura* and Samuel at **Nehardea*. Each headed a famous school which possessed central religious authority in the Babylonian Diaspora. The academy at Sura flourished almost 800 years; that at Nehardea was destroyed at the end of the ’50s of the third century C.E. and was succeeded by a number of academies, finally settling in **Pumbedita*, where it survived, with intermissions, until about the middle of the 11th century C.E. (See Map: Main Academies). The principal innovation of the Babylonian academies was the institution of the *yarḥei kallah* (months of **kallah*), the assembly of the Babylonian sages at one of the leading academies

in the months of Adar and Elul, when they discussed a prescribed tractate which they had studied during the preceding five months. A detailed description of the arrangements of study during the *yarhei kallah* is given by R. Nathan ha-Bavli in *Seder Olam Zuta* (ed. Neubauer, 87–88). Although this account relates to the middle of the tenth century C.E. similar arrangements were presumably already in vogue in the days of the *amoraim*.

The Aim of the Studies in the Academies

The studies in the academies were designed to produce scholars who would be conversant in all fields of the Oral Law and who could derive from the existing *halakhah* laws applicable to new situations (see Rav's statement and the discussion in *Hul.* 9a).

The Method of Study

The pupils participated actively in the *rosh yeshivah's* lectures, as well as in the halakhic discussions in the formulation of the law, the students' religious responsibility in this connection being duly stressed (*Sanh.* 7b). It was the duty of the pupils to raise objections when they believed their teacher to have erred in judgment (*Shevu.* 31a) and students even contested legal decisions of the *rosh yeshivah* (*Ket.* 51a). The *rosh yeshivah* often called in his students when deciding in cases of ritual law (*Hul.* 45b), when examining a slaughterer's knife (*ibid.*, 17b), or when dealing with questions concerning the ritual fitness of an animal (*ibid.*, 44a–b), and similar questions. From time to time the *rosh yeshivah* would test his pupils in their knowledge and understanding of the *halakhah* (*Er.* 76a; *Hul.* 113a).

[Moshe Beer]

ACADEMY OF THE HEBREW LANGUAGE, Israeli institution that is the supreme authority on the Hebrew language. Established by the Knesset in accordance with the “Law for the Supreme Institute for the Hebrew Language, 1953,” it succeeded the Hebrew Language Committee (*Va'ad ha-Lashon ha-Ivrit*) inaugurated in Jerusalem in 1890. In 1889 a group calling itself “Safah Berurah” had been formed, with the object of “spreading the Hebrew language and speech among people in all walks of life.” This group elected the Committee, the first members of which were Eliezer *Ben-Yehuda, David *Yellin, R. Ḥayyim *Hirschenson, and A.M. *Luncz. Initially the Committee devoted itself to establishing Hebrew terms needed for daily use and to creating a uniform pronunciation for Hebrew speech to replace the then current variety of pronunciations. After only one year of existence, organizational problems disrupted the Committee's activities, but in

1903 at the Teachers' Conference in Zikhron Ya'akov, it was reconvened with an enlarged membership, and thereafter held regular monthly meetings.

In *Principles of the Committee's Activities*, drafted by Ben-Yehuda, its purpose was declared to be: (1) “To prepare the Hebrew language for use as a spoken language in all facets of life – in the home, school, public life, business, industry, fine arts, and in the sciences.” (2) “To preserve the Oriental qualities of the language and its distinctive form, in the pronunciation of the consonants, in word structure and in style, and to add the flexibility necessary to enable it fully to express contemporary human thought.”

The sources used by the Committee were Hebrew literary vocabulary of all periods; Aramaic, provided it was given Hebrew forms; Hebrew roots from which new forms could develop; and Semitic roots, especially Arabic. Non-Semitic words found in the sources were used only if they already had a Hebrew form or had been absorbed into the language and were in common use.

Scientific problems of linguistic principle were discussed in the *Zikhronot* (“Records of the Committee on Language”). In 1912, the Committee was recognized by the Teachers' Organization and the Committee for the Propagation of Hebrew as “the final authority in authorizing and choosing new words.” In a lecture given at the convention of the Organization for Hebrew Language and Culture in Vienna in 1913 (published in *Zikhronot*, 4 (1914)), David Yellin defined the Committee as not merely a factory for new words, as its opponents alleged, but the highest authority for all matters of language, encouraging the coordinated work of all Hebrew linguists and writers. At the 11th Zionist Congress (1913), M. *Ussishkin proposed a resolution authorizing the Committee “to serve as the center of the renaissance and development of the Hebrew language” and urging the Zionist General Council to give it the necessary moral aid and material assistance. After World War I, the beginning of the British Mandate and the Jewish National Home, Hebrew became an official language in Palestine. The Committee, which had been largely inactive during the war, now felt an obligation to expand the program of the Language Committee far beyond its previous range. Practical linguistics and the supply of new words were to be increased, and it engaged in language research, intended to lay the scientific foundations for the practical work.

With an increased membership, the Committee met frequently, establishing and publishing professional terminology. To prepare for the establishment of the Haifa Technion and the Hebrew University, as well as to facilitate the development of trade and industry, work in the various subjects was divided among subcommittees, consisting of members of the Committee and experts in the particular field. These met in Jerusalem, Tel Aviv, and Haifa, referring their findings to other specialists in the field as well as to all members of the Language Committee. After final approval, lists were published in the Hebrew Language Committee's quarterly, *Leshonenu*, or in a special dictionary.

The Sephardi pronunciation was established as the standard for spoken Hebrew and instruction in the schools. Rules of spelling were established: grammatical when the writing was vocalized and “full” (*plene*) in unvocalized writing. Rules of punctuation were determined, and doubtful matters of grammar clarified. While developments in technology and the sciences forced the committees on terminology to include many non-Semitic words in the Hebrew dictionary, the formation of verbs from foreign words was deliberately restricted because, while nouns are easily assimilated into Hebrew, verbs are not. Nevertheless, the formation of verbs such as טלפון (*talpen*, “telephone”) and גלגן (*galven*, “galvanize”) proved unavoidable. Grammatical nouns encountered certain scholarly and practical obstacles: the establishment of spelling rules was long delayed by disputes between adherents of biblical spelling and those of the “full” spelling current in post-biblical literature.

The law adopted by the Knesset in 1953 established the Academy and defined its function as the “development of Hebrew, based on the study of the language in its various periods and branches.” The maximum number of members is 23. Well-known scholars in various fields of Jewish and Hebrew studies were appointed as members of the Academy, together with practicing writers, and a number of advisory and honorary members were invited to join them. N.H. *Tur-Sinai was chosen to be president of the Academy, a position he held until 1973. Subsequent presidents were Ze'ev Ben *Hayyim (1973–1981), Joshua *Blau (1981–1988), and Moshe Bar-Asher (1988–).

The supreme body within the Academy is the plenum, to which linguistic problems discussed in the various committees are referred for final discussion and approval. The plenum meets five or six times a year. The committees on terminology hold weekly or biweekly meetings attended by at least two members from the Academy as well as by specialists in the areas under discussion. Scientific secretaries assemble the available linguistic material in each area, which is then checked against literary sources and decisions already taken in other areas. After discussion, the secretary collates the material and transmits it to all Academy members and to further specialists in the field, who are entitled to comment on, or take issue with, the committee's findings. The material is finally presented to the plenum for discussion, authorization, and publication, either in the *Zikhronot ha-Akademyah* or in the series of technical dictionaries, originally instituted by the Hebrew Language Committee. Among dictionaries published in recent years are those on electronics, chemistry, molecular biology, psychology, library science, diplomacy, medicine, and home economics. Committees on terminology are at work in the fields of banking, law, sociology, nomenclature of plants, and artificial intelligence. The Haifa office for technical terminology is a joint body of the Academy and the Technion. Committees on grammar and spelling follow a similar work pattern, but since the problems in this area are complex, there are usually greater differences of opinion and theory, center-

ing, as a rule, on the conflict between the dictates of historical grammar and those of living speech and practical teaching. Language forms created outside the Academy, whether originating in foreign influence, in slang, or in the language of children, also demand a clear decision by the Academy.

A practical problem over which the Academy, in common with its predecessor, has labored for many years, is the determining of Hebrew spelling. Hebrew writing is mostly consonantal, the vowels being represented by vocalization signs. This spelling, inadequate in the past, is even more so in the present, since the vowels are rarely indicated either in script or in print. The spelling used in the past generations, which substitutes *matres lectionis* for vowels, is incomplete (although it is called “full”), lacks uniformity, and is not universally accepted. The rules for unvocalized spelling, established by the Hebrew Language Committee, were never generally accepted and various systems have been retained. In 1968, after prolonged debate, the Academy decided to maintain two modes of spelling: one vocalized according to all the established grammatical rules, the other an unvocalized spelling in accordance with the rules of the Hebrew Language Committee. A related question is how to transliterate Hebrew into Latin letters in such a way that the non-Hebrew reader is able to pronounce the name as it is said in Hebrew, and after much discussion, a system was approved. In addition, rules have been determined for the transliteration of foreign names into Hebrew as well as for transliteration from Arabic into Hebrew. Rules have also been established for vocalization of foreign words. New rules for Hebrew punctuation were approved in 1993. The Academy assists public bodies requiring linguistic guidance, such as the National Committee on Names, scientific projects, the state broadcasting system, etc.

Academy decisions are published either as technical dictionaries, in lists of terms, or as collections of rules in the annual *Zikhronot ha-Akademyah la-Lashon ha-Ivrit*. A special project of the Academy is the *Historical Dictionary of the Hebrew Language*, begun in 1954 by an editorial board headed by Z. Ben-Hayyim, planned to include all Hebrew words and their uses from the earliest sources until the present. Preparatory work on material from tannaitic literature, the Talmud, and Midrash has been completed. Work continues on readying ancient *piyyut*, geonic, Karaite, and North African literature, and modern Hebrew literature (dating from 1750). The historical dictionary project is fully computerized and applies programs especially adapted to the dictionary's requirements. In 1994 the Academy established the “Masie Institute” to bring the Academy closer to the public and for research into the history of the revival of Hebrew in Israel and the Diaspora from its earliest stages to the establishment of the State of Israel. The publications of the Committee and of the Academy are *Zikhronot* for the years 1920–28, vol. 5 edited by J. Klausner, vol. 6 by S. Ben-Zion, D. Yellin, and A. Zifroni. Afterwards the committee decisions were published in *Leshonenu* (see below) up to 1954. Then, when the Academy was established, a new series of *Zikhronot* was commenced under the name of

Zikhronot ha-Akademia la-Lashon ha-Ivrit: vols. 1–2 (1954–55), 3–4 (1956–57), 5 (1958), 6 (1959), 7–8 (1960–61), 9 (1962), 10–11 (1963–64), 12 (1965), 13 (1966), 14 (1967), 15 (1968), 16 (1969), 17 (1970), 18 (1971), 19–20 (1972–73), and 21–24 (1974–77) of the new series were probably edited by Meir Medan, but no name of an editor is specified; vols. 25–27 (1978–80), 28–30 (1981–83) and 31–34 (1984–87) were edited by Y. Yannai; 35–37 (1988–90) by Y. Yannai and J. Ofer; 38–40 (1991–93) and 41–43 (1994–96) by J. Ofer; and vol. 44–46 (1997–99) by D. Barak. *Leshonenu*, a quarterly, was edited by A. Zifroni (1929–34, five volumes) and N.H. Torczyner (*Tur-Sinai) from 1934 to 1954. These continued under the auspices of the Academy and were edited by Z. Ben-Hayyim from 1955 to 1965, by E. Kutscher from 1965 to 1971, by S. Abramson from 1972 to 1980, by Y. Blau from 1981 to 1999, and from 2000 by M. Bar-Asher. *Leshonenu la-Am*, popular pamphlets on matters of language, consist of six pamphlets edited by A. Avrunin, M. Ezrahi, and I. Perez (and more regularly from 1949 to date, a few pamphlets a year). There is also a series of technical dictionaries. The Academy's lexical innovations used to be disseminated among the public through *Lemad Leshonkha* ("Learn Your Language") pages published bimonthly, and since 1989 in the framework of a regular newsletter called *Aqaddem*. Among the most important recent publications are the *Ma'agarim CD* which includes all the sources of the ancient period, the critical edition of the *Talmud Yerushalmi* according to the Leiden MS, and the second part of *Sefer ha-Mekorot* (the Book of Sources) for the North African Hebrew literature from 1391 to date (1,941 pages).

[Meir Medan]

ACADEMY ON HIGH. In rabbinic tradition, a heavenly body of scholars. Post-mishnaic (talmudic and midrashic) literature speaks of an Academy on High, for which two terms are used: "*Yeshivah shel Ma'lah*" ("Academy on High") and "*Metivta de-Raki'a*" ("Academy of the Sky"). It is clear from *Bava Mezia* 86a that the two terms are identical. Generally speaking, the Academy on High has the same features as an earthly academy. Scholars continue their studies and debates there; therefore the death of a sage is expressed as a summons to the Academy on High (BM 86a). Very daringly, the Almighty Himself is made to participate in its debates and is not even an absolute authority. One of His rulings is contested by all the other scholars, and a human, Rabbah b. Nahamani, is especially summoned from earth (i.e., to die) for a final decision, which he gives before he dies. Although his ruling concurs with that of the Almighty, it is given independently.

Every day God gives a new interpretation of the Torah (Gen. R. 49:2), and He cites the opinions of various scholars (Ḥag. 15b). He also instructs young children who died before they could study (Av. Zar. 3b; however, the Academy on High is not mentioned there). The most surprising of all students is *Asmodeus, the king of the demons, who is depicted as studying daily in both the heavenly and the earthly academies (Git. 68a). Admission to the Academy on High is automatic for scholars (Eccl. R. 5:11, no. 5), although it may be denied for certain reasons (Ber. 18b). Others may enjoy the privilege for particularly meritorious deeds. These include teaching Torah to a neighbor's son (BM 85a) and assisting scholars to study by promoting their commercial ventures (Pes. 53b).

Greetings were sent from this Academy to people who were still alive. Abbaye received these once a week on the eve of the Sabbath. Rava, his contemporary, was greeted once a year, on the eve of the Day of Atonement. However, a certain *Abba Umana ("the bloodletter") was privileged to receive greetings daily because of the due proprieties which he observed when bleeding women patients. Scholars have their definite places there, according to rank. The great *amora* Johanan was not deemed worthy of sitting next to Ḥiyya (BM 85b). They sit in a semi-circle, like the Sanhedrin on earth (Eccles. R. 1:11, no. 1). Nothing suggests that this academy is identical with paradise. On the Day of Atonement, before *Kol Nidrei*, the permission of the Academy on High is invoked to hold the Service together with "transgressors." It is also invoked in the prayer recited before changing the name of a sick person, see *Seder Berakhot* (Amsterdam, 1687), 259 ff.

[Harry Freedman]

In Kabbalah

The Zohar makes a clear distinction between the two terms "Academy of Heaven" and "Academy on High." The former is headed by *Metatron and the latter by God Himself (II, 273b; III, 163a, 192a, 197b, 241b, etc.). Promotion from one academy to the other is mentioned, as are some academy heads in certain departments of the heavenly academy, e.g., "the Academy of Moses", "the Academy of Aaron." A long section in the portion *Shelah Lekha* (III, 162ff.) is devoted to a description of the imaginary wanderings of *Simeon b. Yoḥai in these academies and his meeting with the head of the Academy of Heaven. The place of Metatron in the Zohar is taken in the Testament of Rabbi Eliezer the Great, composed by the author of the Zohar himself, by Rav Gaddiel Na'ar, who forms the subject of a special legend (Seder Gan Eden, *Beit Midrash* of Jellinek, III, 136). In order to distinguish between the two academies, *Midrash ha-Ne'lam* on Ruth (Zohar Ḥadash, 84a) changed the term "Academy of Heaven" which occurs in the Talmud (Ber. 12b) to "Academy on High." Legendary motifs concerning the Heavenly Academy which occur in the Talmud were completely remolded in the Zohar, especially in the story of R. Ḥiyya's ascent to the Academy of Heaven (Zohar I, 4a). The *Messiah seems also to come into this academy at certain times so as to study the Torah with the sages of the academy.

AÇAN, MOSES DE TARREGA (*Zaragua?*; c. 1300), Catalan poet. Moses Ačan, whose true name was probably Moses Nathan (Načan), is known for his verse treatise in Catalan on chess. The introduction begins with an account of the Creation, stressing man's obligation to worship God the Creator. It ends with an explanation of the rules of chess and a condemnation of other games, especially card playing. The work was translated into Castilian by a Jew or Jewish convert in 1350; a manuscript copy was preserved in El Escorial. He seems to be also the author of a collection of 58 short poems of ethical content, *Toza'ot Hayyim*, published by Menahem ben Yehuda de Lonzano in 1618. Their originality and literary value are not very high. In the acrostic he calls himself Moses Ben-Netanel Bar-Solomon. He could also be identical with one of the notable Jews of the Crown of Aragon who signed the *takkanot* in Barcelona on 1354.

The author has been also identified with the Moses b. Joseph Ačan who at Cuenca in 1271 warned King Alfonso X of a conspiracy of the Castilian nobles led by the Infante Felipe, but this identification is unfounded.

ACE, GOODMAN (1899–1982), U.S. humorist. Born in Kansas City, Mo., as Goodman Aiskowitz, he was an actor, comedian, and writer who supplied dozens of performers with funny things to say but also became well known for the malapropisms he provided for his wife on a nationally heard radio program that ran from 1930 to 1945. At his peak Ace was probably the highest-paid writer in television. The son of a haberdasher, he got his first job as a hat salesman. He shifted quickly to newspaper writing and became a columnist on the *Journal Post*. Seeking to supplement his salary as a columnist and theater and film reviewer, he did extra work commenting on films for a radio station. After he finished a 15-minute program, the station manager asked him and his wife Jane, who happened to be at the station, to stay on the air because the performers for the next segment had not yet shown up. The ad-lib show proved so popular that the Aces were hired to do two programs a week. By 1931 they had moved to the CBS network. Over the air the quips and bon mots seemed to flow effortlessly, but Ace had carefully composed each misused expression for Jane Ace. She died in 1974. Ace wrote for performers as diverse as Danny *Kaye, Perry Como, Sid *Cesar, Milton *Berle, and Bob Newhart.

[Stewart Kampel (2nd ed.)]

ACHAN (Heb. אָחָן), sacrilegious transgressor from the tribe of Judah, son of Carmi, son of Zabdi, son of Zerah. In the time of Joshua, Achan violated the **herem* imposed on Jericho and was subsequently executed (Josh. 7). Despite the ban on spoils from Jericho, Achan misappropriated a fine *shinar* mantle, 200 shekels of silver, and a wedge (lit. “tongue”) of 50 shekels' weight and buried them in the ground under his tent. The Israelites were defeated in an attempt to take *Ai because of the trespass of the *herem*. Lots were cast to determine who was responsible and Achan was indicated. On the principle of collective responsibility the people had been punished for the transgression of this one man, since Achan's sin was ascribed to all of Israel (Josh. 7:1, 11). Achan confessed his sin publicly before God and Israel (Josh. 7:20–21). Another example of collective responsibility is that he was stoned with all his family in the valley of *Achor (“troubling”), where the articles he had taken were burned and a great mound of stones was raised over him. The word *achor* is a play on the name Achan. In 1 Chronicles 2:7 he is actually called “Achar, the troubler of Israel.”

The story of Achan may be an amalgam from two different sources. The first half of Joshua 7:25 reads “and they stoned him,” while the second half says “and they stoned them,” which is not only a duplication but employs a different Hebrew verb for “to stone.” The story is widely regarded as an independent, Judean, etiological narrative, explaining the origin of the name valley of Achor and the presence there of a big pile of stones (Josh. 7:26). According to Y. Kaufmann, however, it belongs to a class of biblical legal literature which illustrated rulings by example. These were actual cases decided on the spot and the story preserved the result of the case (e.g., Lev. 10:1–7, 12–20; 24:10–23; Num. 9:6–44; 27:1–11; 36:1–12; 1 Sam. 30:22–25).

In the Aggadah

Achan was a hardened criminal whose sins (previous to stealing the spoil from Jericho) included desecration of the Sabbath, obliterating the signs of his circumcision, and adultery (Sanh. 44a). Nevertheless, he is one of the three men who, by their confessions, lost this world, and gained the world to come (ARN version B, 4–5:3). When his fellow tribesmen were willing to espouse his cause to the extent of slaying one group after another in Israel, Achan said to himself: “Any man who preserves one life in Israel is as though he had preserved the entire world... It is better that I should confess than be responsible for a calamity” (Num. R. 23:6). His confession was a victory over his evil inclinations. “The Lord shall trouble thee this day” (Josh. 7:25), implied: “This day thou art troubled, but thou wilt not be troubled in the world to come” (Lev. E. 9:1 and Sanh. 6:2).

ACHBOR (Heb. עֲכֹבֹר), the name of two biblical figures.

(1) Achbor was the father of Baal-Hanan, king of Edom (Gen. 36:38–39; 1 Chron. 1:49). Some scholars maintain that the father's name is not Achbor, but a duplication of Beor (Gen. 36:32), because the king's native city is not given (as in all the other cases, rather than their father's name). Nonetheless, there is no doubt that the name existed. It can denote a mouse (*akhbar*), as it is normal for biblical persons to bear animal names. Furthermore, there may also be a cultic connotation for this name, as is proved by the discovery of sacrificial mice (cf. also the golden mice in 1 Sam. 6:4, 5, 11), and the reference in Isaiah 66:17 to a non-Yahwistic cultic practice in which mice were eaten. This is in addition to the preservation of a tradition by Maimonides that the Horites sacrificed mice. It is further interesting to note that a seal bearing the words "Hananyahu ben Akhbor" was found in Jerusalem.

(2) Achbor, the son of Micaiah, was one of the men sent by King Josiah to consult the prophetess *Huldah (11 Kings 22:12–14; in 11 Chron. 34:20, he is called *Abdon, probably a corruption of Achbor). On the mission he is believed to have represented the pro-Egyptian families, who were influential in the last days of the Kingdom of Judah (see *Ahikam). His son, *Elnathan, was one of the ministers in the time of Jehoiakim (Jer. 26:22; 36:12). Possibly "K-[-]iahu son of Elnathan," an army officer mentioned in one of the Lachish ostraca (no. 3, 1.15), was Achbor's grandson in the time of Zedekiah.

ACHISH (Heb. אֲכִישׁ), *Philistine king of *Gath, mentioned at the end of Saul's reign. In 1 Samuel 27:2, his father's name is given as Maoch. Achish's realm was extensive and included the city of Ziklag and its environs (1 Sam. 27:6). Fugitives from Judah often sought shelter in his land because of its proximity to Judah (1 Kings 2:39–40). At first Achish refused *David permission to stay in his territory, possibly to avoid becoming embroiled in a political conflict with Saul (1 Sam. 21:11 ff.). After a company of several hundred men, however, had gathered around David, Achish welcomed him and even allocated to him the Ziklag region (1 Sam. 27). It is possible that David took his first steps in royal administration when he was in the kingdom of Gath.

In the Septuagint Achish is called Akchous, Agchous, Agchis. If the late readings reflect some early tradition, it would seem almost certain that the original form of the name was Achush or Akkush, which corresponds or is related to Ikusu, the name of one of the kings of Ekron in the days of Esarhad-don and Ashurbanipal, now attested to in a monumental inscription from Ekron. The name Achish is not Semitic in form, and some scholars have related it to Agchioses, the name of a king in the neighborhood of Troy who lived around the time of the Trojan War (*Iliad*, 2:819; 20:239; et al.). The fact that the form *Agchisis* is not Greek supports the theory that Achish

and *Agchisis* may have had a common origin. Since the name *Akhshan* is found in an Egyptian list as the name of a son of Kaphtor (*Keftiu*), it is plausible to assume that the form "Achish" stems from the same group of peoples to which the Philistines belonged. But it is also conceivable that the name is Horite, because the combination of sounds in "Achish" is possible in Horite. J. Naveh has argued that Achish was an appellative employed as a throne name.

A king of Gath called Achish is also referred to in the fourth year of Solomon's rule; he is called "Achish son of Maacah" (1 Kings 2:39). Perhaps there were two kings by this name; Achish son of Maoch, the predecessor, and Achish son of Maacah, the successor of an intermediate king called Maacah.

[Joshua Gutmann]

ACHOR, VALLEY OF (Heb. עֲמֶק אַחֹר), site near Jericho where *Achan was stoned to death for helping himself to some of the forbidden booty taken from Jericho (Josh. 7:24–26). Achor is mentioned in Joshua (15:7) as being located on the border of Judah and Benjamin, between Debir and Adummim. Both Hosea (2:17) and Isaiah (65:10) predicted that in time to come this valley would cease to be a desert. Achor figures in the *Copper Scroll from the Dead Sea as the site of vast hidden treasures. Eusebius (*Onom.* 18:17–20) located it north of Jericho in the direction of Galgala, and it has been placed by most scholars in or near Wadi el-Qelt, or farther north at the large Wadi Nuwei'imeh. A more recent suggestion is al-Buqe'ah, a large plain in the Judean Desert southwest of Jericho.

[Michael Avi-Yonah]

ACHRON, JOSEPH (1886–1943), composer and violinist. Achron made his debut at the age of eight, touring Russia as a prodigy violinist. He studied with *Auer and Liadow at St. Petersburg, and later taught at the Kharkov Conservatory (1913–18). Achron began his composing career by writing light music. His association in St. Petersburg with the group of Jewish writers and musicians who founded the Society for Jewish Folk Music brought about a change in musical interests, and manifested itself in his *Hebrew Melody* (1911). After attempting to settle in Berlin (1918–22) and Palestine (1924), he went to New York in 1925. There he wrote music for Yiddish plays and was commissioned to compose *Evening Service for the Sabbath* for Temple Emanu-El (1932). In 1934 he moved to Hollywood, wrote film music, but continued serious composition. Achron's work shows the stresses resulting from

his double role as a performing musician and a composer. He composed more than 80 works, including violin sonatas and concertos, *Symphonic Variations and Sonata on the Folk Song "El Yivneh ha-Galil"* (1915), *Concerto for Piano Alone* (1941), *Golem Suite* (1932), *Sextet for Woodwinds* (1942), and incidental music to plays by *Goldfaden, *Shalom Aleichem, Peretz, and Sholem *Asch. The bulk of his manuscripts is preserved in the National and University Library, Jerusalem.

ISIDOR (1892–1948), brother of Joseph, born in Warsaw, was a pianist and composer. He studied in St. Petersburg and toured Europe and the U.S., where he settled in 1922.

ACHSAH (Heb. עֶכְסָה; probably “anklet,” cf. Isa. 3:18), the daughter of *Caleb, the son of Jephunneh. Achsah’s father announced that he would give her in marriage to the man who would capture Kiriath-Sepher (later called *Debir; modern Tell Beit Mirsim). *Othniel, son of Kenaz, the latter apparently a younger brother of Caleb (Caleb and Kenaz both being the sons of the Kenizzite Jephunneh), took Kiriath-Sepher and married Achsah (Jos. 15:16–17; Judg. 1:12–13). Apparently because Othniel desired a dowry in addition to the girl (whom her father had “given away as Negeb Land” [i.e., without dowry], see Kaufmann ad loc.), she asked her father for a piece of property known as Upper and Lower Springs and Caleb acceded to her request (Jos. 15:18–19; Judg. 1:14–15). This story is told in connection with the apportionment of land to the families of the tribe of Judah (Josh. *ibid.*; Judg. *ibid.*). Caleb, according to the critical view, represents a tribe or group of families (cf. 1 Sam. 25:2–3) that was incorporated into Judah. The detailed story intended to describe the settlement of Othniel and the families of Kenaz in a Calebite region. Furthermore, the story brings to light the relations between the families of Caleb and that of Kenaz (probably both Hurrians).

The name Achsah is derived from the root עֶכַס (cf. Isa. 3:18; Prov. 7:22), meaning to reverse, tie backward, hence anklet, bangle.

BIBLIOGRAPHY: Noth, *Personennamen*, 223. **ADD. BIBLIOGRAPHY:** J. Stamm, in, SVT16 n (FS Baumgartner 1967), 328; Y. Amit, *Judges* (1999), 35–36.

ACHSHAPH (Akhshaf; Heb. אֶחְשָׁף), ancient Canaanite town, usually mentioned together with Acre in Egyptian documents from the Middle and New Kingdoms (cf. the Execration Texts of early 18th century B.C.E.), the list of cities conquered by Thutmose III (c. 1469 B.C.E.), the El-Amarna letters (14th century B.C.E.), and the Papyrus Anastasi (13th century B.C.E.). It was in the territory allotted to Asher in the period of the Israelite conquest (Josh. 19:25). The king of Achshaph is listed among the 31 kings who fought Joshua (*ibid.* 12:20); he participated in the battle at the Waters of Merom (*ibid.* 11:1). The various sources indicate a location in the southern part of the

Plain of Acre, perhaps one of the more prominent of its many ancient tells: Tell Kisan 6 mi. (10 km.) S.E. of Acre, or Khirbet al-Harabaj, E. of Haifa near Kefar Ḥasidim.

[Michael Avi-Yonah]

ACHZIB (Heb. אֶחְזִיב). The name may mean “charming,” “delightful.” (1) Ancient Canaanite harbor town north of Acre near the cliff called “the ladder of Tyre.” North of the village is a tell in which potsherds dating from and after the Early Bronze Age have been found. According to Joshua 19:29 and Judges 1:31, Achzib belonged to the tribe of Asher, but it did not come under the effective control of the Israelites, as the Canaanites continued to occupy it. A large number of tombs from the period of the Israelite monarchy have been discovered south and east of the tell. *Sennacherib captured Achzib from the king of Tyre in 701 B.C.E. In the period of the Second Temple, Achzib is mentioned (in the Greek form Ekdippa) as a road station, 9 Roman mi. north of Ptolemais (Acre., Jos., Wars, 1:257; Pliny, 19). A Roman milestone has been found on the site, on the Acre–Antioch road, in addition to many Roman tombs. In the mishnaic period, Achzib, then called also Kheziv (Gesiv in the Palestinian Talmud), was considered a part of Erez Israel and its inhabitants were bound by all the biblical laws pertaining to the sabbatical and jubilee years, priestly dues, and tithes (Shev. 6:1; 4:6; Hal. 4:8; 2:6; Tosef. Oho. 18:14). Achzib occupied an important position as a base-camp for the Crusader armies and was known as Casal Imbert after the knight who held it. The Arab geographers of the Middle Ages (Ibn Jubayr, 307; Yaqut, 2:964; Idrisi, 2) refer to it as al-Zib, a fortified village. Until 1948 the site was occupied by the Arab village of al-Zib, 9 mi. (15 km.) north of Acre. Nearby is the kibbutz *Gesher ha-Ziv whose name was partly inspired by the ancient city. In excavations conducted in 1941–44 and 1959–64, fortifications and occupational levels were discovered beginning with the Middle Bronze Age II (first half of the second millennium B.C.E.) to the Roman period and also from the Crusader period and Middle Ages. Most of the tombs investigated were Phoenician (tenth to seventh centuries B.C.E.); others were from the Persian and Roman periods. The tombs were rock-hewn and also contained pottery, figurines, scarabs, and bronze and silver jewelry. Four tombstones were especially significant, being engraved with the name of the deceased; and in one instance, with his occupation (metal worker). A Phoenician inscription on the shoulder of a jar mentions Adonimelekh.

(2) A city of the biblical period in the Shephelah of Judah, between Keilah and Mareshah (Josh. 15:44; Micah 1:14–15) also called Chezib (Gen. 38:5). It is mentioned by Eusebius (Onom. 172:6) as Chasbi near Adullam, a reference which would confirm its proposed identification with Tell al-Bayḏā (today Lavnin) west of Adullam.

[Michael Avi-Yonah]

ACKERMAN, GARY (1942–), U.S. congressman. Ackerman was born in Brooklyn and raised in Queens, New York. His parents, Max and Eva (Barnett) Ackerman, were the children of East European immigrants. Ackerman was educated in the New York public school system and graduated from Queens College. Following his graduation, Ackerman spent four years teaching junior high school. In 1970, when his wife gave birth to the first of their three daughters, Ackerman petitioned the New York Board of Education for an unpaid leave of absence. He was turned down; under the then existing policy, maternity leave was solely for women. In what was to become a forerunner of the Federal Family Leave Act, Ackerman successfully sued the Board of Education in a landmark case, which established the right of either parent to claim such leave.

At the end of his unpaid leave, Ackerman left teaching in order to start a weekly newspaper, the *Flushing Tribune*, eventually renamed the *Queen's Tribune*. Ackerman was elected as a Democrat to the New York State Senate in 1978 and to the United States Congress in a special election held in 1983 to fill the unexpired term of the late Benjamin Rosenthal. During his more than 20 years in Congress, Ackerman has been a forthright supporter of Israel. As a member of the House Committee on International Relations, Ackerman has traveled the globe extensively. He was one of the first members of Congress to draw attention to the rescue of Soviet and Ethiopian Jews. He has long made it a practice to go to synagogue in every country he visits.

A celebrated character on Capitol Hill, who always wears a white carnation in his lapel and lives on a houseboat docked in the Potomac River, Ackerman is perhaps best known for being the co-founder (along with New York Senator Charles Schumer) of an informal group known as “The Congressional Minyan.” Ackerman’s *minyan* is a group of Jewish legislators and staff members who gather several times a month in the Congressman’s office to study Torah and Talmud with a rabbi he flies in from New York City. Once a year, Ackerman also hosts an annual “Taste of New York” gathering on Capitol Hill, which features Jewish food and waiters imported from New York. Widely popular with his largely Jewish constituency, Ackerman has been reelected every two years since 1984 by wide margins.

[Kurt Stone (2nd ed.)]

ACKERMAN, NATHAN WARD (1908–1971), U.S. psychiatrist, born in Russia. Ackerman joined the Menninger Clinic

in Topeka, Kansas, and became the chief psychiatrist of the Child Guidance Clinic in 1937. In 1957 he established the Family Mental Health Clinic in New York City and began teaching at Columbia University. He was a clinical professor of psychiatry at Columbia, chief psychiatrist of the Child Guidance Institute of the Jewish Board of Guardians, and supervising psychiatrist of the Family Mental Health Clinic of the Jewish Family Service, New York.

Ackerman held that the family unit is the crucial link between individual personality and the social and cultural milieu, that psychiatric abnormality in a child is at times an expression of disturbed emotional relations in the entire family, and that cure requires therapy of the conflicts and relations of the family group as such. His astute ability to understand the overall organization of families enabled him to look beyond the behavioral interactions of families and into the hearts and minds of each family member. He used his strong will and provocative style of intervening to uncover the family’s defenses and allow their feelings, hopes, and desires to surface. Committed to sharing his ideas and theoretical approach with other professionals in the field, he published *The Unity of the Family* and *Family Diagnosis: An Approach to the Preschool Child* (1938), both of which inspired the family therapy movement. Together with Don Jackson, he founded the first family therapy journal, *Family Process* (1960), which is still a leading journal of ideas in the field today.

Ackerman opened the Family Institute in New York City in 1960, which was later renamed The Ackerman Institute for Family Therapy. A nonprofit institution, its twofold mission was to develop innovative and effective models of treatment for families in trouble and to train clinicians to implement these models.

On behalf of the American Jewish Committee, Ackerman was coauthor of *Anti-Semitism and Emotional Disorder* (1950). On family therapy he wrote numerous articles in professional journals; the books *The Psychodynamics of Family Life* (1958), *Treating the Troubled Family* (1966), *Expanding Theory and Practice in Family Therapy* (1967), and *Family Process* (1970); and edited several anthologies, such as *Family Therapy in Transition* (1971). He also coauthored with Marie Jahoda *Anti-Semitism and Emotional Disorder, a Psychoanalytic Interpretation* (1950). His selected papers were published in *The Strength of Family Therapy* (1982).

[Ruth Beloff (2nd ed.)]

ACKERMAN, PAULA HERSKOVITZ (1893–1989), first woman to assume spiritual leadership of a U.S. mainstream Jewish congregation. Born in Pensacola, Florida, Ackerman was active in the Reform movement throughout her life. Graduating as high school valedictorian in 1911, she received a scholarship to Sophie Newcomb College, which she declined for personal and family reasons. To supplement her family’s income, she became a private music instructor and high school math and Latin teacher. She also taught at Tem-

ple Beth-El, the Reform congregation to which her family belonged, leading its congregational choir as well. In 1919 she married Dr. William Ackerman, the rabbi of Temple Beth-El; the couple left Pensacola for a better-paying rabbinic position in Natchez, Mississippi, and in 1922 moved on with their 15-month-old son, Billy, to Meridian, Mississippi. During her husband's tenure as rabbi of Temple Beth Israel in Meridian, Ackerman taught preconfirmation classes and led worship services when her husband was ill or out of town. Initially hesitant when the congregation invited her to succeed her husband as rabbi following his death in 1950, she accepted the position when the congregation received informal permission from Maurice *Eisendrath, president of the Union of American Hebrew Congregations. Ackerman viewed this invitation as a divine call to service and an opportunity "to plant a seed for enlarged activity for the Jewish woman." Soon after, Eisendrath withdrew his approval, maintaining that he had become convinced that congregational leaders unqualified to discharge full rabbinical duties would create more problems than they would solve. However, the synagogue's leadership upheld the appointment, declaring that "practically all of the members of our congregation believe she is qualified, and we want her." Paula Ackerman served as Temple Beth Israel's spiritual leader from January 1951 through the fall of 1953; she conducted services, preached, taught, and officiated at weddings, funerals, and conversions. Attracting international attention from the press, she erroneously was labeled "America's first Lady Rabbi." After retirement, she remained active on city, state, and national religious and cultural boards and traveled throughout the U.S., lecturing on religious themes. In 1962, she briefly served as spiritual leader of Temple Beth-El in Pensacola until a new rabbi could be found. In 1986 the Union of American Hebrew Congregations formally recognized her pioneering contribution to Jewish communal life at a special ceremony held at The Temple in Atlanta.

ACKERMAN, SHABTAI (1914–), *hazzan*. Ackerman was born in Kishinev (Bessarabia). He sang in synagogue choirs from his childhood on. He studied cantorial liturgy under David Roitman, David Moshe Steinberg, and Abraham Kalechnik, and led the services at the Kishinev synagogue. Wounded by the Nazis in World War II, he nevertheless succeeded in escaping to Russia. In 1945 he conducted services in the Great Synagogue in Moscow and then returned to Romania, where he was cantor in the Baron Rothschild synagogue and Ahavat Achim in Bucharest. In 1950 he moved to Israel and served in the Beth El synagogue, Tel Aviv, and from

1952 to 1954 he was chief cantor in the Great Synagogue of Tel Aviv. At the same time he was chairman of the Israel Cantors' Association. From 1955 to 1982 he was cantor of the Beth Abraham Hillel Moses synagogue in Detroit. From 1983 he was cantor of Temple Beth Israel in Deerfield Beach, Florida. The Shabtai Ackerman Scholarship Fund was established in his name. In 1985 he became chairman of the Florida Cantors Association. His recordings include *Songs of the Ages – Cantorial Masterpieces*.

[Akiva Zimmerman]

ACKORD, ELIAS (d. 1811), physician, born in Mogilev (White Russia). Ackord, who studied medicine in Berlin, received his medical diploma in 1788 in St. Petersburg. From 1789 he served as an army doctor in Kiev and in Wasilkov, and subsequently practiced as a civilian. Interested in the reform of Jewish conditions in Poland, Ackord translated an anonymous pamphlet, *Die Juden oder die nothwendige Reformation der Juden in der Republik Polen* (1786), from Polish into German, urging the necessity of improving the status of Polish Jewry. Ackord recorded with satisfaction that he, a native of Poland, was able to translate the work into German. He attacked and amended several of the writer's conclusions, stating that they were insulting to the Jews. He denied the author's assertion that Jews opposed secular learning, adding that they had been prevented from receiving a higher education. His arguments reflect the influence of the school of Moses Mendelssohn and the scholars of the Haskalah.

ACOSTA, CHRISTOBAL (1515–1580), Marrano physician and botanist. Acosta's father, probably born a Jew and a victim of the Forced Conversion in Portugal in 1497, emigrated first to one of the Portuguese fortresses in North Africa and then to Mozambique, where Acosta was born. He studied in Portugal, qualified as a physician, and in this capacity accompanied the Portuguese viceroy Luis de Ataïde in 1568 to India, where he spent many years in medical practice. In 1569–71 he was a physician at the Royal Hospital in Cochin. Later he undertook many long and arduous journeys, suffering shipwreck, captivity, and many hardships in Persia, China, Arabia, and North Africa. The trips were for the purpose of studying natural history. On his return he settled down in Burgos (Spain) where he spent the rest of his life. Acosta's main interest in his travels was the study of the medicinal plants of the East Indies. His great work on the subject was *Tractado de las drogas y medicinas de las Indias Orientales con sus Plantas debuscadas al vivo*. This treatise was originally published in Burgos in 1578, and describes 69 plants and other sources of medicines, with illustrations of 46 plants and their roots. Acosta was undoubtedly influenced by Garcia da *Orta, whom he knew in India, but he revealed originality in his reproduction of certain plants from nature. Acosta's *Tractado de las drogas* was translated into Latin, Italian, and French. There is no evidence that Acosta had any Jewish leanings, despite

his ancestry; and indeed he wrote two works which breathe a spirit of Catholic piety: *Tractado en contra y pro de la vida solitaria*, and *Tractado en loor de las mujeres de la caridad* (both Venice, 1592). In the latter work, Acosta describes himself as “Cristobal Acosta Affricano.”

[Isidore Simon]

ACOSTA, ISAAC (Yhsak; d. 1728), French Sephardi rabbi. Probably a native of Amsterdam, Acosta became *hazzan* of the Jewish community of Peyrehorade, near Bayonne, formed by Marrano fugitives from the Iberian Peninsula. His *Historia Sacra Real* (1691), dedicated to the wardens of the community, is one of the earliest manifestations of Judaism in this place. Later (apparently after an interlude in Biarritz) he succeeded R. Ḥayyim de Mercado as *hakham* at Bayonne, where he composed his handbook for the administration of the last rites to the dying, *Via de Salvación* (1709; reprinted by M. Kaplan, Bayonne, 1874), and his major work, *Conjeturas Sagradas* (Leyden, 1722), a commentary in Spanish on the Early Prophets, based on the classical Hebrew commentators and the Midrash.

[Cecil Roth]

ACOSTA, JOAN D' (17th–18th centuries), court jester of Czar Peter I of Russia, descended from a Portuguese Marrano family. After prolonged wanderings in Western Europe, he settled in Hamburg as a broker and from there reached the new Russian capital, St. Petersburg. His quick wit and command of many European languages brought him to court, and in 1714 he was appointed court jester. At the time this was a position of some importance, since it was the jester's function to ridicule the customs of the old Russian society, in order to facilitate transition to a western European mode of life. D'Acosta had a wide knowledge of the Scriptures and the Czar enjoyed conversing with him on theological subjects. D'Acosta reached an old age and also served as jester at the court of the czarina Anna.

[Yehuda Slutsky]

ACQUI, town in Piedmont, Italy. Jews began to settle in Acqui, then in the independent marquisate of Montferrat, dur-

ing the 15th century. The Gonzaga dynasty, which ruled from 1536, was at first kindly disposed toward the Jews, failing to comply with the Papal order to confiscate the Talmud in 1553, and in 1562 protecting them from mob violence. Later its attitude became influenced by Counter-Reformation trends and in 1570 the Jews in Acqui were ordered to wear the Jewish *badge and live apart from Christians. Both the war fought in 1612–31 and the plague of 1630 were disastrous for the Jews of Acqui. The only loan bank then allowed failed in 1614. In 1630 Jewish property was pillaged. Conditions improved under the Gonzaga-Nevers dynasty. However, from 1708, under the rule of the House of Savoy, conditions again deteriorated. In 1731, the 41 Jewish families were restricted to living in a ghetto, although they were permitted to maintain loanbanks. A further source of livelihood was the textile industry, some Jews in Acqui owning silk or cotton mills. The ghetto became heavily overcrowded when the Jews of Monastero had to move there in 1737. By the end of the 18th century, their position had improved markedly, although as late as 1789 Jews were debarred from appearing in public on feast days. When the French Republican armies entered Acqui in 1796, Abraham Azariah (Bonait) Ottolenghi, later the rabbi, zealously took up the revolutionary cause. Disorders followed the French retreat, however, and the Ottolenghi family in particular suffered. Jews were excluded from attending public schools in Acqui for some time after they had been permitted to do so in most of Piedmont. At the beginning of the 19th century the Jewish population numbered about 700. In 1848 the Jews were emancipated and the ghetto abolished. The Jewish population, which numbered only 500 in 1870, decreased to 200 by 1899, and 50 a generation later. By the late 1960s there were no Jews living in Acqui. Rabbis of Acqui include Joshua Ben-Zion *Segré (18th century) and several members of the Ottolenghi family. The old synagogue was demolished, together with the ghetto, in 1881, and a new one constructed in the Via Jona Ottolenghi, which still stands.

[Attilio Milano]

ACQUISITION (Heb. קנין; *kinyan*) the act whereby a person voluntarily obtains legal rights. In Jewish law almost all kinds of rights, whether proprietary (*jus in rem*) or contractual (*jus in personam*; see *Obligations), can be voluntarily acquired only by way of *kinyan*. Acquisition of rights by way of *kinyan* can be divided into three groups:

(1) Acquiring ownership over ownerless property (*hefker*) such as animals, fish in river or ocean, and lost property which the owner has abandoned hope of finding; (2) rights over property which has an owner, acquisition being by way of sale or gift. Acquisition of ownerless property (original acquisition) is called in the Talmud, *ein da'at aheret maknah* (literally “when no other mind conveys title”) and acquisition

from a previous owner (derivative acquisition) is called *da'at aheret maknah* ("another mind conveys title"). In this latter group are also included lesser rights than ownership (*jura in re aliena*) such as a lease or an easement; (3) contractual or personal rights such as debts, or the hiring of workmen, the acquisition of which also depends upon "another mind conveying the right."

In the case of original acquisition the formalities of acquiring title are to demonstrate that the property is in unrestricted possession of the person acquiring it, meaning that he has the ability and intent to use it whenever he wishes to do so, which includes the power to prevent others from interfering with that use. The *halakhah* enumerates, according to objective tests, the acts by which people would usually recognize that the property is in the possession of the acquirer. Consequently, the list of recognized forms of original acquisition is a closed one.

With regard to derivative acquisition, however, the function of *kinyan* is not to demonstrate that it has passed into the possession of the person acquiring it, but that the alienator and the acquirer had determined to conclude the transaction. In fact, the party acquiring title performs the *kinyan*, and the alienator expresses his approval orally. The sole reason for a formal *kinyan* is that a mere oral agreement may not be taken seriously and might enable the parties to withdraw from the proposed transaction. For this reason derivative acquisition can be effected in a greater variety of ways than original acquisition; when the parties derive mutual benefit from the transaction showing that they have wholeheartedly reached an agreement to conclude it, no formal *kinyan* is even required (R. Johanan, BM 94a). For the same reason an acquisition is valid if done in a mode customary among local merchants even though different from the talmudic *kinyanim* (Sh. Ar., ḤM 201:2). Since in the case of derivative acquisition the *kinyan* serves not to show possession but to indicate that the parties made up their minds to conclude the transaction, it can also be used for creation of contractual rights, such as a duty to sell something which is not yet in existence (*davar she-lo ba la-alam*) – even though one cannot effect transfer of a non-existent object (see *Assignment; Sh. Ar., ḤM 60:6). The acquisition of rights requires "intention" on the part of the acquirer. The statement in the Talmud (BM 11a) that "a person's premises acquire for him without his knowledge" (see below) must therefore be taken to refer to the acquisition of such an object as the owner of the premises would have desired to acquire had he known of its presence there, and it must, by the same token, be property which is usually found there (Tos. to BB 54a).

There are general modes of *kinyan* which apply to both original and derivative acquisition, and others which apply only to derivative acquisition by way of sale and gift. Under the first class come:

(1) *Kinyan Hazer*

("Acquisition through one's courtyard"). A person's prem-

ises "acquire" for him such movable property as comes into it. Since, as stated, the property must be within his possession and control, such premises, in order to "acquire" on his behalf, must be fenced in, or "he stands at the side thereof" guarding what is in it (BM 11a), or that others keep away from the premises for any other reason (*ibid.* 102a). Consequently a shopkeeper does not acquire property lost in his shop, if it is in a place to which customers have access, but only if it is in a place to which he alone has access (Maim. Yad, Gezelah, 16:4). Nor does a person acquire anything in premises to which the public has access (Novellae Rashba to BM 25b). Similarly, a man's premises do not acquire fledglings because they can fly away (BM 11a) or chattels which may be blown away (Git. 79a). Similarly, treasure hidden in the ground, even of guarded premises, belongs to the finder (BM 25b) and not to the owner of the ground because the owner is not likely to find it because it is hidden, and therefore he has no control of it. The *hazer* need not necessarily be immovable property; the same rule applied to utensils if their owner had the right to leave them in a certain place where they would not be removed (BB 85a). It follows that a person's animal cannot acquire for him since it is a "moving courtyard" (Git. 21a) and may wander beyond its owner's care. On the other hand, a boat would "acquire" for its owner fish which leap into it (BM 9b) since it is property guarded by its owner. With regard to derivative acquisition, since there is no need to demonstrate that the property is in the possession of its acquirer, even an unguarded *hazer* can acquire according to one opinion (BM 11b).

(2) *Arba Ammot*

("Four cubits"). The area round a person having a radius of four cubits is regarded as having the same properties as a *hazer*, providing that he is in a place where he has control over the article (BM 10b). There seems to be a difference between the Babylonian and the Jerusalem Talmuds with regard to *kinyan* by *arba ammot*. According to the former it acquires even without an express formula on the individual's part, unless he has clearly stated or indicated that he does not wish to acquire and the Talmud refers to it as applying only to original acquisitions. The Jerusalem Talmud, on the other hand, requires an express declaration on his part that his *arba ammot* shall acquire the article for him (Elijah of Vilna to TJ, Pe'ah 4:2) and makes this rule apply also to derivative acquisition. Opinions differ as to the capacity of minors to acquire by *kinyan hazer* or *arba ammot* (BM 11a).

(3) *Hagbahah* ("lifting"), *Meshikhah* ("pulling") and *Mesirah* ("transfer")

Movable objects are acquired by *hagbahah* in the case of articles which can be lifted without difficulty; where they are too heavy, or can be raised only with difficulty, *meshikhah* takes its place (BB 86a). Both serve to demonstrate that the article thereby comes into the acquirer's possession, and is guarded for him as in his *hazer*. The article may be raised merely by the force of his body (Tos. to BK 98a). There is a difference

of opinion as to whether it must be lifted one handsbreadth or three (Tos. to Kid., 26a). *Meshikhah*, applying to an animal, can be effected by striking or calling it so that it comes to one (BB 75a) or by leading or riding it (BM 8b). The prevailing opinion is that *meshikhah* applies only in premises owned by both parties or in a side street (BB 76b), but not in a public place. According to one opinion, however, it is effective in a public thoroughfare as well (TJ, Kid. 1:4, Tos. to BK 79a). The above-mentioned methods of *kinyan* apply both to original and derivative acquisition, but in cases of derivative acquisition the express permission of the alienator to the acquirer to perform *kinyan* is an indispensable element in the *kinyan* (BK 52a; BB 53a). These methods of *kinyan* apply also to personal obligations, such as those of a bailee (Tos. to BK 79a) or an artisan for his work (BM 48a; see *Labor Law). *Mesirah* consists of grasping at the object to be acquired (BB 75b) and the term *mesirah* indicates that it is done at the behest of the transferor (Tos. to *ibid.*) Since it does not demonstrate intention to control the subject matter which is a necessary element of possession, it applies only to derivative acquisition. It is employed where *meshikhah* is ineffective, i.e., in a public place or in an *hazer* not belonging to either party.

(4) *Hazakah*

Whereas all the foregoing modes of acquisition apply to movables only, in the case of immovable property acquisition is by an act of *hazakah* (Kid. 26a) which consists of any act usually done by an owner, such as fencing, opening a gateway or locking the premises (BB 42a), or weeding or hoeing (*ibid.*, 54a), or putting down a mattress to sleep there (*ibid.*, 53b). In general, any improvement of the land is regarded as an act usually done by the owner (Maim. Yad, Mekhirah, 1:8). Such an act as preventing floodwaters from inundating a field, however, would not constitute a *hazakah* as it could be regarded simply as a voluntary neighborly act (BB 53a). There is a difference of opinion as to whether merely traversing the land is acquiring as it constitutes an act usually done by the owner (BB 100a). With regard to a sale or gift, the land acquired by the *hazakah* includes everything stipulated by the parties (Sh. Ar. ḤM 192:12); with regard to ownerless property, it includes only such part as is patently seen to be in his possession (*ibid.* 275:3–9). As with *meshikhah*, in the case of derivative acquisition the alienator must specifically instruct the acquirer to take possession, or otherwise indicate his consent (BK 52a; BB 53a). There are forms of acquisition by *hazakah* which apply either to original or to derivative acquisition, but not to both (Sh. Ar., ḤM 275:12–13). (For the *hazakah* established by three years' possession which is a method of proof and does not come within the category of *kinyan*, see **Hazakah*).

The following methods of *kinyan* apply to derivative acquisitions only because they do not demonstrate possession but rather the intention of the parties to conclude the transaction:

(5) *Kinyan Kesef*

(“Acquisition by money”). The transfer by the purchaser to the seller of the agreed monetary price of the article. R. Johanan is of the view that in strict law this mode of *kinyan* applies both to movables and immovables, and with regard to derivative acquisition the *kinyan* was done by paying money only and not by *hagbahah* and *meshikhah*. But it was enacted that instead of paying money *meshikhah* should be necessary, since if the object remains in the possession of the transferor he may not guard it against being destroyed by fire or other dangers (BM 47a). Similarly, the need for a deed (*shetar*) was added in the case of immovables (Kid. 26a). The Jerusalem Talmud (Kid. 1:5) indicates other modes of *kinyan* with regard to immovables, one based on the removal of a shoe as mentioned in Ruth 4:7, and the other being **kezazah*, without any indication of the period when those modes were practiced. But *kesef*, *shetar*, and *hazakah* alone remained. However, even though, since tannaitic times, neither movables nor immovables were acquired solely by *kinyan kesef*, the sale of immovables was not regarded as completed until the money had passed, though it could be paid to a third party according to the seller's instructions (Kid. 7a). Where only part of the purchase money is paid, the balance being postponed by the transferor in the form of a loan, even if only implicitly and without the loan being expressly stated, the part payment concludes the transaction, unless it is clear from the conduct of the transferor that this part payment did not complete the transaction, even if *kinyan* took place (BM 77b). *Kinyan kesef* is already mentioned in the Bible (Gen. 23; Jer. 32:6–15).

(6) *Kinyan Shetar*

(“Acquisition by deed”). In *kinyan shetar* the deed is not just evidence of the act of acquisition but constitutes the act of acquisition itself (*shetar kinyan*, Sh. Ar., ḤM 191:2). The vendor writes on paper or other material “my field is given (or sold) to you” and the receipt of that deed by the purchaser establishes his title even in the absence of witnesses (*ibid.*, 1). Movables cannot be acquired by *shetar*. *Kinyan shetar* is already mentioned in the Bible (Jer. 32).

(7) *Halifin* (“barter”), *Kinyan Sudar* (“*Kinyan of the Kerchief*”)

The exchange of property is as effective as the payment of money in establishing acquisition, even if the two objects exchanged are not of equal value. Thus, if the alienator draws to him an article owned by the acquirer the transaction is affected. *Halifin* cannot however be effected by current coinage since this would constitute *kinyan kesef*, which depends upon the monetary value (see BM 45b). Out of this there developed the act of acquisition called *kinyan sudar*, which is therefore also called *kinyan halifin* (Kid. 6b; et al.). The kerchief (*sudar*) is merely pulled by the acquirer and can then be returned to the owner (*ibid.*, Ned. 48b). This mode of acquisition being very easy to perform in all kinds of situations, it became so prevalent that it is referred to simply as *kinyan* (cf. Git. 14a;

BM 94a; BB 3a). The origin of *kinyan sudar* may be traced to Ruth 4:7. Throughout the tannaitic period it is never expressly mentioned. It is first mentioned at the beginning of the amoraic period in the dispute as to whether, as in the case of barter proper, the *sudar* must belong to the acquirer, or to the alienator (BM 47a); the former view prevailed. Apparently, because of the simplicity of this mode of acquisition, this *kinyan* is not regarded as completed even after the ceremony, as long as the parties are still talking about the deal (BB 114a).

(8) Aggav Karka

(“The acquisition of movables incidental to land.”) Movables may be acquired as an adjunct to land, the act of *kinyan* being performed only with regard to the land (Kid. 26a). It probably originated in the acquisition of a courtyard with everything contained therein (cf. Tosef., BB 2:13) or similar cases as field, olive press, etc. subsequently being extended to apply to everything belonging to them (cf. BB 78a), even if not actually there at the time of the transaction, and finally to all movables of unlimited amount being sold incidentally to any immovable property, even if they do not have any connection whatever with it (Kid. 26b). Thus the movables did not have to be assembled (*ibid.* 26a–b) except in the case of slaves (BK 12a). The final development was to acquire movables as an adjunct to an unspecified piece of land (Sh. Ar., ḤM 202:7 gloss) and the land could be acquired by sale and the movables as a gift, and conversely. As a facile mode of acquiring movables, not necessitating the presence of the parties on the site, it was in operation for long periods. In the geonic period the “four cubits in Erez Israel” which every Jew theoretically owns, was made the basis of a practice whereby an agent could be appointed to recover a deposit or a debt, *aggav karka*, of these four cubits (Maim. Yad, Sheluḥin, 3:7).

(9) Usage and Custom

Generally speaking, any custom adopted by the local merchants as a mode of acquisition is valid according to Jewish law (Sh. Ar., ḤM 201:2), since it fulfills the principle that the purpose of the *kinyan* is to bring about the decision of the parties to conclude the transaction. Conversely, when a once accepted mode of acquisition fell into desuetude it could no longer be employed (cf. C. Albeck, *Shishah Sidrei Mishnah, Seder Nashim* (1958), 410–12; addenda to Kid. 1:4–5). The Babylonian Talmud mentions the custom of wine-merchants marking the barrels they had purchased (BM 74a), and in post-talmudic times three such customs prevalent among Christians were adopted since they fulfilled the same function as “affixing a mark” (Sh. Ar., ḤM 201:2). They are (a) the handshake (*Teki'at kaf*) mentioned in Proverbs 6:1 as a form of giving surety (*Piskei ha-Rosh*, BM 74a in the name of “R.H.,” probably the tosafist Ḥayyim Cohen and not R. Hananel, who expressed a contrary view; see *Or Zarua*, BM 231). Some authorities even regarded a handshake as the equivalent of an oath (*Mordekhai* to Shevu. 757) but others regarded it as an act of acquisition (for the parallel among Christians see *Palmata, Handschlag*);

(b) the handing over of a coin by the purchaser to the vendor, which was originally a medieval Christian custom (Arrha, earnest money); and (c) handing over a key – the vendor hands to the purchaser the key of the premises where the merchandise is housed. Handing over a key is mentioned in the Babylonian Talmud (BK 52a; Tos. to *ibid.*), but only as the authorization by the alienator for the acquirer to make the *kinyan ḥazakah* and in the Jerusalem Talmud as a mode of derivative acquisition of the building (*Mareh ha-Panim* to Kid. 1:4). As a mode of acquiring movables it was a Christian custom (*Traditio clavium*; see B. Cohen, *Jewish and Roman Law*, 2 (1966), 538–56). Present day rabbinical courts have applied the principle of regarding local custom as valid; thus the transfer of immovable property through registration in the Land Registry is a valid *kinyan* in Jewish Law (PDR, 1:283).

(10) Acquisition with No Formal Act

Where it is clear that the parties concerned decide a transaction to their mutual benefit and satisfaction a formal *kinyan* is not essential (see Ket. 102b; Git. 14a; BM 94a; BB 176b; cf. Maim. Yad, Mekhirah, 5:11). This rule obtains generally with regard to personal obligations but can include rights in *rem* (see BB 106b and *Haggahot ha-Rashash* on Tos. Bek. 18b). This principle was extended in the post-talmudic period (Hai Gaon, in *Hemdah Genuzah*, no. 135; responsa Meir of Rothenburg, ed. Prague, 941; responsa Ribash 476; Sh. Ar., ḤM 176:4). For other modes of acquisition see *Admission, *Assignment, *Confiscation and Expropriation, *Hefker, *Hekdesh, *Succession, *Theft, and Robbery.

In the state of Israel, sale is governed by the Law of Sale, 1968, based on the uniform international draft (Hague, 1964); gift is governed by the Law of Gift, 1968; and the acquisition of immovables by the Land Law, 1969. Ownership, in the case of sale, passes by way of offer and acceptance and, in case of gift, by delivery of the property. Transfer of title to land becomes valid only on registration in the Land Registry. Contractual obligations are created by agreement between the parties in any manner whatever. Legislation vests ownership of all unowned property in the state, which cannot therefore be originally acquired.

[Shalom Albeck]

Legal Acts Which Do Not Require a Kinyan

Further to the above discussion regarding the requirement of a *kinyan* in order to give force to a legal act, it should be noted that as of the 13th century, we find the legal principle that any legal transaction undertaken by the public is valid even in the absence of a formal *kinyan*, “Any thing that is done by the public does not require a *kinyan*, [even] in a situation in which an individual would require a *kinyan*” (Responsa Maharam of Rothenburg, cited in *Mordekhai, Bava Mezia*, #457–458). This new principle was applied to various categories of legal transactions, such as employer-employee relations, guarantees and gifts, and other legal matters to which the public is a party (see Responsa Maharam b. Reb Barukh (Prague), 38;

Responsa Ribash, §476; Sh. Ar., ח"מ 163, 6 (Rema); 204.9; Responsa *Mayim Amukkim*; Responsa *Ra'annah* – Rabbi Eliahu b. Rabbi Hayyim, §63). The established and accepted rule was that “whatever the leaders of the community agree to do has validity without a *kinyan*” (Responsa Rosh, Kelal 6.19, 21). This distinction between the *kinyan* of an individual and the *kinyan* of the public or its representatives also affected the application of other basic requirements normally applying to the *kinyan*. Thus, a public authority has full authority to acquire or transfer something not yet in existence; despite the general rule of Jewish law that “*asmakhta* does not convey title” (see *Asmakhta), the acts of a public authority are valid even where performed by way of *asmakhta* (Responsa *Mayim Amukim*, op cit.; Responsa *Mabit* 3, 228; see *Contract, Law of Obligations”).

The above-cited sources served as a basis for the Supreme Court’s ruling, given by Justice Elon, regarding the heightened requirement of good faith imposed on the public authority in its actions performed within the realm of the law (HC 376/81, *Lugassi v. Minister of Communications*, 36(2) PD 449). Additional sources are cited further on in the decision (pp. 465–471; see *Public Authority and Administrative Law).

An additional category in which there is no need for a *kinyan* in order to give force to a legal act is the area of wills (see *Succession). Generally speaking, a will must be accompanied by a *kinyan* in order to prove the finality of the decision and to give it legal force. However, in the case of a will made on a deathbed (the will of a *shekhiv me-ra*) – that is, one made by a person who is ill and in danger of dying, or a healthy person in a situation causing him to regard himself as facing death – the will is valid even without a *kinyan*, because we assume that, due to the unique circumstances involved in its making, it was performed as a final decision (Maimonides, *Yad*, *Zekhiyah u-matanah* 8.2, 4, 24, 26.)

In an Israeli Supreme Court decision in the *Koenig* case (FH 80/40 *Koenig v. Cohen*, 36(3) PD 701), Justice Menahem Elon held that this halakhic rule should determine the interpretation of Section 23 of the Succession Law, 5725–1964. Section 23 utilizes the Talmudic term “*shekhiv me-ra*” (Lit: moribund) in referring to a person making a will when on the point of death:

A person who is a *shekhiv me-ra* or who under the circumstances reasonably regards himself as facing death may make an oral will before two witnesses who understand his language.

Justice Elon ruled that Section 23’s use of the Talmudic term *shekhiv me-ra* indicates the origin of the law in the Jewish law regarding a deathbed will, and hence the applicability of the Jewish Law regarding the deathbed will (= *zava'at shekhiv me-ra*). The decision in the *Koenig* case dealt with a case in which a woman left a will made on a piece of paper without a date and signature just before she killed herself. The justices disagreed regarding the legal validity of the will, and Justice Elon contended that the will should be seen as a deathbed

will and hence should be considered valid, notwithstanding its deficiencies and flaws (*ibid*, pp. 733–38.)

Alternative Explanation of the Essence of *Kinyan Sudar*

According to another view, *kinyan sudar* is not a derivative of *kinyan halifin* (barter), i.e., the exchange of property, but derives rather from the institution of surety (see *Suretyship). The transaction takes effect when the conveyor of title, or the obligatee, undertakes to bind himself (*meshabed nafsho*) (BM 47a). In other words: he places himself in the “position” of a purchaser, conveyor of title, debtor, worker, etc., in accordance with the legal action for purpose of which *kinyan sudar* is performed.

ACRA, THE (from the Greek *akros*, “high”), fortress established in Jerusalem on a site in close proximity to the Jewish Temple in 167 B.C.E. by Antiochus Epiphanes in order to keep the Jewish population of the city in subjection. It seems to have replaced another Hellenistic citadel (*acropolis*) used as the administrative center for the *eparchos*, who was responsible for maintaining public order and collecting revenues from the inhabitants, but little information about this place is known except that it was the place to which Menelaus fled when the fortifications of the city were breached by Jason (II Macc. 4:27, 5:5). It was also mentioned in the Letter of Aristeas (2nd century B.C.E.) as situated “in a very lofty spot and [it] is fortified with many towers, which have been built up to the very top with immense stones, with the object, as we were informed, of guarding the Temple precincts ...” The exact topographical situation of the subsequent Seleucid Acra is also unclear. It was built in 167 B.C.E. following the destruction of the city by Antiochus IV and was in use until it was dismantled by Simon or Jonathan at the time of the construction of the “First Wall” fortifications of Jerusalem c. 140 B.C.E. During the Maccabean revolt the Acra was regarded as a symbol of wickedness and inequity overshadowing the Temple of the pious. Various attempts were made by Judah Maccabee and the Hasmonean Jonathan to oust the Greeks from their stronghold, with suc-

cess eventually falling to Simon (1 Macc. 13:49–50) on the 23 Iyyar of 142 (Meg. Ta'an., 2) and it was he who subsequently had it leveled. Josephus Flavius in his writings (Ant., 12:252, 13:215; Wars, 1:39, 5:138, 253, 6:392) pointed to the Acra as situated in the Lower City, i.e., in the area of the southeastern hill (the "City of David"), at the same time indicating that it was higher than the adjacent Temple Mount which therefore allowed the Greek garrison to control the activities in the area of the Temple. Scholars regarded the situation of the Acra as suggested by Josephus unsustainable on both topographical and archaeological grounds, since the Lower City area had always been substantially lower than the uppermost part of the Temple Mount area, and also because excavations in the City of David area had not brought to light remains of a separate Hellenistic fortress. Hence, alternative locations for the Seleucid Acra were sought by scholars – on the Ophel, at the southeast corner of the Temple Mount, north of the Temple Mount, and at various places on the Western Hill – none of which could be proven archaeologically. Of these the Ophel seems to be the most likely location since it was situated within the area of the northern extension of the "City of David" in the Lower City and also because it was a topographical prominence which could very well have supported a building or tower that easily might have reached the level of the adjacent Temple Mount, i.e., a height of 60–100 ft. (20–30 m.).

ACRABA, place on the edge of the desert in the eastern Samaria mountains. Acraba is a site with archaeological remains from the Roman and Byzantine periods. The site has not been excavated but surveys conducted there in the 19th century by V. Guérin, C.F. Tyrwhitt-Drake, and C. Clermont-Ganneau revealed the remains of numerous ancient buildings, including a church, Greek inscriptions, cisterns, an open reservoir (*birkeh*), and a number of burial caves. The site was inhabited during the Late Hellenistic period by Idumeans, Samaritans, and Jews. The site was apparently part of a toparchy that was established in the area during the Hellenistic period. First mentioned in 1 Macc. 5:3 and Judith 7:18, the town was later conquered by Hyrcanus and added to the territory of Judea. It was a Jewish village during the First and Second Jewish Revolts and was subsequently transferred to the dominion of the city

of Neapolis [= Shechem]. Acrabbeim was mentioned by Eusebius (*Onom.* 14) as situated on the "boundary of Judea toward the east, belonging to the tribe of Judah. There is a town by this name nine miles (15 km.) from Neapolis to the east heading down toward the Jordan, on the way to Jericho across the toparchy called Acrabattene." The site appears on the Madaba map of the mid-sixth century C.E. with the Greek inscription: "Akrabim, now Akrabittine." Two Monophysite monasteries may have existed at the site according to a sixth century C.E. epistle, one was dedicated to St. Stephen and the other was founded by a certain Abbot Titus. The village still exists today (Aqraba) and is inhabited by Moslems – the mosque is apparently situated above the remains of a church.

ACRE (Heb. אַקְרָא, **Acco**, **Akko**; Ar. أَكْكَ *'Akkā*; Ptolemais; **St. Jean d'Acre**) coastal city in northern Israel situated on a promontory at the northern end of the Bay of Haifa, 14 mi. (23 km.) north of Haifa, in the Acre Coastal Plain.

Ancient Acre

Ancient Acre is first mentioned in the Egyptian Execration Texts (c. 1800 B.C.E.) and it appears after the battle of Megiddo in the list of cities conquered by Thutmose III (c. 1468 B.C.E.). In the El-Amarna letters, the king of Acre, Zurata, and later his son, Zutana, appear as rivals of Megiddo and together with the king of Achshaph, as allies of Jerusalem. Acre is also mentioned in the lists of Seti I and Rameses II. The Greeks later derived the name Acre – a Semitic word – from the Greek *akē* ("healing") and connected it with the legend of Heracles. During the reign of Ptolemy II, the name of the city was changed to Ptolemais, by which it was known until the Arab conquest.

The geographic position of Acre made its occupation vital to every army waging campaign in Syria and Erez Israel. It was allotted to the tribe of Asher which, however, could not subdue it (Judg. 1:31) and it remained an independent Phoenician city. It submitted to the Assyrian king Sennacherib (701 B.C.E.) but revolted against Ashurbanipal who took revenge on the city in about 650 B.C.E.

Under Persian rule Acre served as an important military and naval base in the campaigns against Egypt. Coinage of Tyrian *staters* began there in 350 B.C.E. Alexander's conquest of Syria and the fall of Tyre in 332 B.C.E. enhanced Acre's position as is evidenced by the gold and silver coins struck there. In 312 B.C.E. Ptolemy I razed its fortifications during his retreat from Antigonos but he reoccupied the city 11 years later. An association of loyal "Antiochenes" was founded in Acre when

the city became Seleucid. The city was hostile to the neighboring Jews in Galilee, and Simeon the Hasmonean had to beat off its attacks (164 B.C.E.). His brother Jonathan was treacherously taken prisoner in Acre by the usurper Tryphon in 143 B.C.E. After the overthrow of the latter five years later, the town was held by Antiochus VII Sidetes, who bestowed upon it the titles “holy and inviolable” and was in turn honored by it in inscriptions. After his death Acre became virtually independent, although it acknowledged the nominal suzerainty of various Ptolemaic rulers. It resisted all attacks of Alexander Yannai (Jos., Ant. 13:2), although it lost the Carmel region to him. From Cleopatra Selene, Acre passed to Tigranes, king of Armenia (until 71 B.C.E.) and became Roman with Pompey’s occupation of the country, Caesar landed there in 48–47 B.C.E. and his visit marked a new era for the city. Herod later made it his base for the conquest of his kingdom (39 B.C.E.). At the outbreak of the Jewish War in 66 C.E. the inhabitants massacred 2,000 of the Jewish population. The following year Acre became Vespasian’s base of operations against Galilee. Nero then settled veterans of four legions (3rd, 5th, 10th, 12th) there and made it a Roman colony: Colonia Claudia Ptolemais Germanica. As a harbor, Acre was by now overshadowed by Herod’s new port of *Caesarea. Its rights were augmented by the emperor Heliogabalus and its independent coinage continued until 268 C.E. A Christian community lived in Acre from the time of the apostle Paul (Acts 21:7).

The Roman city of Ptolemais which stretched far beyond the present Old City, extended around Tell al-Fukhar, which was the site of Phoenician Acre up to the Hellenistic period. Excavations were conducted at Tell al-Fukhar by M. Dothan between 1973 and 1979. Early Bronze I remains were found on bedrock and were fairly sparse, with wall remnants, floors, and several pits. It is possible that at the end of this period the sea level rose and the site was temporarily inundated. Substantial fortifications were uncovered dating from the Middle Bronze Age II A–B, including a 60 ft. (18 m.) stretch of rampart of solid clay and earth surmounted by a wall. Remains of a two-story brick citadel were also exposed. These defenses surrounded the mound on all sides, save the south where it was protected by the swamps of the nearby Naaman River. A gate was uncovered to the southwest, with three chambers and three pairs of asymmetrical pilasters. The citadel was destroyed towards the end of the 18th century B.C.E. Large buildings and numerous finds (including bronze *Reshef* figurines) were discovered at the site dating from the Late Bronze I–II indicating that it was a well-planned city, even though it apparently lacked defenses. Although there are some signs of occupation at the site circa 1200 B.C.E., perhaps by some of the “Sea Peoples,” very little was found that could be associated with the subsequent 11th–9th centuries B.C.E. Based on the archaeological finds, the city evidently revived and flourished during the eighth and seventh centuries B.C.E., and evidence of public buildings built of ashlar was unearthed at the site. One of these buildings was destroyed apparently by Sennacherib towards the end of the eighth century B.C.E. A cache of small silver

ingots belongs to this level. The Persian period was one of the most important phases in the development of Acre as an administrative and commercial center, probably from the time of Cambyses onwards. Subsequently, Acre became an important naval center of importance to both Egypt and Persia. Among the finds from this period on the tell were cultic figurines in a pit and two ostraca bearing Phoenician inscriptions, and many Greek artifacts including Attic wares, suggesting that Greek merchants and Phoenicians lived side by side in this specific part of Acre.

Acre had two harbors, one northwest of the present port, with the other south of it. The center of Hellenistic Akke/Ptolemais moved towards the harbors and away from the tell. Numerous buildings and fortifications have been unearthed. Finds include large quantities of stamped amphora handles, indicating that wine was imported from Rhodes, Cos, and Thasos. In later Roman times, the Jewish and Samaritan quarters were also situated near the Old Port. Despite the fact that the town was considered as being strictly outside the halakhic boundaries of the Holy Land (cf. Git. 2a), the Jews re-established their community there after the war against Rome because it was the most convenient port for Galilee (although they buried their dead outside the city and within the halakhic boundaries of Erez Israel at the foot of Mt. Carmel and later in Kefar Yasif up to the 19th century). It served as a port of embarkation for the Patriarchs (and other rabbis) traveling to Rome and as a home port for their commercial fleet. Rabbi *Gamaliel II visited a bath dedicated to Aphrodite in Acre (Av. Zar. 3:4). Its fair was one of the three most famous in Erez Israel (TJ, Av. Zar. 1:4, 39d) and its fisheries gave rise to the saying “to bring fish to Acre” as an equivalent of the modern “bringing coals to Newcastle.” According to both Josephus and Pliny, glass was discovered in its vicinity, in the sands of the Belus River (Na’aman) which were used for glass manufacture throughout antiquity. In Byzantine times Acre was the seat of a bishopric in the archdiocese of Tyre and had a large Samaritan community. In 614 C.E. it was taken, according to one source, by Jews allied with the Persian invaders of the Byzantine Empire; the Persians evacuated it 14 years later and Byzantine rule was restored. Shortly thereafter, however, in 636 C.E., it fell to the Arabs and resumed its original name, which had been preserved by the Jews, as can be seen from Talmudic sources.

[Michael Avi-Yonah / Shimon Gibson (2nd ed.)]

Medieval Period

Letters in the Cairo *Genizah* refer to *kehal Akko* (“the congregation of Acre”) and *rasheha* (“its leaders”). In the second half of the 11th century R. Moses ibn Kashkil, known as a scholar in many fields, arrived in Acre from Mahdiah, N. Africa. In 1104 Acre was captured by Baldwin I, Crusader king of Jerusalem. It was lost by the Crusaders in 1187 and recaptured in 1191 when the city became the Crusader capital. In 1165 *Maimonides had paid a short visit to the town and later corresponded with the local *dayyan*, Japheth b. Elijah. In 1170 *Ben-

Plan of Acre showing Crusader and Ottoman sites.

jamin of Tudela found 200 Jews in Acre and lists the names of the leading scholars, R. Zadok, R. Japheth, and R. Jonah. *Pethahiah of Regensburg (c. 1175) also mentions in a short sentence Jews in the town. During this period Acre served as the port of disembarkation for both pilgrims and immigrants to Palestine. The Jewish community presumably received an impetus with the arrival of 300 rabbis from France and England in 1211. Among those who settled in the town were the scholars *Samuel b. Samson and his son, R. Jacob ha-Katan, Jonathan b. Jacob ha-Kohen of Lunel, and *Samson b. Abraham of Sens. Another event that stimulated both the quantitative and qualitative development of the community was the arrival in 1260 of R. *Jehiel b. Joseph of Paris, his son, and 300 of his pupils. Upon their arrival he founded a yeshivah, known as Midrash ha-Gadol de Paris, where he taught many pupils. There is also information that at about this time the scholars

of Erez Israel and Babylon addressed their questions on religious matters to "the scholars of Acre." The town became a center of study and attracted many scholars. R. Abraham *Abulafia lived there for a while and *Naḥmanides, who first settled in Jerusalem, moved to Acre, where he died in 1270. In the late 13th century, R. Solomon Petit taught in a yeshivah in Acre. In 1291 the town was conquered and destroyed by the Mamluks, led by al-Malik al-Ashraf who massacred Christian and Jewish inhabitants. Only a few managed to escape. After the Ottoman conquest in 1516 Acre again regained its importance as a port, and Jews gradually began to return. However, the settlement in Acre in the mid-16th century was small and impoverished. It may be assumed that Acre Jewry served as a link between the Jews of Galilee and the Mediterranean countries, and traded with Sidon, Aleppo, and Jerusalem. A letter dated 1741 states that there were over 100 Jewish house-

holders. Moses Ḥayyim *Luzzatto died there of the plague in 1747. The revival of Acre as an important administrative and economic center was connected with the activities of the pashas Ṣāḥir al-ʿAmr and Aḥmad al-Jazzār. In 1750 Acre fell into the hands of al-ʿAmr, and in 1775 it became the capital of the *vilayet* of Sidon under Aḥmad al-Jazzār. *Simḥah of Zalozhtsy (1764–65) notes that the Jewish settlement was small and poor. Abbé Giovanni Mariti (1767) records that the Jews had a synagogue but were not allowed to enlarge it. Al-Jazzār fortified the town, using large numbers of forced laborers, and built markets, inns (*khān*), and a water supply. He developed Acre into a political and military center strong enough to deter Napoleon, who in 1799 unsuccessfully besieged Acre. The British fleet under Sir Sidney Smith helped al-Jazzār to defend the city and Napoleon's failure here marked the collapse of his Middle Eastern expeditions. In 1816 the traveler J.S. Buckingham stated that the Jews of Acre constituted a quarter of the population, had two synagogues, and were led by Ḥayyim *Farḥi. Farḥi was highly respected by the authorities; his influence was decisive in Acre, and extended down as far as the Jaffa region. He was killed by Abdallah, the ruler of Acre. The census of 1839, requested by Sir Moses *Montefiore, listed 233 Jews; and the 1849 census, 181 Jews. Most were poor and lived in the eastern and northern parts of the town. In 1856 there were only 120 Jews, and in 1886, 140. In the mid-19th century the Jews of Acre worked as peddlers and artisans, but many were without means of support.

[Natan Efrati]

Modern Acre

Acre stagnated and its shallow harbor was unfit for modern shipping. In the first decade of the 20th century, however, the Turks lifted the prohibition on building outside the Old City walls, and a new city quarter came into being on the north side, laid out with straight, and sometimes broad, roads. Although its population reached its lowest ebb before World War I, the town slowly started growing after its occupation by British forces (September 1918). There was always a Jewish population in Acre, residing alongside the Arab-Muslim, Christian, and Bahai inhabitants.

The Jewish residents, who numbered 350 in 1936, abandoned the town when the Arab riots broke out that year. During the British Mandate the fortress of al-Jazzār served as a prison in which political prisoners were also held (members of the Jerusalem *Haganah, with Vladimir *Jabotinsky, in 1920; members of the Haganah and other underground organizations in 1936–39; a group of Haganah commanders, with Moshe *Carmel and Moshe *Dayan in 1939–41). Jewish underground fighters, among them Shelomo *Ben-Yosef, and Arab rioters were executed there. This fortress was attacked by the *Irgun Zeṽa'i Le'umi in 1947.

During the early months of the War of Independence (1948), Acre served as an Arab base for operations against Jewish settlements further north and for a planned attack on Haifa. On May 13, 1948, however, Acre was stormed by Haganah forces and was included in the State of Israel, together with all of Western Galilee. Those of its Arab inhabitants who remained were, from the end of 1948, joined by Jewish immigrants. Acre's population grew from 12,000 between 1953 and 1955 to 32,800 (including 8,450 non-Jews) in 1967 and 45,800 in 2002 (76% Jews, 22% Muslims, 2% Christians). At the beginning of the 21st century, most of the Arab residents lived in the Old City, while the Jewish population was concentrated to the north and east of it. The quarter east of the Old City (and of the Nahariyyah highway) was built shortly after 1948. The expansion to the north and northeast took place later, while an industrial zone took shape on the dunes south of Acre, with the installations of the industrial company called "Steel City" at its southern extremity on the Haifa Bay beach. Acre itself became an industrial center. The Steel City factories closed down during the 1990s but were replaced by others, including the Tambour paint factory and a pipe plant. The municipal area now extended over 4 sq. mi. (10 sq. km.).

Acre serves most of Western Galilee in trade and administration matters, being the center of the Acre sub-district as it had been during the British Mandate. Included in its municipal area are a government Experimental Agricultural Station (founded under the British Mandate) and the Berit Aḥim (Kefar Philadelphia) youth village. Acre is an important Muslim center, its al-Jazzār Mosque being the largest within Israel's pre-1967 borders. Together with Haifa, it is also the world center of the *Bahai faith. There are churches of several denominations (Roman Catholic, Maronite, Melkite), and a considerable number of synagogues.

Efforts were made to preserve the Oriental character of the Old City and to excavate and repair its remains. The crypt of the citadel (the refectory of the order of St. John) was cleared, and a municipal museum, with Crusader and Arab antiquities, was established in the old Turkish bath. Excavations outside the city wall have uncovered extensive Hellenistic and Roman cemeteries and the remains of a temple with a dedication to Antiochus VII. The ancient remains in the Old City date mainly from the Ottoman period. These include the double wall of the city, the citadel, two caravanserais – the Khān al'Umdān and Khān al Firanji – and the mosque and bath built by al-Jazzār. A few remains of the Crusader period are still visible in the Burj al-Sultan and the sea wall. The Old City of Acre is a major tourist attraction, and in 2002 UNESCO declared it a world cultural preservation site. Since the 1980s a fringe theater festival has been held in the Old City every Sukkot.

°**ACRO, PSEUDO-**, a scholium to Horace which from the 16th century was ascribed to Acro, a second-century commentator. The actual author is unknown. The Jewish interest in the work is contained in a note on *Horace’s *Satires* 1, 9, 70, which states that since Moses was born circumcised, he wanted all the Jews to follow suit so that he would not be unique.

[Jacob Petroff]

ACROSTICS (and Alphabetizing Compositions). A literary style in which successive or alternating verses, or clusters of verses, begin with the letters of the alphabet in sequence.

Bible

Biblical literature has preserved, in complete or truncated form, 14 alphabetizing compositions. Except for one (Nah. 1), they are restricted to the Hagiographa (Ps. 9–10, 25, 34, 37, 111, 112, 119, 145; Prov. 31:10–31; Lam. 1–4). Complete acrostics occur in the conventional order in Psalms 111, 112, 119; Proverbs 31:10–31; and Lamentations 1, as well as, with a curious but unexplained variant transposition of *ayin* and *pe*, in Lamentations 2:16–17, 3:46–51, 4:16–17. While the possibility of textual dislocation cannot be entirely ruled out here, the successive repetition of the irregularity makes it a less likely solution, particularly in view of the identical phenomenon behind the Greek version of Proverbs 31:25–26, and apparently in the original forms of Psalms 34:16–17 (*zāaku*, v. 18 now has a remote subject) and Psalms 10:7–8c (cf. also Hebrew *Ecclus.* 51:23–25). In the case of four psalms the acrostic arrangement is impaired. Psalm 25 omits *vav* and *kof*, duplicates *resh*, and adds an extra *pe* at the end. Psalm 34, too, lacks *vav* and has supernumerary *pe*. The *ayin* is missing in Psalm 37, and the *nun* in Psalms 9–10 (originally a unity) and Nahum 1 are unmistakable torsos of originally alphabetic compositions, but are too mutilated to permit reconstruction in full.

The types of alphabetic structure vary. By far the most frequent is when the initial successive letters head each full verse (Ps. 25, 34, 115; Prov. 31:10–31; Lam. 1, 2, 4). Sometimes they begin alternate verses (Ps. 9–10 [?], 37) and sometimes each half verse (Ps. 111; 112; Nah. 1 [?]). The most sophisticated and elaborate arrangement appears in Psalm 119 and Lamentations 3 in which each stanza comprises eight verses in the former and three verses in the latter, all commencing with the same letter. The impact of the acrostic principle is also present in Lamentations 5 with its 22 verses, even though no abecdiary is used. Whatever the age of the individual alphabetic compositions, it is clear that the phenomenon cannot be used as a criterion for the dating of biblical texts. The word and

sentence acrostic is found in at least five works in Akkadian literature. Although the only two dated examples come from the seventh and sixth centuries B.C.E., there is no reason to doubt that the principle was not in vogue in Mesopotamia much earlier. Moreover, since the traditional order of the alphabetic signs is now known to have been fixed no later than the 14th century B.C.E., there is every likelihood of its early employment in Israel in literary compositions.

It is not possible to decide what considerations influenced the choice of this particular device. Sometimes it seems to provide a connecting link between variations upon a single theme. At other times it apparently serves to impose an external order and system upon material that lacks inner coherence or logical development. Frequently, it must have been used as a mnemonic aid in a pedagogic or didactic context as well as in a cultic-liturgical situation. For instance, it would be particularly suited to the rote recitation of moralistic instruction, divine attributes, and hymns of praise and thanksgiving. A magical or mystical purpose can be ruled out in the biblical period, but purely aesthetic considerations might occasionally have been at work. Finally, it is not at all improbable that the arrangement of literary material in alphabetic sequence from beginning to end would signify the striving for comprehensiveness in the expression of an emotion or idea.

[Nahum M. Sarna]

Post-Biblical

In later usage the letters, syllables, or words are arranged in such a way that their combinations have meaning independent of their meaning in the general context (and not necessarily alphabetically). There are three main types of acrostics: *Akrostikhon* – in the narrowest meaning of the word, when the letters (or syllables or words) that are to be joined are consistently found at the beginning of each line, verse, sentence, or paragraph; *Telestikhon* – when they are at the end; *Mezostikhon* – when they are in the middle. With regard to content there are two types of acrostic. One is alphabetic when the first letters (or last in *telestikhon*, etc.) of each line (or verse, etc.) combine to produce the alphabet or the alphabet in reverse (in Hebrew called *tashrak* תשרק) or regular and reverse in turn (*atbash*, אתבש; *atbah* אטבא; *tashab* תאשב) and the like. There are also variations, e.g., entire works in which every word begins with the same letter. The other is an acrostic of words, in which the combinations produce a word or complete sentence.

Originally, the acrostic fulfilled several important functions. It simplified learning by heart and prevented mistakes, deletions, and additions. Furthermore, it preserved the name of the author, which often appeared as an acrostic. One Midrash (PR 46) attributes an acrostic to Moses: “And Moses came and they began (Psalm 92) with the letters of his name מִזְמוֹר שִׁיר [לְיוֹם] הַשַּׁבָּת.” According to another Midrash (Song R. 1:7), Solomon composed an alphabetic acrostic. On the other hand, the view (appearing in the *Pesikta Rabbati*) that

the Bible also contains acrostics of words is doubtful. Following the model of the Bible are the acrostics in The Wisdom of Ben Sira (li, 36–54; although somewhat corrupted).

It is not known whether there was a special Hebrew name for the acrostic. In a later period it was called a *siman* (“sign”), and then a *ḥatimah* (“signature”). Alphabetic acrostics had names which were derived from the Greek ἀλφαβητάριον (e.g., Eccles. R. 7:7, 18; in the parallel in Ruth R. 6:6 mistakenly *Alfanterin* (אַלפֿאַנטֶרין)), and especially: Alfa Beta, Alfabet, etc.). Under Arabic influence alphabetic acrostics began to be called *fibetim* (singular: *fibeta*), dropping the first syllable which was thought to be the (Arabic) definite article (al-). These foreign names may indicate that the acrostics in prayers and *piyyutim* were not a direct continuation of biblical acrostics but were influenced by those which had become part of Roman, Byzantine, Syrian, and Arabic literature (though in certain aspects it was the Hebrew *piyyut* that influenced the Syrian and Byzantine and not the reverse). In any event the acrostic in its different forms is often found in the prayers and *piyyutim*. An alphabetic prayer is found in the tractate *Soferim* (19:9). Other examples are the prayers: “אַל בְּרִיךְ גְּדוֹל הָעֵדָה” (Alphabet), and “תְּכַנֵּן [תְּקַנֵּן] שְׁבֵת רְצִיָּתָ קֶרְבְּנוֹתֵיהֶם...” (*Tashrak*) and others. The *paytanim*, beginning with Yose b. Yose, Yannai, Kallir, R. Saadiah Gaon, and others, employed acrostics, which became increasingly longer and more complicated. The letters of the alphabet were repeated in differing and unusual combinations. The names of the *paytanim*, their fathers, place of residence, pseudonyms, often combined with blessings, verses from the Bible, etc., were woven into the *piyyut* in acrostic form. The poets of Spain, Solomon ibn Gabirol, Judah Halevi, Abraham Ibn Ezra, and others, followed the *paytanim* in this, especially in their liturgical poetry. The acrostic found its way into prose writing, especially rhymed prose, letters, introductions to various works, etc. An example is the beginning of the famous letter of Ḥisdai ibn Shaprut to the king of the Khazars which was written at his behest by Menahem b. Saruk. The introduction of R. Shabbetai Donnolo to his *Sefer Hakhmoni* includes the acrostic “הָזֶק הוּא דוֹנוֹלוֹ” שְׁבֵתֵי בְּרֵי אֲבֵרָהֶם, הָזֶק הוּא דוֹנוֹלוֹ” [i.e., Oria]. In the Middle Ages, and even later, entire works were composed in which every word began with the same letter. The most famous of these is “*Elef Alfin*” (“A thousand *alefs*”), attributed to Abraham Bedersi. A common form of acrostic is when the initial letters of the first few words of a work spell the name of God. Kabbalistic literature considered acrostics, like all combinations of letters and syllables, to be important. The use of acrostics, already criticized by R. Isaac Arama in the 15th century, has continued to the present but only as a diversion.

ACSÁDY, IGNÁC (1845–1906), Hungarian historian and writer. Born in Nagy-Károly, Acsády took his doctorate of philosophy in Budapest. He wrote many novels and plays and was a regular contributor to the Hungarian press. His main importance lies, however, in the field of historiography. Acsády's work as an historian is marked by his anti-feudal and progressive views. In his novel *Fridényi bankja* (“Fridenyi's Bank,” 1882; new edition: 1968) he criticized the dominant role of money in the contemporary world. His liberal outlook is also stressed in his *A magyar birodalom története* (“History of the Hungarian Empire”), and especially in his most important work *A magyar jobbágyország története* (“History of Hungarian Serfhood”), which was translated into Slovakian and Russian. Acsády's main interests were economic conditions in the 16th and 17th centuries and the fate of the common people. He advised the Jews to unite with the peasants against the antisemitism of the lower and middle classes, and he fought constantly for equal rights for the Jews of Hungary. In 1883 he published *Jewish and Non-Jewish Hungarians after the Emancipation*, and in 1894 he helped to found the Hungarian Jewish Literary Society. After World War II a street in Budapest was named after him and a plaque dedicated in his memory.

[Alexander Scheiber]

ACTION FRANÇAISE, French royalist and antisemitic movement formed after the *Dreyfus affair, mainly active between 1896 and 1939. The doctrine of its principal theorist Charles *Maurras, termed “integral nationalism,” was the radical expression of the conception of organic national unity. Prominent among its leaders were the writer Léon *Daudet, and the historian Jacques Bainville. The party organ, also named *L'Action française*, was established as a daily in 1908. The Action Française took pride in having reactivated antisemitism in France, alleging that the Jews were one of the principal agents of national disintegration and economic and moral corruption. They were part of an evil plot hatched by a would-be “confederation of the Four Estates,” which, beside the Jews, included Protestants, Freemasons, and foreigners in general. These were allegedly using the slogans of liberty and revolution to mask mercenary interests and the political fragmentation of national life by the parties. The Action Française waged scurrilous campaigns against economic enterprises. It

hence attacked *métèques* (“foreigners”) according to Maurras’ formula “not to divide, but to define.” The Semite in particular was singled out as basically barbarian; to combat him was a proof of incorruptibility and concern with national interests. Even so, the Action Française rejected the idea of racist antisemitism as absurd.

The importance of the Action Française lies in the respectability of some of its leaders and the influence they exercised on certain circles of French officers between the two world wars. The antisemitic legislation enacted by the Vichy government after the fall of France in World War II was directly inspired by ideas of the Action Française and its program of excluding the Jew from French society and politics. The last issue of *L’Action française* appeared in Lyons in August 1944. Its spirit has been kept alive by Fascist-inclined and racist publications, such as the weeklies *Aspect de la France*, *Rivarol*, and *La Nation française*.

BIBLIOGRAPHY: S.M. Osgood, *French Royalism under the Third and Fourth Republics* (1960), includes bibliography; E.R. Tanenbaum, *Action Française: Die-Hard Reactionaries in Twentieth-Century France* (1962); E.J. Weber, *Action Française: Royalism and Reaction in Twentieth-Century France* (1962), with bibliography.

ACZÉL, TAMÁS (1921–1994), Hungarian author and journalist. Aczél wrote the prizewinning novel *A szabadság árnyékában* (“In the Shadow of Freedom,” 1948). A member of the circle of Imre Nagy, he fled to Paris after the suppression of the 1956 revolution and edited the radical emigrant periodical *Irodalmi Ujság*.

ADA, townlet in Vojvodina, Serbia, until 1920 in (Austro-) Hungary. Jews came there from German-speaking areas; they also spoke Yiddish and later Hungarian. They were allowed to settle in the late 17th century in order to repopulate the southern provinces devastated during the Turkish wars, but were forbidden to use Hebrew or Yiddish in official documents, testaments, and *pinkasim*. The first rabbis were Aaron Acker (d. 1837) and Jacob Heilprin. During the 1848–49 troubles, when Serbia sent volunteers to help the Slav populations in Hungary, a Serbian troop occupied Ada and took 60 Jews – including Rabbi Heilprin – to Senta where they were all murdered. Ada remained one of the dozen or so Orthodox communities along the Thissa River following the split between the Neologist majority and Orthodox minority in 1868/69. They maintained *talmud torah* schools and formed an Association of Orthodox Communities that worked in close cooperation with the Neologist Federation of Jewish Communities in Belgrade. The synagogue was built in 1896. In 1925 there were 452 Jews in Ada, but many left for bigger towns. During World War II Ada was occupied by Hungary and a concentration camp was established there. Of its 350 Jews in 1940, only 59 remained after the war, when the community was temporarily reestablished. Most subsequently left for Israel.

[Zvi Loker (2nd ed.)]

ADADI, ABRAHAM ḤAYYIM BEN MASOUD ḤAI (1801–1874), halakhic authority and kabbalist. Born in Tripoli and orphaned at an early age, Abraham was raised by his grandfather, Nathan Adadi, an outstanding scholar. In 1818 the family emigrated to Safed, where Adadi studied and was occasionally required to travel abroad as an emissary of the community. While in Leghorn in 1837 he heard of the great earthquake in Safed, and therefore changed his plans and returned to Tripoli, where he served as rabbi and *dayyan* and maintained a *bet midrash*. Some time after 1865, Adadi returned to Safed, remaining there for the rest of his life. Adadi paid particular attention to the local *minhagim* (“customs”), especially of Tripoli and Safed, and also of places he visited. His books incorporate much historical information, particularly about Tripoli. In this he was doubtless influenced by Abraham *Ḥalfon, his greatest Tripolitanian contemporary. Adadi’s works include: *Ha-Shomer Emet* (Leghorn, 1849), primarily *halakhot* and customs concerning Torah scrolls; *Va-Yikra Avraham* (Leghorn, 1865), responsa, etc.; *Zeh ha-Kelal* on talmudic methodology; and *Makom she-Nahagu*, customs omitted from *Ha-Shomer Emet*. The rest of his works, including talmudic novellae and sermons, are still in manuscript (Ben-Zvi Institute, Jerusalem). An original poem in praise of Safed appears at the beginning of his *Ha-Shomer Emet*.

ADAH (Heb. אָדָה; “ornament” or [according to the Arabic] “morning”; cf. Heb. personal names: Adaiyah, Adiel), name of wife of *Lamech and wife of *Esau. Adah was one of the two wives of Lamech (Gen. 4:19–20). To her and to his other wife Zillah, Lamech recited his song (Gen. 4:23ff.). Her children, *Jabal and *Jubal, were the first to practice, respectively, pastoral pursuits and music, thus inaugurating a new stage of human progress. Her importance for the genealogy in Genesis 4 is derived from this fact, because Lamech’s wives are the only women mentioned there. In the account in Genesis 5:28ff. there is no mention of Adah, Zillah, and their children. Noah, the firstborn of Lamech, appears instead, together with other sons and daughters, whose names are not mentioned.

Adah was the wife of Esau (Gen. 36:2) and the daughter of Elon (but cf. Gen. 26:34, where the daughter of Elon, who married Esau, is Basemath). Esau, who is also called *Edom (*ibid.* 36:1), and was probably the patriarch of Edom, married Adah, a Hittite, who was a native of Canaan. This account provides information on a Hittite element in Edom, a fact unknown from other sources, except in connection with other wives of Esau (Judith and Basemath, Gen. 26:34; cf. 28:9). Nonetheless, this information is difficult to fit in. On the other hand, Adah’s Canaanite origin is probable, due to the wide range of nationalities included in the term Canaan. Adah was the mother of Eliphaz and his children, who were

**allufim* and counted as her descendants (Gen. 36:11–12, 15–16) rather than those of Lamech.

ADALBERG, SAMUEL (1868–1939), Polish literary historian and folklorist. Born in Warsaw, Adalberg studied in a number of European capitals. His main work, a compendium of Polish proverbs, sayings, and proverbial phrases, *Księg przysłów, przypowieści i wyrażen przysłowiowych polskich* (1889–94), remains the most extensive collection ever made in this field. Its 40,000 entries include both folk proverbs and quotations from major Polish writers of the 16th to 18th centuries that have become proverbs. For this work Adalberg was rewarded with membership of the philological section of the Cracow Academy of Science. He also translated and annotated 580 Yiddish proverbs drawn from the collection of Ignatz *Bernstein. This was published in the Polish ethnographical journal *Wisła* (vol. 4, 1890) and was also issued as a separate booklet. From 1918 Adalberg was an adviser on Jewish matters to the Polish Ministry of Education and Religious Affairs, and was thus able to do much for Jewish communal and educational institutions. He committed suicide when the Nazis occupied Warsaw.

[Dov Noy]

ADAM (אָדָם), the first man and progenitor of the human race. The Documentary Hypothesis distinguishes two conflicting stories about the making of man in Scripture (for a contrary view, see U. Cassuto, *From Adam to Noah*, pp. 71ff.). In the first account of Creation in the Bible (attributed by critics to the Priestly narration; Gen. 1) Adam was created in God's image (verse 27), as the climax of a series of Divine creative acts, and was given dominion over the rest of creation (verses 28–30). In the second story (attributed by critics to the J or Yahwist strand; Gen. 2–3), after the completion of heaven and earth, God fashioned "the man" (*ha-adam*) from dust of the ground (*ha-adamah*), breathed life into his nostrils, and placed him in the Garden of Eden to be caretaker. Permission was given to eat freely from any tree of the Garden except, under penalty of death, from the Tree of Knowledge of Good and Bad. In order that the man might not be alone but would have appropriate aid, God formed the various animals and had the man determine what they should be called. The man gave names to all the animals, but found among them no suitable help. God then put the man to sleep, extracted one of his ribs, and fashioned it into a woman, and presented her to the man who found her eminently satisfactory and congenial. The naked pair had no feeling of shame until the serpent seduced the woman to eat the fruit of the forbidden tree. The woman shared the fruit with her husband with the result that they became aware of their nakedness and hid from God. As punishment for this

transgression, the serpent was condemned to crawl on its belly and eat dust. The woman was sentenced to the pangs of childbirth, a craving for her man, and subjection to him. The man, for his part, for listening to his wife and for violating the prohibition, was destined to toil and sweat in order to wrest a bare living from an accursed and hostile soil until his return to the dust whence he came. Perpetual enmity was established between snake and man. God then made skin tunics (better: "tunics for the skin") and clothed the man and woman. The man had now become like one of the divine beings "knowing good and bad" (Gen. 3:22, i.e., everything; cf. Gen. 31:24; Lev. 5:4; 11 Sam. 13:22; Isa. 41:23). To keep the man from taking and eating of the Tree of Life and thereby acquiring the other quality that distinguished the divine beings, immortality, God expelled him from the Garden of Eden and barred access to the Tree of Life by means of the *cherubim and the flaming sword. Next one reads that "the man" had experience of his wife *Eve, who bore him *Cain and later *Abel (Gen. 4:1–2), and further on that "Adam," at the age of 130 years, sired *Seth by his wife (4:25; 5:3), after which he lived on for another eight centuries without report of further events, except that he "begot sons and daughters" and died at the age of 930 (5:4–5).

The presence of the article before the word *adam* in Genesis 2:7–4:1 militates against construing it as a proper name. However, in 4:25, and also in 5:1–5, the article is dropped and the word becomes Adam. The masorah takes advantage of the ambiguity of the consonantal spelling (*l'dm*) which can mean "to/for the man" or "to/for Adam," depending on the vocalization, to introduce the proper name Adam into Genesis 2:20 and 3:17, 21, contrary to the import of the passage. Similarly, the Septuagint and Vulgate begin at Genesis 2:19 to translate *ha-adam* as the proper name Adam.

The only further mention of Adam in the Bible occurs in the genealogical table of 1 Chronicles 1:1. It is moot whether *adam* in *ke-adam* of Hosea 6:7 and Job 31:33, and *benei adam* of Deuteronomy 32:8, is to be taken as the proper name. In the apocryphal books, however, there are several probable allusions to Adam and the creation story (Ecclus. 17:1; 49:16; Tob. 8:6; Wisd. Sol. 2:23; 9:2; 10:1).

The etymology of the word *adam* is ambiguous. The feminine form *adamah* designates the ground or soil, and the play on the two forms *adam* and *adamah* in Genesis 2:7 suggests for *adam* the meaning "earthling." The root אָדָם (*dm*) is also connected with the color "red," which might apply to the color of the soil from which man was formed. The word *adamu* is used in Akkadian for "blood," *adamatu* for "black blood" in pathological conditions, and the plural *adamātu* for "dark, red earth [used as dye]." The word *admu/atmu* ("child") probably has no relation to *adam* but is rather to be connected with a root *wtm* and related to Hebrew *yatom* ("orphan"). In Old South Arabic *dm* has the meaning "serf." The occurrence of *dm* as the apparent theophorous element in few personal names such as *'bd dm* ("servant of *dm*"; MT, Obed-Edom, 11 Sam. 6:10 ff.), suggests a deity *dm*, but there is little additional direct evi-

dence for this. In an Akkadian synonym list the word *adamu* is equivalent to an “important, noble person.” The personal names *A-da-mu*, *A-dam-u* also appear in Old Akkadian and Old Babylonian (*Chicago Assyrian Dictionary*, 1, part 1 (1964), 95, s.v. *adamu* B; cf. also W. von Soden, *Akkadisches Handwörterbuch*, 1 (1965), 10).

[Marvin H. Pope]

In the *Aggadah*

Adam was formed from a mixture of water and earth, as is implied in Genesis 2:7. According to Greek mythology too, Prometheus formed men from water and earth (Apollodorus, 1:7, 1); and Hesiod (*Opera et Dies*, 61) relates that Hephaestus kneaded earth and water and made woman. The ancient Egyptians also believed that “man was formed from miry and swampy land” (Diodorus 1:43, 2).

There is no reference in the existing texts of the Septuagint to the statement of the *aggadah* (Mekh. 60:14) that the translators of the Bible changed Genesis 1:26 from the plural “Let us make man in our image, after *our* likeness,” to “I will make man in my likeness and image” in order to remove any suggestion of anthropomorphic polytheism. The aggadists were actually more concerned with possible polytheistic interpretations than with the suggestion of anthropomorphism, the belief in anthropomorphism being widespread in both Hellenistic and philosophical works (e.g., among the Epicureans). In any event, many of the aggadists attempted to remove these anthropomorphisms. Some of them explain, “in His image” as meaning “with the dignity of his Maker” (see Tanh. Pekudei 2; Gen. R. 11:2).

In the creation of the universe, whatever was created later had dominion over what preceded it, and Adam and Eve were “created after everything in order to have dominion over everything” (Gen. R. 19:4). They were “created last in order that they should rule over all creation... and that all creatures should fear them and be under their control” (Num. R. 12:4). The subjection of the creatures is also greatly stressed in Adam 37–39; *Apocalypsis Mosis*, 10–12. Another reason for man’s being created last was “that he should immediately enter the banqueting hall (everything having already been prepared for him). The matter may be likened to an emperor’s building a palace, consecrating it, preparing the feast, and only then inviting the guests” (Tosef. Sanh. 8:9). On the other hand, Adam was created last, so that “should he become conceited, he could be told, ‘The gnat was created before you’” (*ibid.* 8:8). Adam alone, of all living things, was created “to stand upright like the ministering angels” (Gen. R. 8:11; cf. Ḥag. 16a). Both Adam and Eve were created “fully developed... Adam and Eve were created as adults 20 years of age” (Gen. R. 14:7). In fact, everything created, “the sun and the moon, the stars and the planets, all were created fully developed, all the works of creation being brought into existence in their completed state” (Num. R. 12:8). The same opinion was held by Philo and by a number of Greek and Roman scholars (Dion Chrysostomus, 36:59).

Thales, “father of philosophers,” used to say, “Every thing that exists is very beautiful, being the work of God” (Diogenes Laertius, 1:35). In the same vein, Philo maintained (Op., 47:136–41) that Adam was a perfect creature. The aggadists exalt the beauty of Adam, saying, “The ball of Adam’s heel outshone the glory of the sun: how much more so the brightness of his face” for “Adam was created for the service of the Holy One, and the orb of the sun for the service of mankind” (PdRK 101).

The rabbis interpret Genesis 1:27 to mean that Adam was created as a hermaphrodite (Er. 18a; Gen. R. 8:1; cf. also Jub. 2:14; 3:8). He was created on New Year’s Day, the first of Tishri, and all that is related of him occurred on that very day. In the first hour his dust was assembled; in the second he was rough-hewn; in the third his limbs were articulated; in the fourth the soul was breathed into him; in the fifth he stood erect; in the sixth he gave names to all creatures; in the seventh Eve was brought to him; in the eighth they begot Cain and Abel; in the ninth they were forbidden to eat of the tree of the knowledge of good and evil; in the tenth they sinned; in the eleventh sentence was passed; and in the twelfth they were driven out of Eden (Sanh. 38b; cf. also Lev. R. 29:1).

When Adam was to be created, the angels were consulted. Some favored his creation for the love and mercy he would show; others were opposed to it because of the falsehood and strife he would stir up. In the end, the Holy One decided to create man (Gen. R. 8:5; Mid. Ps. to 1:22). The angels were filled with such awe at his creation that they wished to worship him, whereupon Adam pointed upward (PdRE 10; Tanh. Pekudei 3), or, according to another version, God caused a deep sleep to fall upon him and the angels realized his limitations (Gen. R. 8:10). All the angels were ordered to bow down to him and they did so, all except *Satan, who was hurled into the abyss and conceived a lasting hatred for Adam (PdRE 13). This myth of Satan’s fall is to be found in the Apocryphal books, e.g., Adam 12–17.

It is characteristic of the book of Genesis that it gives the history of its principals up to a certain stage in their lives and then leaves them, taking up the story of their successors. Likewise, in the case of Adam, the Bible gives his story up to his expulsion from the Garden of Eden, and then deals with the succeeding generations, though Adam lived on for many years. No account is given of how Adam familiarized himself with the strange new world, which lacked those ideal conditions to which he had been accustomed. The *aggadah*, to some extent, attempts to fill the gap. It relates that “when the sun set (after he was driven out) darkness began to fall. Adam was terrified... thinking, ‘The serpent will come to bite me.’ The Holy One made available for him two flints (or, two stones) which he struck, one against the other, producing light” (Pes. 54a; Gen. R. 11:2). This subject is also dealt with by *Adam and Eve* 2:1, which relates that “the Lord God sent diverse seeds by Michael the archangel and gave them to Adam and showed him how to work and till the ground that they might have fruit, by which they and their generations might live.” This is greatly

developed in the Christian Adam books, the *Cave of Treasures* and the *Conflict of Adam and Eve*. This *aggadah* also hints at the answer to another question, how human civilization developed. This theme, especially the origin of light, the catalyst of all human development, greatly occupied Greek scholars. According to other *aggadot*, darkness itself and the seasonal change to winter terrified Adam until he became familiar with the order of the universe – sunset and sunrise, long days and short days (Av. Zar. 8a).

When Adam sinned, he lost his splendor. As a result of his sin, all things lost their perfection “though they had been created in their fullness,” (Gen. R. 11:2; 12:6). Like Philo, the *aggadists* held that the beauty of the generations was slowly diminishing. All other people “compared to Sarah, are like apes compared to a man; Sarah compared with Eve, is like an ape compared to man, as was Eve compared to Adam” (BB 58a).

Satan selected the serpent as his tool because of its being the most subtle of beasts and the nearest to man in form, having been endowed with hands and feet (Gen. R. 19:1; 20:5). With regard to the identification of the tree of good and evil, the vine, the wheat, the citron, and the fig are suggested. According to this last view, it was because the fig tree had served as the source of Adam’s sin that it subsequently provided him with the leaves to cover his nakedness, the consciousness of which was the direct result of that sin (Ber. 40a; Gen. R. 15:7; compare the Syriac *Apocalypse of Adam* (ed., Renan; 1853), 32). Adam was sent forth from the Garden of Eden in this world; whether he was also sent forth from the Eden of the next world is disputed (Gen. R. 21:7). With Adam’s sin, the divine presence withdrew from this world, returning only with the building of the Tabernacle (פָּדַרְק 1). Adam learnt of the power of repentance from Cain. When Cain said to him, “I repented and have been forgiven,” Adam beat his face and cried out, “So great is the power of repentance and I knew it not.” Whereupon he sang the 90th Psalm, the Midrash interpreting its second verse as, “It is good to make confession to the Lord” (Gen. R. 22:13). In the *Life of Adam and Eve*, however, Adam and Eve’s repentance after the expulsion from the garden is described at length (Adam 1–11). Adam was given the Noachian Laws (Sanh. 56b) and was enjoined to observe the Sabbath (Mid. Ps. to 92:6). He would have been given the whole Torah if he had not sinned (Gen. R. 24:5; 21:7). He was the first to pray for rain (Hul. 60b) and to offer sacrifice (Av. Zar. 8a). During the time he was separated from his wife, before he begot Seth, he gave birth to demons (Er. 18b; Gen. R. 20:11). The Zohar (7:34; 3:19) states that *Lilith, a demon, was the wife of Adam before the creation of Eve.

[Elimelech Epstein Halevy]

Medieval Jewish Philosophy

In Hellenistic and medieval Jewish philosophy Adam is often regarded as a prototype of mankind, and Genesis 2:8–3:24, interpreted as an allegory on the human condition. In spite of their predominant interest in the allegorical interpretation of the creation of Adam and his stay in the Garden of Eden,

most Jewish philosophers appear to accept the historicity of the biblical account. For them the biblical story of Adam has both a literal and allegorical meaning.

Philo, following a Platonic model, sees in the twofold account of the creation of Adam a description of the creation of two distinct men, the heavenly man, created in the image of God (Gen. 1:27), and the earthly man, formed out of the dust of the earth (Gen. 2:7). The heavenly man is incorporeal. The earthly man is a composite of corporeal and incorporeal elements, of body and mind (Philo, 1 L.A. 12). Philo maintains that it is the mind of man and not his body which is in the image of God (Philo, Op. 23). The earthly Adam excelled all subsequent men both in intellectual ability and physical appearance, and attained the “very limit of human happiness” (Philo, Op. 3). But Adam did not remain forever at this level. Through eating from the forbidden tree of the knowledge of good and evil he brought upon himself a “life of mortality and wretchedness in lieu of that of immortality and bliss” (Philo, Op. 53). Philo interprets the eating from the forbidden tree allegorically as the indulgence in physical pleasures. Because Adam succumbed to his physical passions, his understanding descended from the higher level of knowledge to the lower level of opinion. While Philo at times does accept the literal interpretation of certain elements in the story, he generally rejects the literal meaning entirely and interprets all the elements of the story allegorically. Adam becomes the symbolic representation of mind; Eve, the representation of sense-perception; the serpent, the representation of passion; and the tree of knowledge, the representation of prudence or opinion. Though Philo did not exert any direct influence upon the medieval Jewish philosophers, there are many similarities between his conception of *Adam ha-Rishon* and that of medieval Jewish philosophy. The similarities in the descriptions of the perfections of the first man may have their origin in the midrashic descriptions of Adam, while the similarities in the interpretation of his sin probably result from the philosophic concerns common to Philo and the medievals.

*Judah Halevi maintains that Adam was perfect in body and mind. In addition to the loftiest intellect ever possessed by a human being, Adam was endowed with the “divine power” (*ha-ko’ah ha-Elohi*), that special faculty which, according to Halevi, enables man to achieve communion with God. This “divine power,” passed down through various descendants of Adam to the people of Israel, is that which distinguishes the people of Israel from all other peoples (*Kuzari*, 1:95).

*Maimonides explains that when the Bible records that Adam was created “in the image of God” it refers to the creation of the human intellect, man’s defining characteristic, which resembles the divine intellect, rather than to the creation of the body. Unlike Halevi, Maimonides believes that communion with God can be achieved through the development of the intellect, and that no special faculty is necessary. Thus, Maimonides emphasizes the intellectual perfection of Adam. Before the sin Adam’s intellect was developed to its full capacity, and he devoted himself entirely to the contem-

plation of the truths of physics and metaphysics. Adam's sin consisted in his turning away from contemplation to indulge in physical pleasures to which he was drawn by his imagination and desires. As a result of his sin, Adam became occupied with controlling his appetites, and consequently his capacity for contemplation was impaired. His practical reason which before the sin had lain dormant was now activated, and he began to acquire practical rather than theoretical knowledge, a knowledge of values rather than of facts, of good and evil rather than of truth and falsehood, and of ethics and politics rather than of physics and metaphysics. It is clear that for Maimonides practical wisdom is inferior to theoretical wisdom, and that, therefore, the activation of Adam's practical reason at the expense of his theoretical reason was a punishment (*Guide*, 1:2).

Maimonides interprets various Midrashim on the story of Adam and the Garden of Eden allegorically in accordance with his interpretation of Adam's sin as the succumbing to physical passion. The Midrash describes the serpent as a camel ridden by Samael. According to Maimonides the serpent represents the imaginative faculty, while Samael, or the evil inclination, represents the appetitive faculty. Maimonides suggests that in the midrashic description of the tree of life in *Genesis Rabbah* 15:6 the tree represents physics and its branches metaphysics. The tree of knowledge, on the other hand, represents ethics or practical wisdom rather than physics and metaphysics. Instead of eating from the tree of life, i.e., devoting himself to the study of physics and metaphysics which would have enabled him to attain immortality, Adam ate from the forbidden tree; he followed his imagination and succumbed to his passions, thereby impairing his capacity for the contemplation of truth, and acquiring the capacity for the acquisition of a knowledge of ethics (*Guide*, 2:30).

Joseph Albo maintains that Adam, as the prototype of mankind, is the choicest of all the creatures of the sublunar world and the purpose of the creation because he is the only creature that has a knowledge of God. All other creatures exist for his sake, and he has a dominion over them. Albo, too, interprets the story of the Garden of Eden allegorically, regarding it as a "symbolic allusion to man's fortune in the world" (*Sefer ha-Ikkarim*, 1:11). In his interpretation Adam represents mankind; the Garden of Eden, the world; the tree of life, the Torah; and the serpent, the evil inclination. The placing of Adam in the garden, in the midst of which stands the tree of life, symbolizes the fact that man is placed in the world in order to observe the commandments of the Torah. In the banishment of Adam from the Garden of Eden after he ate from the forbidden tree Albo sees an allusion to the punishment that will befall man if he disobeys the Divine commandments.

[David Kadosh / Adela Wolfe]

In Christian Tradition

Adam as the progenitor of the human race and as the type of humanity as such, plays a far greater role in Christian theo-

logical thought than in classical Judaism, since the former uses the account in Genesis 1–2 (and especially the story of Adam's sin and expulsion from Paradise) as a basis for its doctrine of man and his relation to God. Endowed with many extraordinary qualities as the crown of God's creation (e.g., perfect righteousness, sanctifying grace, absence of concupiscence, viz. evil inclination, immortality, etc.), he lost these at his fall ("original sin") and transmitted his fallen and corrupted nature to all his posterity. Only by the coming of Jesus, the "Second Adam," was humanity restored to its original grandeur and perfection "for as in Adam all die, even so in Christ shall all be made alive" (1 Cor. 15:22). As the heavenly Adam succeeded the earthly Adam, so humanity of the flesh will become a spiritual humanity (1 Cor. 15:44–49). The teaching of Paul greatly influenced Augustine and later Calvin in their formulations of the doctrine on original sin, implying as it does the innate corruption of human nature.

According to one Christian tradition, Adam is buried not in the Machpelah cave at Hebron but under the Calvary in the Holy Sepulcher, Jerusalem, so that the redemptive blood of Jesus shed at the crucifixion, flowed on his grave. In the Greek Orthodox Church a feast in honor of the parents of humanity, Adam and Eve, is kept on the Sunday preceding Christmas.

In Islamic Legend

Adam is more favorably presented in the Koran than in the Bible. The Adamic legend, as Muhammad related it, is as follows: Allah created Adam to become his regent (caliph) on earth (Sura 2:28) and made a covenant with him (Sura 20:114; cf. Hos. 6:7 and Sanh. 38b). At first the angels opposed it, fearing that man would evoke evil and bloodshed. However, Allah endowed Adam with the knowledge of the names of all things. The angels, who do not know these names, recognize Adam's superiority and pay him homage. Only Iblis (Gr. *diábolos*, the Devil) revolts, claiming that he who is born of fire should not bow before one who is born of dust, whereupon Allah expels Iblis from Paradise. Adam and Eve are forbidden to eat the fruit of a tree, but *Šaytān* (Satan) appears and whispers in their ears: Allah has forbidden this tree to you, so that you will not live eternally like the angels (Sura 7:19). They eat from the tree, become aware of their nakedness, and cover themselves with the leaves of Eden. Allah proclaims eternal enmity between Man and Satan. Then Adam repents for his sin.

*Geiger recognized that the concept that God had consulted the angels and that voices had been raised against the creation of man belongs to an old *aggadah* (Sanh. 38a–b; Gen. R. 8:1). The fact that the Koran knew nothing of the serpent but placed Satan in its place points perhaps to Christian influence. Umayya ibn Abi'l-Salt, Muhammad's contemporary, knew of the serpent in connection with Adam's disobedience, but not the Satan.

Later Muslim interpreters and collectors of legends completed the story of the Koran from the Bible, *aggadah*, and

their own poetic elaboration: Allah sent his angels, Gabriel and Michael, down to Earth in order to fetch dust for the creation of man; but the Earth rejected them and the Angel of Death forcibly took dust from the surface (surface of the earth in Arabic, *Adim*, thus Adam). Adam was created from red, white, and black dust – hence the various skin colorings of mankind. The dust for the head came from the Ḥaram in Mecca; the chest, the sanctuary in Jerusalem; the loins, Yemen; the feet, Ḥejāz; the right hand, the East; and the left hand, the West. For a long time the body was lifeless and without a soul. Suddenly the spirit penetrated the body, Adam sneezed and exclaimed with the angels, “Praise be to Allah.”

The notion of the homogeneity of the human race, as expressed in the legend which says that dust was gathered from the whole Earth to create Adam’s body, is found in the Talmud (Sanh. 38a). Rav, however, suggested the following: dust was taken for the body from Babylon; the head, Erez Israel; and the remaining limbs, the rest of the countries (Sanh. 38b). The idea that in the beginning Adam lay still as a figure of clay without a soul (golem), also originates from an *aggadah* (bibliography and interpretation in Bacher, *Pal Amor*, 2 (1896), 50–51; in addition, *Mid. Hag. to Gen. 2:7*). The *aggadah* and the Islamic legend both share the belief that God was the first couple’s “best man,” and that the forbidden fruit was wheat. This is the reason why Gabriel taught Adam agriculture: wheat banished man from Paradise, but wheat also introduced him to the earthly world. The *aggadah* is interested in calculating just how the hours of Adam’s first day were spent (Sanh. 38b). That Adam did not stay an entire day in Paradise is derived from Psalms 49:13: “But man abides [“spends the night”] not in honor.” According to the Islamic legend, Adam foresaw the future generations and their prophets. In the *aggadah* there is also a most impressive description of how one generation after the other – with its great men and sages – file past Adam (Sanh. 38b; *Av. Zar. 5a*; *ARN 31:91*; *Gen. R. 24:2*; *PR 23:115*).

Nor is there any doubt as to the reciprocity between the Islamic legend and the late Midrash. Thus, for instance, the specific statement that Adam was formed from red, white, and black earth – hence the differences in the complexion of mankind – is a further development of both the late *aggadah* (*Targ. Yer., Gen. 2:7*; *PDRE 11*) and the Islamic legend. The Koran (2:28–32) recognizes Adam’s superior status in that he knew the names of the creatures and things. Familiar is the Islamic oath: “By Allah who taught the names to Adam” (see *Gen. R. 17:4*). *Pirkei de-R. Eliezer* 16 says – under Islamic influence – that Samael came to Eden riding on the serpent; what the serpent said, all came from Samael (similar, *Mid. Hag. to Gen. 3:1–5*). The following example appears to be significant concerning the mutual influence of *aggadah* and Islamic legend: *Genesis Rabbah* 19:8 cites Genesis 2:17: “On the day on which you eat from it, you will die,” in connection with Psalms 90:10: “The number of our years is seventy,” and thus interprets: “One Lord’s Day, that is, 1,000 years [Ps. 90:4] was allotted to Adam, but he only lived 930 years and gave 70 years

to each of his descendants.” *Pirkei de-R. Eliezer* 19 relates that Adam gave 70 years of his life to David. According to Tabari (1:156), Adam let David have 40 of his own years.

[Bernard Heller]

Illuminated Manuscripts

Adam and Eve often appear in illuminated manuscripts, especially in the scenes of the Temptation and the period after the Fall. Among them is the Hebrew manuscript (British Museum Add. 11639), where the serpent is shown with a human face. This indicates the influence of the Jewish legend, which relates that before the Temptation of Eve, the serpent had wings, hands, and feet and was the size of a camel. Other illustrations are more conventional in examples such as the British Museum *Haggadah* (Ms. Or. 2884) and the *Haggadah* of Sarajevo, but it is interesting to note that the non-Jewish manuscripts such as Octateuch in Istanbul (Serail, Codex 8), a Bible Moralisée in the British Museum (Add. 15248), and Hugo van der Goes’ diptych in Vienna are influenced by this Jewish legendary approach.

[Helen Rosenau]

In the Arts

The story of Adam and Eve is frequently exploited in Western literature because of its theological association with the Christian doctrine of Original Sin. The oldest surviving treatment is the 12th-century Anglo-Norman *Jeu d’Adam*. In medieval English, French, and Spanish miracle plays Adam is represented as a precursor of Jesus. An early Protestant interpretation was *Der farend Schueler im Paradeiss* (1550), a comedy by the German dramatist and poet Hans Sachs. The drama *L’Adamo* (1613), by the Italian actor-playwright Giambattista Andreini, probably influenced the English Puritan John *Milton, whose *Paradise Lost* (1667) depicts Adam as a free agent overcome by Satan, but sustained by his belief in ultimate redemption. This post-medieval conception of the first man also permeates two Dutch works, the *Adamus Exul* (1601) of Hugo Grotius (Hugo de Groot) and *Adam in Ballingschap* (“Adam in Exile,” 1664) by Joost van den Vondel. Milton’s epic poem was dramatized by John Dryden as *The State of Innocence, and Fall of Man* (1677), while a Rousseauesque yearning for an imagined Golden Age appears in the drama *Der Tod Adams* (1757) by the German poet F.G. Klopstock.

Some later plays on this theme are *Az ember tragédiája* (“The Tragedy of Man,” 1862) by the Hungarian writer Imre Madách; *Adam Stvořitel* (“Adam the Creator,” 1927) by the Czech authors Josef and Karel Čapek; *Nobodaddy* (1925) by the American writer Archibald Macleish; and the first part of G.B. Shaw’s *Back to Methuselah* (1921). The English writer C.M. Doughty based his “sacred drama” *Adam Cast Forth* (1908) on a Judeo-Arabian legend; while Arno *Nadel wrote his play *Adam* (1917) on the basis of a fragment by S. *An-ski.

In the sphere of art there are early treatments of the Adam and Eve theme in second-century frescoes at Naples and in the Christian chapel at *Dura-Europos in Syria, as

well as on Roman sarcophagi. There are also representations in medieval mosaics and in metal and in both Christian manuscripts and Jewish **Haggadot* of the Middle Ages. Scenes from the creation of Adam to the expulsion from Eden were much favored by medieval artists and early sculptures include the reclining Eve by the 12th-century French sculptor Gislebertus, and a pair of gaunt figures at Bamberg Cathedral in Germany (c. 1235).

In the 15th century the reawakening feeling for the beauty of the human body gave artists an opportunity to depict the nude within the framework of religious art, particularly in Renaissance Italy. Masaccio's fresco in the Brancacci Chapel in Santa Maria del Carmine in Florence (1427) shows Adam and Eve leaving the Garden of Eden with their faces buried in their hands in a striking gesture of despair. In the best-known representation of the theme, Michelangelo's *The Creation of Adam* (1511) in the Sistine Chapel in the Vatican, the newly created man reclines on a rock while the Creator sweeps by with the heavenly host. Other treatments are those of Raphael and Tintoretto, and Titian's robustly sensual *Fall* (1570) in the Prado, Madrid. Adam and Eve were also represented by various masters of the Flemish, Dutch, and German schools, notably the brothers Van Eyck, Albrecht Durer, Hieronymus Bosch, Lucas Cranach, and Hugo van der Goes. In the painting *The Spring* by the French artist Nicolas Poussin (1660–64), Adam and Eve are seen in a peaceful landscape resembling a vast park (in the Louvre, Paris). A century later the theme inspired a watercolor by William *Blake, while Marc *Chagall painted a *Creation*, a *Paradise*, and an *Expulsion from Eden*, all remarkable for their iridescent colors. Two modern examples are Rodin's *Eve* (1881) for his *Gates of Hell*, and Jacob *Epstein's heroic and deliberately primitive *Adam* (1938).

The earliest musical work of any distinction based on the Bible story is the opera by the German composer, J.A. Theile, *Der erschaffene, gefallene und wieder aufgerichtete Mensch* (1678). There have been many librettos based on Milton's *Paradise Lost* and on its Continental imitations, notably Klopstock's *Der Tod Adams*, which was set to music as *La Mort d'Adam* (1809) by the French composer J.-F. Lesueur. Anton *Rubinstein's first oratorio, *Das verlorene Paradies* (1858), and E. Bossi's Italian "poema sinfonico-vocale," *Il paradiso perduto* (1903), were both based on Milton's epic. Two interesting French compositions were F. David's *L'Eden* (1848) and Jules Massenet's stage music for the "mystère" *Ève* (1875). The American composer Everett Helm's *Adam and Eve* (1951) is a modern adaptation of a 12th-century mystery play.

ADAM (Heb. אָדָם), city on the eastern bank of the Jordan River mentioned in Joshua 3:16 as the place where the Jordan ceased flowing at the time of the Israelite crossing. It also appears in the inscriptions of Pharaoh Shishak (10th century B.C.E.). King Solomon's foundries were in the vicinity of Adam (1 Kings 7:46; 11 Chron. 4:17). The place is perhaps also mentioned in Hosea 6:7 and Psalms 68:19, 78:60, and 83:11 as an ancient site of worship.

The ford that was situated during ancient times at Adam is marked on the *Madaba Map and is still found at a place the Arabs call Damiyeh on the road from Shechem to Gilead and Moab. It is south of the confluence of the Jabbok and the Jordan on the one side and north of the mouth of Wadi Fariah on the other. On the small Tell el-Damiyeh near the ford, potsherds from the Canaanite and Israelite periods (Late Bronze to Iron Age I–II) as well as from the Roman and Byzantine periods have been found.

ADAM, Jewish monthly literary journal in the Romanian language. The first number of *Adam* was published in Bucharest on April 15, 1929. The journal was subsequently published for 12 years, until July 1940, in book form. Its founder and director was the writer and publicist I. *Ludo (Isac Iacovitz). He edited the review until 1936, when he left Romania temporarily and sold it to Miron Grindea and Idov Cohn. They continued publication until their emigration from Romania, Miron Grindea to England (where he published a new review under the same name in London in English) and Idov Cohn (Cohen) to Palestine. *Adam* was a successful publication, reflecting the personality of its editor, Ludo, who wrote most of the articles.

He succeeded in attracting various contributors, intellectuals with various outlooks, among them Felix *Aderca, Ury *Benador, F. Brunea-Fox, Ion Calugaru, Avraham *Feller, Benjamin Fundoianu, Jacob Gropper, Rabbi M.A. Halevy, Michael *Landa, Theodor Loewenstein, Marius *Mircu, Chief Rabbi Jacob Niemirower, Eugen *Relgis, and A.L. *Zissu. Some of them (as well as others) served their literary apprenticeship at *Adam*. It was a review that refused to surrender to the ghetto mentality and also attracted non-Jewish contributors, among whom the best known were Tudor Arghezi, Gala Galaction, Eugen Lovinescu, and N.D. Cocea. *Adam* also featured many illustrations, including work by Victor *Brauner, Marcel *Jancu, M.H. *Maxy, Jules *Perachim, and Reuven *Rubin. *Adam* also engaged in polemics. Its basic idea was that Jewish-Romanian writers, before they could be Romanian writers, must be Jewish writers. In 1939, *Adam* published a yearbook on the occasion of its tenth anniversary.

[Lucian-Zeev Herscovici (2nd ed.)]

ADAM, LAJOS (Louis; 1879–1946), Hungarian physician. His appointment in 1927 as assistant professor at the University of Budapest aroused violent opposition in antisemitic circles, but in 1930 he was appointed full professor and director of the surgical clinic. In 1946 he became *Rector Magnificus*. His contribution to the technique of local anesthesia was of great importance. Among other books he wrote *A heli érzéstelenítés kézikönyve* (“The Handbook of Local Anesthesia”).

ADAM, OTHER BOOKS OF, apocryphal books which contain Christian reworkings of the Jewish Adam legend, some of which include valuable ancient traditions. These books are in addition to the *Life of Adam and Eve* (see *Book of the Life of *Adam and Eve*). In early lists several works, presumably in Greek, are mentioned. The most prominent of these are *Apocalypse*, *Penitence*, *Testament*, and *Life*. The *Apocalypse*, quoted in *Epistle of Barnabas* 2:10, deals with Adam’s penitence. A horarium and some other texts, also connected with repentance and cited by Georgius Cedrenus (*Historiarum compendium* 1:18), appear in a second Greek form, as well as in Syriac (R. Graffin (ed.), *Patrologia Syriaca*, 2, pt. 1 (1907), 1319–37), where they are quoted as being from the *Testament*. This Syriac version mentions the *Cave of Treasures*, connecting it with various Eastern books. A long passage attributed to the *Life of Adam* is preserved by Georgius Syncellus (ed. Dundorff, p. 5ff.). This passage is related to material found in Jubilees 3:1–11. The *Cave of Treasures*, a Syriac work, also deals with the story of Adam. A central feature of this work is a cave of treasures, in which Adam lived and was buried, and from which he was taken into the Ark by Noah to be rebur-

ied at Golgotha. The book also exists in Arabic (D.M. Gibson, *Apocrypha Arabica* (1901), Eng. and Arab.).

The Ethiopic *Book of Adam and Eve* is also a Christian composition, having much in common with the *Cave of Treasures*, including the burial tradition. Armenian books connected with the Adam story include *The Death of Adam*, *History of Adam’s Expulsion from Paradise*, *History of Cain and Abel*, *Adam’s Sons*, and *Concerning the Good Tidings of Seth*. Other unpublished Adam books also exist. These writings are certainly not Gnostic, as Preuschen maintained. They are early although it is impossible to give a precise date. There are Georgian translations of the *Cave of Treasures*, the *Life*, and other Adam books. There are also some texts in Arabic, including an Arabic version of the Ethiopic Adam book. Epiphanius (*Panarion* 26) quotes a Gnostic composition, and a Gnostic Coptic Adam Apocalypse is found among the Nag Hammadi texts.

[Michael E. Stone]

ADAM AND EVE, BOOK OF THE LIFE OF, apocryphal work dealing with Adam’s life and death. It has been preserved in Greek, Latin, and Slavonic versions differing considerably from one another. General considerations point to composition in Palestine between 100 B.C.E. and 200 C.E.

The Greek version, known erroneously as the *Apocalypsis Moysis*, begins with the expulsion from Paradise, and relates the story of the death of Abel, the birth of Seth, Adam’s illness, and the journey of Eve and Seth to Paradise in search of oil from the tree of life to ease Adam’s suffering. Adam dies and he is buried in the third heaven by the angels. Six days later Eve dies and Seth is instructed regarding burial and mourning.

The Latin version is known as the *Vita Adae et Evae*. Its main part roughly corresponds to the Greek text, but there are some omissions and additions. The most extensive and important addition precedes the material found in the Greek version. It tells how Adam and Eve, finding life outside Paradise difficult, decide to entreat God for nourishment and propose to do penance by standing in water; Eve in the Tigris for 37 days and Adam in the Jordan for 40. By a trick, the Devil induces Eve to end her penance before the designated time.

The Slavonic version follows the Greek closely, although it shortens some passages. It also includes the main addition of the Latin in a different form and not at the beginning of the

book, but as a part of Eve's account of the Fall. According to the Slavonic version, Adam and Eve, expelled from Paradise, beg God for nourishment and are given the seventh part of Paradise. Adam begins plowing, but the Devil prevents him from continuing until Adam acknowledges his lordship over Adam and the earth. To trick the Devil, Adam writes: "I and my children belong to whoever is Lord of the earth." There follows the story of the penance of Adam and Eve, as found in the Latin, but with the significant difference that Eve withstands the Devil's blandishments and completes her penance. The rest of the addition is missing.

The religious spirit expressed in the *Book of Adam and Eve* is somber and somewhat pessimistic. It illuminates many minor points of theological interest, but presents no clear and central doctrine. Only the resurrection and final judgment are taught repeatedly and emphatically. Angels are represented as important, but there is no speculation about them and none about the End of Days. The simpler Greek version, which is mildly dualistic, also teaches a distinction of body and soul. There is no doctrine of original sin in the Christian (or Qumranic) sense. Adam is considered perfect; Eve is morally weak, but not wicked. She loves and obeys Adam and repeatedly deplores her own shortcomings. There is also a mild halakhic interest in the matter of burial. The additional material contained in the Latin version stresses Eve's weakness and the wickedness of the Devil, and actually teaches that there was a second temptation, which Adam withstood. This part is more speculative, and is concerned with man's struggle against the Devil and with the origin of evil. The penance by water shows a marked tendency toward asceticism, which might be a modification of an earlier tendency, emphasizing the importance of purity.

The work cannot be assigned to any known or definable sector or movement in Judaism. There are similarities both with apocalyptic writing (Enoch, Jubilees) and with the rabbinic *aggadah*, but none of these is sufficiently close or precise to indicate identity of teaching. The simpler Greek version is closer to the mainstream of Judaism. The story of Adam and Eve's penance and second temptation displays a unique development of ancient Jewish thought. A book of Adam (*Sifra de-Adam ha-Rishon*) is mentioned in *Bava Mezia* 85b; but this work must have been different from the *Book of Adam and Eve*.

[Jacob Licht]

ADAM BA'AL SHEM, a legendary figure about whom various tales have been collected in small Yiddish pamphlets published in Prague and in Amsterdam in the 17th century. They relate the miracles performed before Emperor Maximilian II by a kabbalist, whose historical existence has not been verified. According to these tales, Adam Ba'al Shem was born and was buried in Bingen near Worms; however his permanent place

of residence was Prague. The stories about him were popular and used by the compiler of *Shivhei ha-Besht* (Berdichev, 1815) who transformed Adam Ba'al Shem into an esoteric kabbalist in Poland who died close to the birth or in the childhood of *Israel b. Eliezer Ba'al Shem Tov, the founder of Ḥasidism. Ḥasidic legend attributed to him writings on the mystery of Kabbalah which he commanded his son to give to Israel Ba'al Shem Tov. Apparently, the earlier figure of a German Jewish folktale (Adam Ba'al Shem) was combined in ḥasidic legend with that of the Shabbatean prophet Heshel Zoref, who died in Cracow around the time of Israel Ba'al Shem Tov's birth. Heshel's work, *Sefer ha-Zoref*, on the mysteries of Shabbatean Kabbalah, undoubtedly reached the Ba'al Shem Tov who ordered them to be copied by his disciple Shabbetai of Raschkow. Copies of the copy were preserved in the courts of several *zaddikim*. The Ḥasidim were not aware of the Shabbatean character of these works, but several legends spread about their contents. The author of *Shivhei ha-Besht* or the creators of the legends about the Ba'al Shem Tov modified the character of these writings and attributed them to Adam Ba'al Shem. An unfounded assumption seeks to identify Adam Ba'al Shem with a Russian Christian of German origin, called Adam Zerneikov, who supposedly had contact with the father of Israel Ba'al Shem Tov.

[Gershom Scholem]

ADAMIT (Heb. אָדָמִית), kibbutz in northern Israel, on the Lebanese border. Adamit, affiliated with Kibbutz Arzi (Ha-Shomer ha-Za'ir), was founded in 1958, following completion of a serpentine road to secure the access to its small mountain plateau. Most of the settlers were Israel-born and the economy was based on orchards, vineyards, and livestock. In 2004 its population was 106. The name "Adamit" derives from the Arabic "Idmith", but is also reminiscent of the biblical town of Adami (Josh. 19:33), assumed to have been located in the vicinity.

[Efraim Orni]

ADAM KADMON (Primordial Man), kabbalistic concept. The Gnostics inferred from the verse "Let us make man in our image" (Gen. 1:26) that the physical Adam was created in the image of a spiritual entity also called Adam. The early *Kabbalah speaks of *adam elyon* ("supreme man"; in the Zohar the corresponding Aramaic is *adam di-l'ela* or *adam ila'ah*). The term sometimes represents the totality of the Divine emanation in the ten **Sefirot* ("spheres") and sometimes in a single *Sefirah* such as *Keter* ("crown"), *Ḥokhmah* ("wisdom"), or *Tiferet* ("beauty"). The term "Adam Kadmon" is first found in *Sod Yedi'at ha-Mezi'ut*, an early 13th-century kabbalistic treatise. In the *Tikkunei Zohar*, the Divine Wisdom is called *Adam ha-*

Gadol (“The Great Man”). The spiritual man is hinted at in the verse “a likeness as the appearance of a man” (Ezek. 1:26) which the prophet Ezekiel saw in the vision of the divine chariot. The letters of the Tetragrammaton (see Names of *God) when spelled out in full have the numerical value of 45, as do the letters of the word Adam. In this fact support was found for the revelation of God in the form of a spiritual man (*Midrash Ruth Ne'elam* in the Zohar). In contrast to the First Man Adam, this spiritual man is called in the Zohar proper the *adam kadma'ah ila'ah* (“primordial supreme man”), and in *Tikkunei Zohar* he is called *Adam Kadmon* (“primordial man”) or *Adam Kadmon le-khol ha-kedumim* (“prototype of primordial man”). In the Kabbalah of Isaac *Luria, great importance and new significance is given to *Adam Kadmon*. There *Adam Kadmon* signifies the worlds of light which, after the retraction of the light of **Ein-Sof* (“The Infinite”), emanated into primeval space. This *Adam Kadmon* is the most sublime manifestation of the Deity that is to some extent accessible to human meditation. It ranks higher in this system than all four worlds: *Azilot* (“emanation”), *Beri'ah* (“creation”), *Yeẓirah* (“formation”), and *Asiyah* (“making”). The portrayal of this *Adam Kadmon* and his mysteries, and in particular the description of the lights which flow from his ears, mouth, nose, and eyes plays an important role in Ḥayyim *Vital's *Ez Ḥayyim* and in other kabbalistic works of the Lurianic school. Through this theory the mystical anthropomorphism of the school becomes crystallized. This anthropomorphic figure recurs in all the stages and in all the worlds. Consequently there is an *adam de-veriah* (“man of creation”), *adam di-yzirah* (“man of formation”), and an *adam de-asiyyah* (“man of making”). In contrast to *Adam Kadmon*, who is from the holy emanation, stands Satan, from the world of iniquity. In the *Tikkunei Zohar*, and subsequently in the Lurianic Kabbalah, Satan is called *adam beliyyaal* (“evil man”). In the Lurianic Kabbalah, there is no relationship between *Adam Kadmon*, which is the light which transcends all other lights, and the *Messiah. Such a connection was made only in the system of the extreme Shabbateans, who believed in the divinity of the Messiah and regarded *Shabbetai Ẓevi as the incarnation of *Adam Kadmon*. (He figures as such in a number of poems of the sect of the *Doenmeh.)

[Gershom Scholem]

ADAMS, ARLIN MARVIN (1921–), U.S. jurist, public servant, and legal educator. Born in Philadelphia, Pennsylvania, Adams worked for a produce distributor during the Depression to pay for college at Temple University. When he graduated first in his class in 1941, the chair of the political science department took him by trolley to the University of Pennsylvania, where he obtained a full scholarship for the young man by declaring to the law school registrar: “He is the best that we've ever had.”

A day after Pearl Harbor, Adams volunteered for the Navy, received a commission, and in 1942 was sent to the north

Pacific. After the war, he resumed his studies at Penn, where he served as editor-in-chief of the law review and graduated second in his class in 1947. He completed a clerkship with Horace Stern, probably Pennsylvania's greatest chief justice, and then joined Philadelphia's premier law firm, Schnader, Harrison, Segal and Lewis. Adams earned a reputation as a brilliant, yet humble attorney, and after only three years he became the youngest associate in the firm's history to make partner. At this time, he also earned an M.A. in economics from Temple and Penn.

In 1963, Adams joined Governor William Scranton's cabinet. As Pennsylvania's secretary of public welfare (1963–66), he instituted a medical program for indigents that anticipated Medicaid and developed educational training for poor children that became the prototype for the federal Head Start program. Scranton described Adams as “the ablest and most effective secretary of welfare that this Commonwealth has ever known.”

When President Nixon nominated Adams for a seat on the United States Court of Appeals for the Third Circuit, the Senate unanimously approved the selection without holding any hearings. Adams served 18 years on the court (1969–87), earning the highest praise and ensuring himself a place alongside scholar-judges such as Learned Hand and Benjamin *Cardozo. As with Hand, appointment to the United States Supreme Court eluded Adams, although he was three times on the short list for selection to the High Court. While Adams wrote landmark opinions in several areas, his most enduring legacy came in decisions involving the First Amendment religion clauses. His erudite, careful opinions possessed a Burkian quality, striking a balance between the nation's commitment to institutional separation between church and state and recognition of a vital role for religion in public life. In a concurring opinion in *Malnak v. Yogi* (1979), Adams led the way in defining “religion” for constitutional purposes, fashioning a three-part test that widely influenced courts in America and in other nations.

In 1987, the indefatigable Adams returned to the Schnader firm, where he continued to accept major public duties, most notably as independent counsel (1990–95) to investigate irregularities in President Reagan's Department of Housing and Urban Development and as trustee in the New Era proceedings (1995), then the largest non-profit bankruptcy case in U.S. history. Adams achieved unparalleled results in both cases, securing 16 criminal convictions or guilty pleas in the HUD scandal and obtaining a collection rate of over 90 percent in New Era, thereby saving numerous charities from financial ruin.

Throughout his life, Adams faithfully served academia, the community, and his religion. He held positions as chairman of Penn Law School's Board of Overseers (1985–92); president of the American Philosophical Society (1993–96), founded in 1743 by Benjamin Franklin; and president of Kneseth Israel, one of Philadelphia's oldest synagogues. For almost three decades, Adams taught a Freedom of Religion seminar

at Penn Law School. The course inspired Adams to write numerous articles and *A Nation Dedicated to Religious Liberty*, a groundbreaking book that resurrected William Penn as a champion of religious freedom and asserted that the core value of the religion clauses was religious liberty, not separation of church and state.

In 2004, Penn Law School recognized “a lifetime of dedicated public service” by endowing a chair in constitutional law in his name. When he received the esteemed Philadelphia Award in 1997, Justice Sandra Day O’Connor said: “[Adams] has accomplished more in his lifetime than a hundred ordinary heroes combined. . . . He saw that the rule of law had to be administered with a spirit of compassion and a caring for those in need.”

[Charles J. Emmerich (2nd ed.)]

ADAMS, FRANKLIN PIERCE (1881–1960), U.S. newspaper columnist known by his byline “F.P.A.” and noted for his wit and erudition. Born in Chicago, he started his daily column “The Conning Tower” in the *New York Tribune* in 1914. It appeared successively in the *World*, the *Herald-Tribune*, and the *Post*.

A member of the illustrious Algonquin Round Table, Adams lunched every day in the 1920s and 1930s at a round table at New York City’s Algonquin Hotel with a group of some of the most brilliant writers of that period. They traded quips and critiques, many of them still repeated today. The group was formed at the suggestion of Dorothy *Parker, who was living in the Algonquin Hotel at the time. There was no formal membership, so people came and went, but the primary early members included Parker, Adams, Robert Benchley, Alexander Woollcott, George S. *Kaufman, Edna *Ferber, and Harpo *Marx. Others visited as well, including actors and entertainers such as Douglas Fairbanks, George *Gershwin, Irving *Berlin, Jascha *Heifitz, Moss *Hart, Budd *Schulberg, and Oscar *Hammerstein. But most of the Round Table members were critics. Outspoken and outrageous, they would exchange ideas and gossip, which found their way into Adams’ “Conning Tower” column in the *Tribune* the next day. Though society columns referred to them as the Algonquin Round Table, they called themselves the Vicious Circle. “By force of character,” observed drama critic Brooks Atkinson, “they changed the nature of American comedy and established the tastes of a new period in the arts and theater.”

Adams’ epigrams, verse, and parodies were reprinted extensively, and his weekly *Diary of Our Own Samuel Pepys* is regarded as historical source material. His appearances on *Information Please* on radio and TV (1939–52) had a large following.

[Ruth Beloff (2nd ed.)]

ADAMS, HANNAH (1755–1831), considered the first American woman professional writer. Hannah Adams’ early interest in religion led to her *Dictionary of All Religions and Religious Denominations* (1817⁴), a superficial compilation, but significant for the sympathetic tone of the article on Jews. In a later, more careful work, *History of the Jews from the Destruction of Jerusalem to the Present Time* (1812), she relied on contemporary historical and demographic information prepared by Jewish correspondents. The chapter concerning the Jews in the New World is of particular interest, and has been reprinted and translated into German and Hebrew.

[Joseph L. Blau]

ADAMS, JOHN (1735–1826), first vice president (1789–97) and second president (1797–1801) of the United States. Adams, a champion of religious freedom and separation of church and state, was also a fervent admirer of the Old Testament in the tradition of his New England ancestors, and a Judeophile. In a letter written to Mordecai Manuel *Noah in 1818 he remarked: “I wish your nation may be admitted to all the privileges of citizens in every country of the world. This country has done much. I wish it may do more, and annul every narrow idea in religion, government and commerce.” In the course of his lengthy correspondence with Thomas Jefferson during the last two decades of his life, Adams exhibited a steady interest in the religious philosophy of the Jews. He advocated that Hebraic studies become part of a classical education, and in a codicil to his will four years before his death he bequeathed land for the erection of a school in which he expressed the hope that Hebrew would be taught together with Latin and Greek. In a characteristic attack on Voltaire’s derogatory attitude toward the Bible and the Jewish people, he wrote to his friend Judge Francis Adrian van der Kemp in 1808: “How is it possible this old fellow should represent the Hebrews in such a contemptible light? They are the most glorious Nation that ever inhabited this Earth. The Romans and their Empire were but a Bauble in comparison of the Jews. They have given Religion to three quarters of the Globe and have influenced the affairs of Mankind more, and more happily than any other Nation, ancient or modern.”

ADAMS, THEODORE L. (1915–1984), U.S. rabbi. Adams was the epitome of the emerging modern Orthodox rabbis in America during much of the 20th century. Born in Bangor, Maine, he was the son of the town *shoḥet*. His pious immigrant parents sent their son to New York for a proper Jewish education. After studying at Yeshiva Torah Vodaath, he went to Yeshiva College (B.A., 1936) and continued for *semikhah* at

Yeshiva's Rabbi Isaac Elchanan Theological Seminary (1938). He occupied pulpits in Congregation Mt. Sinai in Jersey City and Congregation Ohab Zedek in Manhattan. In these he transformed the congregations from their old-style European immigrant milieu into modern Orthodoxy.

With a commanding presence dressed in self-confidence, he attracted the attention of many Jewish causes. His rabbinic colleagues elected him to the presidencies of the *Rabbinical Council of America and the interdenominational *Synagogue Council of America. In his later years, he earned a Ph.D. in Jewish education and joined the staff of *Touro College.

ADANI, DAVID BEN AMRAM (13th or 14th century), Yemenite rabbi and scholar. An ancient source calls him "David b. Amram, the *nagid* from the city of Aden." It is not clear whether the title referred to David or his father. **Nagid*, however, was a title borne by the leader of the Jewish community of Aden from the 12th century. Adani was a renowned scribe whose copies of the Pentateuch were much sought after because of their exactness. He is the compiler of the **Midrash ha-Gadol*.

ADANI, MAHALAL (originally **Mahallal ben Shalom ben Jacob**; 1883–1950), Yemenite scholar and industrialist. His wife, Hannah, was the daughter of Judah Moses, president of the Aden Jewish community (1922–24). Mahalal was a singular figure in the Aden Jewish community, being both learned and an entrepreneur. He obtained his general and Jewish education auto-didactically and set up factories for cigarettes and ice. Mahalal visited Erez Israel in 1895 and 1903, and after fulfilling a central role in strengthening the community's connections with the Zionist movement and in establishing a modern educational system, he finally immigrated to Erez Israel in 1930. Adani continued his business activities in Erez Israel but devoted most of his time to the study of religious, philosophical, and historical texts. He left behind dozens of handwritten essays, including commentaries on most of the biblical books; an interpretation of Rabbi *Kook's *Orot ha-Kodesh*; and a philosophical novel entitled *Rayon Ru'ah*. During his lifetime he published only two books: *Or ha-Hozer* (1940) on Ecclesiastes and *Bein Aden ve-Teiman* ("Between Aden and Yemen," 1947, 1988²), which was edited by D. Sadan. From 1988 his books were brought to press by Y. Tobi. These

include his commentaries: *Job* (1993); *Song of Songs, Proverbs, and Ecclesiastes* (1997); *Psalms, Pirkei Avot, Ruth, Lamentations, and Esther* (1998); *Ha-Nefesh ha-Ḥayyah* and *Ru'ah ha-Kodesh* (2001); and *Pirkei Mikra* (2004).

[Yosef Tobi (2nd ed.)]

ADANI, MIZRAHI SHALOM (second half of 19th century), kabbalist and scholar. The appellation Mizrahi was given to Adani because of his eastern Yemenite origin. In manhood he immigrated to Jerusalem where he joined the kabbalistic circle of the *bet ha-midrash* Bet El. He wrote *Sukkat Shalom* ("Tabernacle of Peace," 1891), novellae on the tractate *Bava Kamma*, the introduction to which contains a description of his adventures on his way to Erez Israel; and *Shelom Yerushalayim* ("The Peace of Jerusalem," 1899), novellae on the *Ez Ḥayyim* of R. Ḥayyim *Vital, as well as some others on the kabbalistic writings of R. Shalom *Sharabi. He used a wealth of sources, the Babylonian and Jerusalem Talmuds, the halakhic authorities, and the responsa literature.

[Yehuda Ratzaby]

ADANI, SAADIAH BEN DAVID (Sa'id ibn Daud, known also as **al-Yamani al-Rabbānī**; 15th century), talmudist. Adani lived in Damascus, Aleppo, and Safed. His works, written in Judeo-Arabic, deal with subjects studied in the Yemenite communities: Midrash, *halakhah*, and lunar intercalation. *Najāt al-Ghāriqīn* ("The Salvation of the Drowning") and *Zafanat Pane'ah* ("Deciphering Mysteries") are aggadic and halakhic commentaries on the Pentateuch and the Sabbath readings from the Prophets. At the request of students Saadiah wrote a commentary on Maimonides' *Mishneh Torah*. Adani used the form of catechism popular among the Jews of Yemen. He prepared an Arabic calendar entitled *al-Jādwalavn* which contains a philosophic poem. In his writings, he shows familiarity with the practices of Yemenite Jewry, although he did not live there. It is noteworthy that this 15th century Yemenite scholar could state: "Thank God the belief in *shedim* ('demons and devils') has ceased, like other superstitions and magical practices. I have enlarged on this matter only because most European Jews and some also in these countries still cling to many preposterous beliefs."

ADANI, SAMUEL BEN JOSEPH (Yeshua; 1863–?), author. Adani's grandfather, R. Yeshua, was the head of the Jewish rabbinical court in Aden and his mother's grandfather, R. Shilo, was a member of it. In 1878 he married the granddaughter of Menaḥem Mansur, then head of the Jewish court. Adani was

a great scholar and studied the Kabbalah with Aden's rabbis. He visited Erez Israel in 1899 and 1902. His book *Nahalat Yosef* (Jerusalem, 1906) is the most important work of Adenese scholarship. This work is to some extent an encyclopedia in two parts: (a) General instruction in Jewish tradition – Hebrew grammar, *halakhah*, angelology, paradise, astronomy, etc. Though the author asserts that enlightenment does not threaten tradition, he takes a definite position against the Jewish philosophers and educators in the new age, who prefer the conclusions of research and Aristotelian views to Jewish tradition (1, 14, 70a–77b). On the other hand, he opposes those who presume to be too strict with the laws of Judaism (1, 15, 77a–85b). (b) The traditions of Adenese Jewry during the year and the life cycle, an account of his family, a description of his visits to Erez Israel, and riddles and jokes as well as his poetry. The chapter about his family is the main source on the Aden community in the 19th century.

ADAR (Heb. אָדָר), the post-Exilic name (of Assyrian origin) of the 12th month in the Jewish year. Occurring in Assyrian inscriptions and also in Hebrew and Aramaic biblical records (Esth. 3:7 with seven parallels; Ezra 6:15), it is held to be identical with the first element in the compound proper name *Adrammelech of a patricidal son of *Sennacherib (II Kings 19:37; Isa. 37:38) and of the Molech-like idol worshiped by the Sepharvite ancestors of the Samaritans (II Kings 17:31). The zodiacal sign of this month is Pisces. In some years an extra month is added to the year (see *Calendar) which is called Adar *Sheni* (“Second Adar” or *ve-Adar* – so vocalized against a firm rule in Hebrew vocalization). In such years the original month is called Adar *Rishon* (“First Adar”). The addition of a second Adar raises problems with regard to the celebration of *bar mitzvah and the observance of **Yahrzeit* and the recitation of **Kaddish*. The law is as follows: A boy born in Adar of a regular year but whose 13th year is a leap year celebrates his bar mitzvah in Adar II (Sh. Ar., OH 55:10). For a person deceased in Adar of a regular year, the *Yahrzeit* in a leap year is observed in Adar I; there are, however, conflicting opinions in this and it is suggested that *Kaddish* be recited also in Adar II (*ibid.* 568:7). In the present fixed Jewish calendar, the month consists of 29 days in regular years while in leap years Adar I consists of 30 days and Adar II of 29 days. The first day of Adar (of Adar II in a leap year) never falls on Sunday, Tuesday, or Thursday. In the 20th century Adar in its earliest occurrence extends from February 12 to March 11 or 12 and in its latest from March 2 to 30 while the 59 days of Adar I with Adar II extend from February 2 to March 31 or April 1 at the earliest and from February 11 to April 9 or 10 at the latest.

Memorable days in Adar (Adar II in leap years) comprise: (a) The Four Special Sabbaths (*Shekalim* may be read on the Sabbath before Adar I and *ha-Hodesh* on Nisan 1, but invari-

ably Sabbaths *Zakhor* and *Parah* fall in Adar). (b) The seventh of Adar, the anniversary of the death of Moses as calculated from Deuteronomy 34:8 and Joshua 1:11; 3:2; and 4:19, observed as a fast (Meg. Ta’an. 13, ed. Neubauer). According to tradition Adar 7 was also the date of Moses’ birth (see *Adar, the Seventh of). (c, d) Adar 9 and 24 once observed as fasts (*ibid.*) commemorating the fateful controversies between the Schools of Shammai and Hillel (Shab. 17a) and the leprosy which befell King Uzziah (II Kings 15:5; II Chron. 26:19–21). (e) Nicanor Day on Adar 13 at first observed as a feast commemorating the Hasmonean victory over the Syrian general Nicanor (I Macc. 7:49; II Macc. 15:36; Meg. Ta’an. 12) and subsequently observed as the Fast of *Esther preliminary to Purim (*Piskei ha-Rosh*, Meg. 1:1). (f, g) *Purim and Shushan Purim on Adar 14–15. (h) The 16th of Adar was not to be a day of mourning for on that day they commenced to build the walls of Jerusalem (Meg. Ta’an. 12); by order of Nehemiah or perhaps under the Maccabees. (i) The 17th was a feast commemorating the miraculous escape of the Sages of Israel from their Herodian or Roman enemies. (j) The 20th was a feast day because on that day Onias (*Honi ha-Me’aggel) effected deliverance from a drought (*ibid.*). These invest the whole month with a joyful character, hence the talmudic ruling “When Adar comes in, gladness is increased” (Ta’an. 29a).

[Ephraim Jehudah Wiesenberg]

ADAR, THE SEVENTH OF, anniversary of both the birth and death of Moses according to talmudic tradition (Meg. 13b; Kid. 38a, etc.). The date is derived from a comparison of biblical dates (Deut. 34:8; Josh. 1:11; 3:3; 4:19; Jos., Ant., 4:327, gives the first day of Adar as the day of Moses’ death). In Oriental communities it became a day of fasting and commemoration for the pious because of the belief that a spark of the soul of Moses is found in every righteous person. In medieval Egypt the date signaled a central event in the life of the community. During the preceding Hanukkah, messengers were sent to all Jews in the area to invite them to come to celebrations at the ancient synagogue in the village of *Dumuh near Cairo which, according to tradition, was erected 40 years before the destruction of the First Temple on the spot where Moses had prayed before going to Pharaoh. The seventh of Adar was a day of prayer and supplication. The eighth was a day of celebration, apparently of a “carnival” nature. To insure the serious aspect of the festivities, the rabbis of Egypt enacted certain prohibitions. Women must be accompanied by their husband, brother, or grown son; men and women were separated in seating; dancing, singing, and the putting on of plays or “shadow shows” (a sort of puppet show) were forbidden. While this observance was later discontinued, Sephardi Jews still light candles for the “ascension of the souls of the righteous” on the seventh of Adar. Some communities recite special *piyyutim* on this date and also on Simhat Torah, when the biblical account of Moses’ death is read in the synagogue. Among these are “Cry! O Jochebed, with a bitter, hard voice!

Sinai, Sinai, where is Moses?!” (Davidson, *Ozar*, 4 (1933), 371); “Be graceful to us, O Lord because of the merit of Moses” (*ibid.*, 3 (1930), 416); and “Happy art thou, O Mount Abarim, over all the high mountains” (*ibid.*, 1 (1924), 8446). In 17th-century Turkey and Italy (and later also in Northern Egypt) it became customary in some circles to observe this date as a fast day, and to recite portions from a special *tikkun* (selected passages from Scripture, Mishnah, and Zohar), compiled by Samuel *Aboab of Venice. In Eastern and Central Europe, as well as in the United States, this day was observed by the members of the *hevra kaddisha* as a fast day which was terminated by a special banquet at which new members were admitted and a new board elected. After the *Minhah* service in the synagogue, the rabbis used to eulogize Moses and all famous rabbis and Jewish scholars who had passed away during the preceding year. The day is still widely celebrated in Orthodox communities. In Israel, it has been officially designated as the day for commemorating the death of Israeli soldiers whose last resting place is unknown.

ADAR, ZVI (1917–1991), Israel educator. Adar was born in Petaḥ Tikvah and became a teacher at the Bet ha-Kerem teachers’ seminary in Jerusalem (1938–53). He subsequently taught at the School of Education at the Hebrew University where he became a professor. He interested himself in the speculative aspects involved with Jewish identity in the past and its meaning in the present, transmitting his thoughts to the younger generation through the medium of education. He wrote extensively, his most important work being *Ha-Arakhim ha-Ḥinnukhiyyim shel ha-Tanakh* (1954; *Humanistic Values in the Bible*, 1968). In this work Adar attempted to use literary analysis to reveal the educational values in the biblical narrative. As the Bible was one of the main subjects of instruction in the Israel educational system Adar tried to show how the Bible could be used as a means for character education. He also wrote *The Book of Genesis: An Introduction to the Biblical Word* (1990). He was one of the editors of the *Enziklopedyah Ḥinnukhit* (1961–69). He also wrote *Ha-Mikẓo ot ha-Humanistim ba-Ḥinnukh ha-Tikhon* (1969), and on Jewish education in Israel and the U.S. in his book *Ha-Ḥinnukh ha-Yehudi be-Yisrael u-ve-Arẓot ha-Berit* (1970; *Jewish Education in Israel and the United States*, 1977). In 1969 he was appointed dean of the faculty of humanities at the Hebrew University.

ADARBI, ISAAC BEN SAMUEL (1510?–1584?), rabbi and halakhic authority. Adarbi was preacher of the congregation of Lisbon Jews in Salonika and later rabbi of the Congregation Shalom, Salonika (before 1554). He was a disciple of Joseph *Taitazak (whose novellae he published as an appendix to his own work) and was a colleague of Samuel b. Moses de Medina. His efforts to unite the various Salonikan communities were reflected in his *Divrei Shalom* (Salonika, 1580), a

collection of 30 of his sermons. He appended homiletic comments to the Pentateuch, some chapters of which (on Exodus) are preserved in the Guenzburg Manuscripts (Moscow) No. 158. Four hundred and thirty of his responsa were published in *Divrei Rivot* (Salonika, 1581; republished Venice, 1587; Sudzilkon, 1833). These responsa show that he was a halakhist of distinction, fearless in his judgments, and often differing in his decisions from Samuel de Medina, who in his turn attributed hostile personal motives to Adarbi (Responsa Maharashdam, ḤM No. 40). Nevertheless, they approved each other’s halakhic rulings.
